CAMPUS HELP CENTER - INTRODUCTION

- CHC is a Workflow Automation Ticketing System, which can be customized as per the requirements of the Institutions. For eg: Grievance Redressal, Shuttle Services, Certificate issuance, Gate-Pass Services etc., can be automated using CHC.

- Here users can raise requests under different services in which they are added as Audience. These requests will be processed by service level admins or executives.

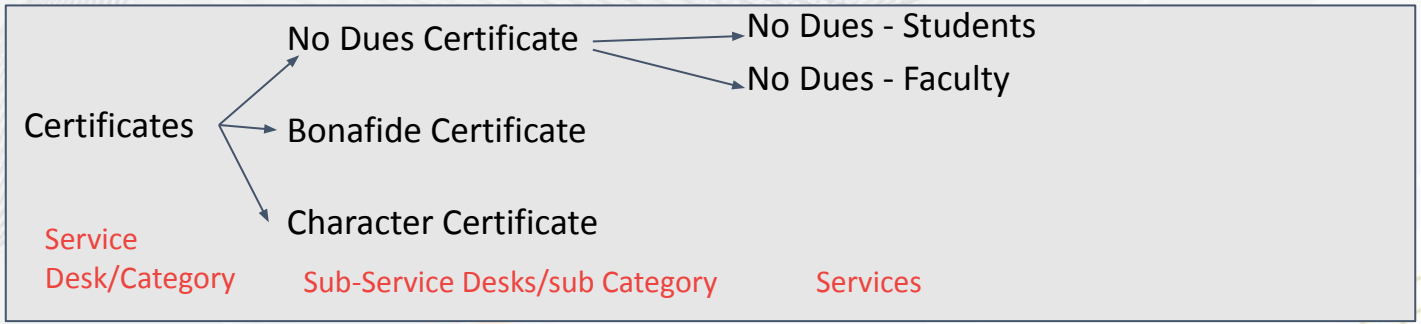

- Users can also track the actions taken on the request through notifications.

CAMPUS HELP CENTER - TERMINOLOGIES

- **Service Desk/Category** - A broad category under which different sub-service desks or services(in case there are no sub-service desks) are configured

- **Sub-Service Desk/Sub Category** - A sub-category in each service desk, under which different services are configured

- **Services** - Users can raise requests under a particular service by filling in all the necessary fields in the service request form

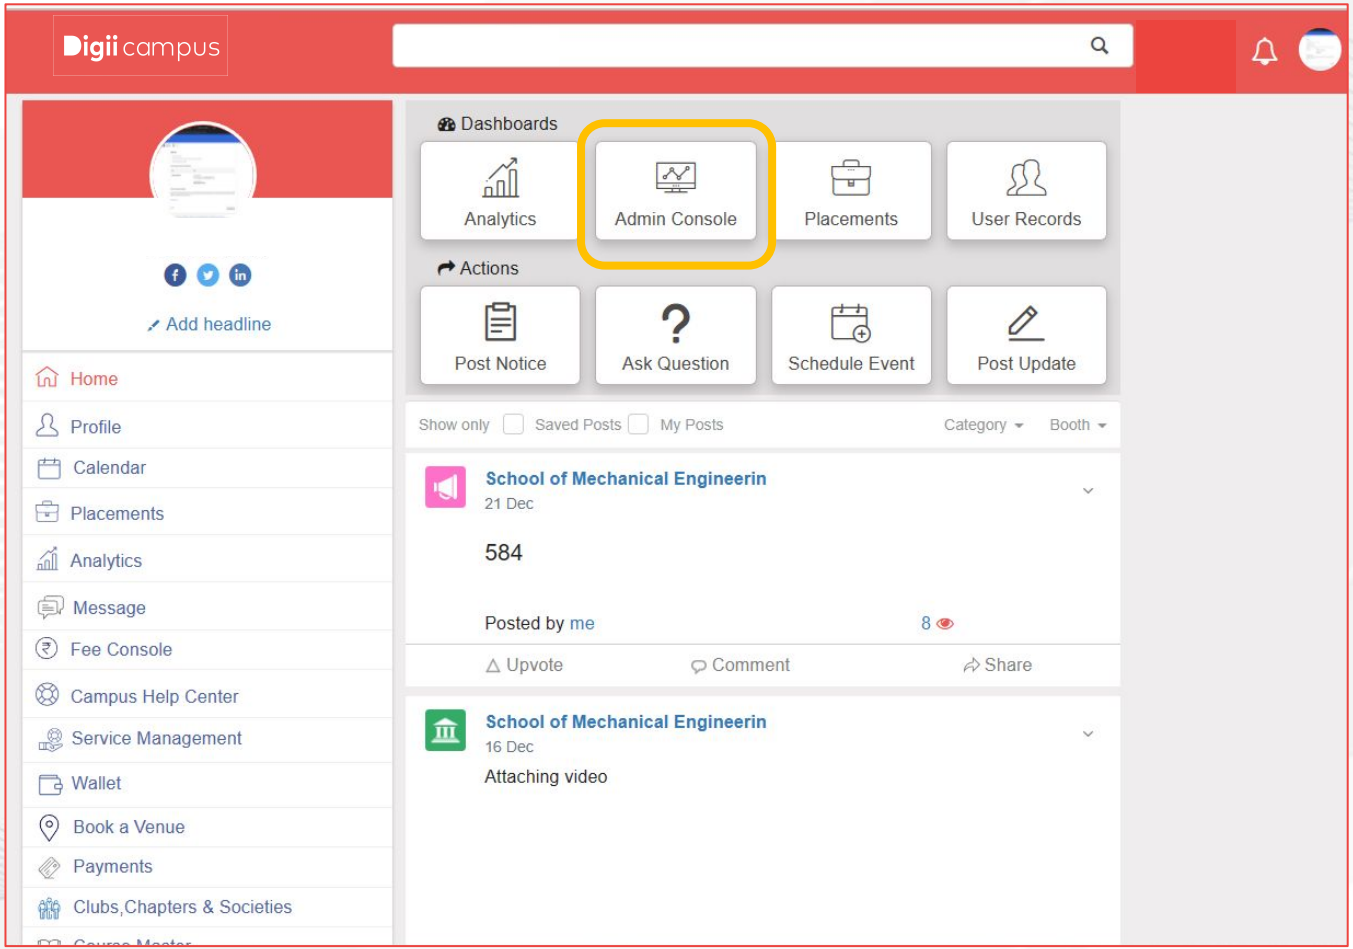

CAMPUS HELP CENTER - TERMINOLOGIES

- **Workcentres** - Defined points in the workflow where the requests are processed as per the configuration. For ex: , In the no dues - students service, once a request is raised by a student, it goes to the admin dept, then forwarded to different departments.(refer the flow below.)

- An admin/executive will be added in each workcentre who can process the request received under that Service.

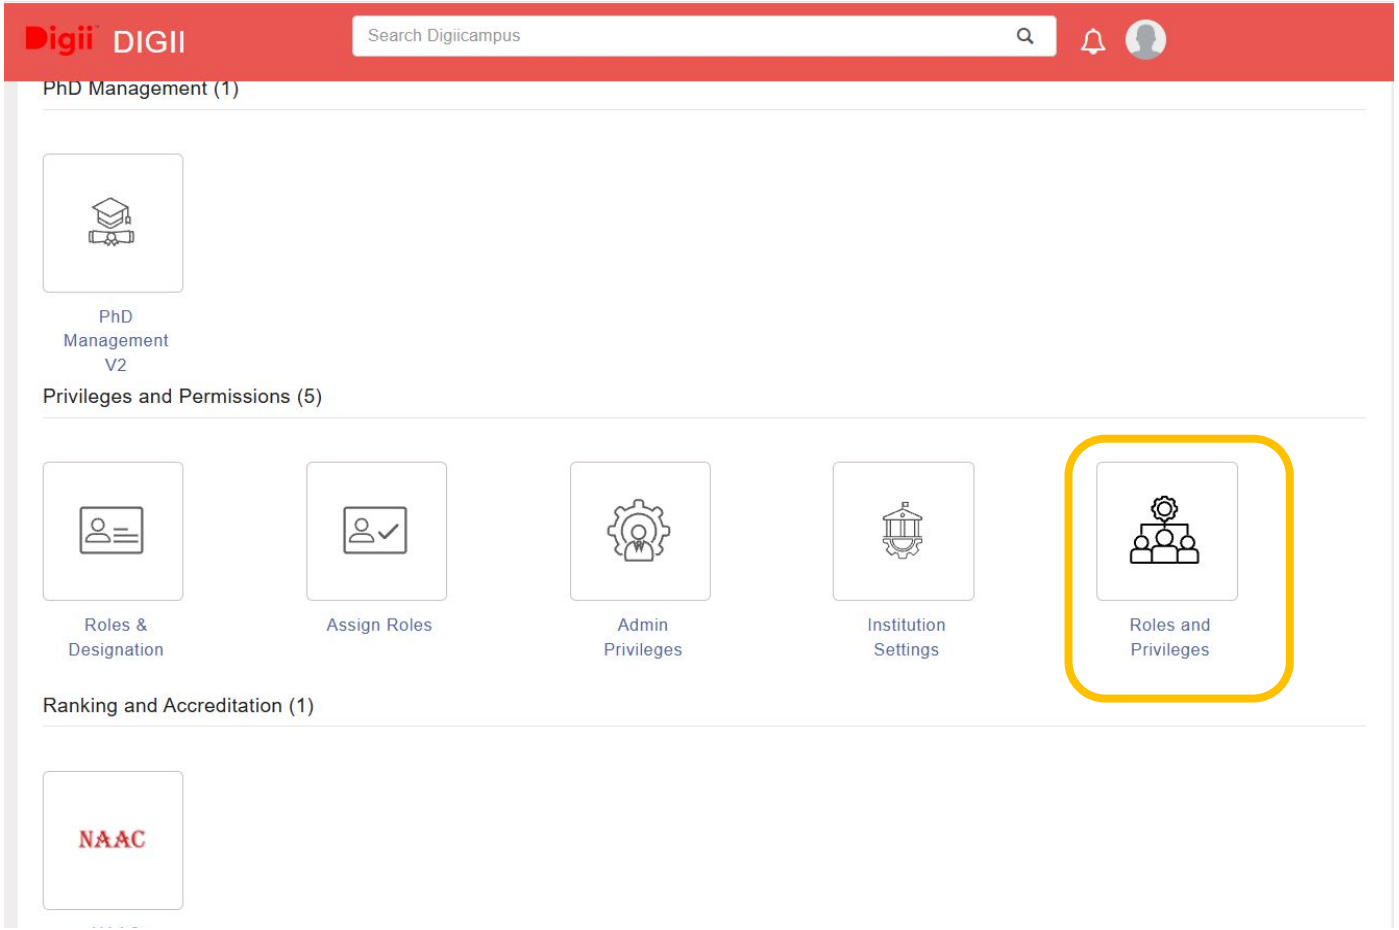

Administration/Finance	→	Workcentre 1 (Workcentre 1 Admins)
Department	→	Workcentre 2 (Workcentre 2 Admins)
Library	→	Workcentre 3 (Workcentre 3 Admins)
Sports	→	Workcentre 4 (Workcentre 4 Admins)
IT	→	Workcentre 5 (Workcentre 5 Admins)

Admin Privileges

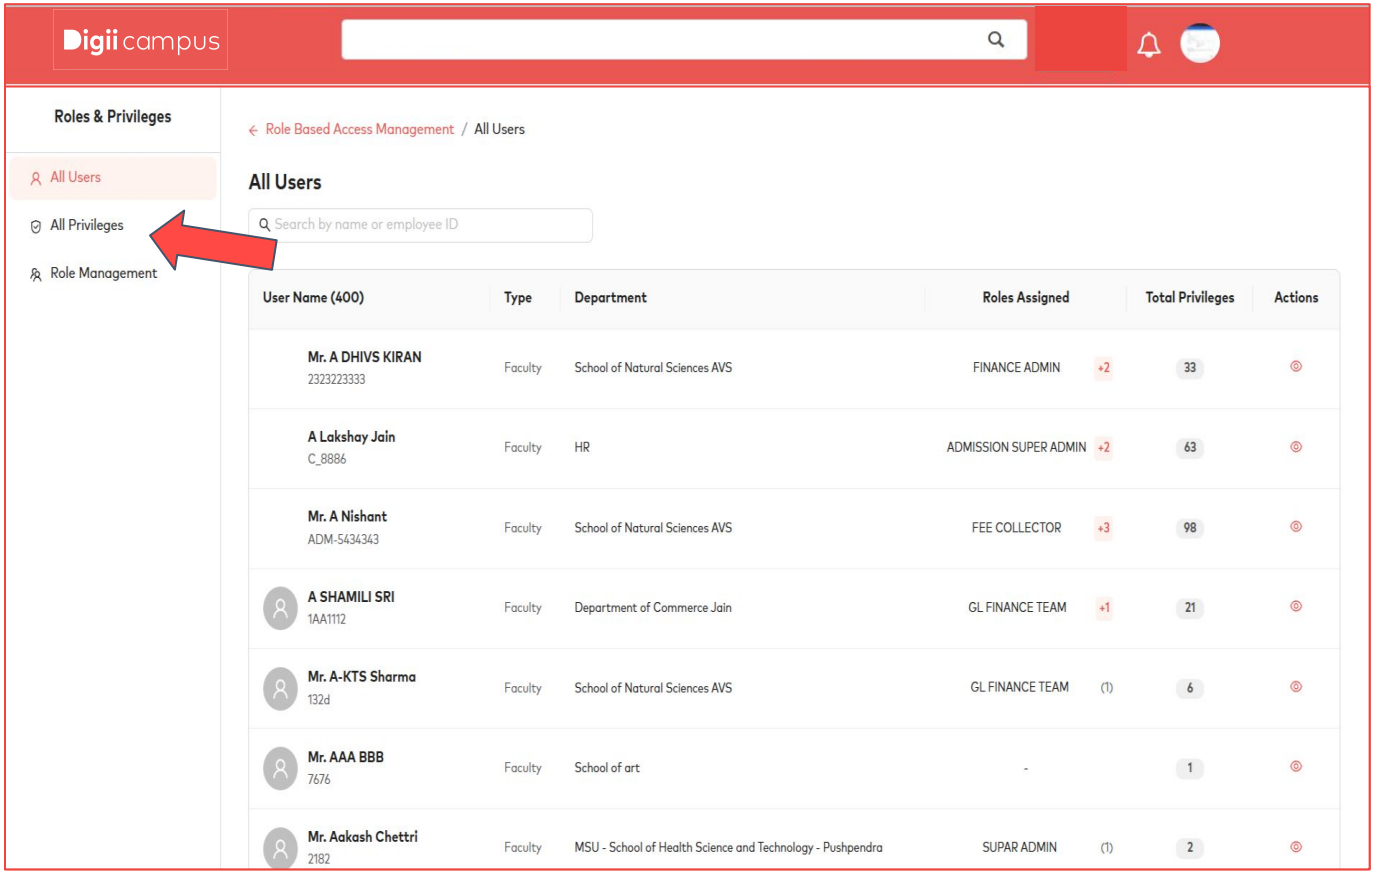

Go to '**Admin Console**' on the Home Page

Admin Privileges

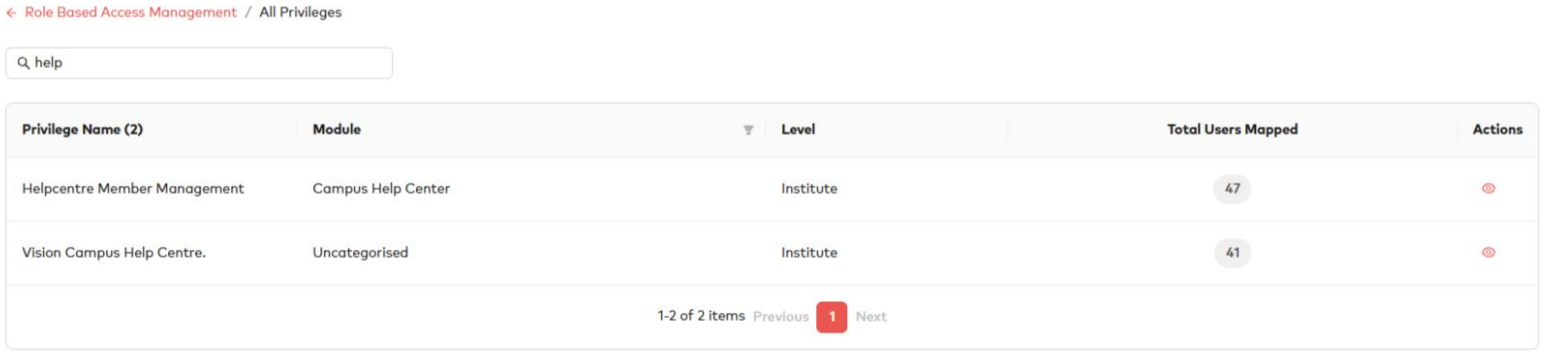

Go to ROLES and PRIVILEGES

Admin Privileges

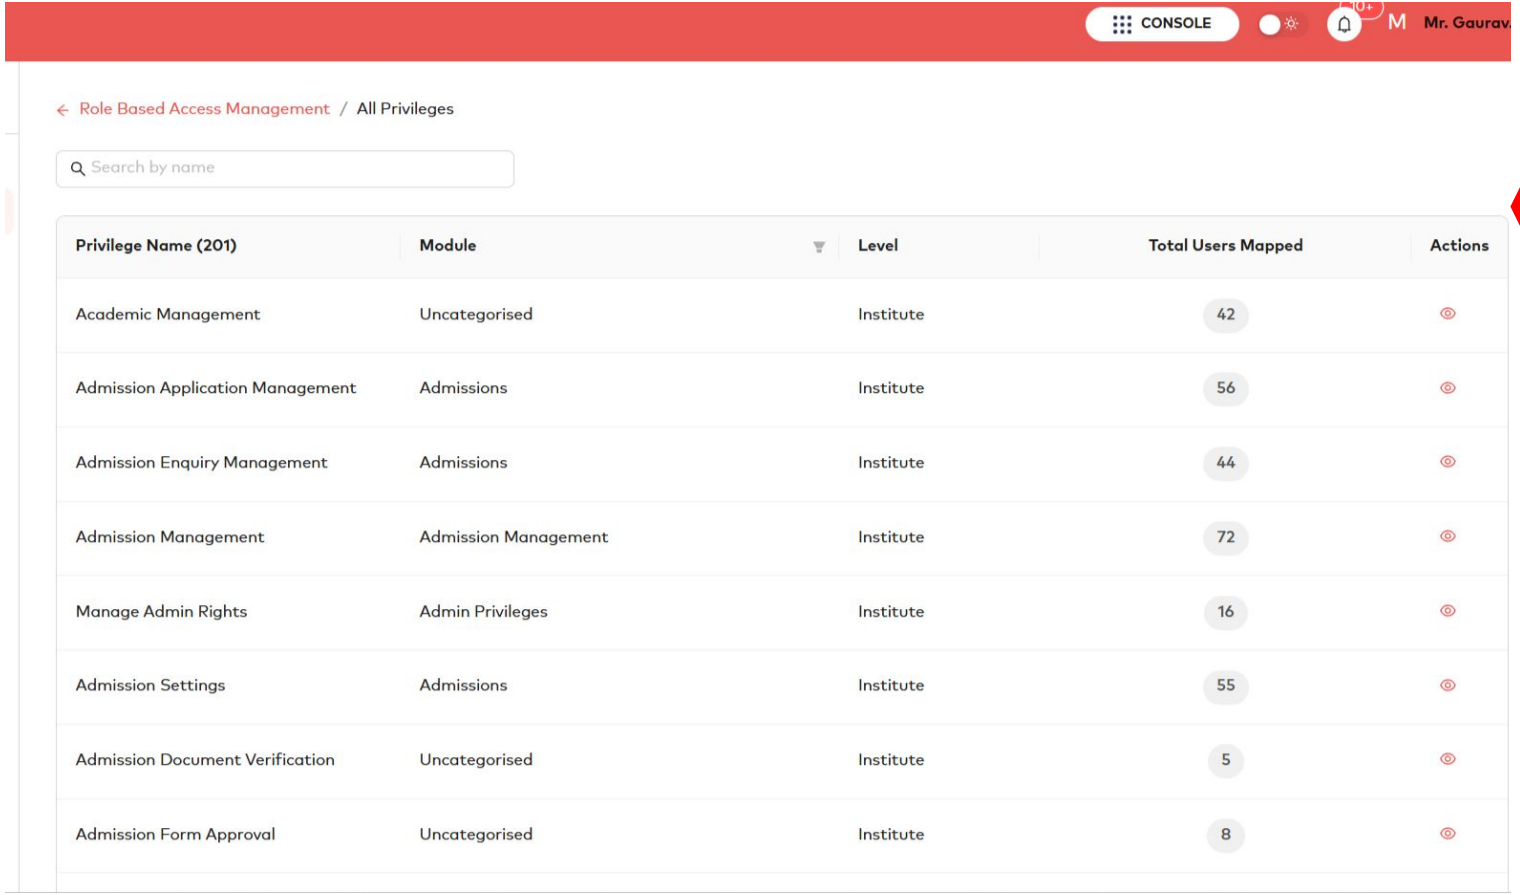

Go to '**All Privileges'** in Roles and Privileges

Admin Privileges

Assign these privileges to the admins to manage CHC activities

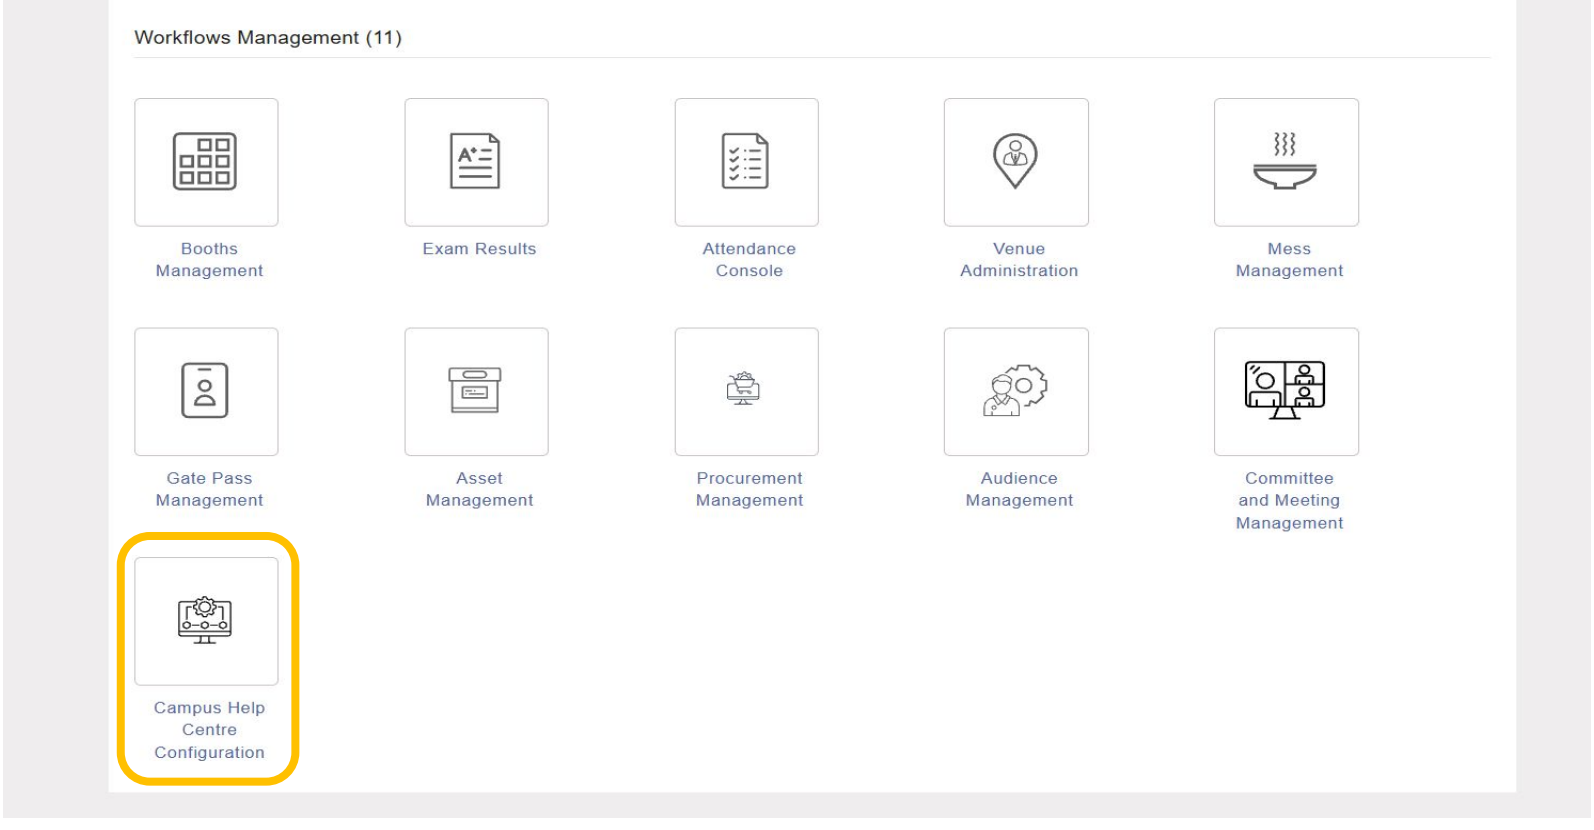

Search for Super Admin Privilege and assign for CHC configuration module access

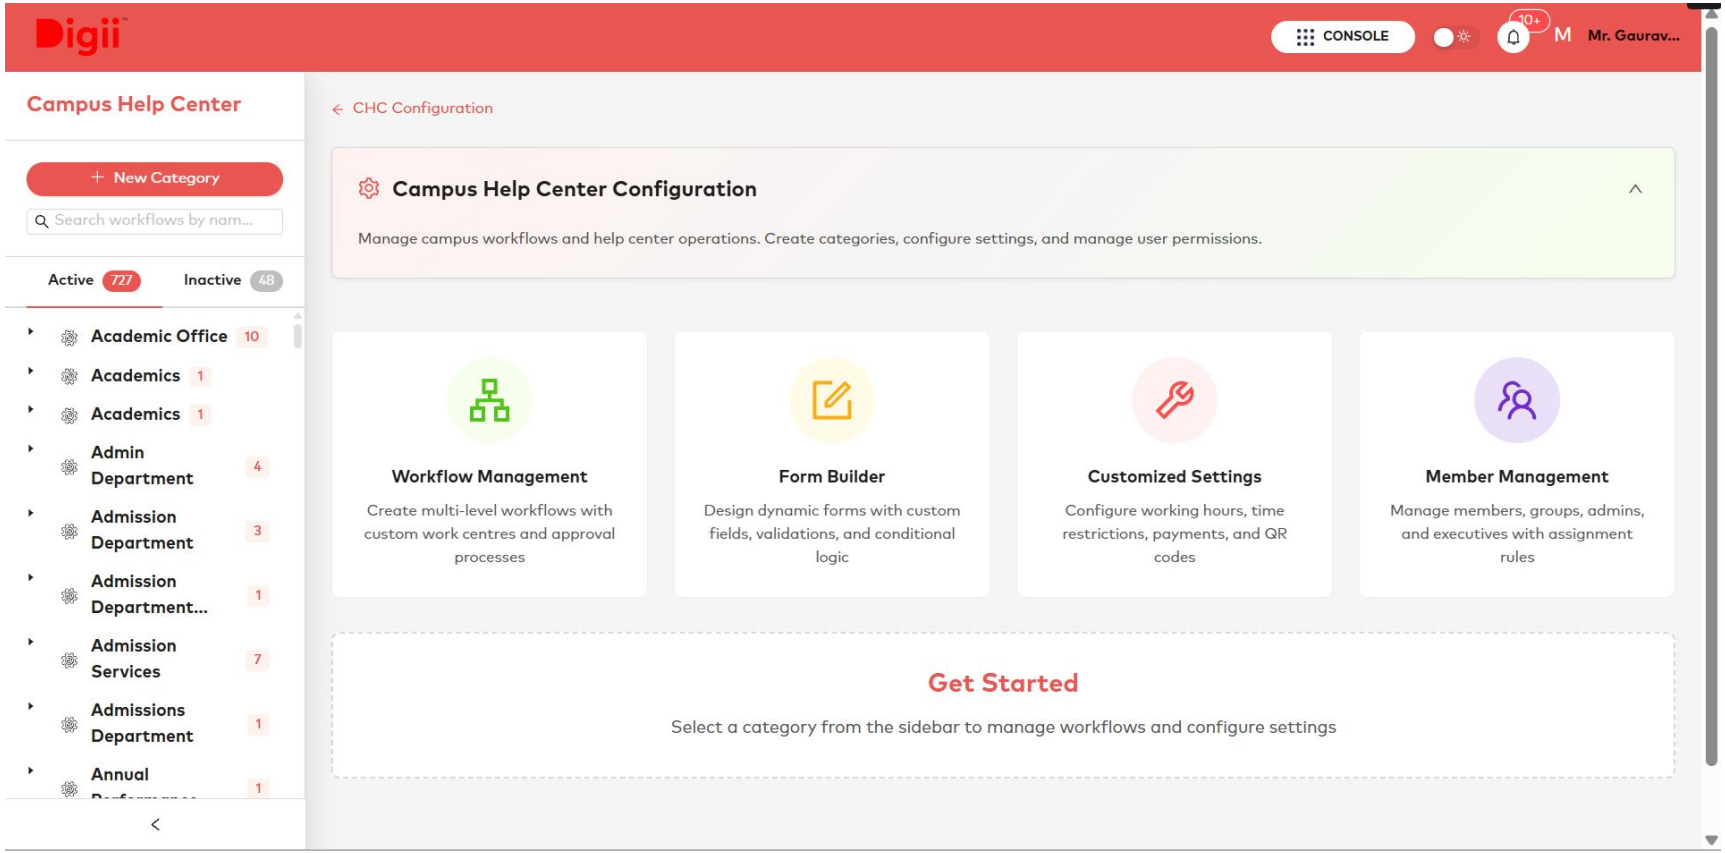

Campus Help Center Configuration

Campus Help Center Configuration module enables administrators to design and manage end-to-end workflows within the Digiicampus platform, using a guided setup to define forms, form fields, actions, and access controls in one streamlined flow.

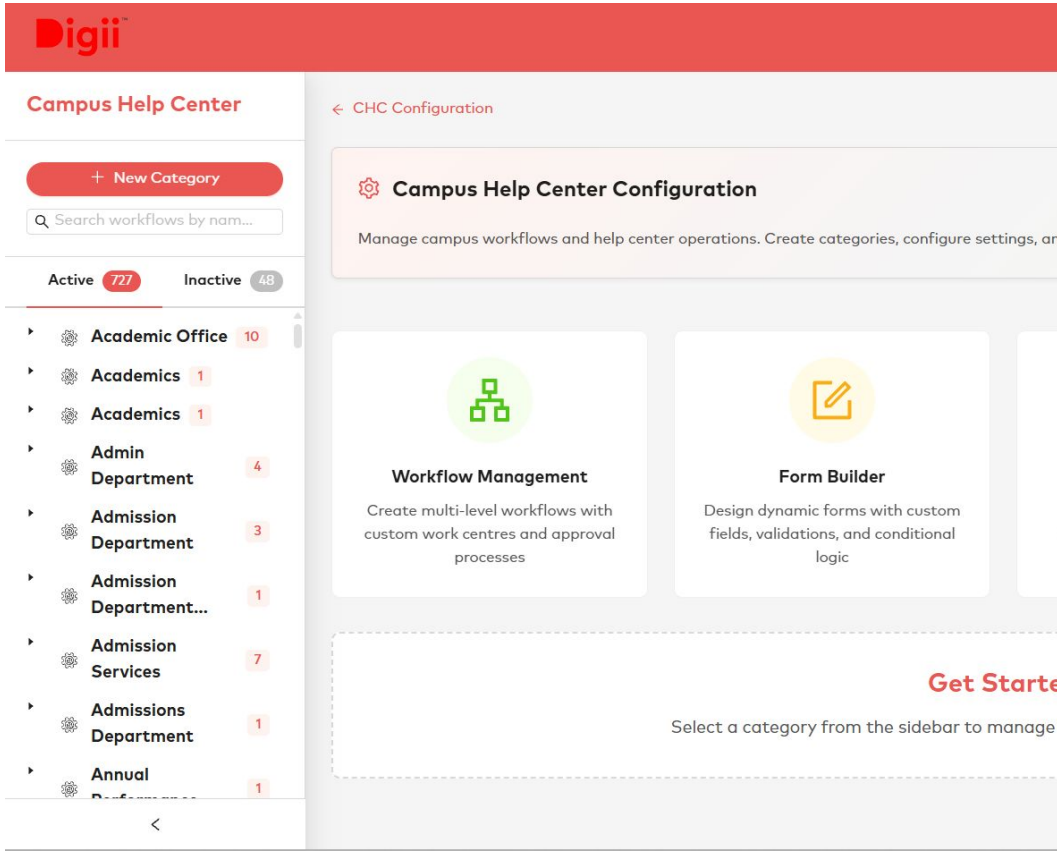

Campus Help Center Configuration

Campus Help Center Configuration Module interface

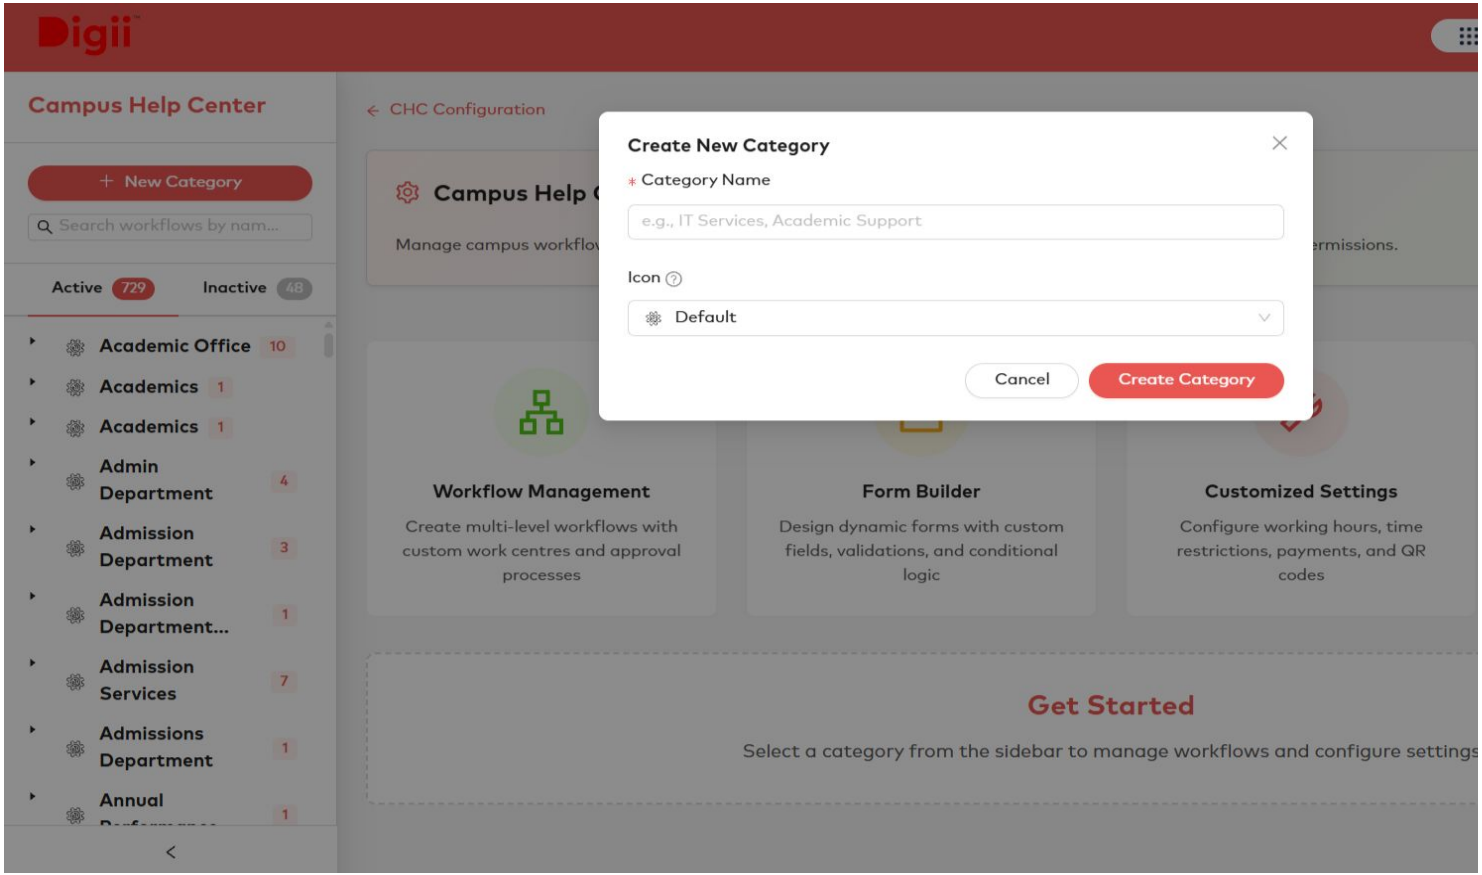

Creation of Category

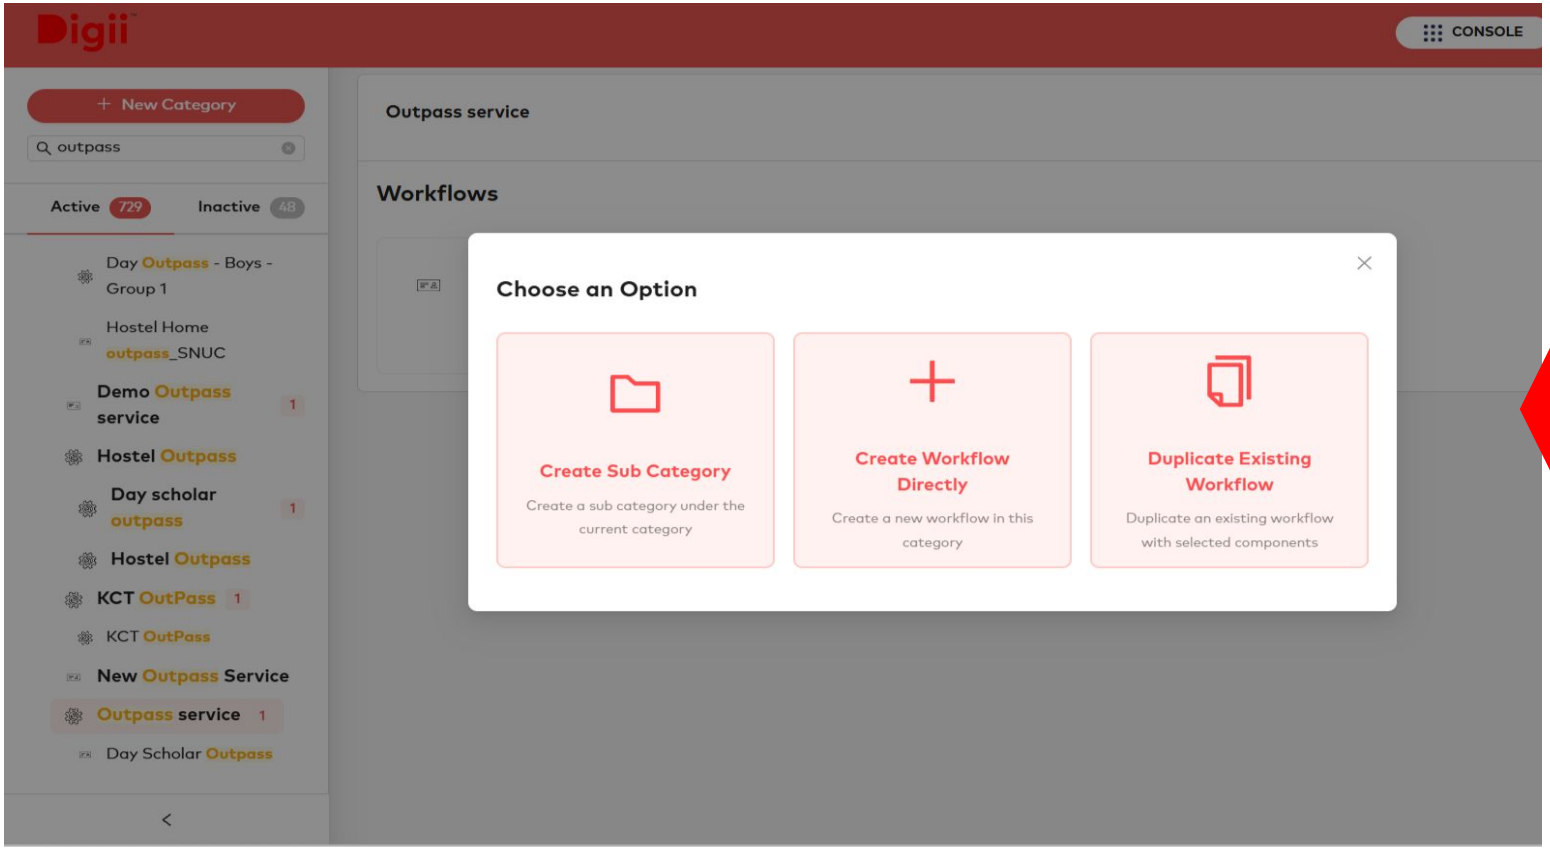

Click on the “New Category” Button.

Creation of Category

Fill Category Name and choose an icon from the Dropdown

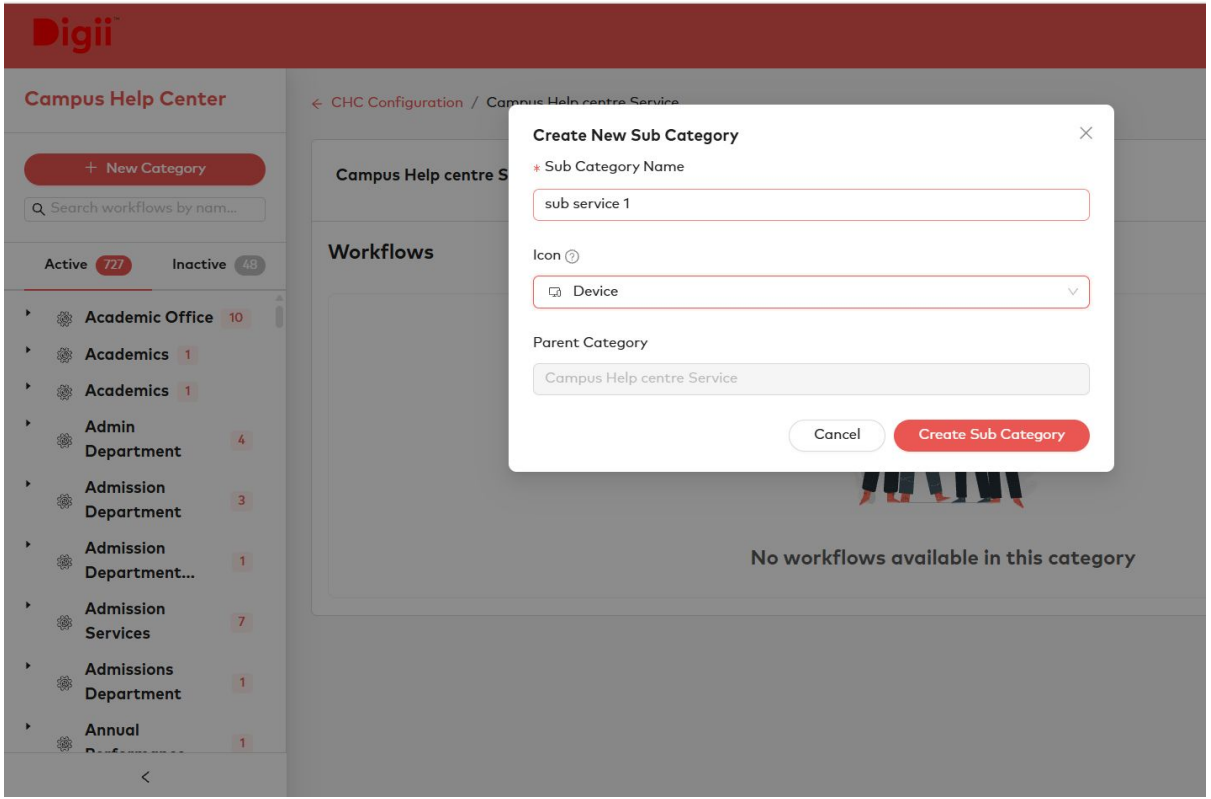

Creation of Sub-Category , Direct Workflow or Duplicating a Workflow

Choose any one of the options to continue with service configuration

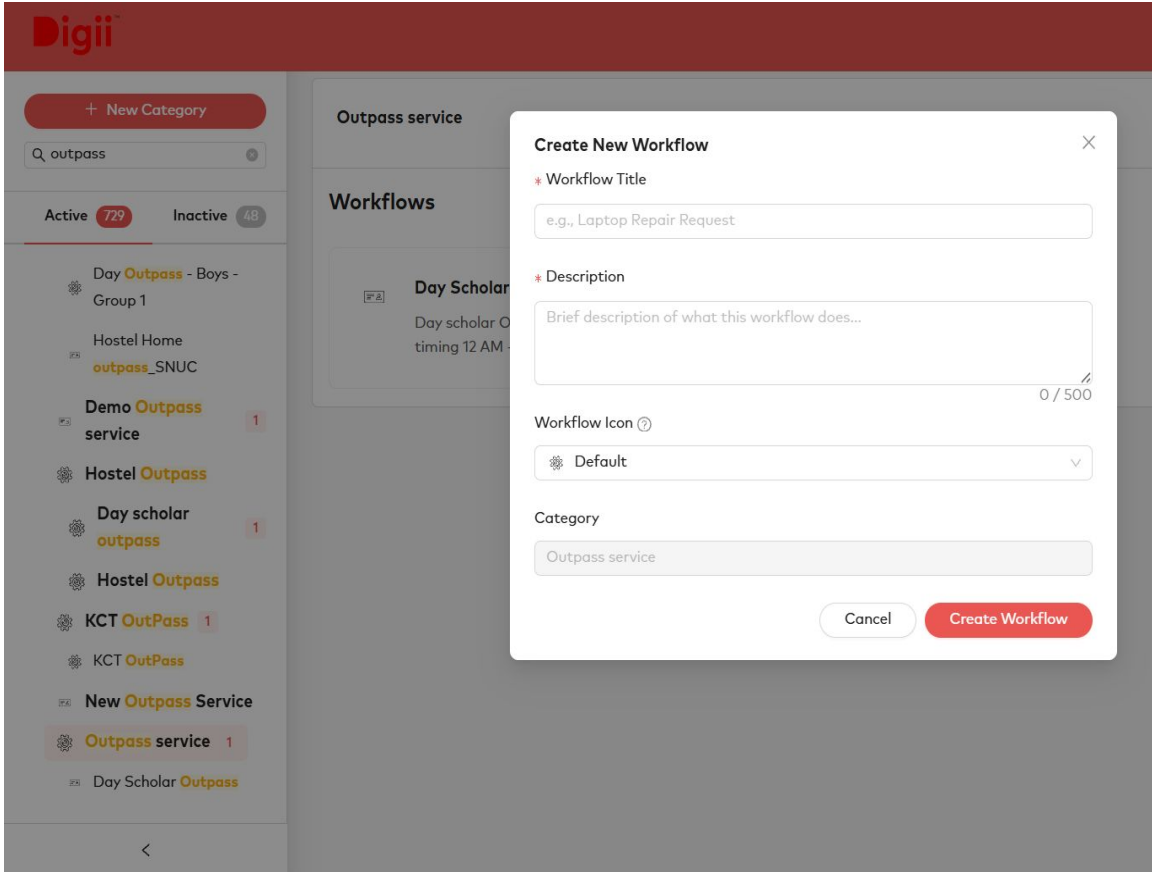

- **Sub-Category :** Sub-category creation refers to defining a structured sub-group within a service category. It enables precise segregation of multiple services that otherwise sit under the same parent category, improving clarity, organization, and downstream workflow efficiency.
- **Create a direct Workflow** :Configure workflows directly without any subcategories
- **Duplicate an existing workflow**: Clone an existing workflow and selectively retain only the components that are required.

Creation of Sub-Category

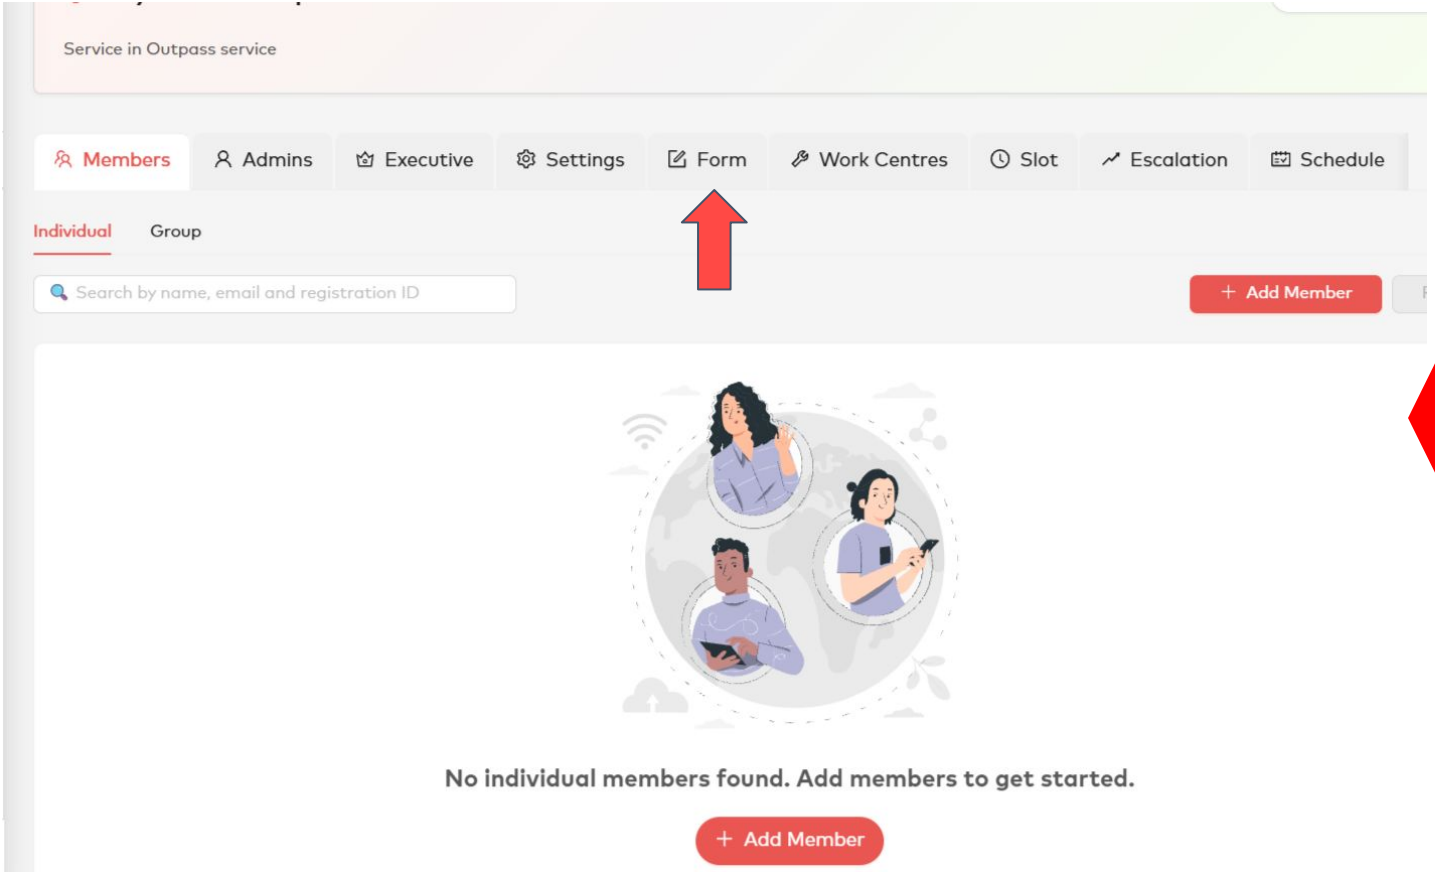

Fill the Sub category Name and choose an appropriate icon from the dropdown

Creation of Direct Workflow

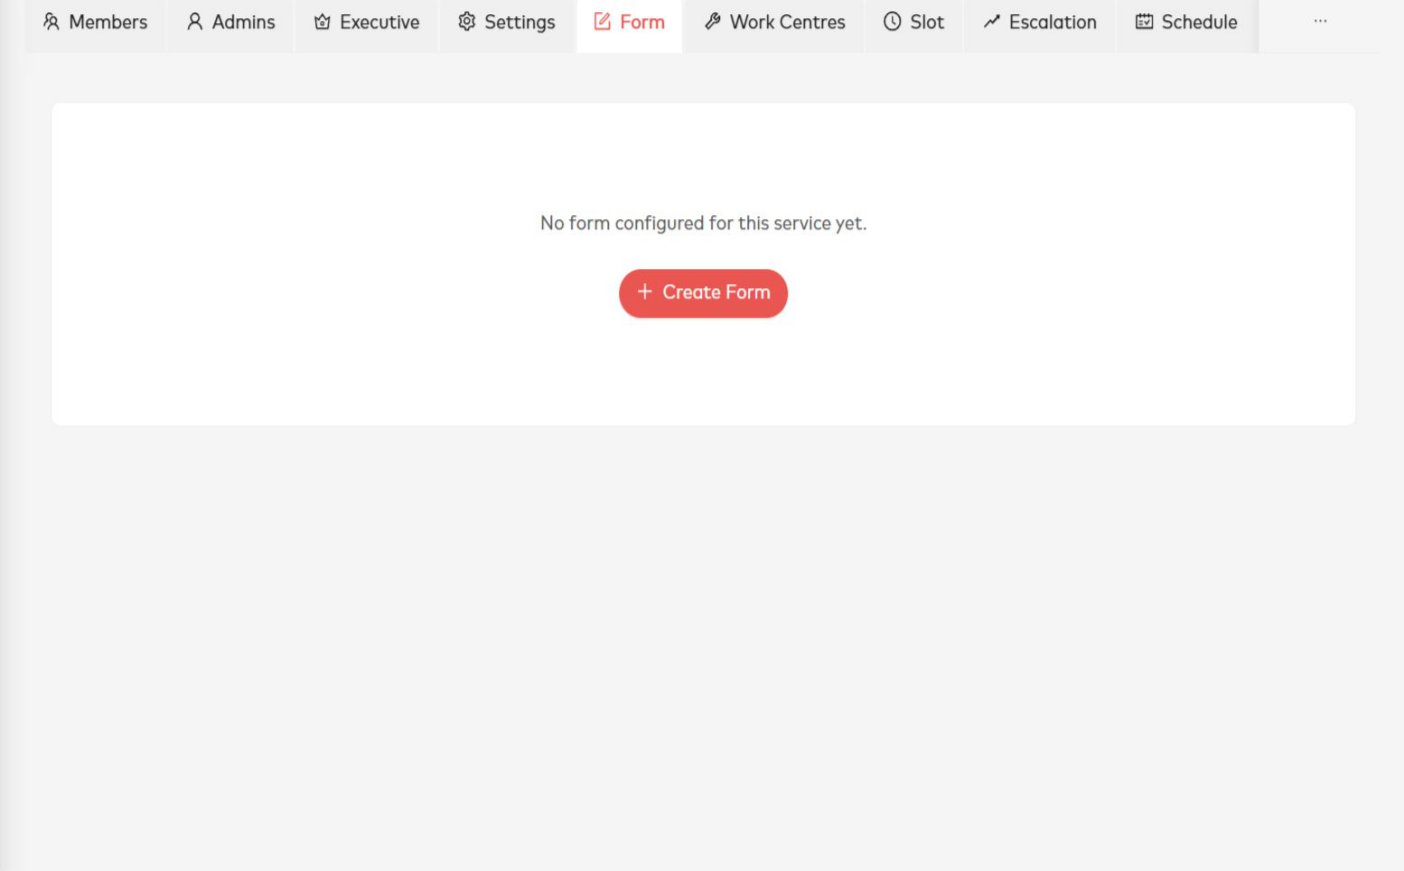

Fill the workflow title , description and select the icon for the workflow as well

Creation of Workflow Form

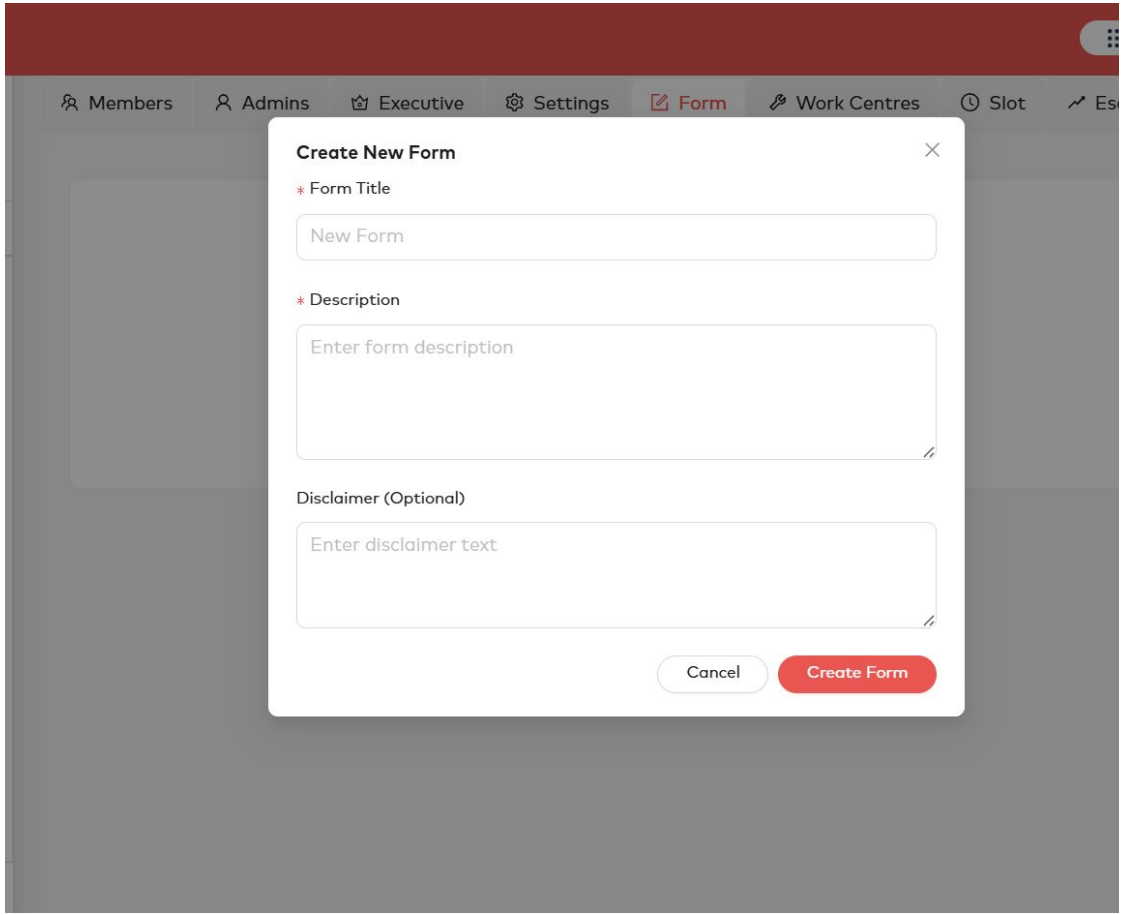

Post Creation of sub category/Direct Workflow, navigate to form creation by clicking on the tab as shown.

Creation of Workflow Form

Click on “create form” to proceed.

Creation of Workflow Form

Fill the form title and description and click on “Create Form”

Creation of Workflow Form

Digii campus

Form Fields (0)

No fields configured

Click the "Edit" button above to add fields to this form

Form Attachments

No attachments configured

Click the 'Edit' button above to add attachments to this form

Add new fields

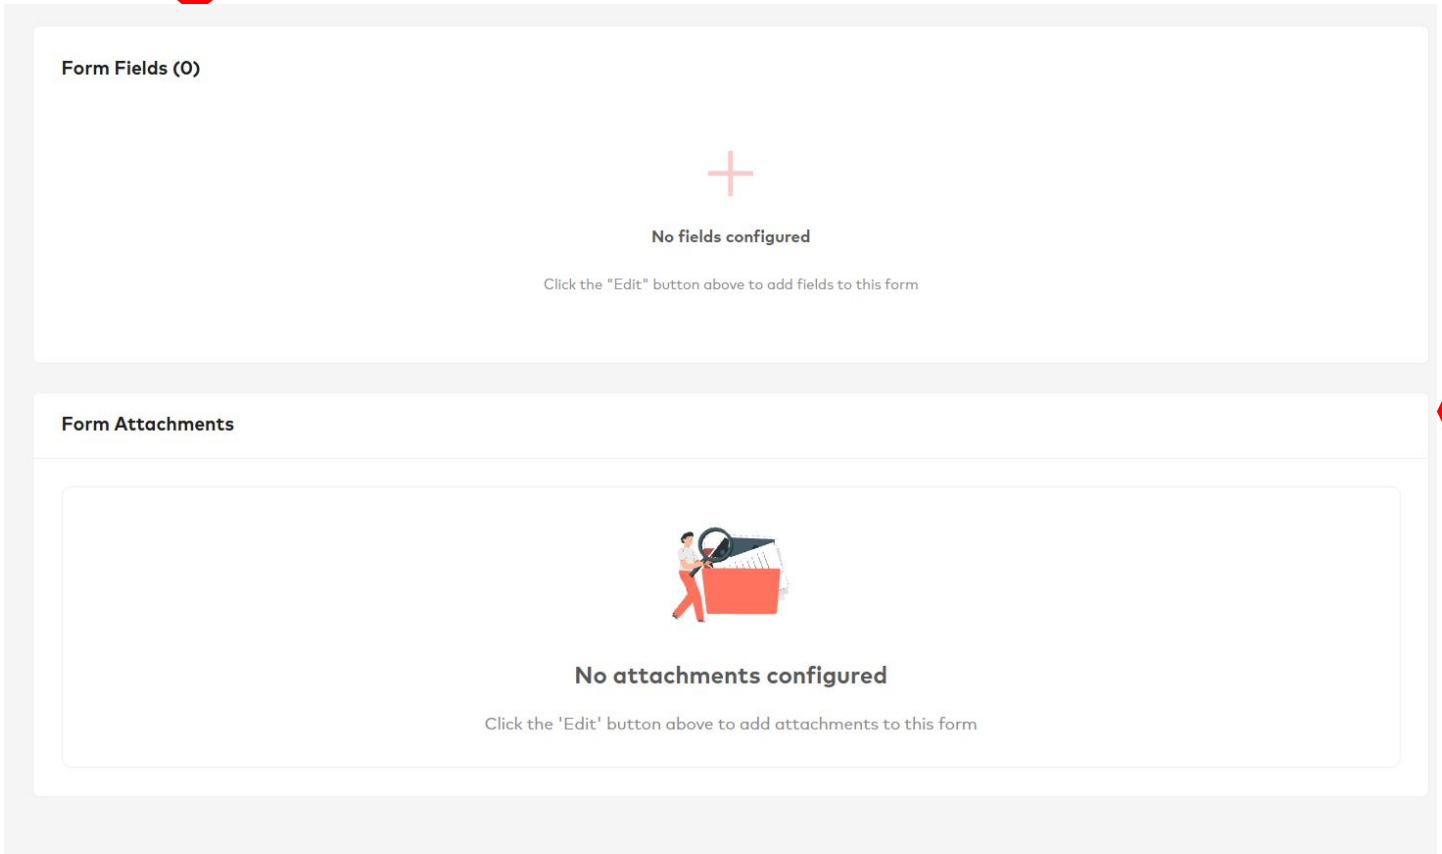

Search field components

Fixed | Dynamic

- Name
- Application Number
- Registration ID
- Gender
- Email
- Phone
- Hostel Room
- Hostel Block

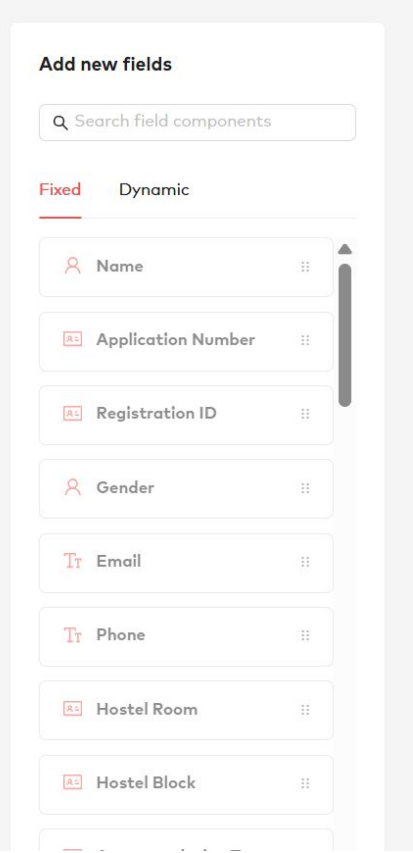

Creation of Workflow Form

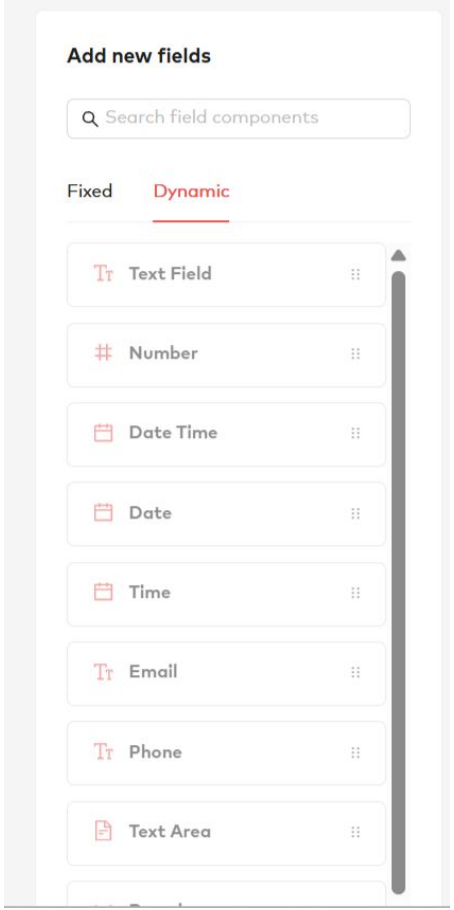

Digii campus

This is the main screen for creation of the form. The fields that are added will be seen here in preview before the form is finalized.

Creation of Workflow Form

We can add 2 types of fields to the form: Fixed & Dynamic fields.

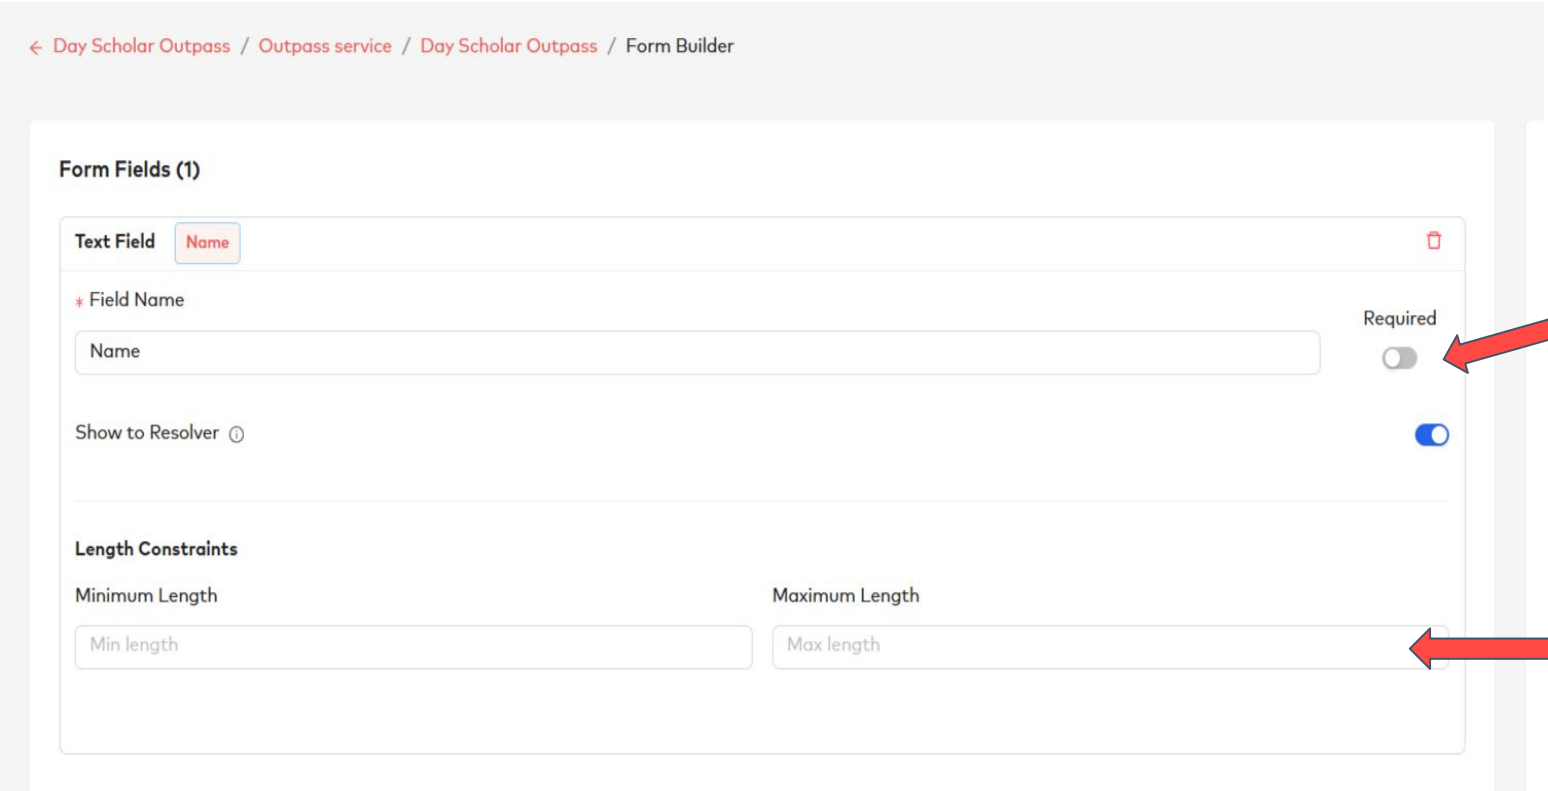

1. Fixed Fields are platform-defined fields that can be auto-populated by the platform, such as User Name and Registration ID.

2. Dynamic Fields are customizable fields that can be configured based on the requirement, allowing end users to input the necessary details. The fields can be selected or dragged and dropped to create the form.

Click on edit button and start adding fields.

Creation of Workflow Form

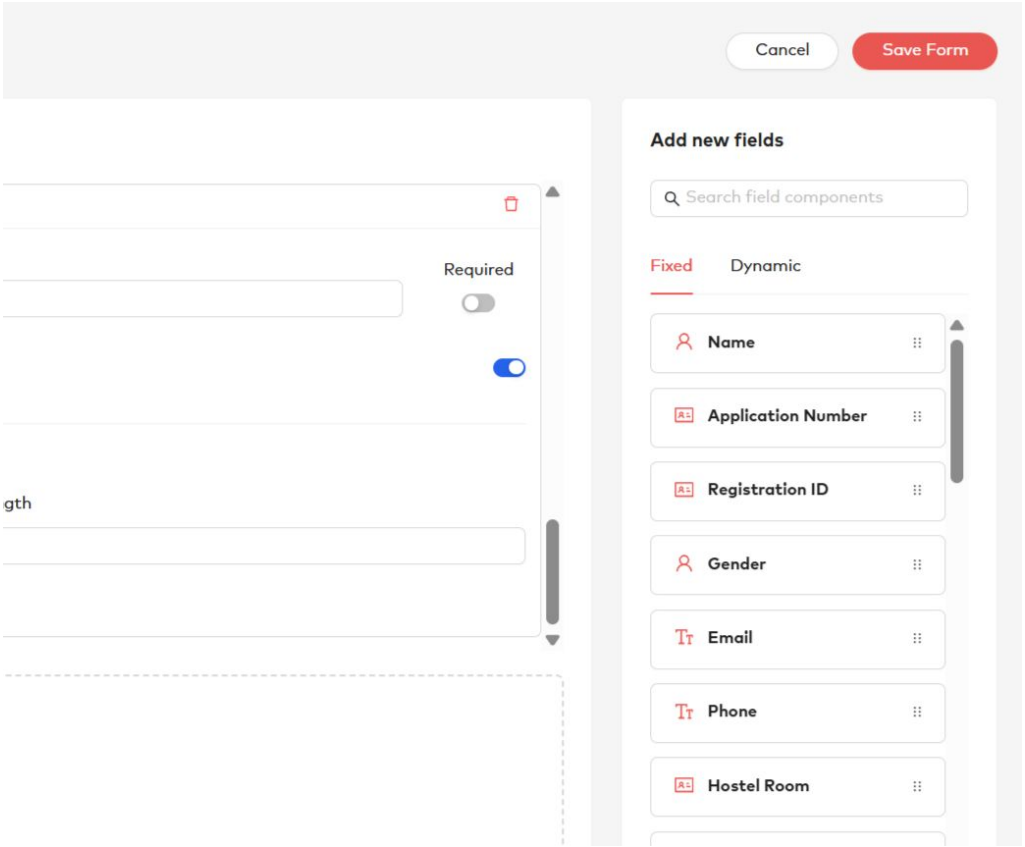

Digii campus

Toggling this on makes the field compulsory to be filled

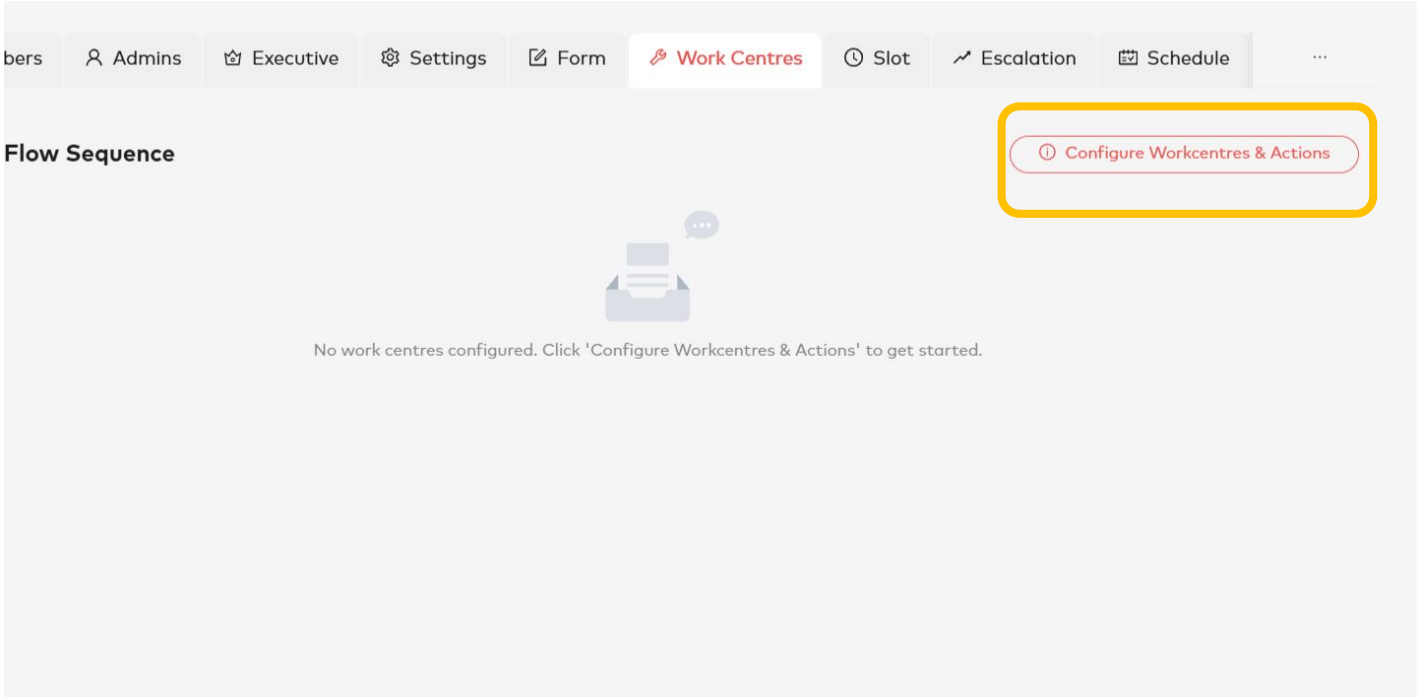

We can impose restrictions on the field length with these length constraints

Creation of Workflow Form

Once the required fields are added , click on “save Form” to ensure creation of service form.

Configuration of Workcentres & Actions

- Click on “Configure workcentres & Actions” after configuration of service form

Configuration of Workcentres & Actions

Digii campus

Work Centre Management

Initial setup mode: Configure work centres with their actions and forms.

- Add multiple work centres using the "+ Workcenter" button
- Configure each work centre (title, assignment type, actions)
- Click **"Save All"** at the top when you're done to save everything at once

Work Centres (0) + Workcenter

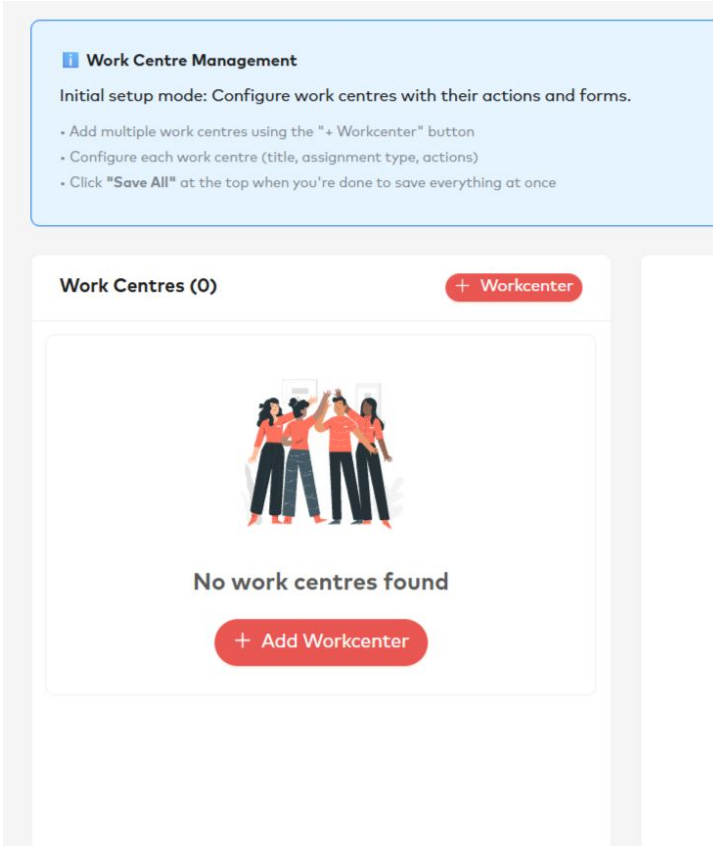

No work centres found

+ Add Workcenter

Select a work centre from the list to view details

Configuration of Workcentres & Actions

- Click on “Add workcenter”

Configuration of Workcentres & Actions

Digii campus

- Configure each work centre (title, assignment type, actions)
- Click **"Save All"** at the top when you're done to save everything at once

Work Centres (1) + Workcenter

1. (Untitled) New
0 action(s)

Edit Work Centre

* Title

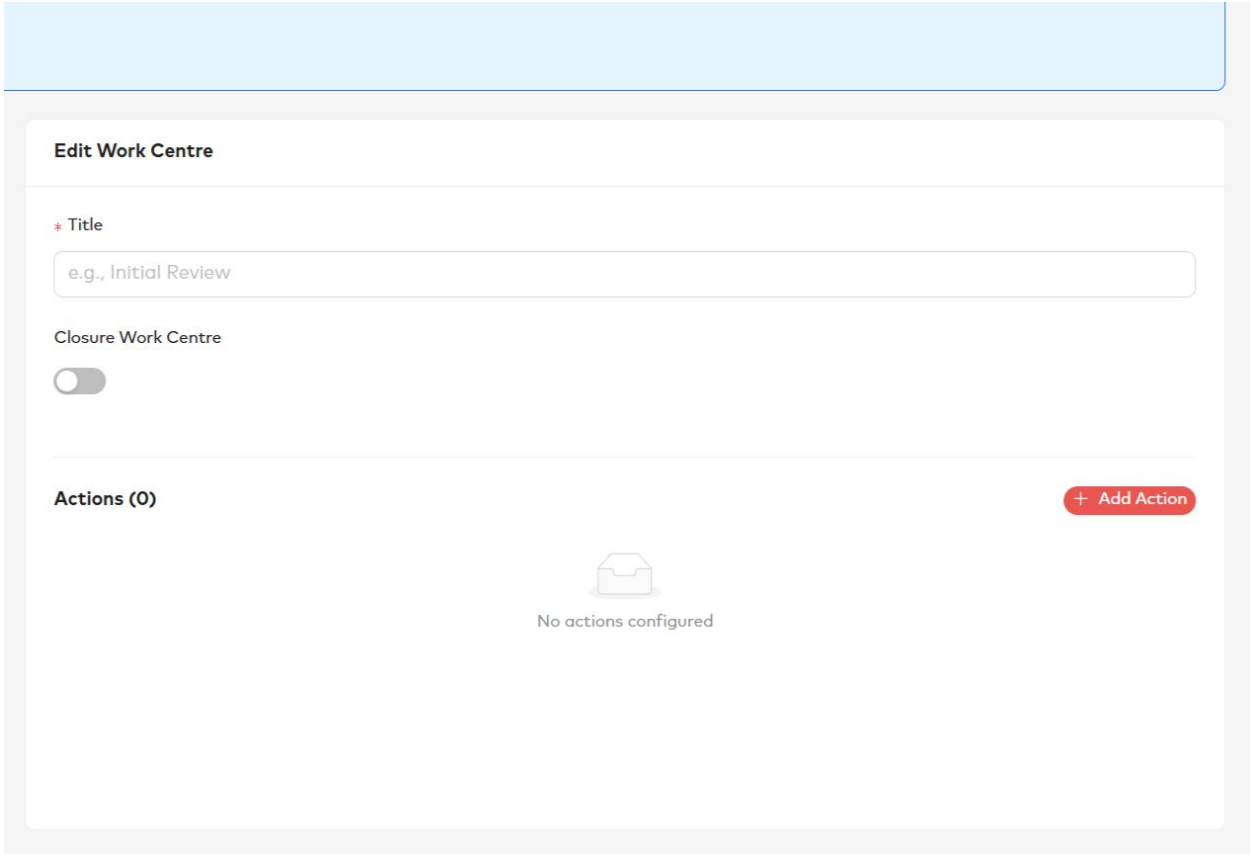

e.g., Initial Review

Closure Work Centre

Actions (0) + Add Action

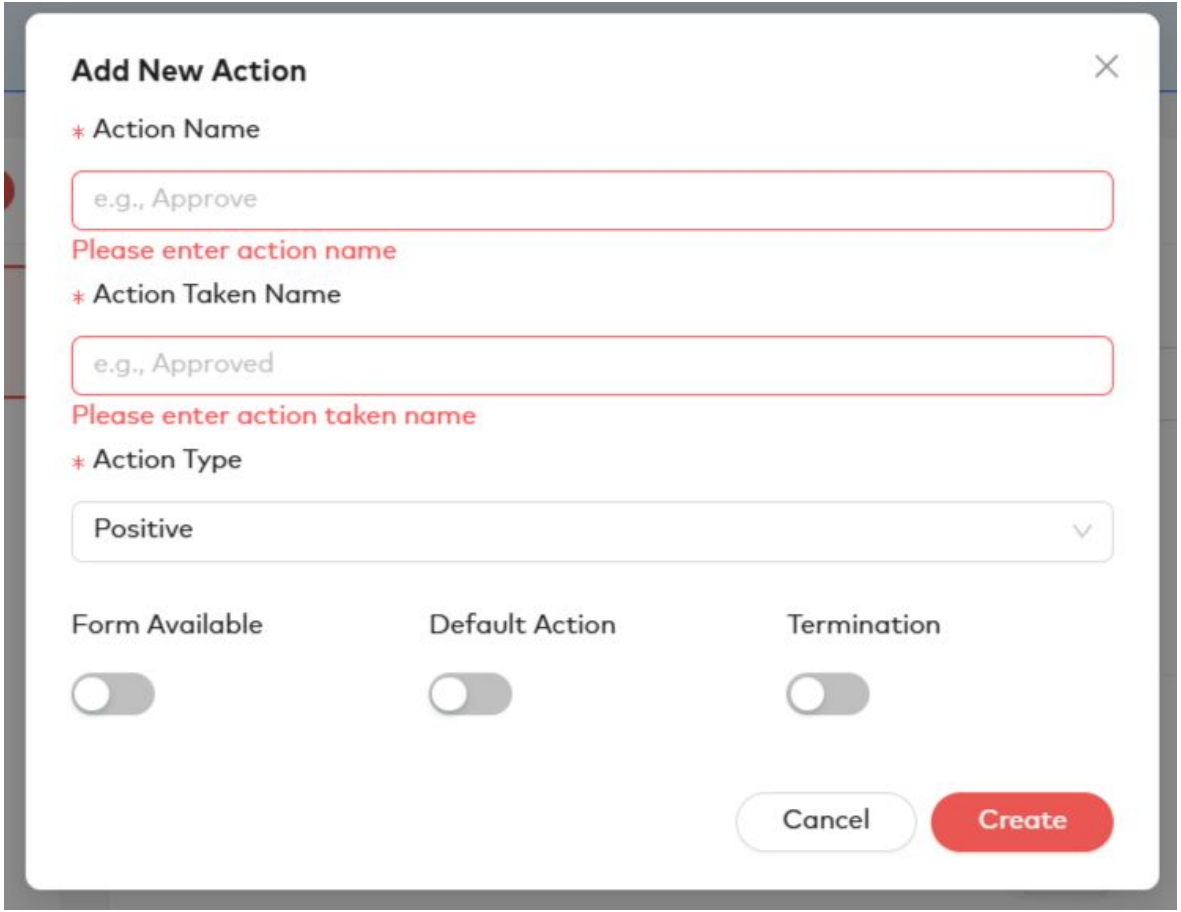

No actions configured

Configuration of Workcentres & Actions

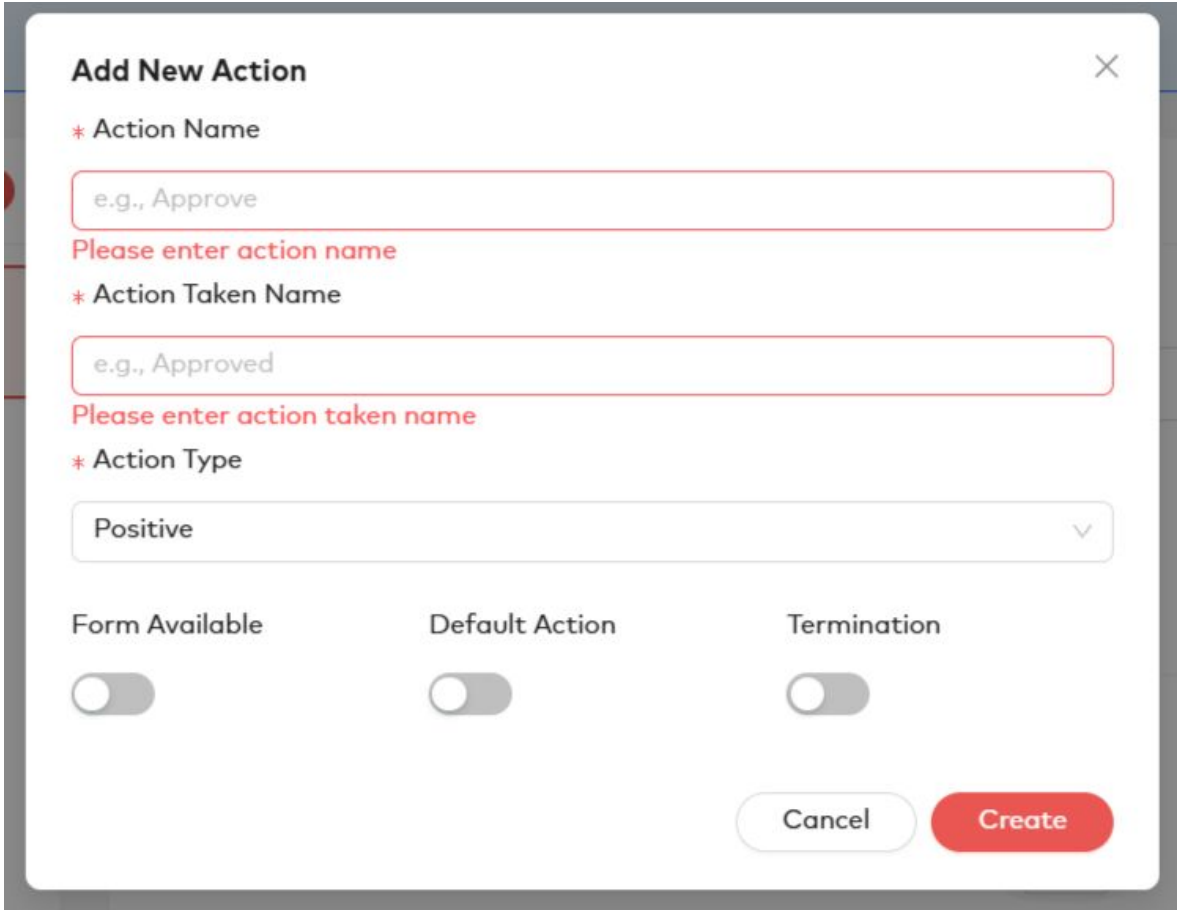

- Give a title for each work centre.
- Toggle on the “Closure work Centre” in case the workcentre is the final level of approval in the workflow.
- Click on “Add Action” to configure the actions that an executive can take on the form

Configuration of Workcentres & Actions

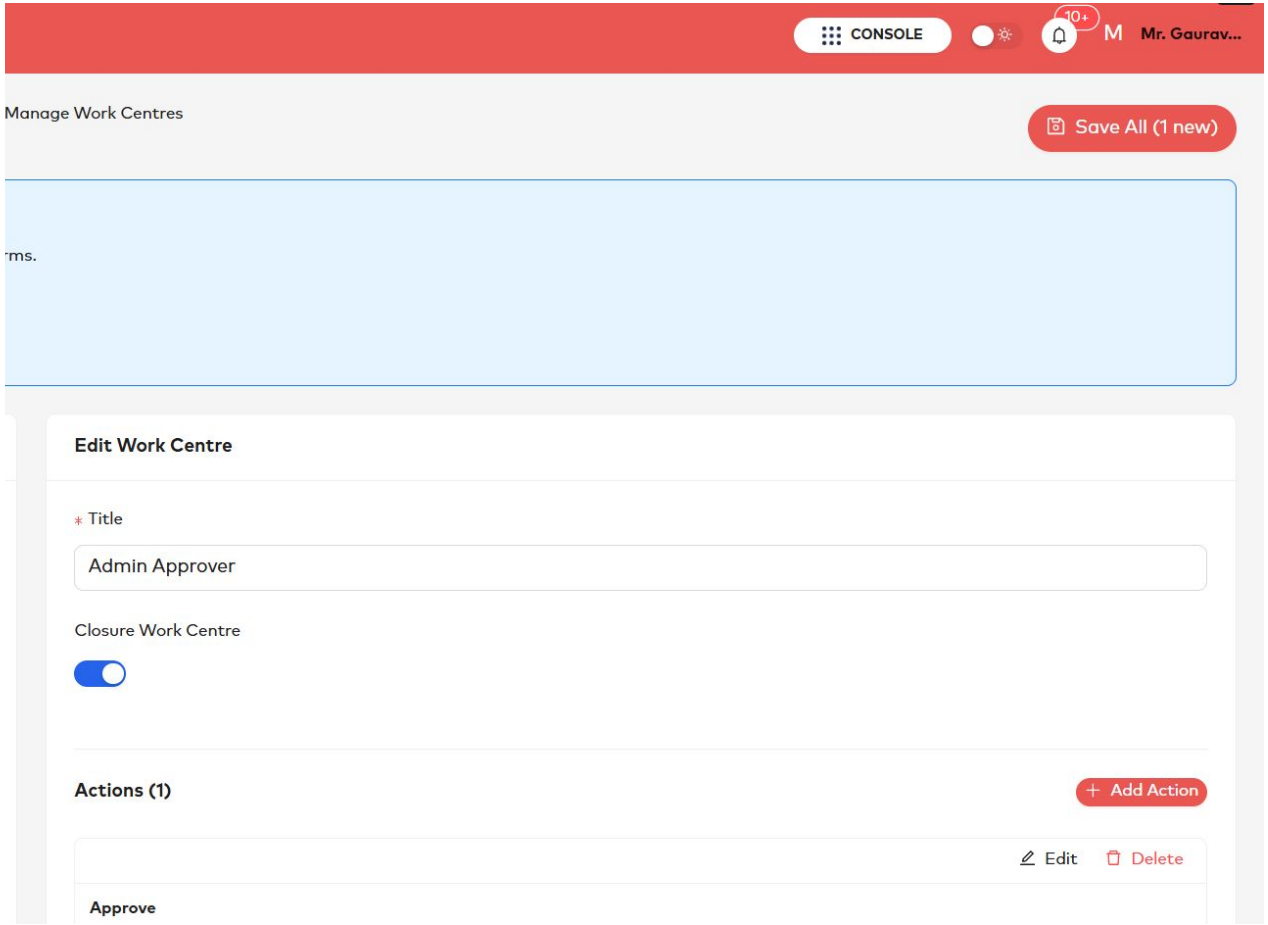

- Give a name to the Action that the executive should take on the Ticket.
- Specify whether the action is a positive or a negative action. E.g approve/approved will be a positive action and reject/rejected will be a negative action.

Configuration of Workcentres & Actions

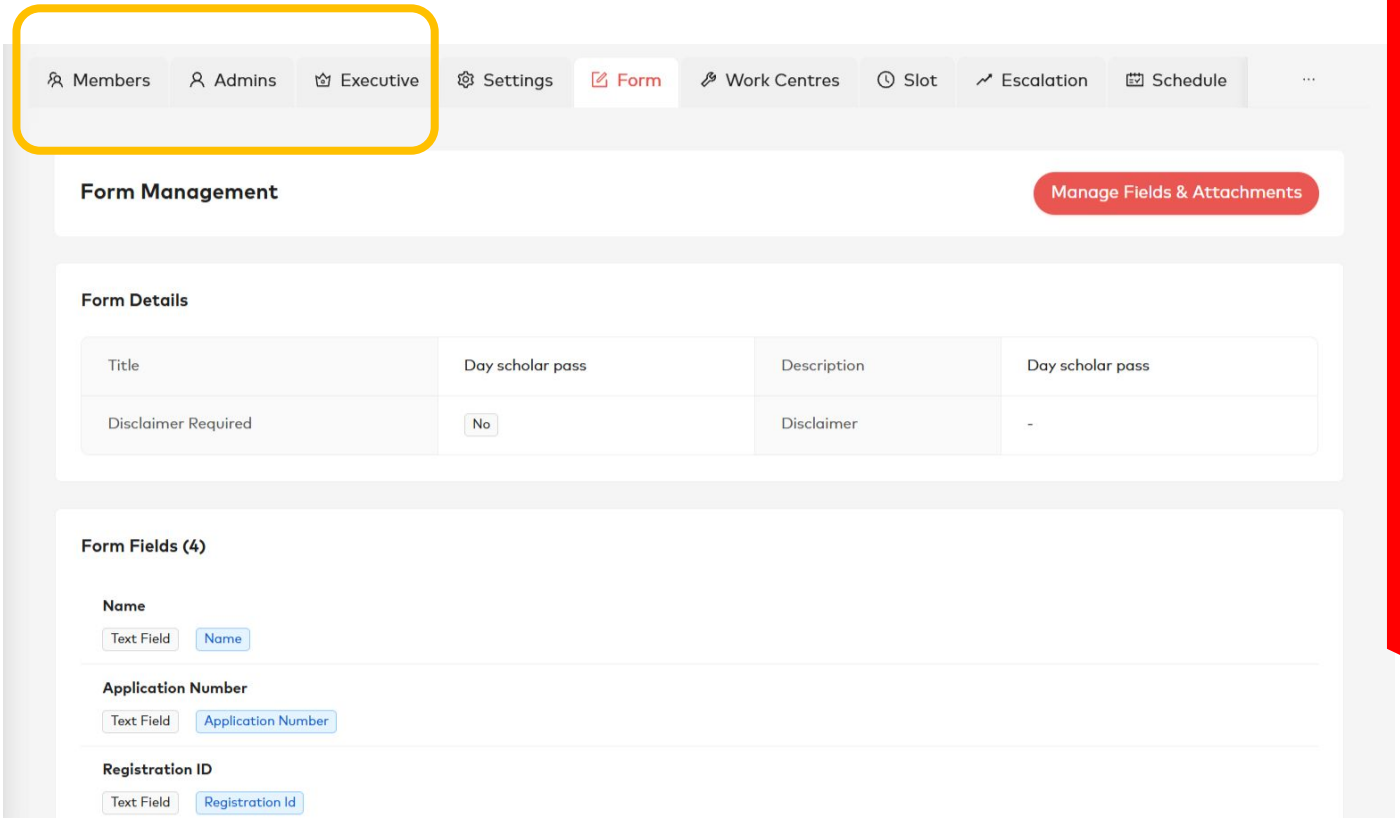

- Enable Form Available to display a pop-up form for capturing ticket-related details.
- Enabling Termination completes the workflow/ticket flow and prevents any the ticket from moving forward to the next workcenter if the configured action is selected.

Configuration of Workcentres & Actions

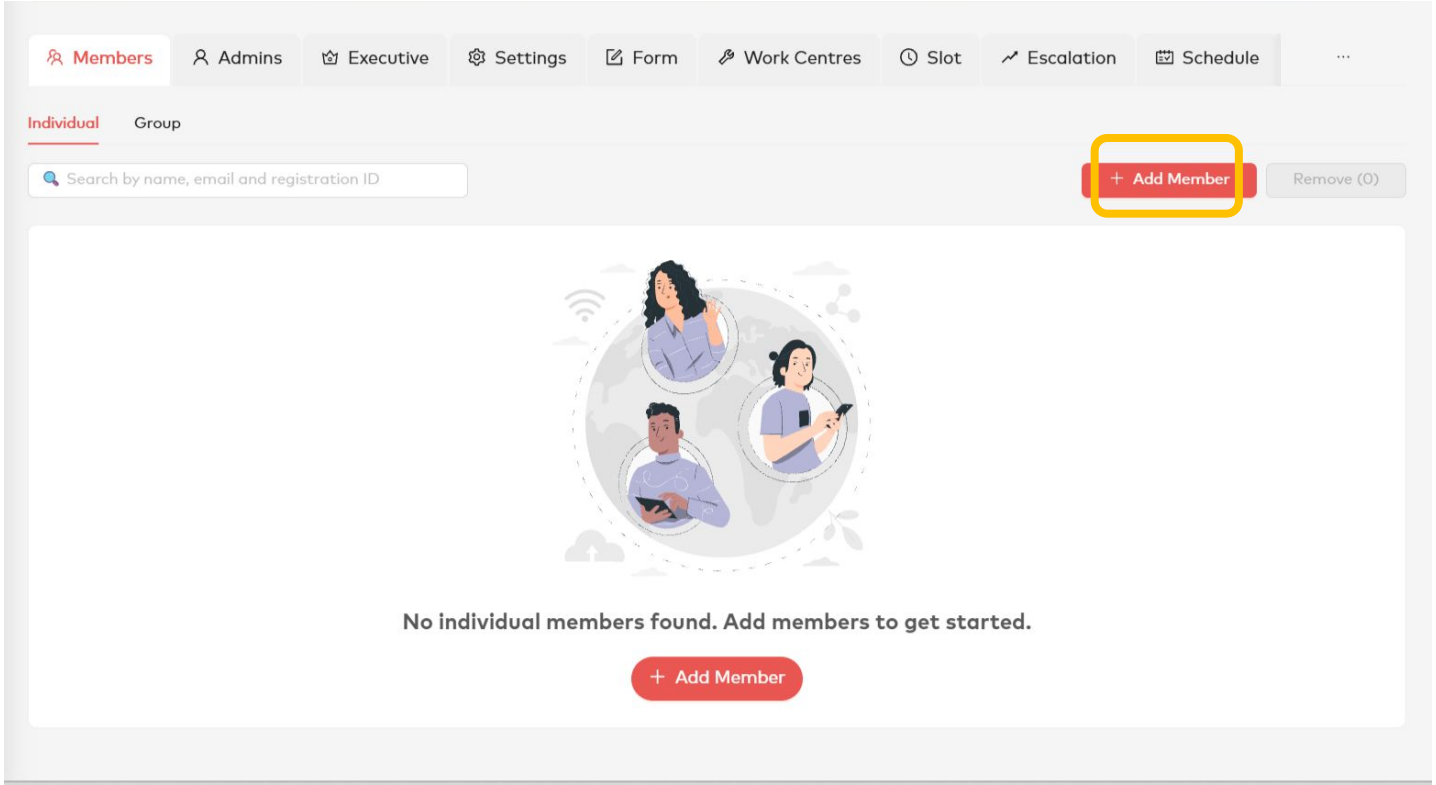

- Click on “Save All” to save any changes made to any and all work centres at once.

Addition of Members , Admins and Executives

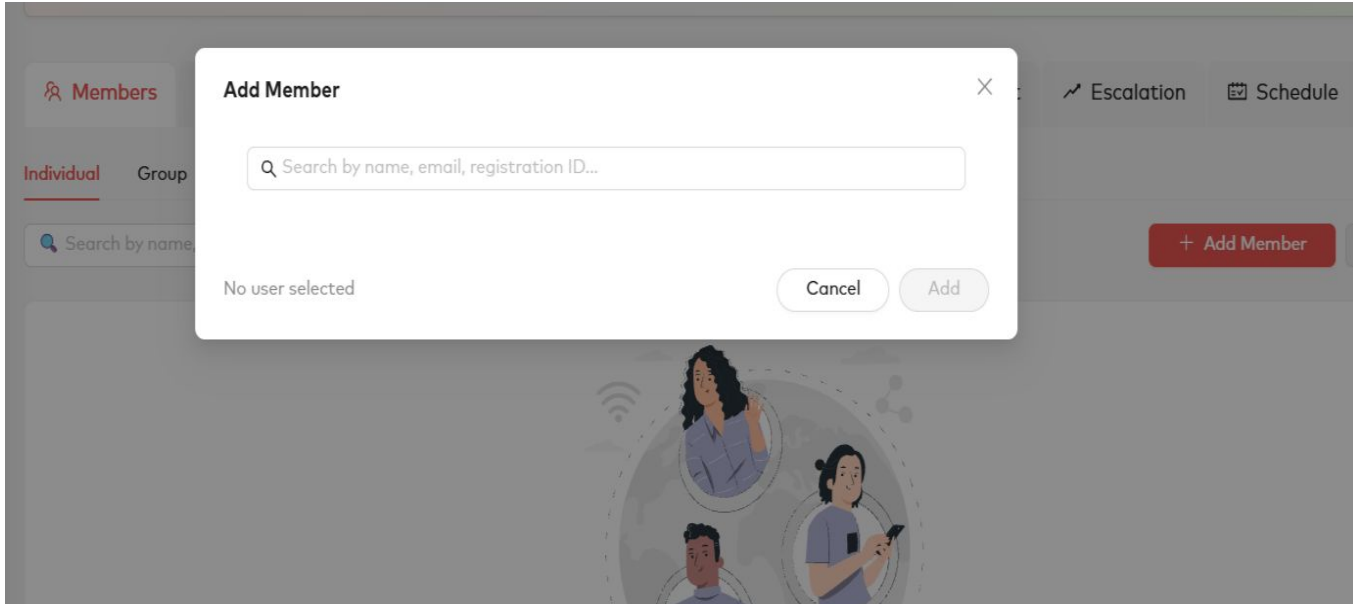

- **Members** are the ones who can raise requests under a particular service.
- **Admins** are the ones who can monitor/process the requests based on work centres.
- **Executives** are similar to Admins, who can process requests raised by a member under a particular Service.

Addition of Members

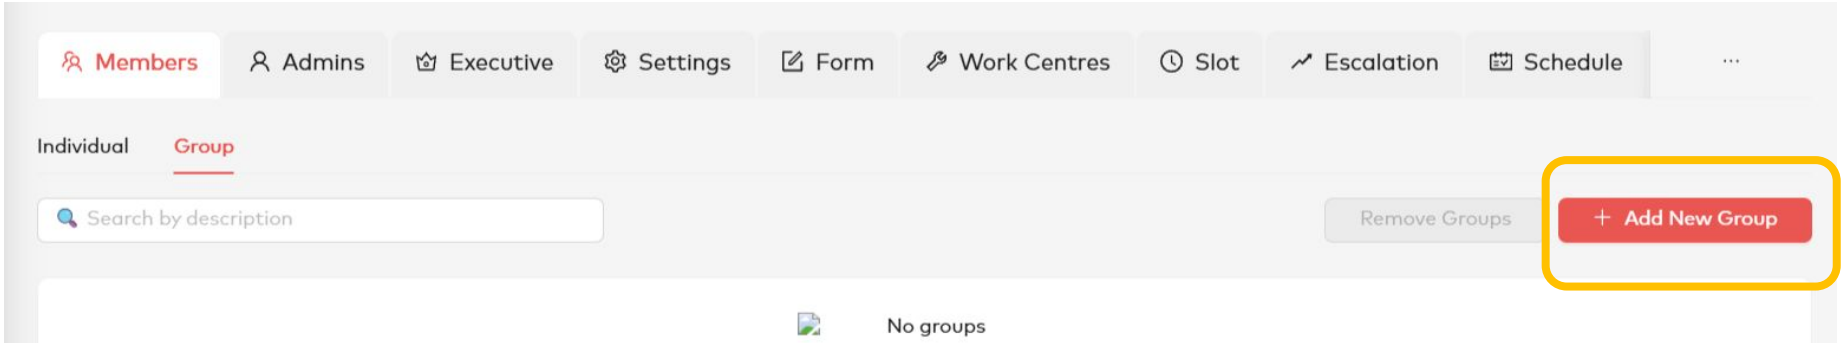

- Members are the ones who can raise requests under a particular service.
- Members can be added individually, one at a time by using the “Add Member” button

Addition of Members

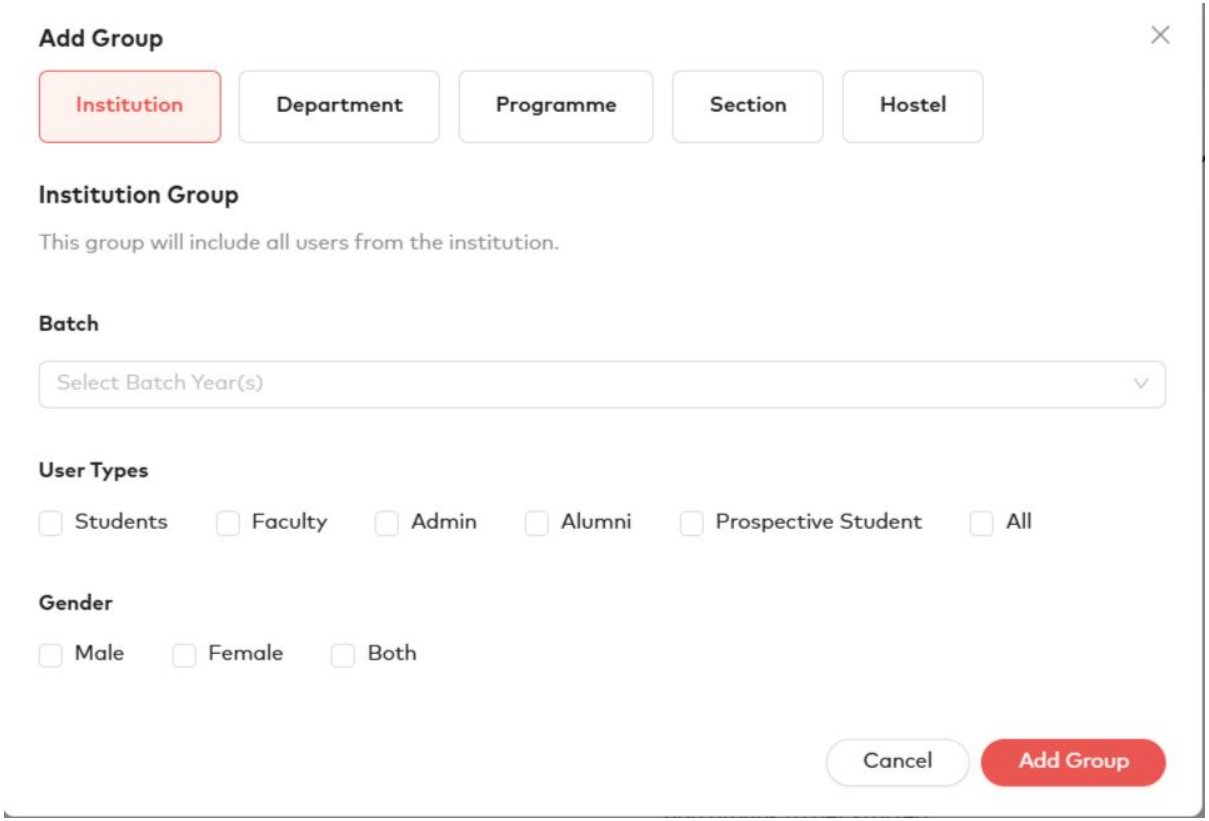

We can search and add members individually by searching for their name , email or registration ID

Addition of Members (in Groups)

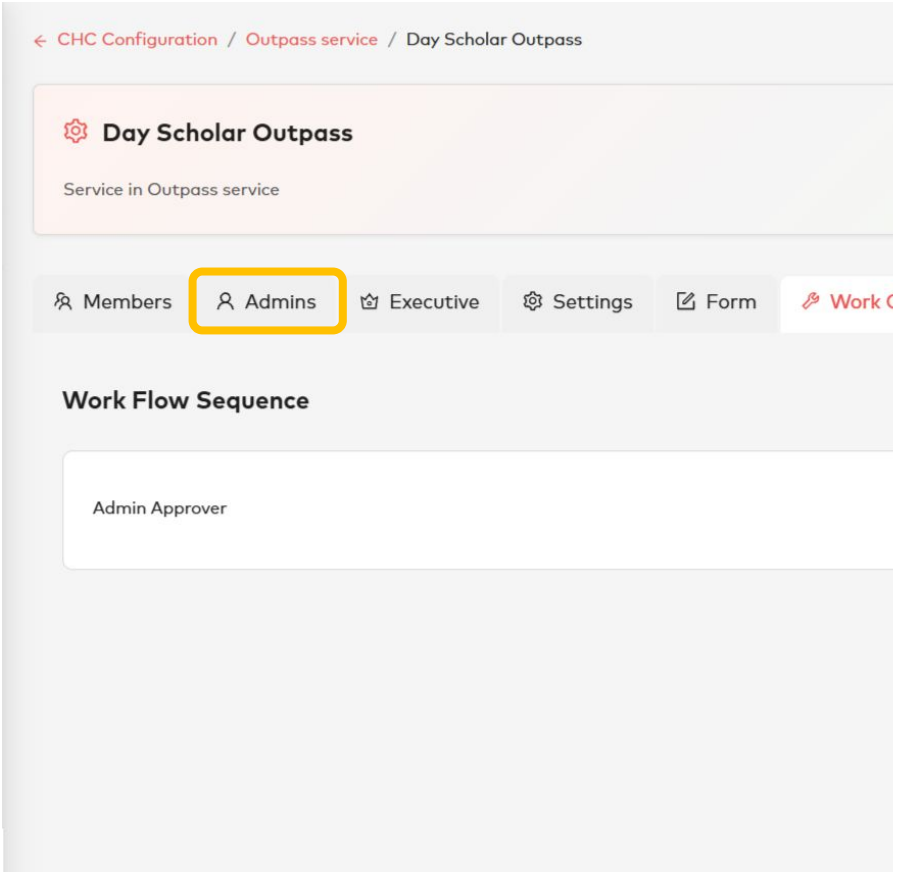

Click on “Add new group” to add members in bulk

Addition of Members (In group)

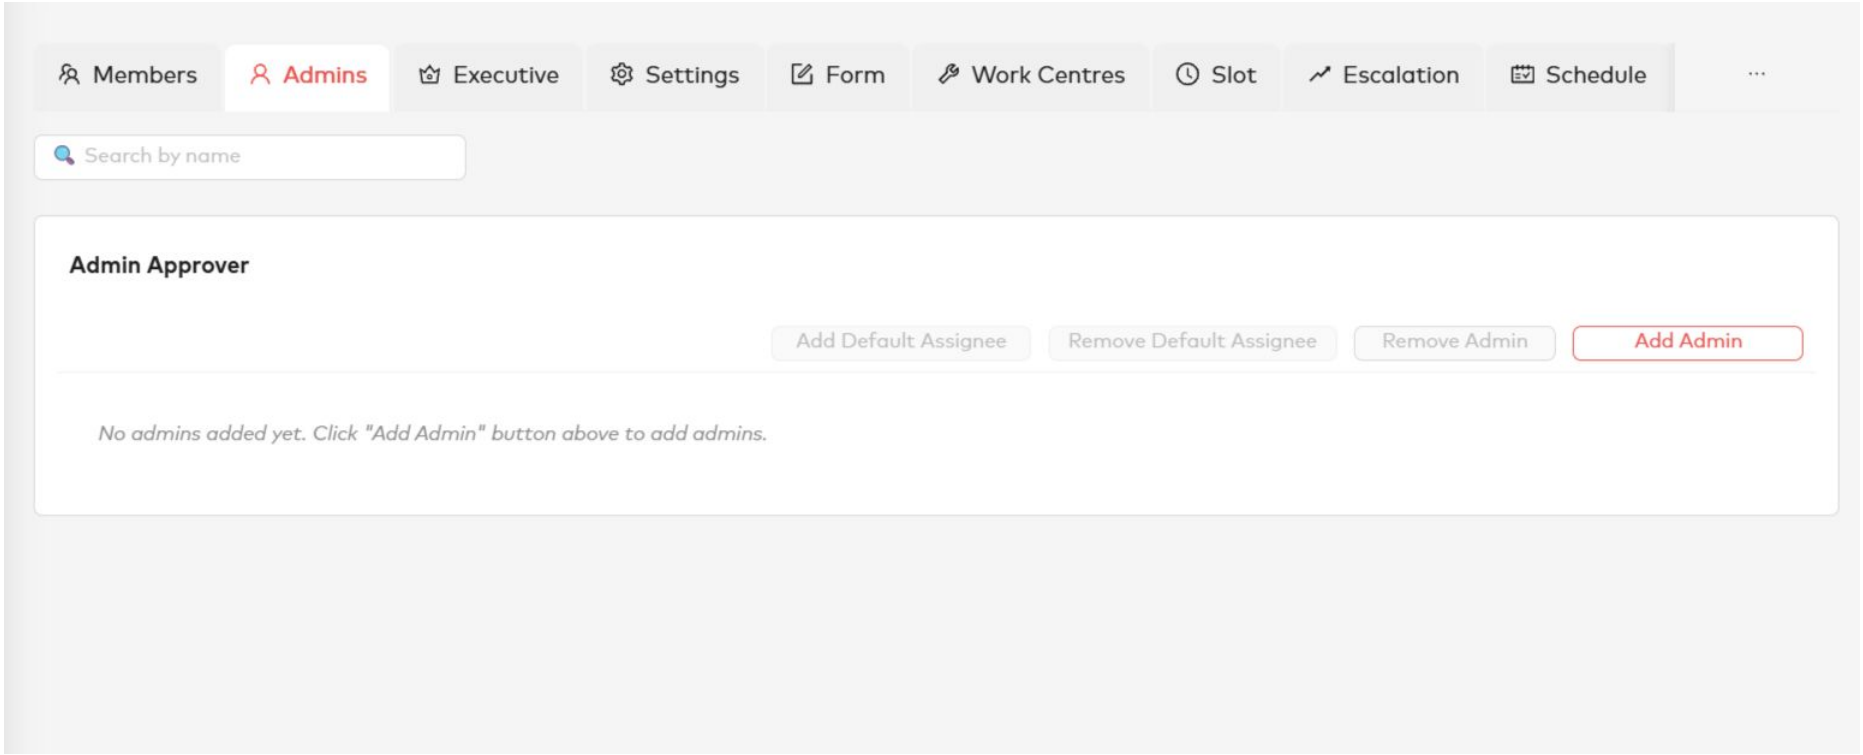

- We can use the institution , department , programme , section and hostel filters to narrow the group.
- The group can be adjusted based on batch year , user type and gender as well.

Addition of Admins

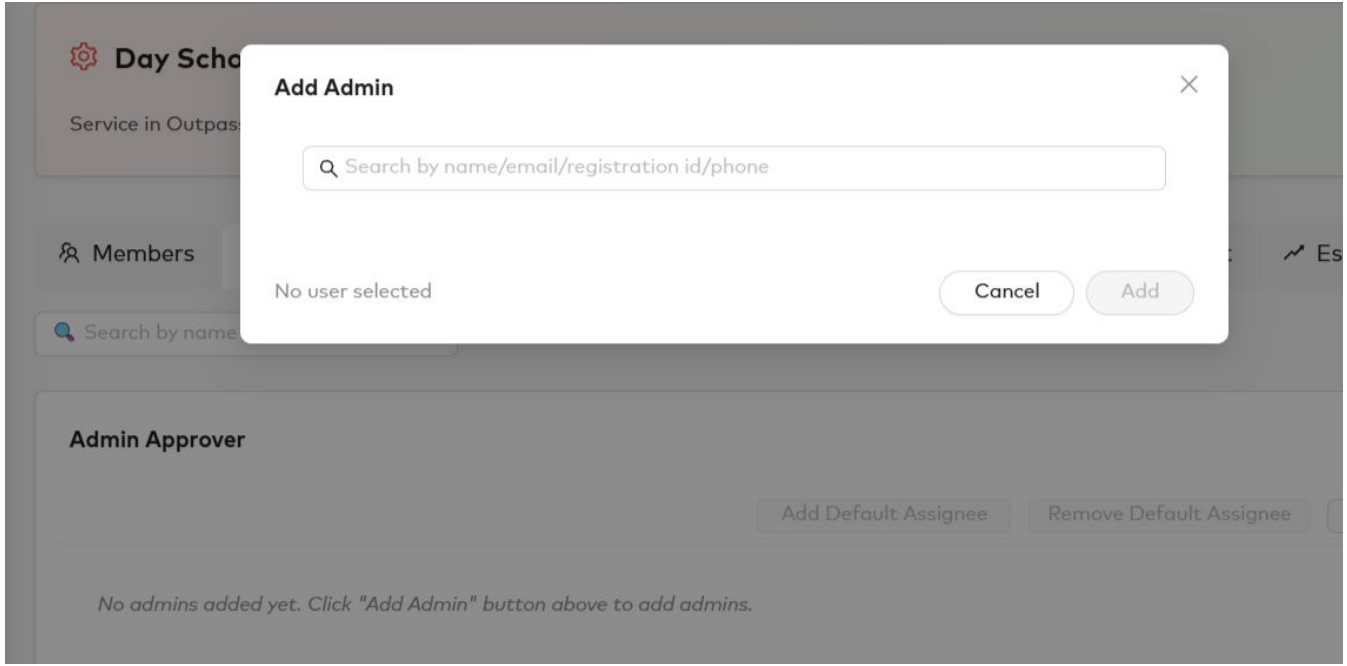

- Click on the “Admins” tab to look at the admins allotted to the service.

Addition of Admins

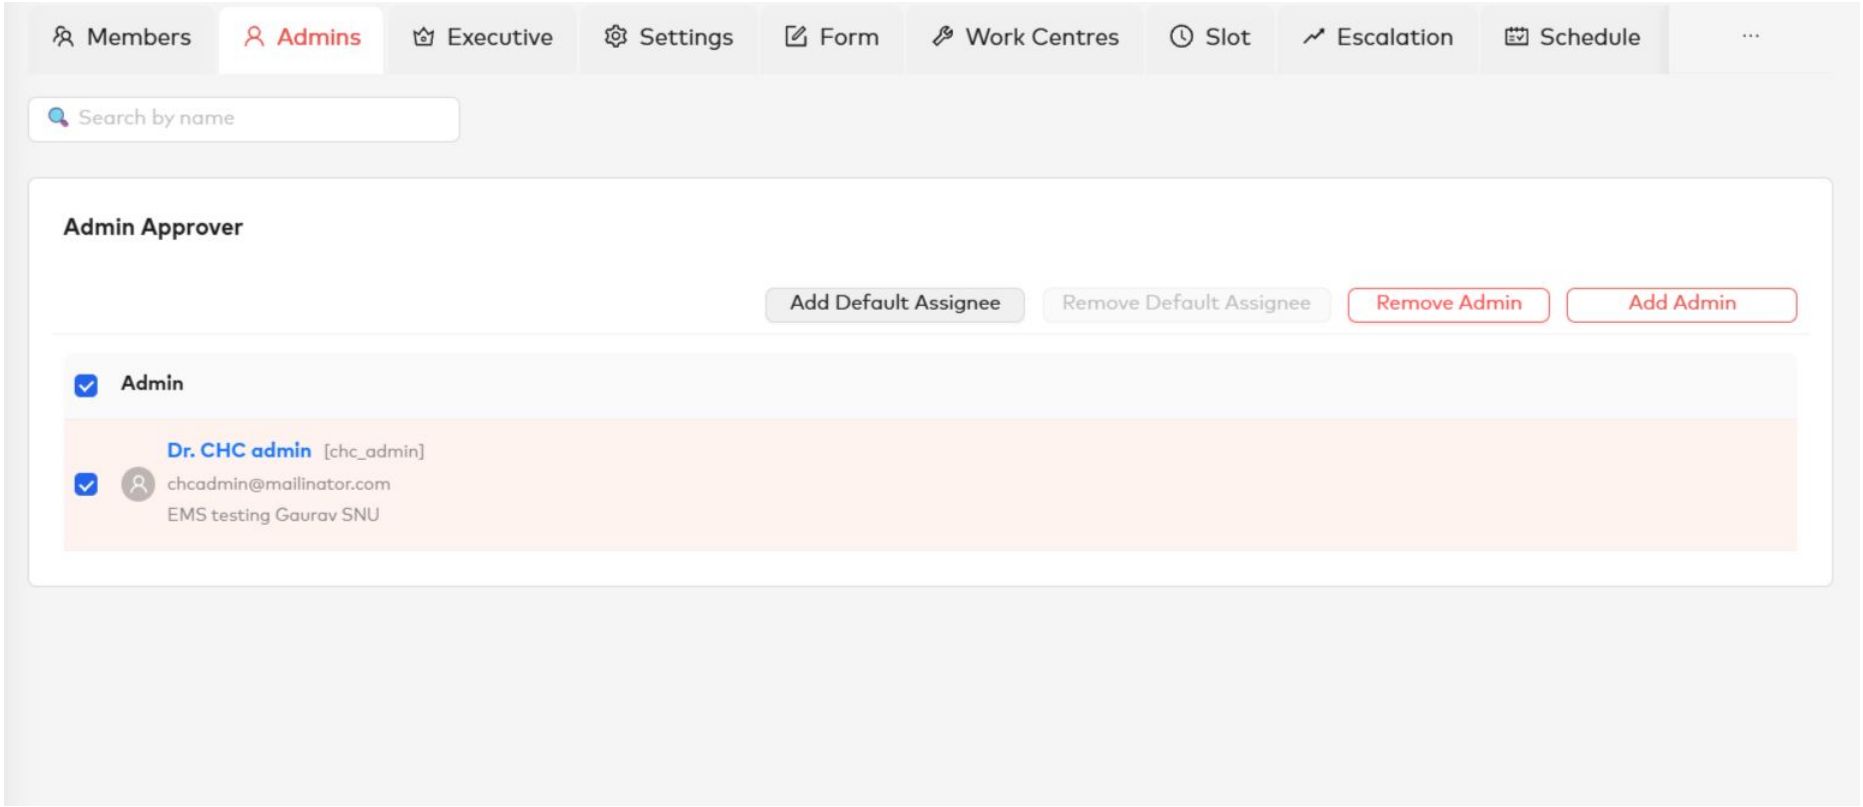

Addition of Admins

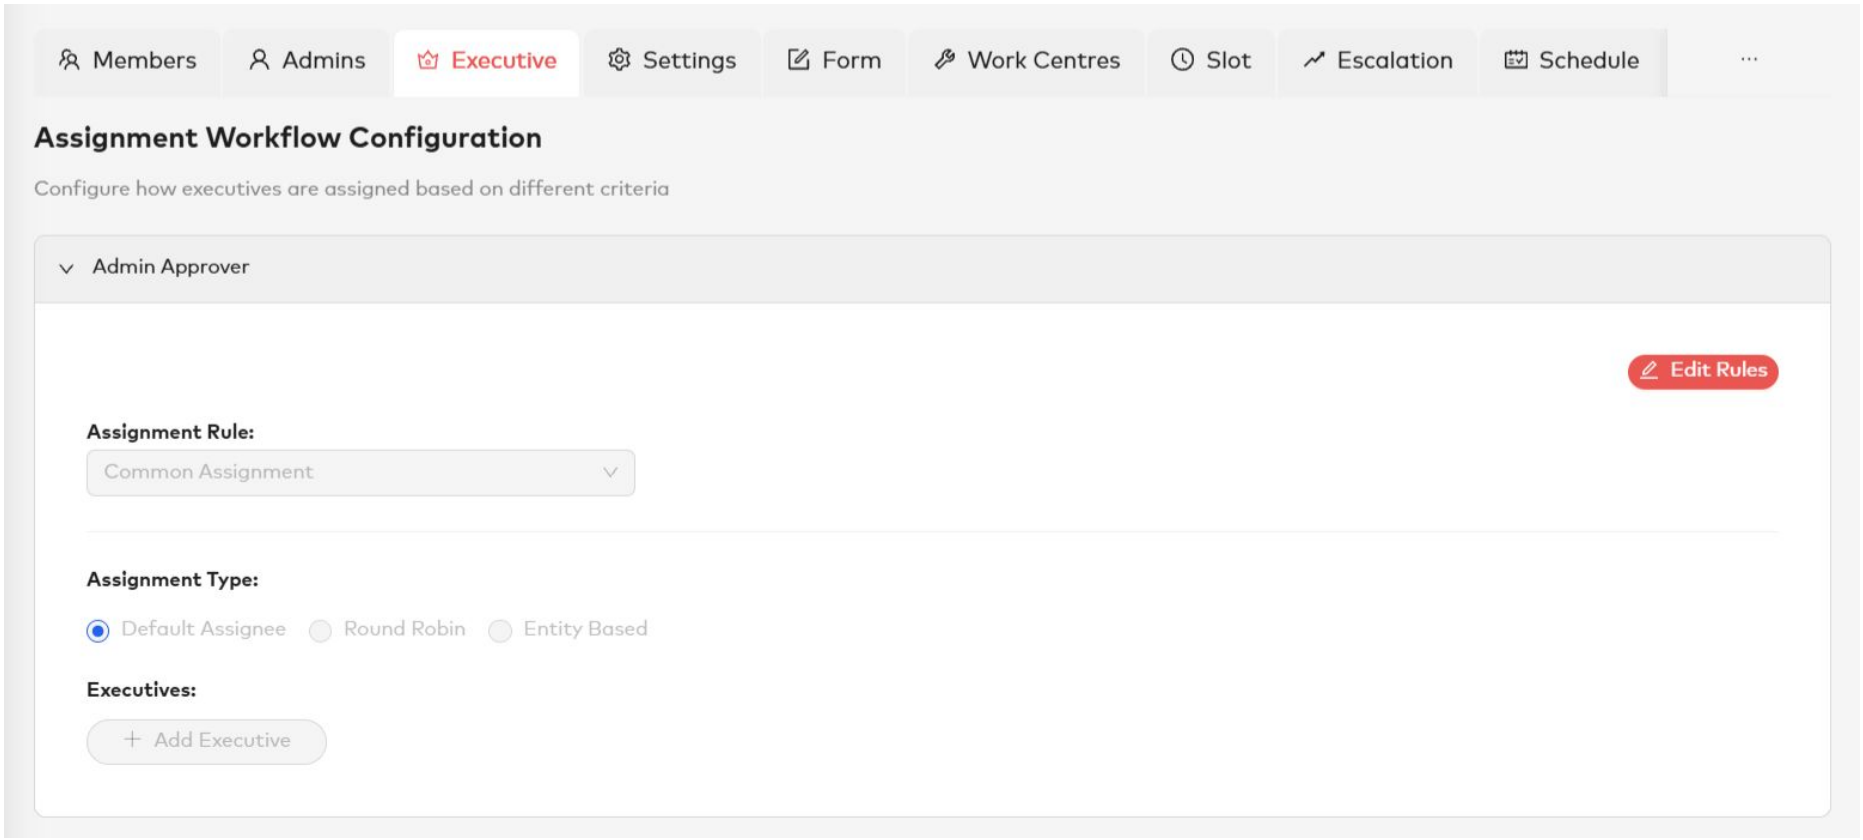

- We can search and add members individually by searching for their name , email or registration ID

Addition of Admins

Addition of Executives

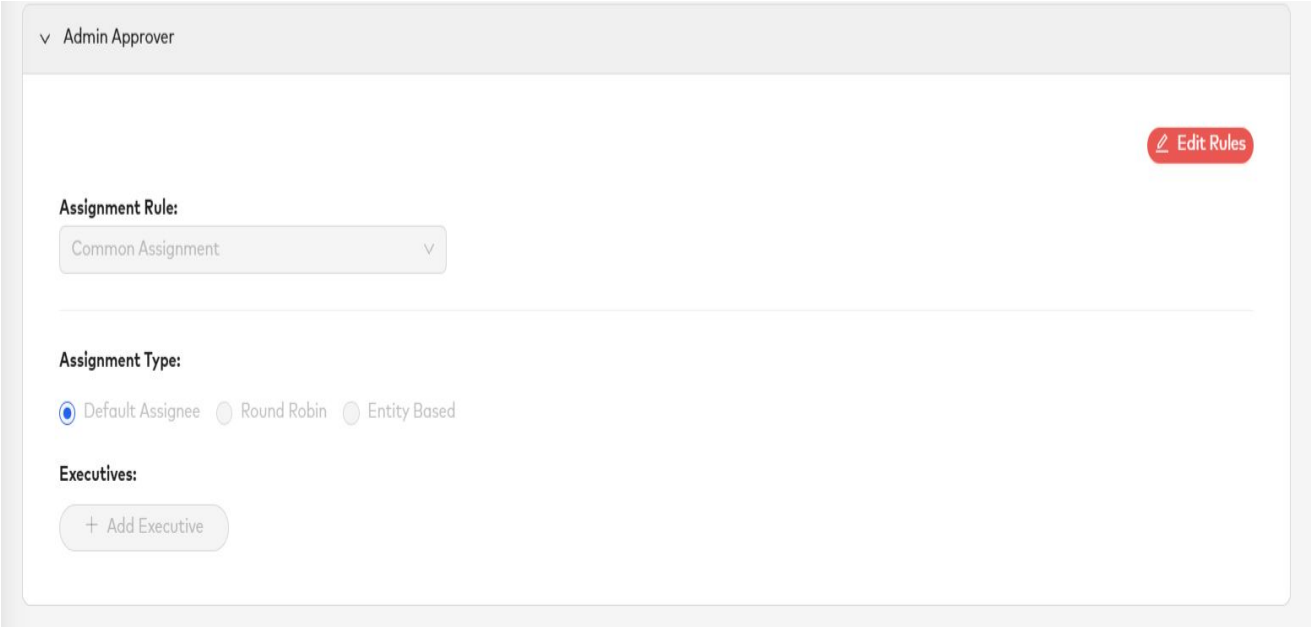

Assignment Rules

- Common Assignment : Automatically routes all tickets to a single designated executive for centralized handling and ownership.

- Based on Group : Automatically routes tickets to the appropriate executive based on group filters such as User Type, Department, Program, and Hostel.

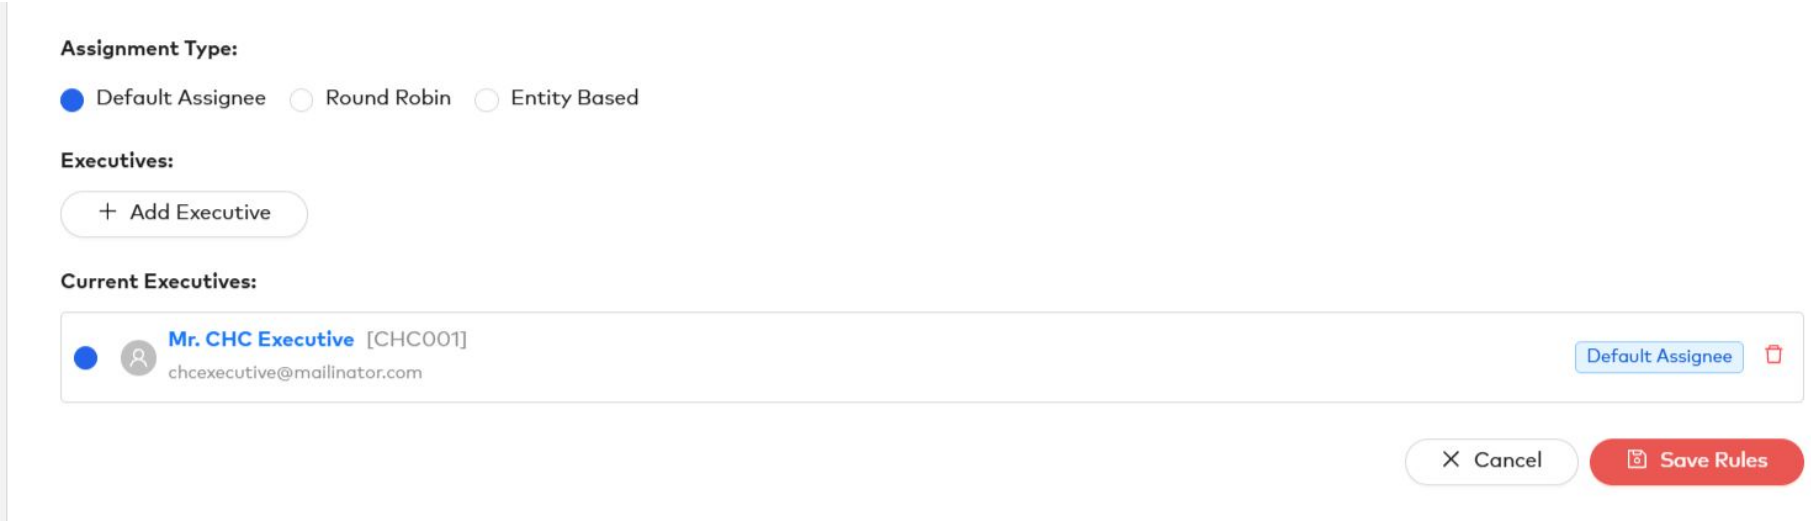

Addition of Executives

- Click on the “edit rules” to enable addition of executive to the service.

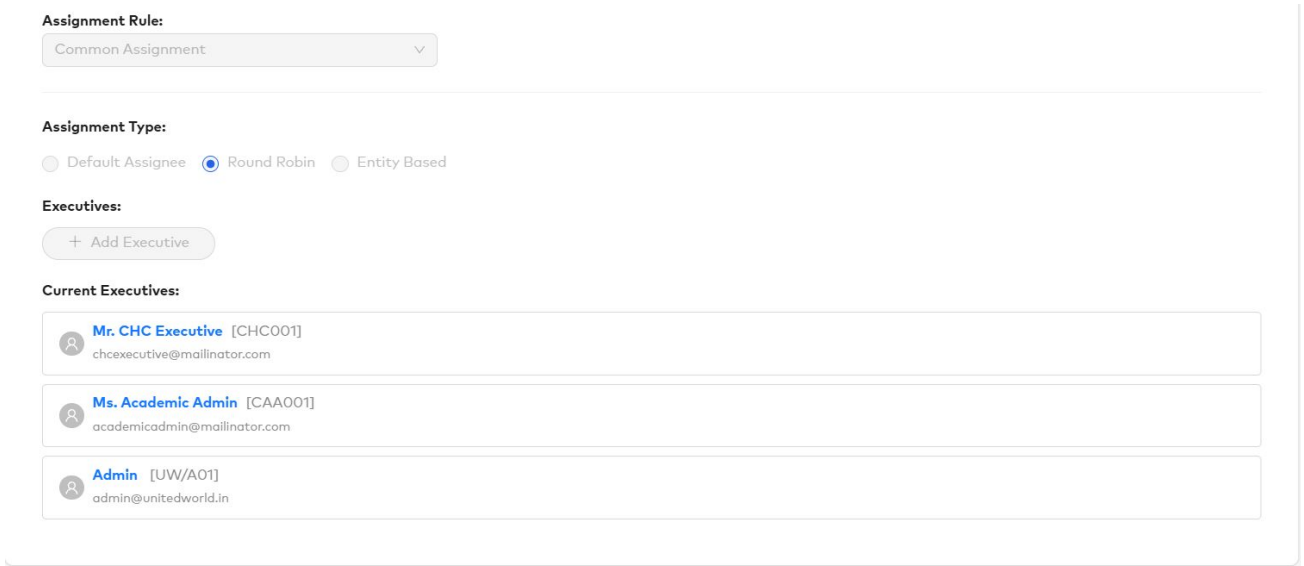

Assignment Types:

- Default assignment: Under Default assignment ,the request will be assigned to the selected executive will by default.

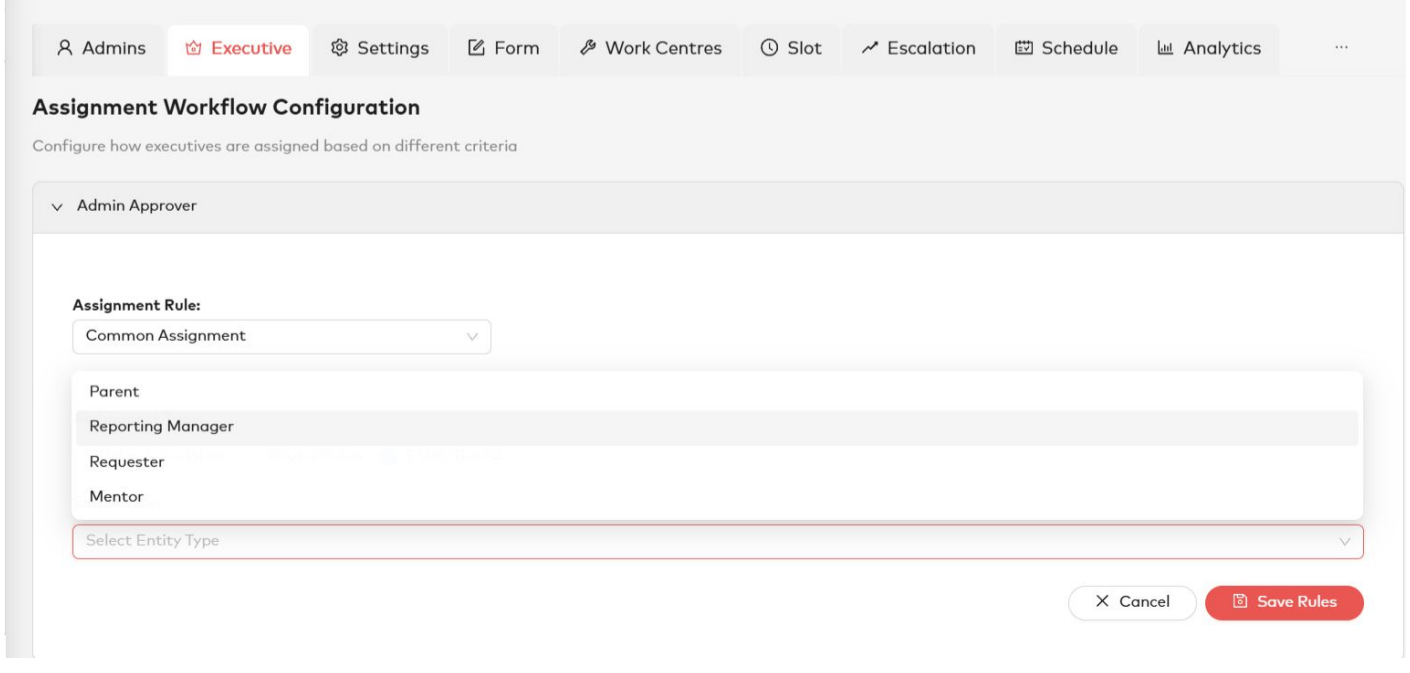

Assignment type:

- Round Robin: Automatically assigns each new ticket to the executive in sequence to ensure even workload distribution across the team.

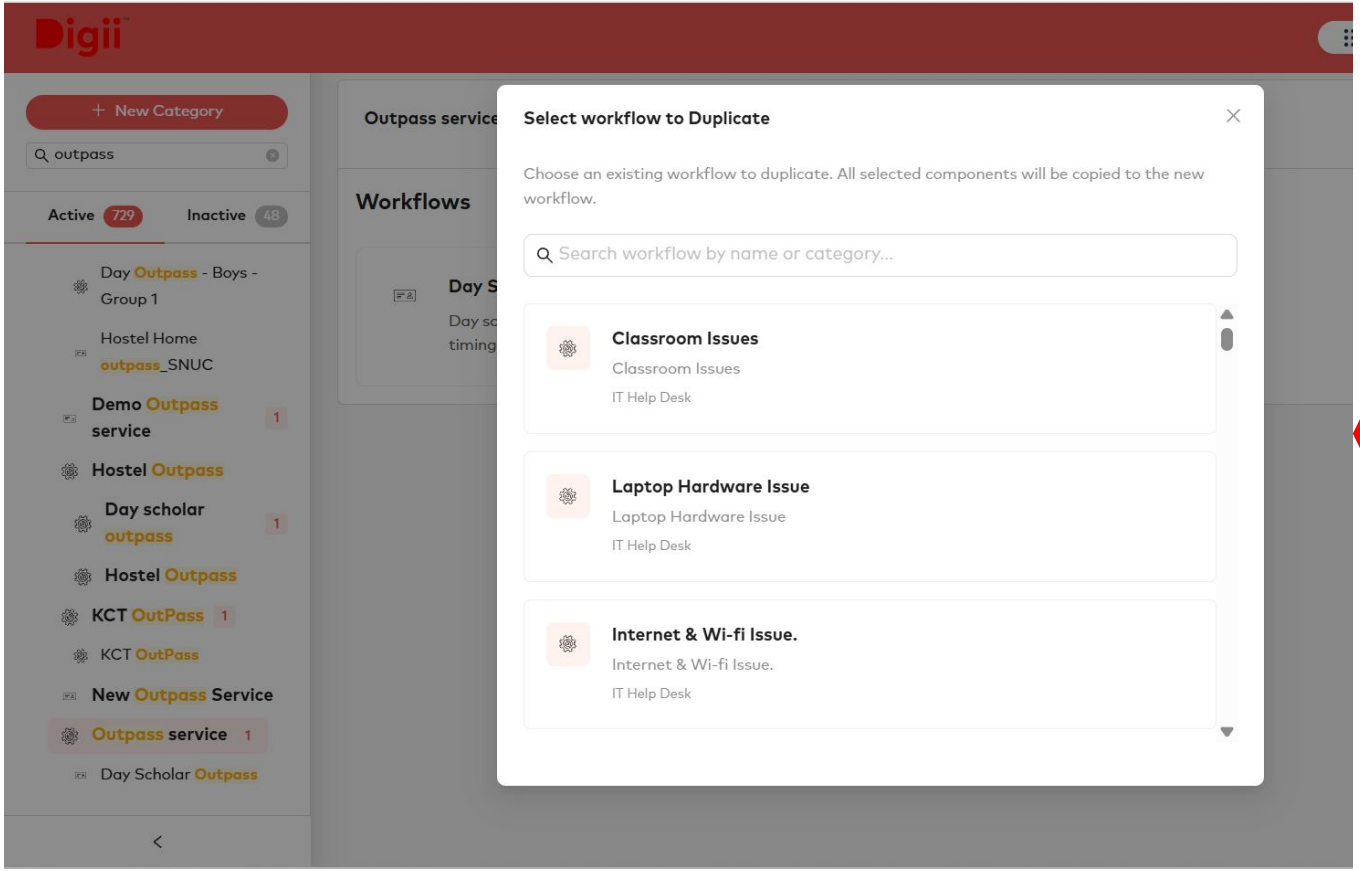

Assignment Rule:

- Entity Based : Automatically assigns tickets to a designated executive based on the selected entity type—such as Parent, Reporting Manager, Mentor, or Requester.

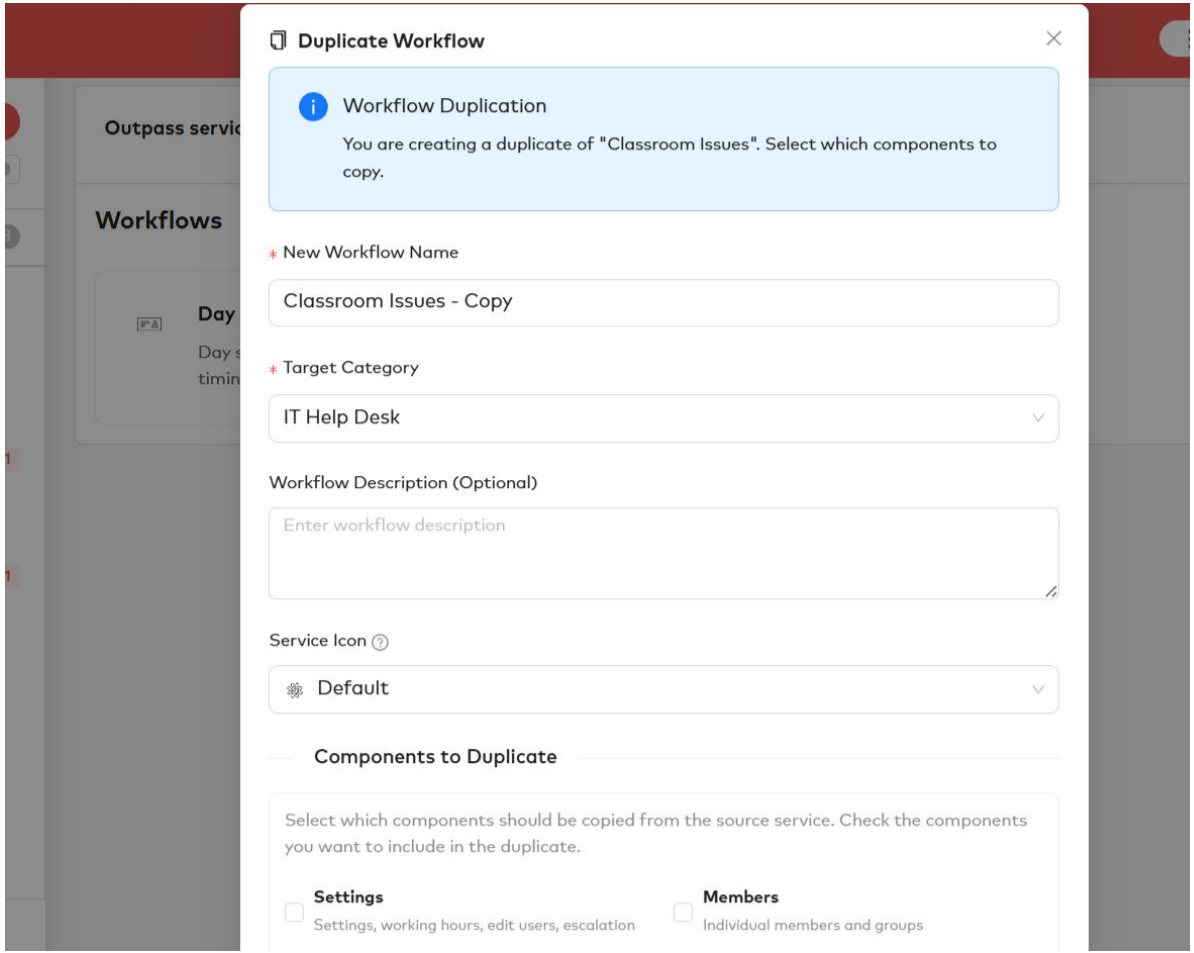

Duplicating a Workflow

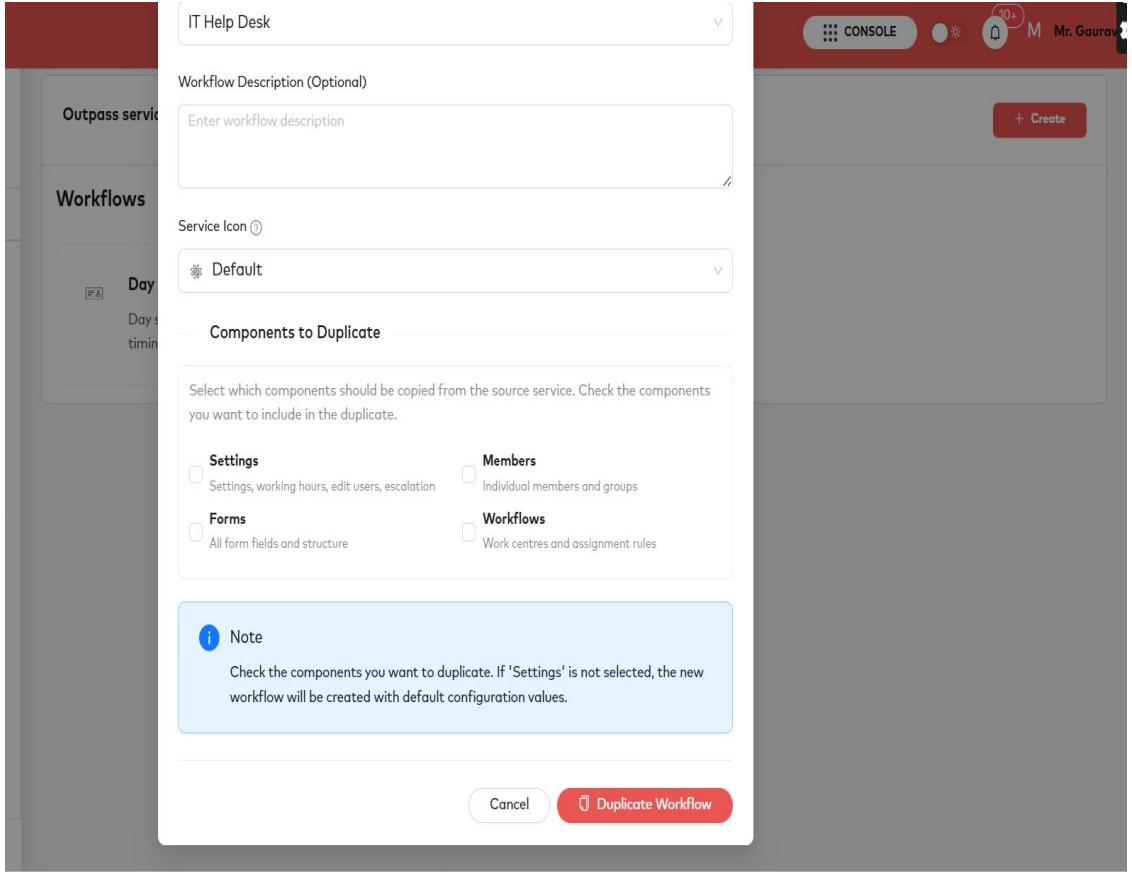

After Selecting Duplicate an existing workflow , choose which workflow needs to be duplicated.

Duplicating a Workflow

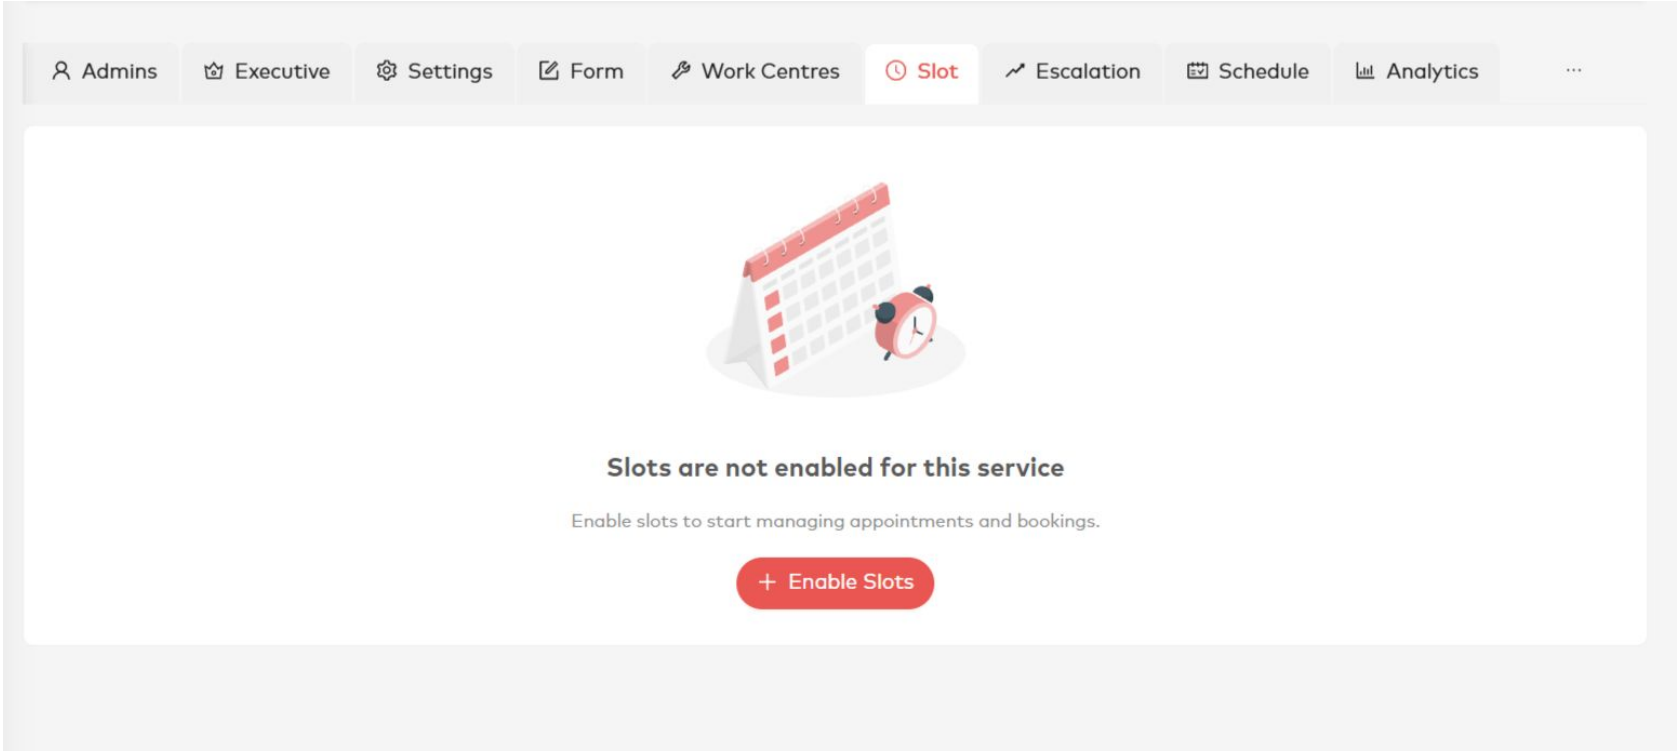

After Selecting which service to duplicate, choose the name , target category , icon and components to duplicate

Duplicating a Workflow

After Selecting which service to duplicate, choose the name , target category , icon and components to duplicate

Slot Management for CHC services

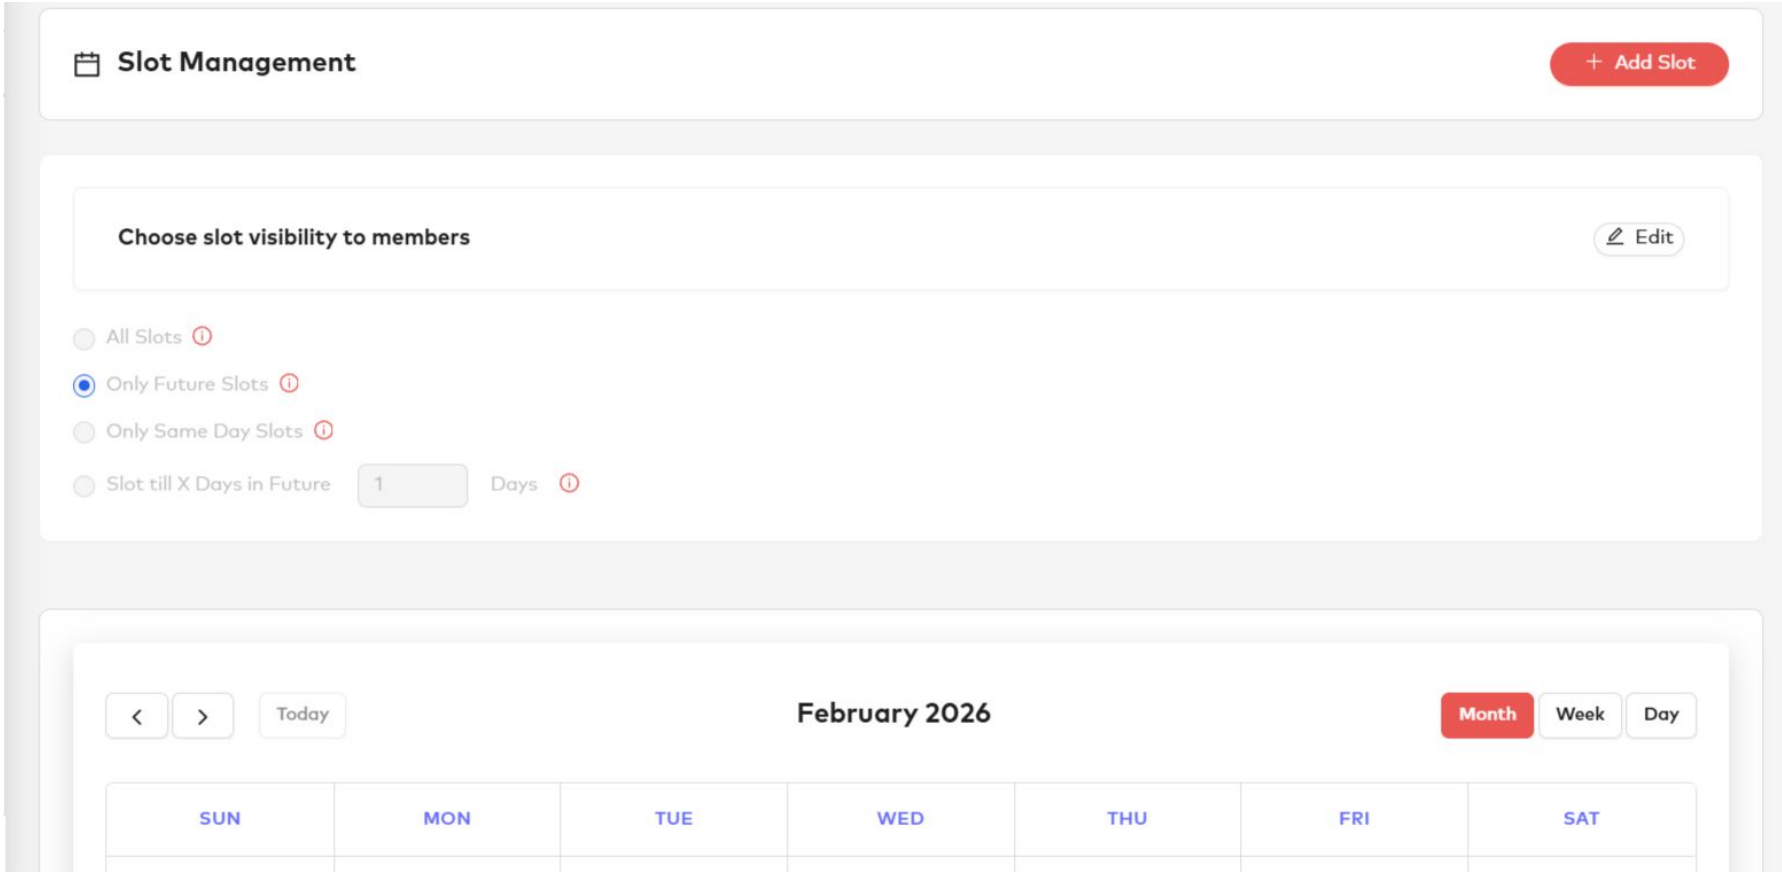

Slot Management for CHC services

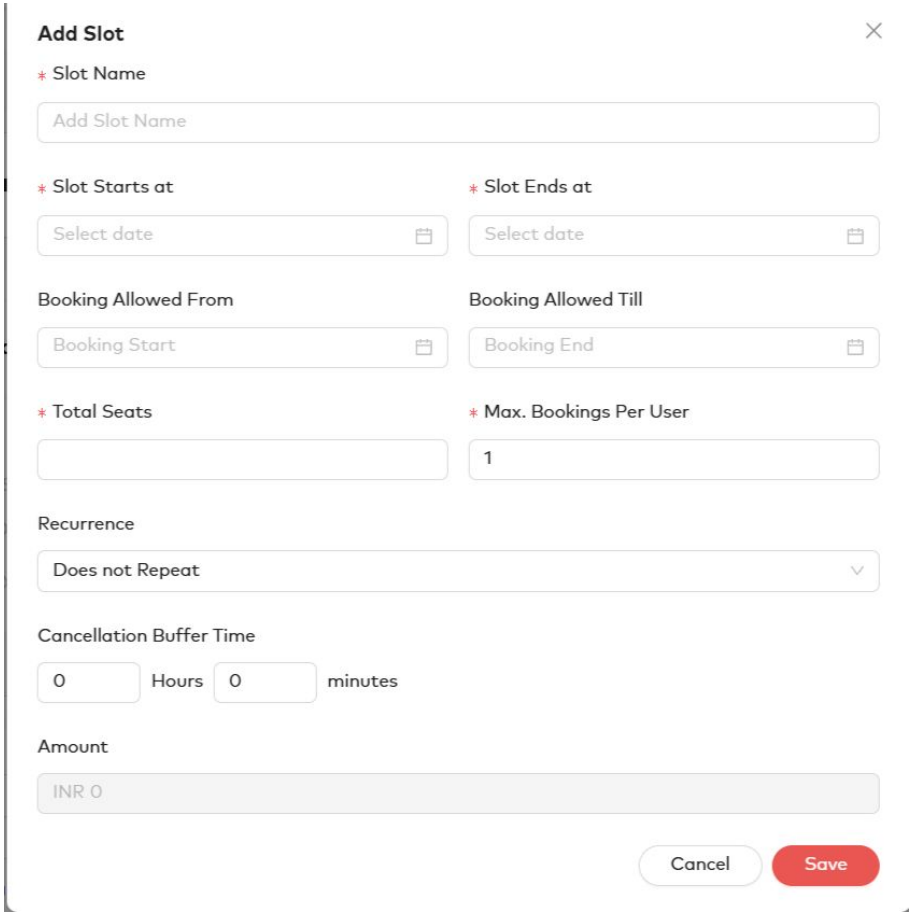

Slot Management in CHC refers to the system capability that allows administrators to configure, control, and publish time-based availability for various services. Through this mechanism, services are divided into predefined time slots, enabling students and users to book appointments in an organized, transparent, and capacity-driven manner.

This ensures that demand is distributed evenly, service providers are not overbooked, and users have a clear, self-service interface to select suitable time windows based on real-time availability.

Slot Management

Slot Management

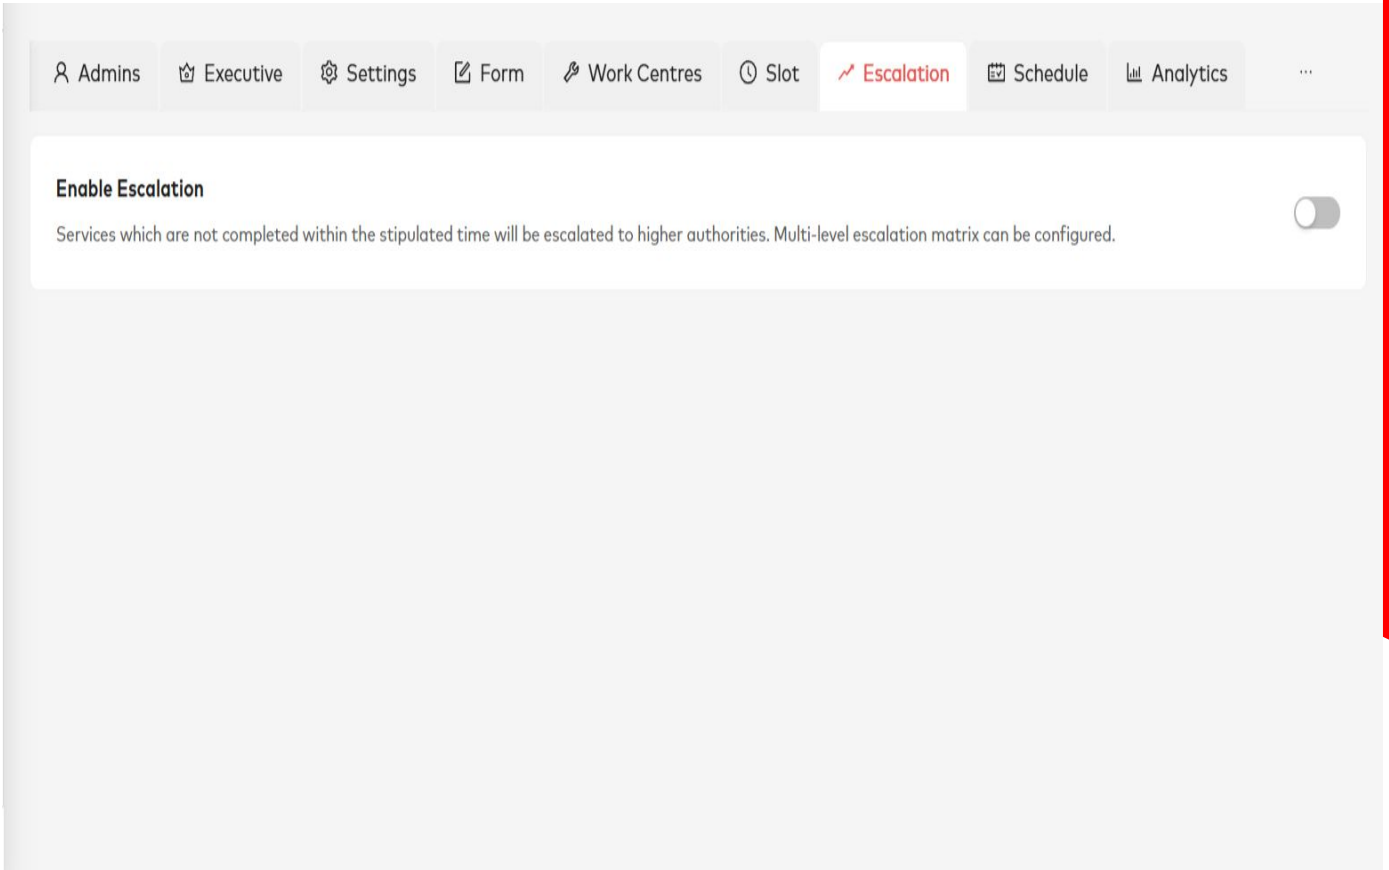

- Click on Add slot.
- You will get a pop up with all the details needed to configure a slot.
- Please ensure that you have filled the fields with the asterix.
- users/members will not be able to submit the forms without slots being configured.

Escalation Matrix

Escalation Matrix is a configurable escalation framework that automatically routes a ticket to the next level of authority when no action is taken within the defined SLA or stipulated time period.

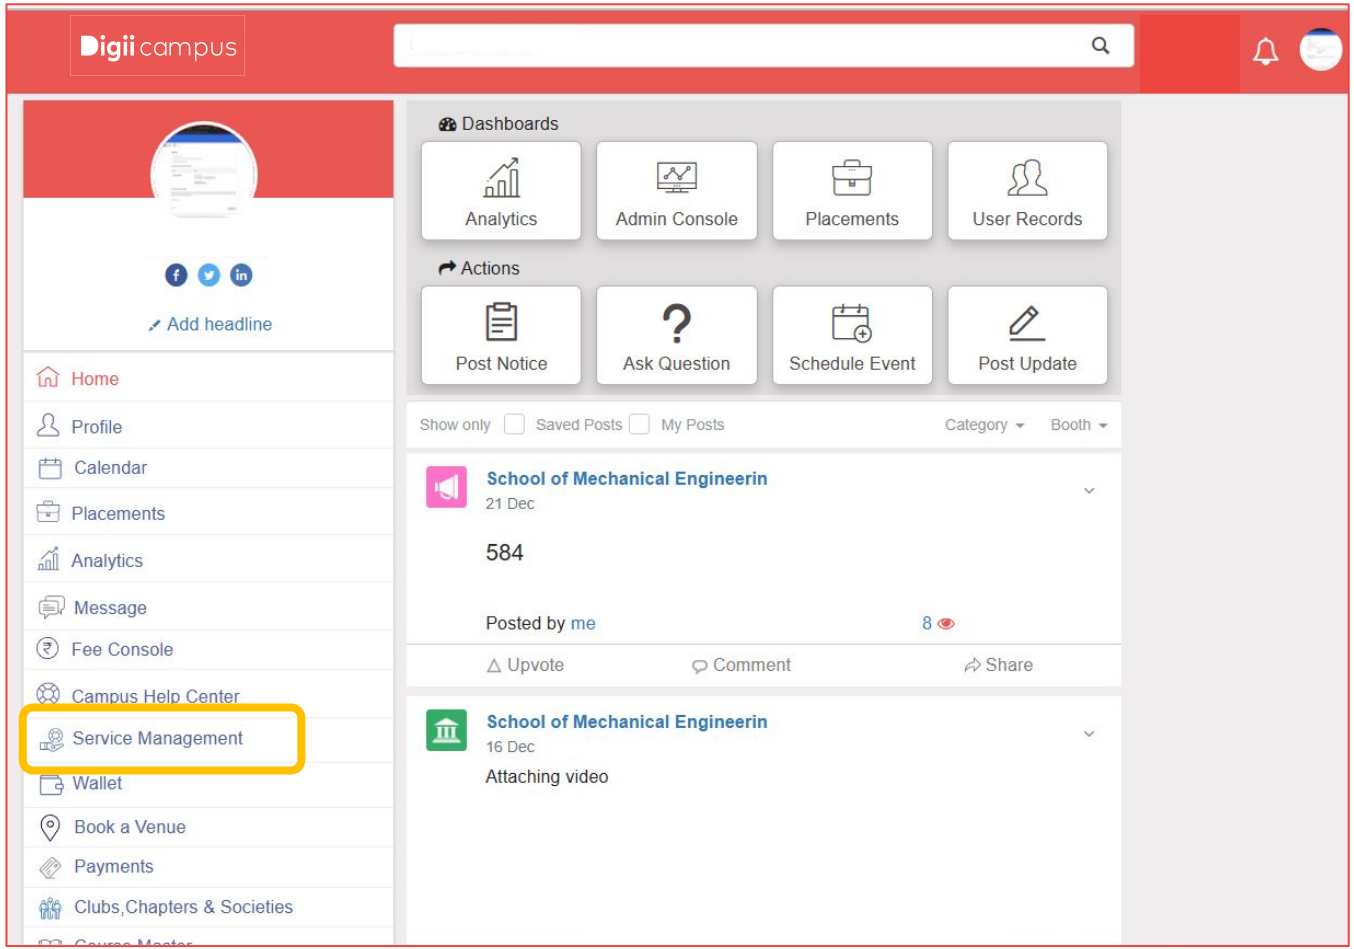

Escalation Matrix

- Toggle on the escalation Matrix to enable tickets to be get escalated

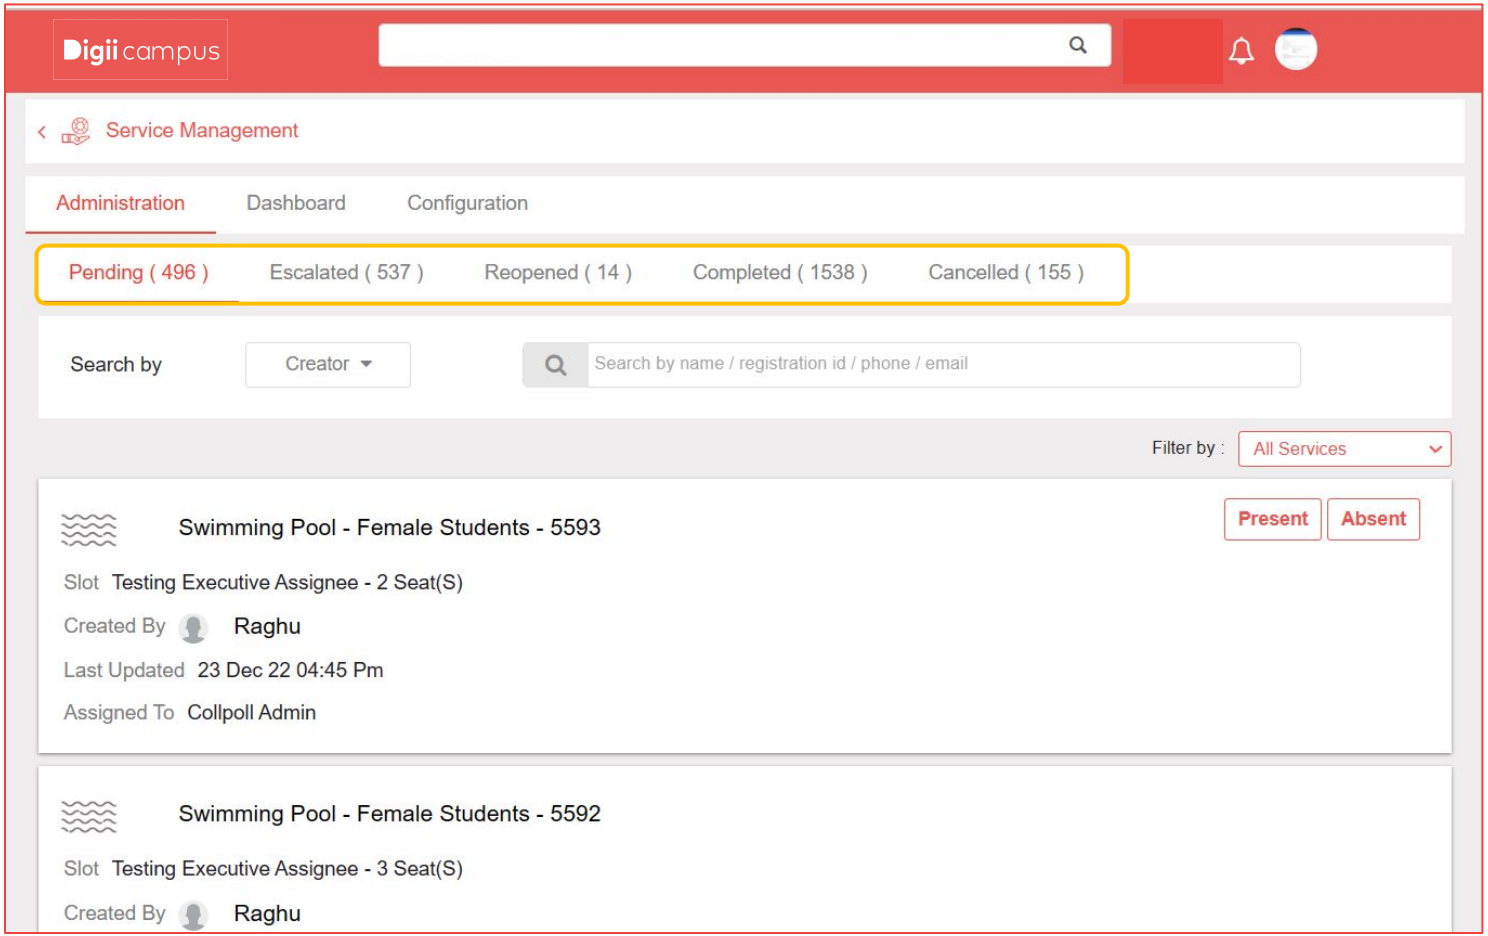

Service Level Configurations (Through service Management)

Service Administration (For Service Level Configuration)

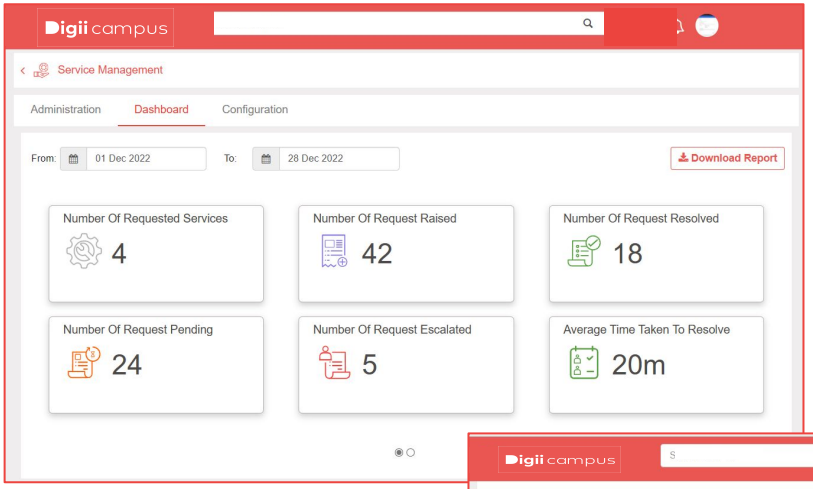

Go to **service management** on the home page

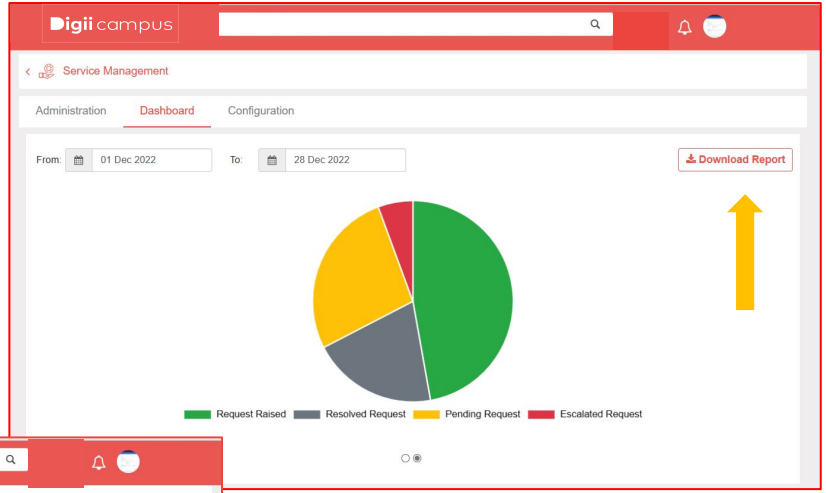

Service Administration (For Service Level Configuration)

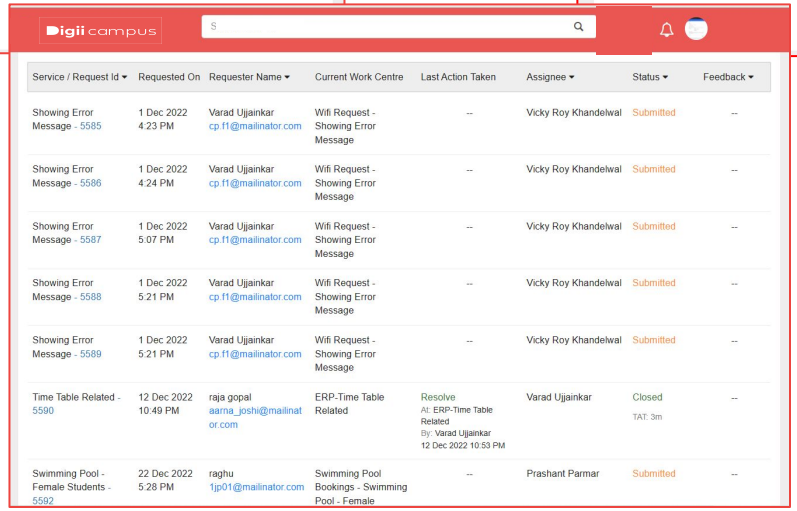

Search the service requests by applying various filters & manage them easily

Service Administration (Download Report)

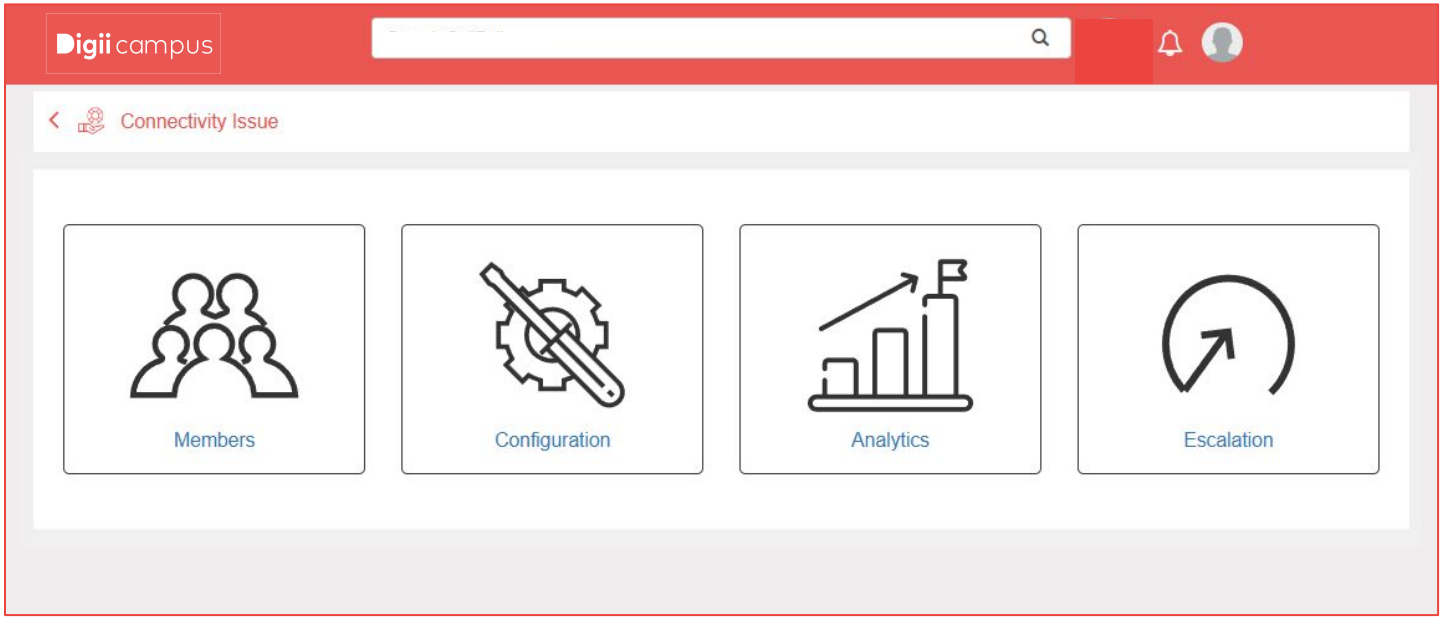

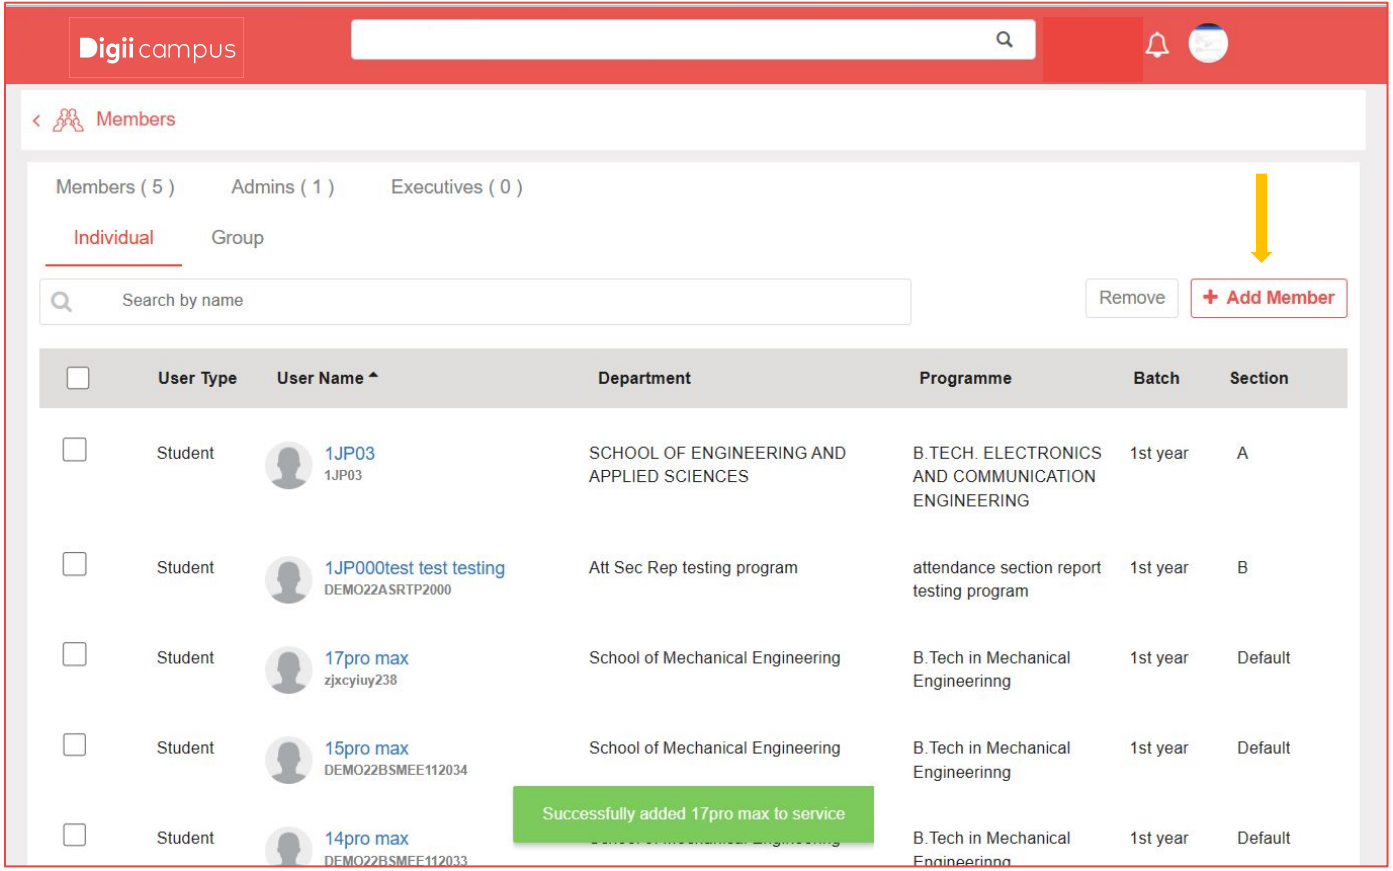

- Under the service dashboard you can view the summary of overall services for any time period you want.
- Scroll down to check the detailed view
- Click on download report button to get detailed report

When we choose a Service, we can configure the details under these four tabs

Manage Individual Members

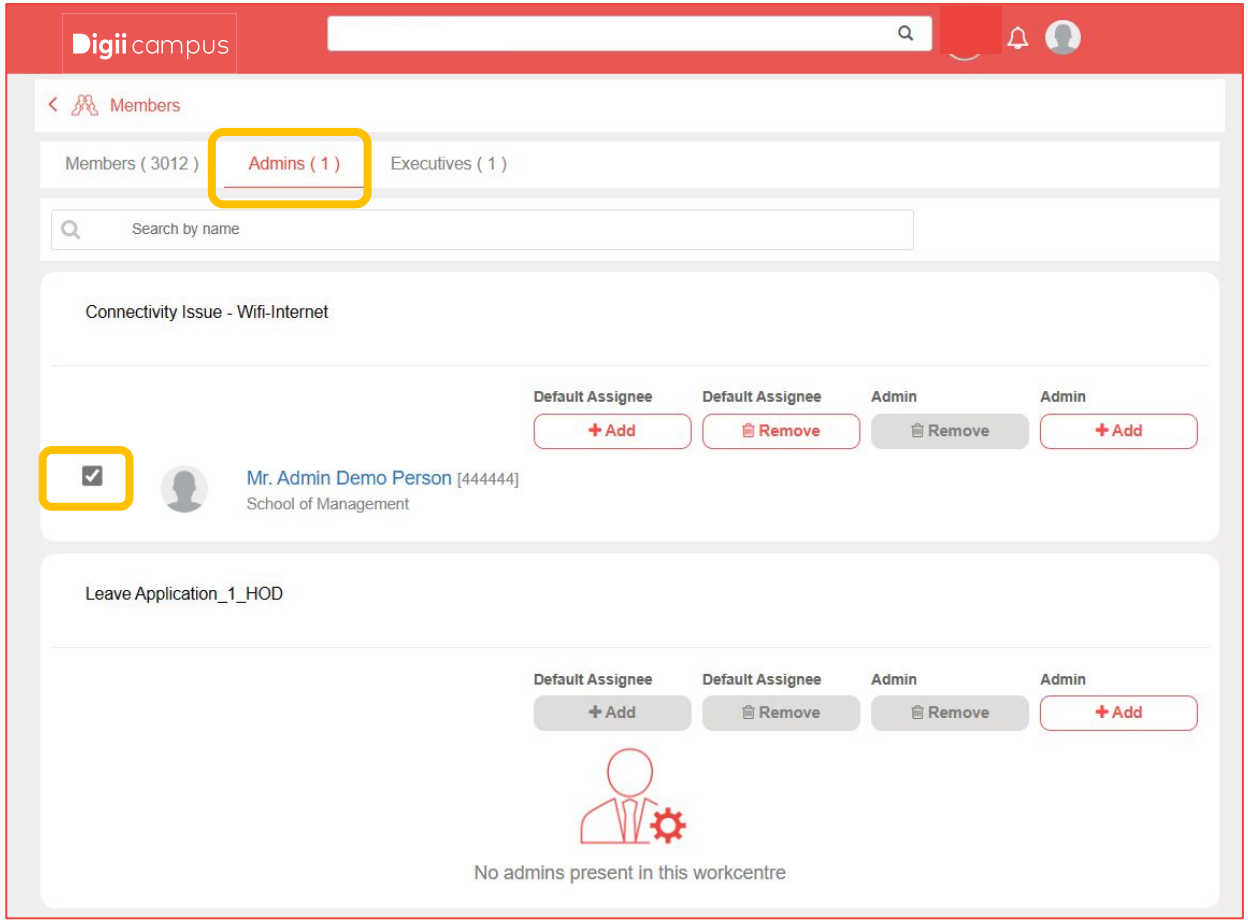

- Members are the ones who can raise requests under a particular service.
- Under ‘Members’, we can add Individual and Group audiences.
- Click on ‘Individual’, to add members.

Manage Members in Groups

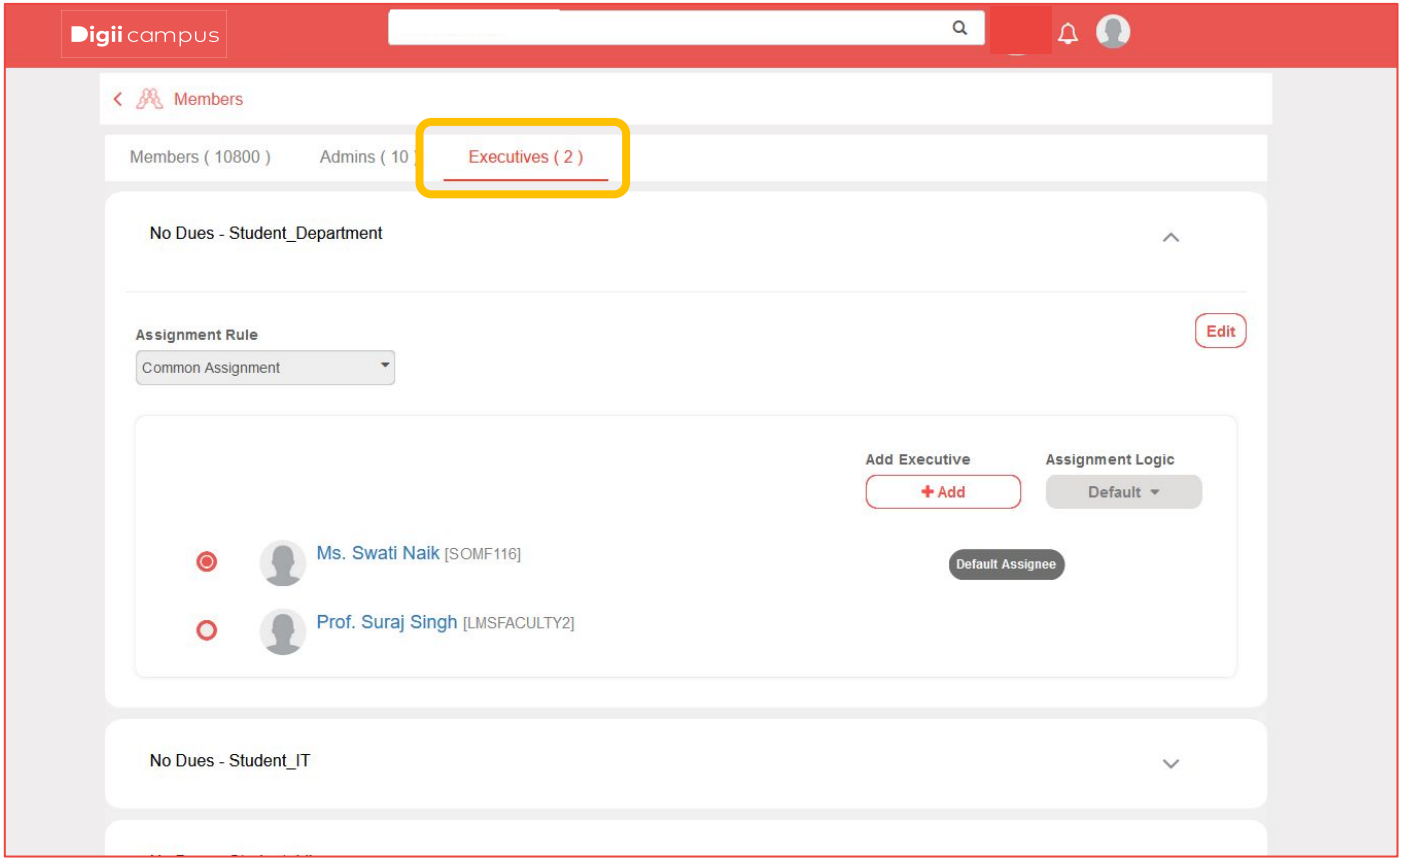

Click on ‘Group’ to add Group Audience

Manage Admins

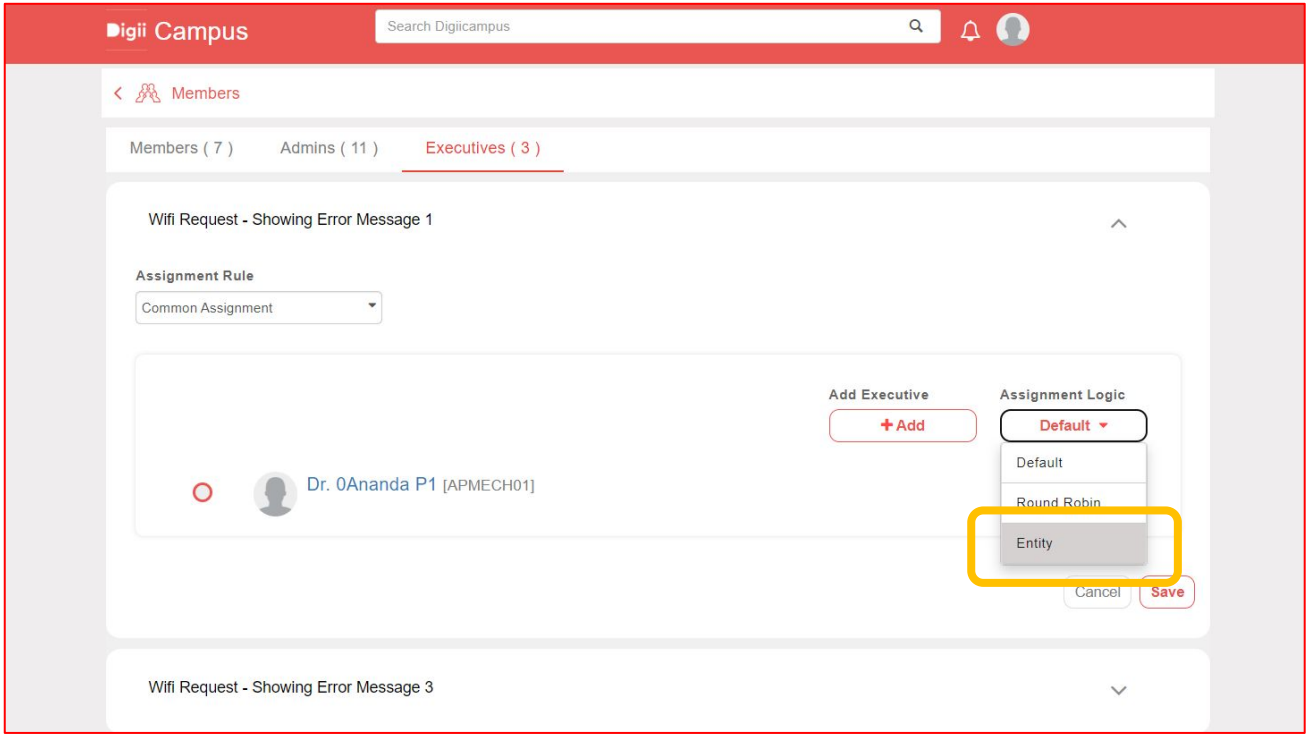

- Admins are the ones who can monitor/process the requests based on work centres.
- Click on ‘Add Admin’, to add admins to different work-centres.
- Default Assignee will be the default receiver of all the requests raised under that particular service.
- Admins can re-assign the request to other admins or executives.

Manage Executives

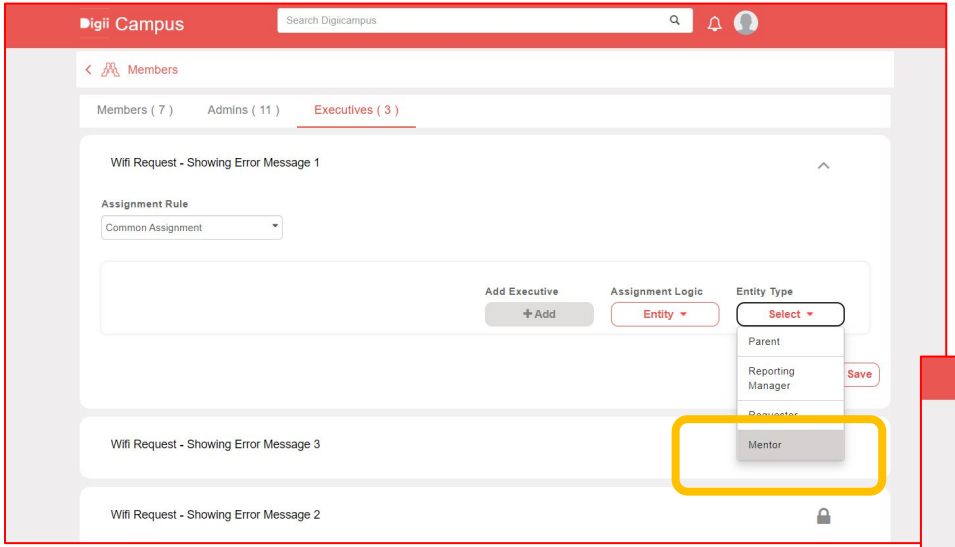

- Executives are similar to Admins, who can process requests raised by a member under a particular Service.
- Executive can also be made as ‘Default Assignee’ but he/she will not be able to re-assign the request to anyone.

Map Mentor And Mentee

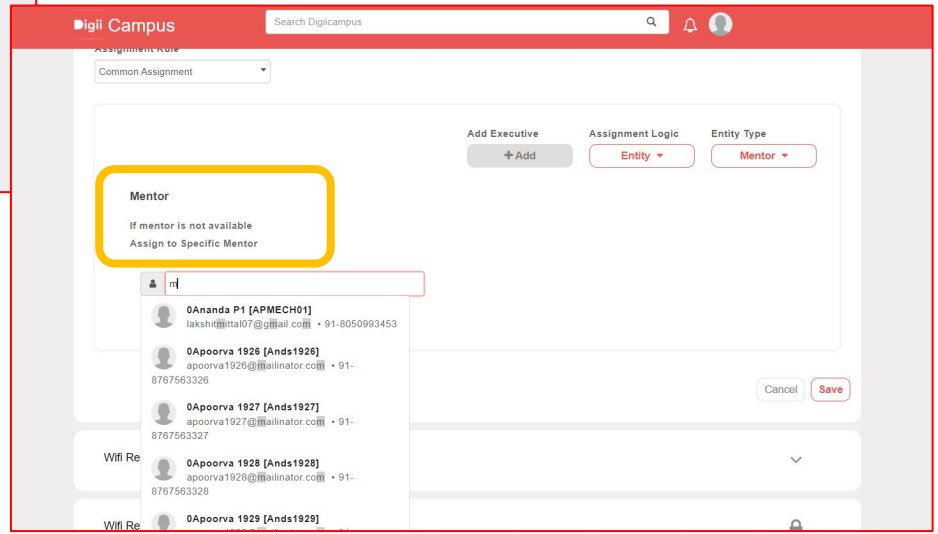

Go to the **edit** button then, select **entity** under assignment logic dropdown

Map Mentor And Mentee

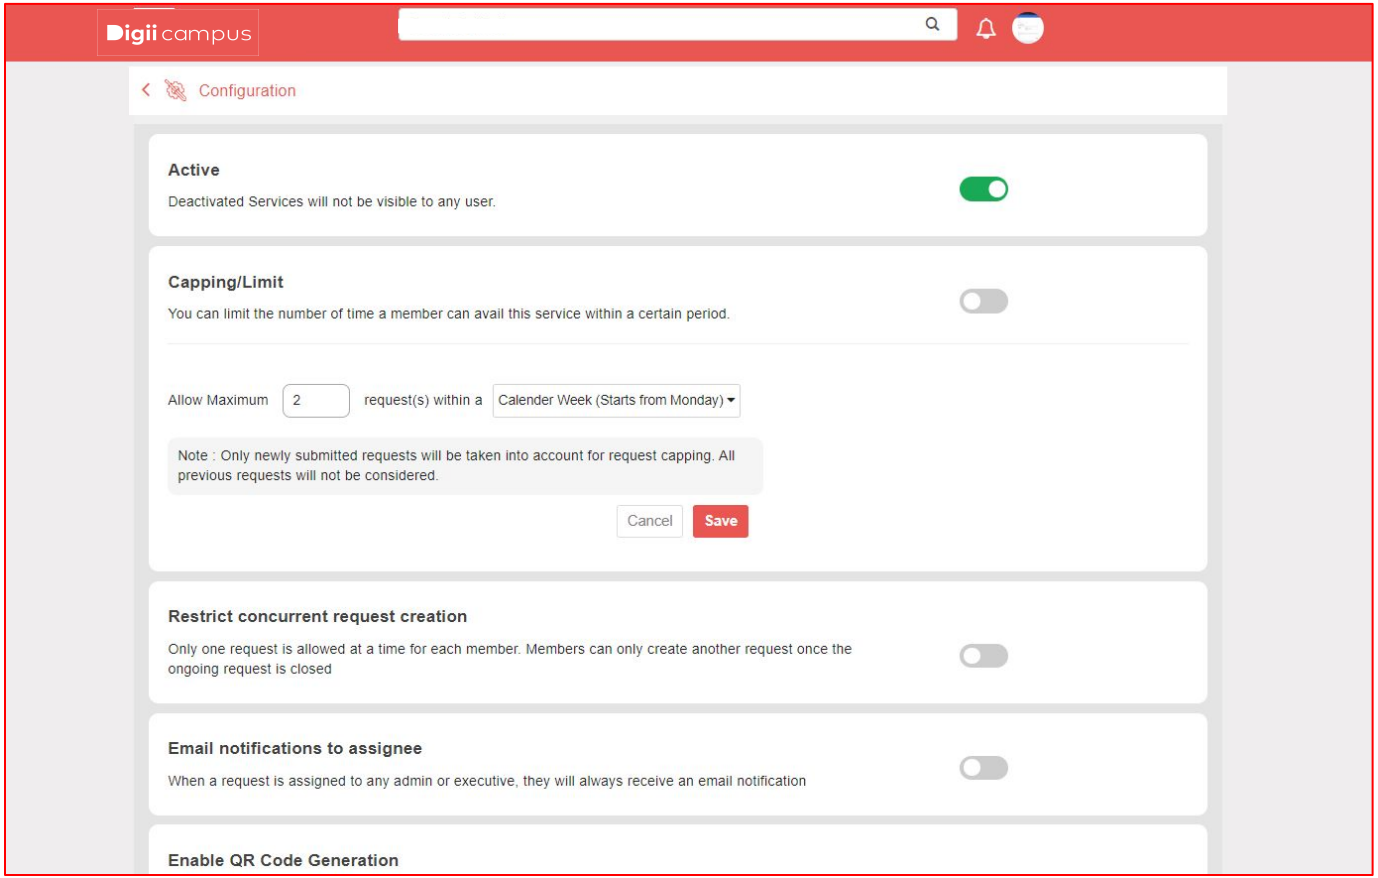

Select **mentor** as entity from the **entity type** dropdown

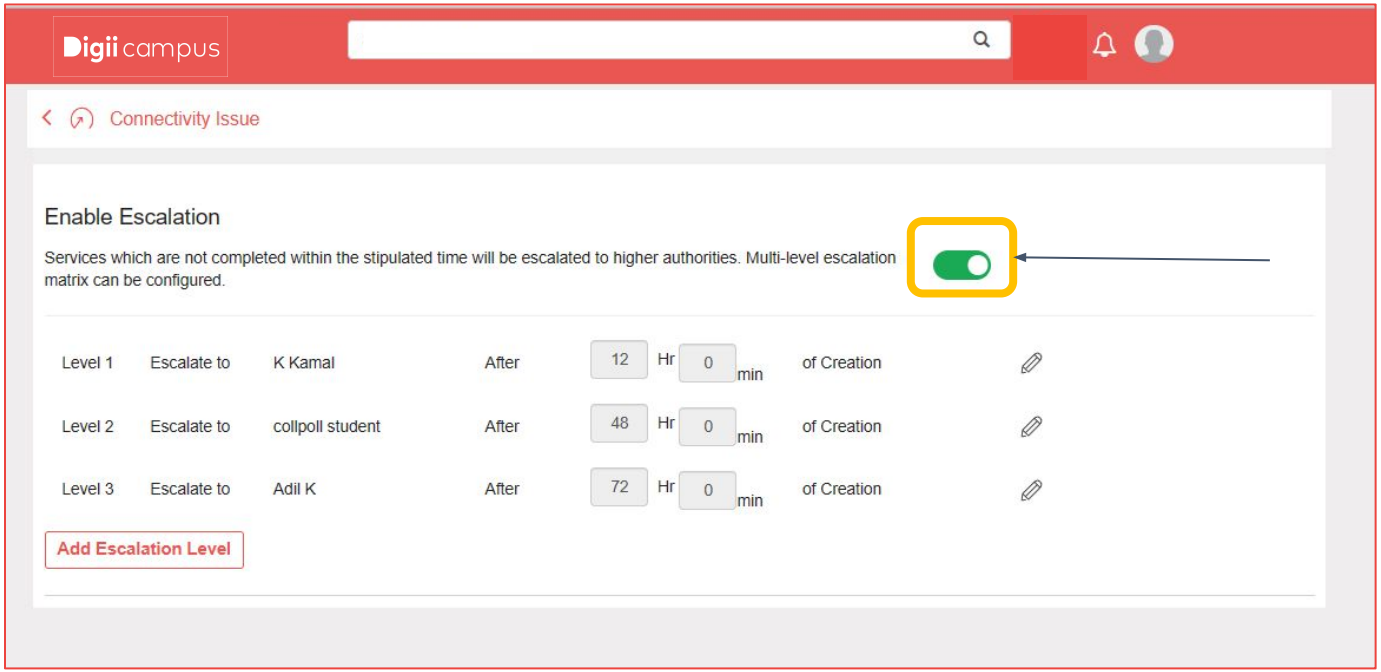

Search the mentor name/email id and **save**

Configuration Settings

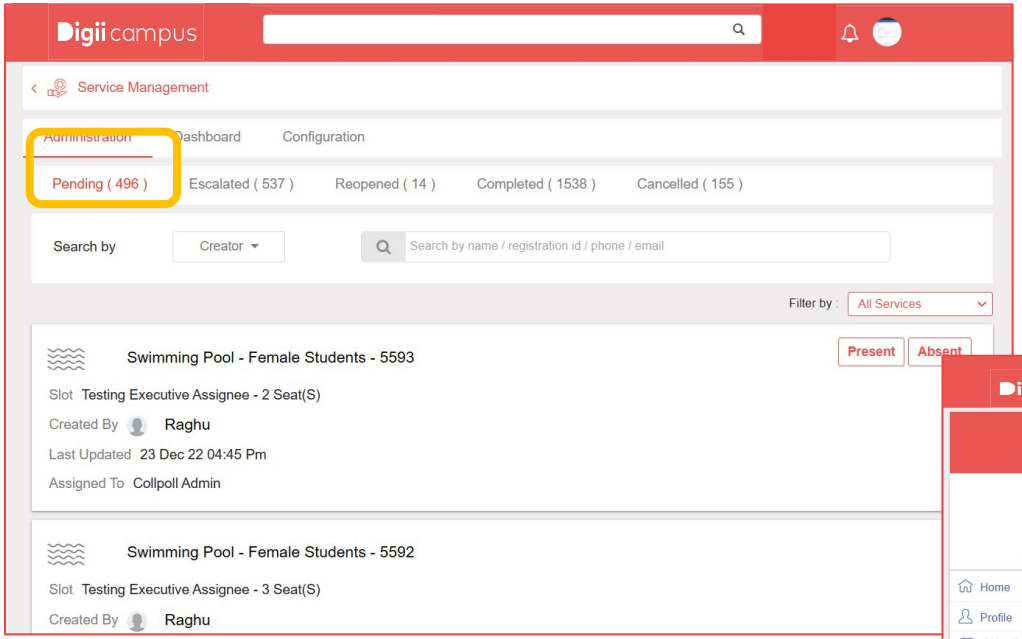

- All the Service-specific settings can be enabled/disabled under Configuration
- Capping allows you to limit the number of times a user can request a service within a time period

Configuration Settings

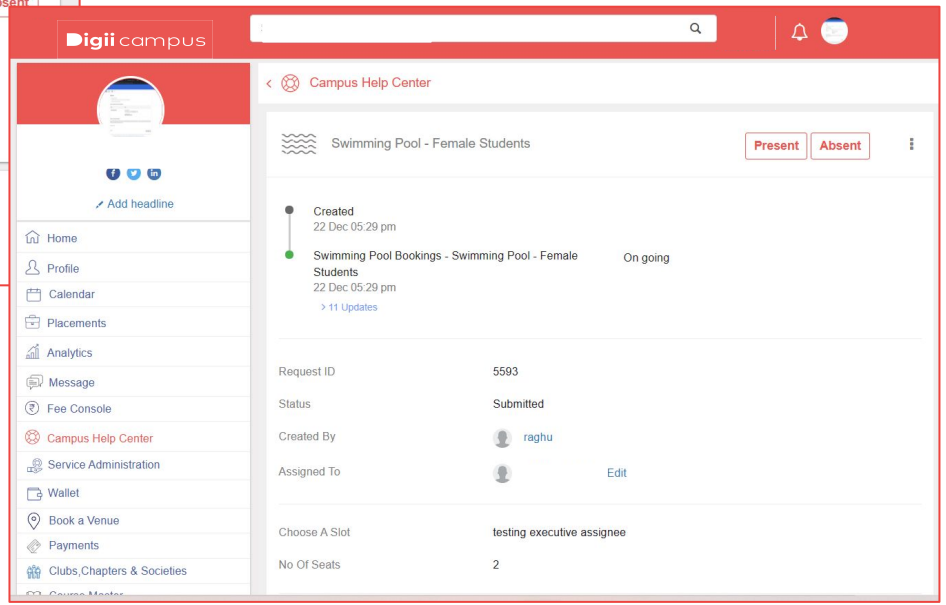

- You can add persons to whom the requests can be escalated, at different levels.
- You can also edit the settings.

Manage Pending Requests

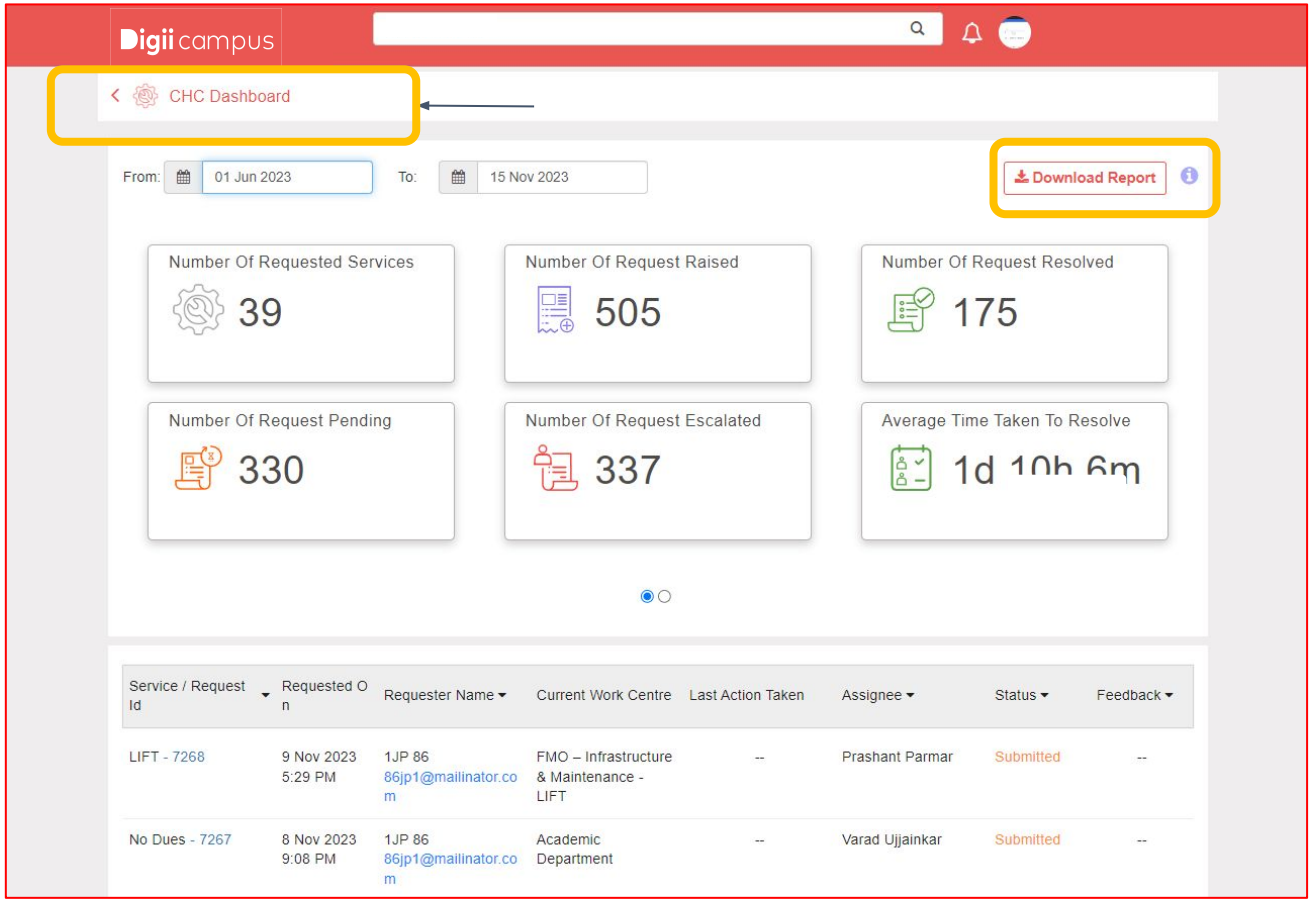

- When an Admin clicks on a pending request he will be able to take action on the request.

- Admins can re-assign the request to others by clicking on ‘Edit’ button in ‘Assigned To’ field.

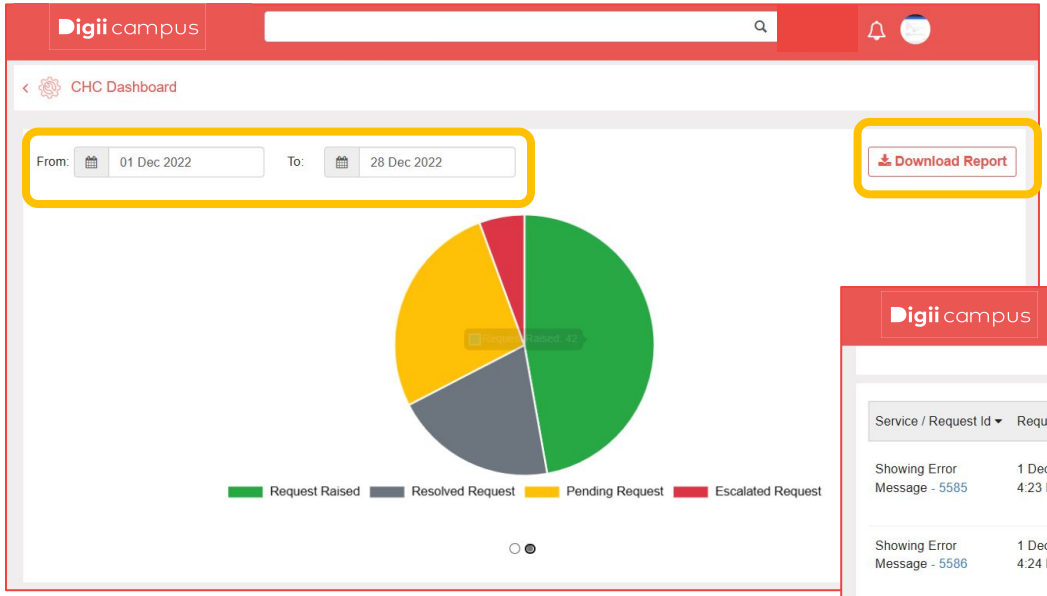

CHC Dashboard

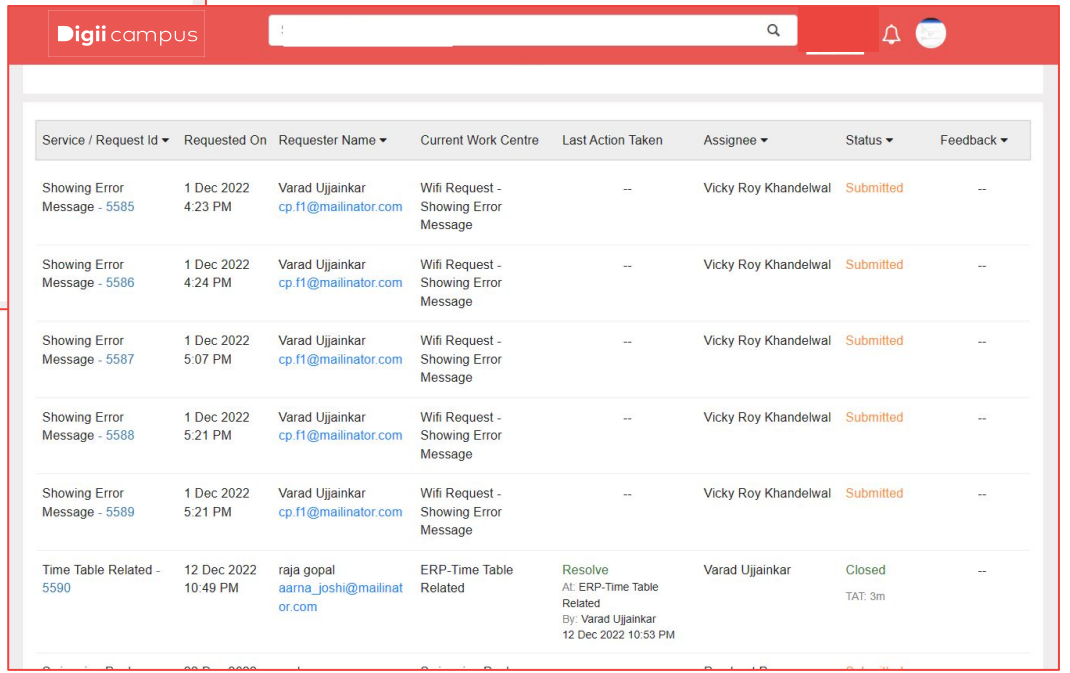

Go to **Dashboard** under **Service Administration** & select a service to download the report
