- Track The Gate Pass Analytics For All Stakeholders From A SIngle Dashboard

GATE PASS MANAGEMENT

Digiicampus Gate Pass Management is an automated module designed to monitor and maintain records of students and staff during their entry and exit from the institute premises. It helps track the complete duration of each visit and ensures proper record management for security and administrative purposes.

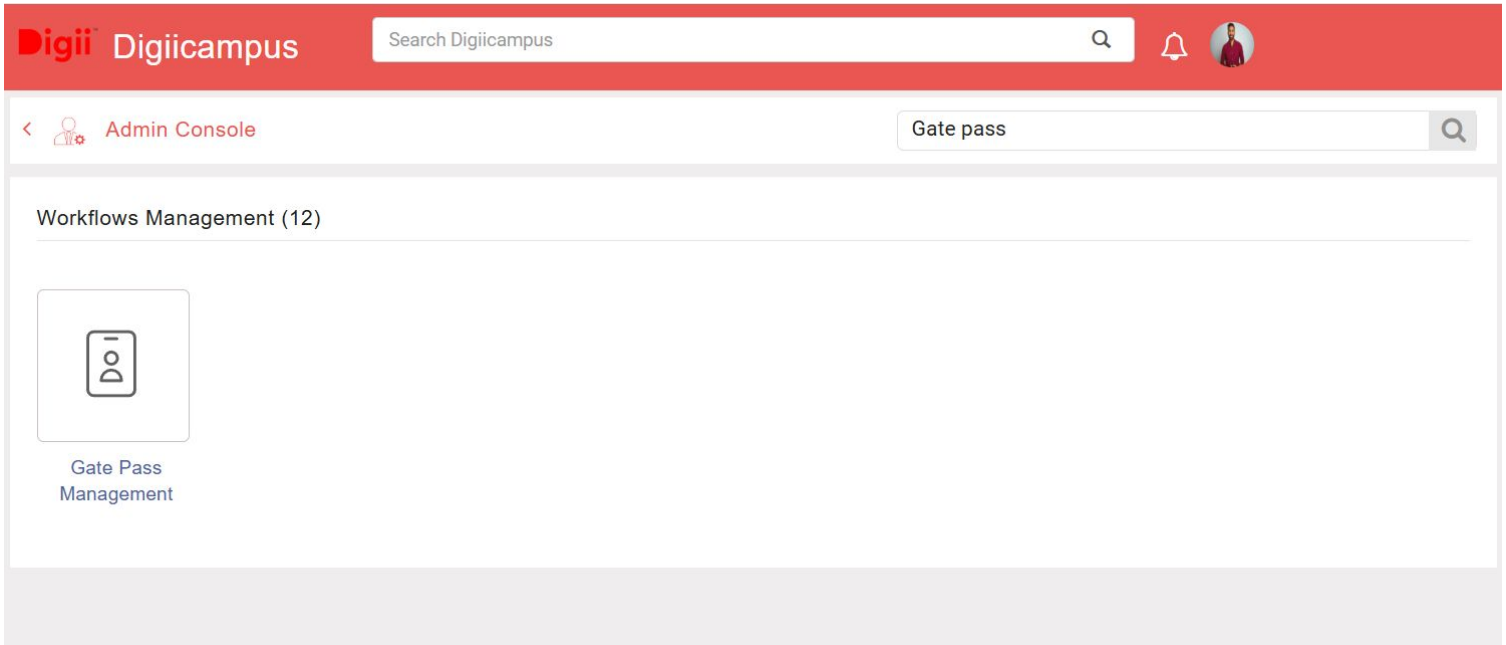

Login into the Admin Account

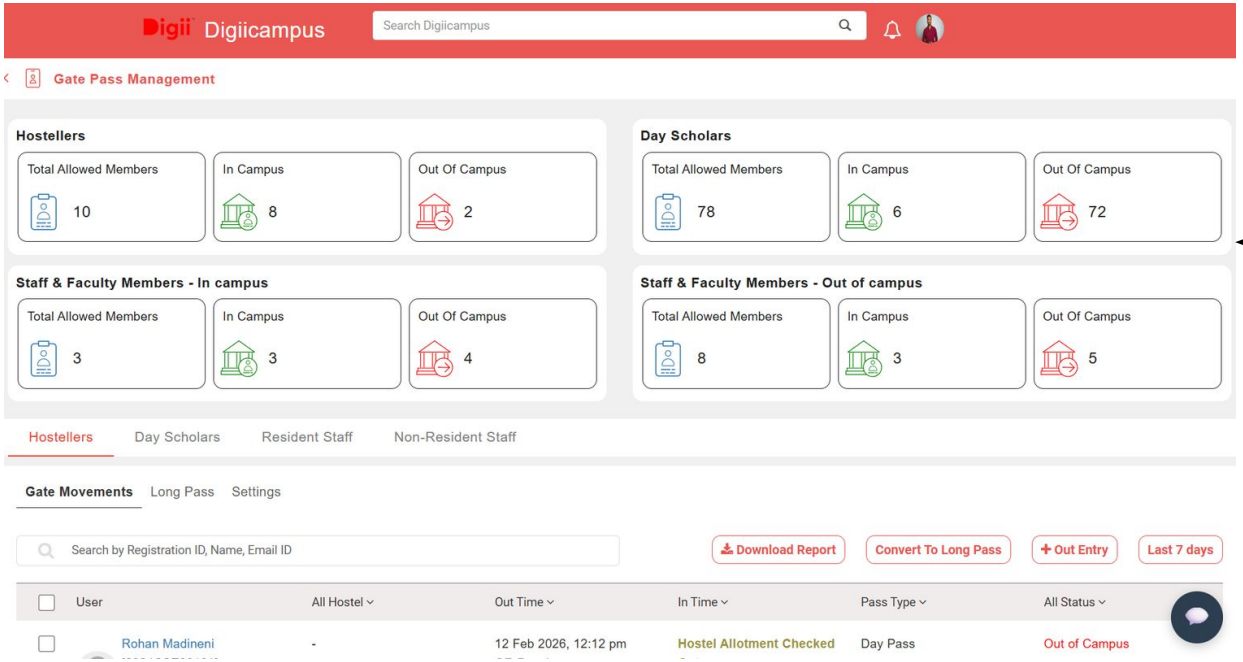

Navigate to the

Admin Console

Search for Gatepass Management

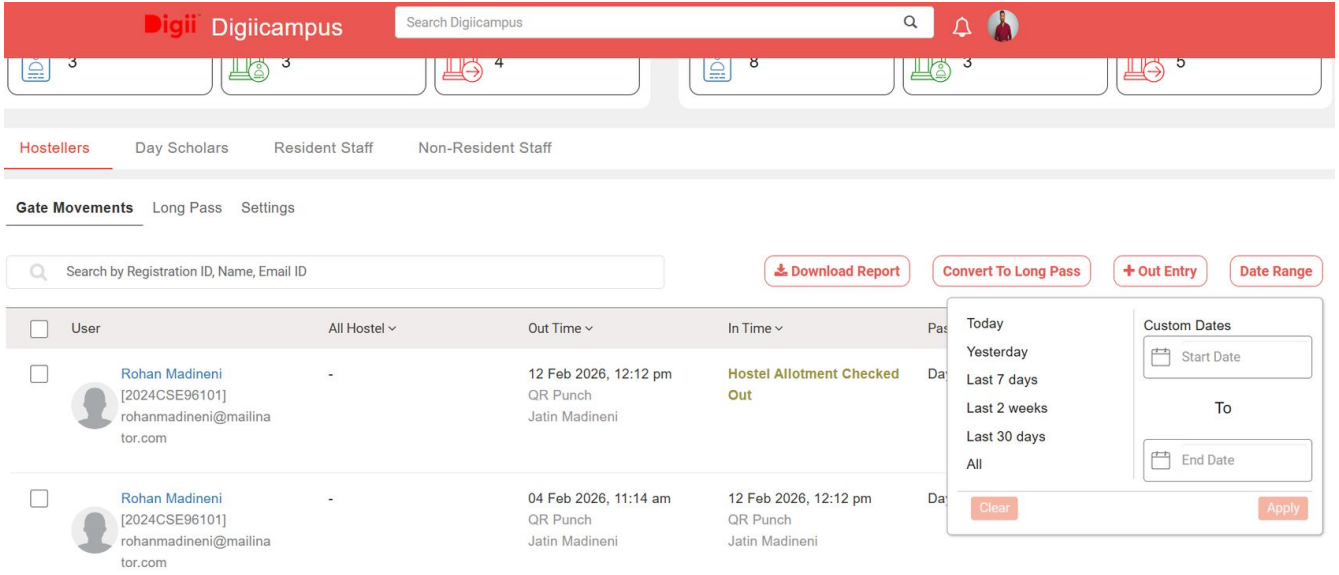

Home Page of Gate Pass Management

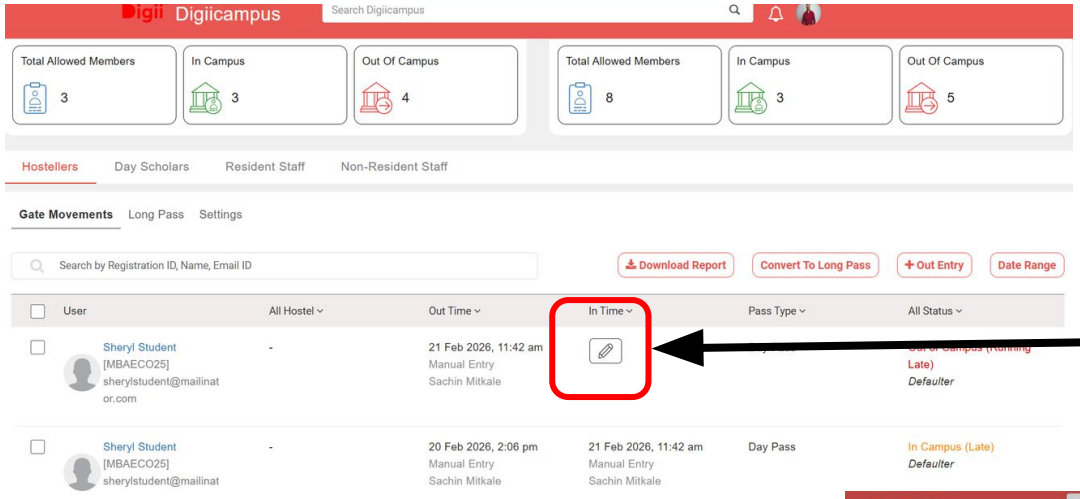

Track the Gate Pass data for hostellers, day scholars, faculty & staff from this dashboard

Track the Date Range

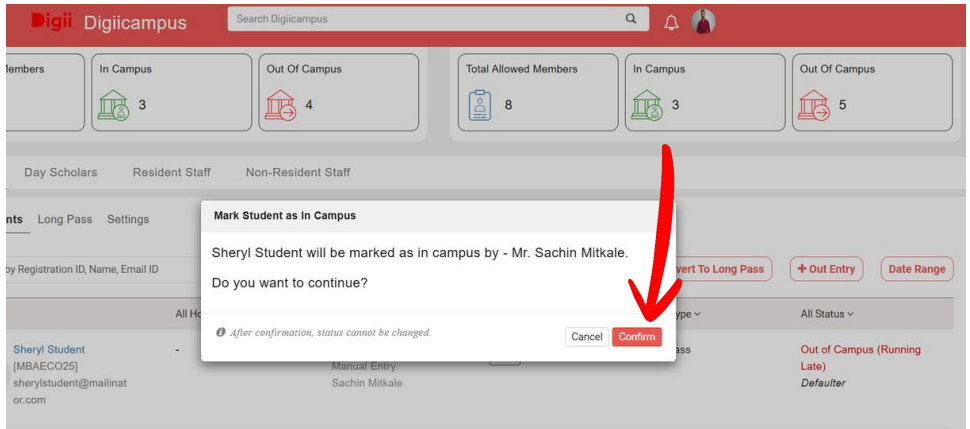

Select the date range to track & mark the entry & exit of the hostellers, day scholars, resident & non-resident staff

Gate Pass Management Entry/Exit Management

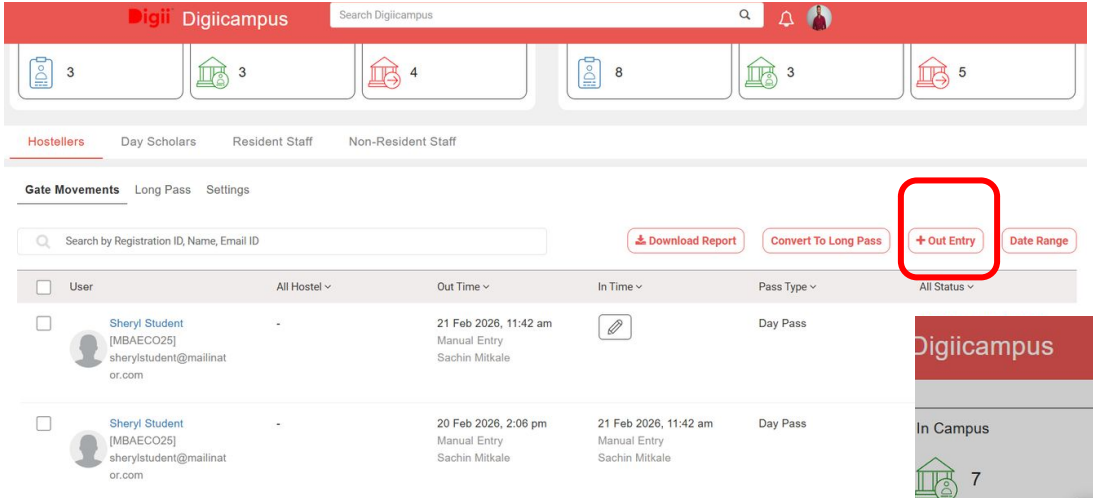

Mark the hosteller student as **"In Campus"** by clicking on the **Edit** icon

<u>NOTE</u> : After confirmation, the status cannot be changed.

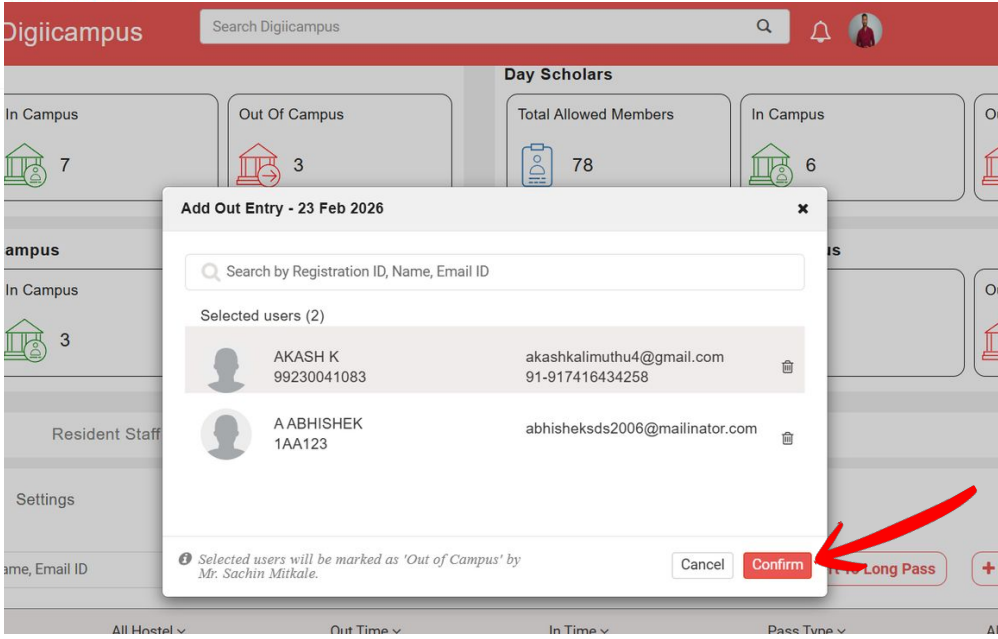

Gate Pass Management Entry/Exit Management

Digii campus

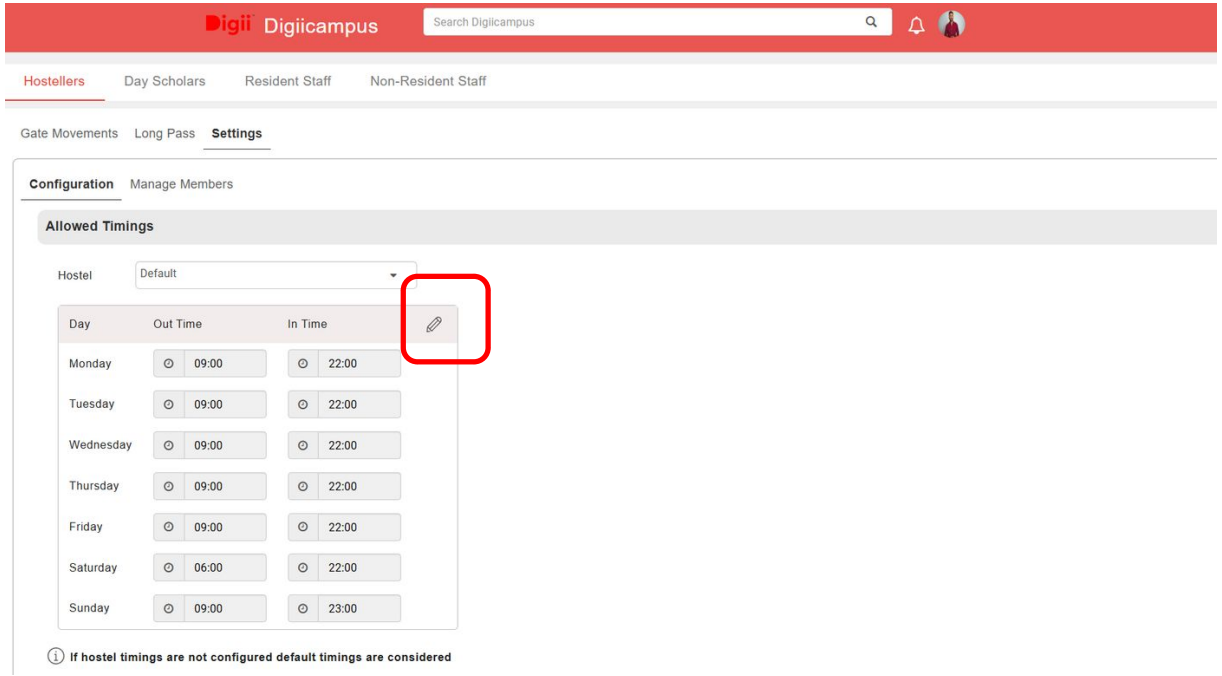

Go to out entry to mark multiple users out of the campus in single click.

Add the users then, confirm

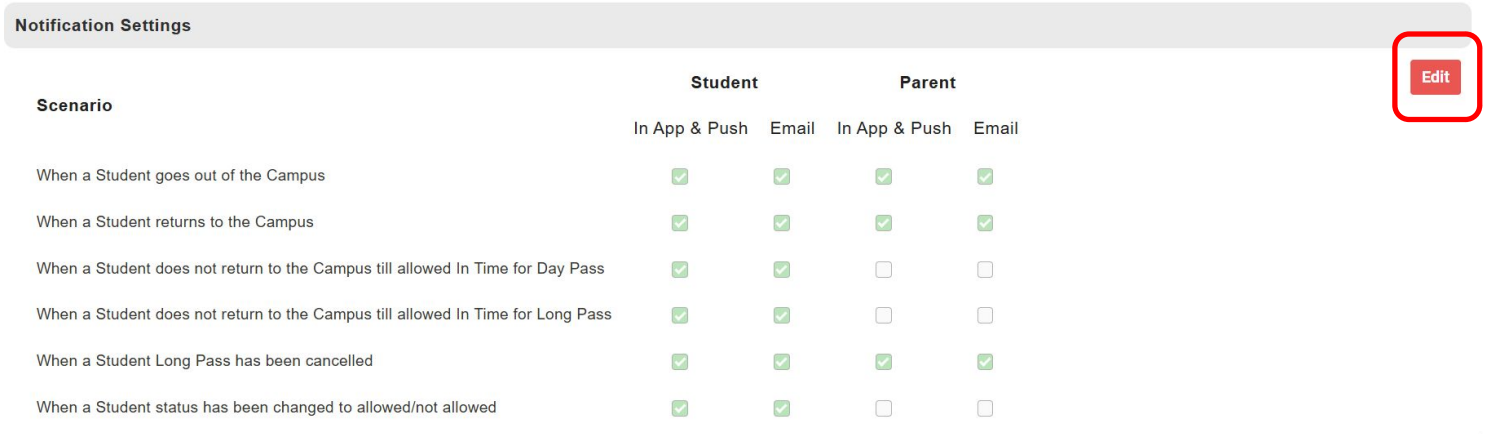

Timings Configuration

Under the Configuration tab, the admin can set the hostel entry (In Time) and exit (Out Time) timings for each day of the week. Select the required hostel, click the Edit (pencil) icon, update the timings for the respective days, and save the changes. These timings will be used to control and validate student hostel movement.

If hostel timings are not configured, the system will consider the default timings.

Notifications Settings

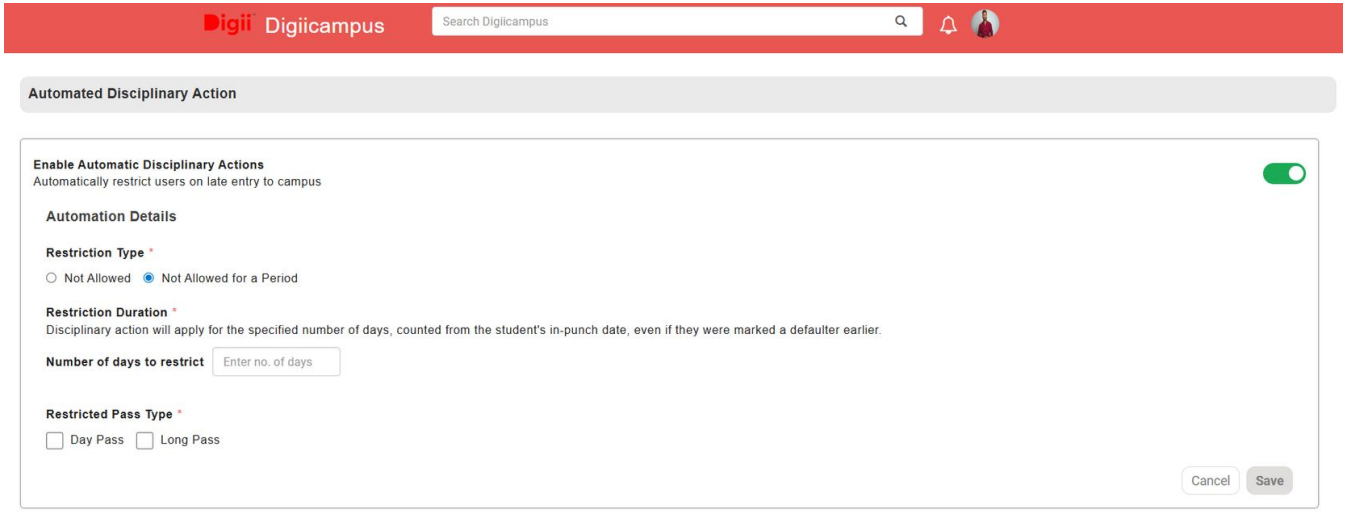

The Notification Settings section allows the admin to enable or disable alerts for student movement activities.

Notifications can be sent to Students and Parents via In-App/Push and Email.

Click Edit to select the required notification options for each scenario.

Automatic Late Entry Restriction Under Configuration

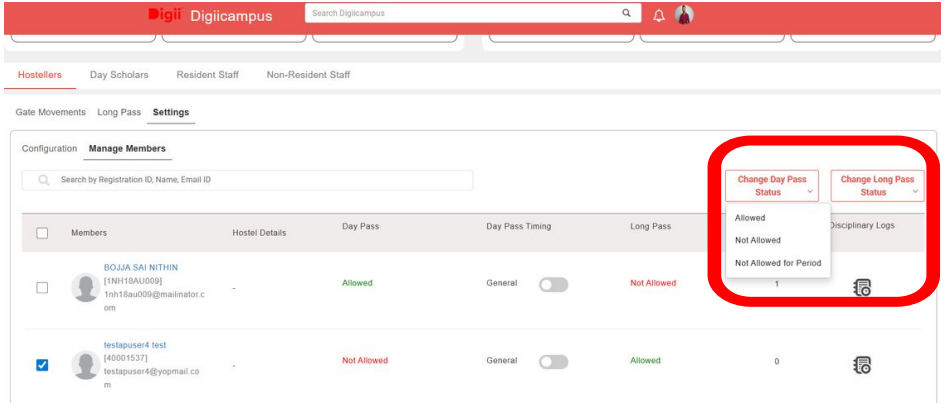

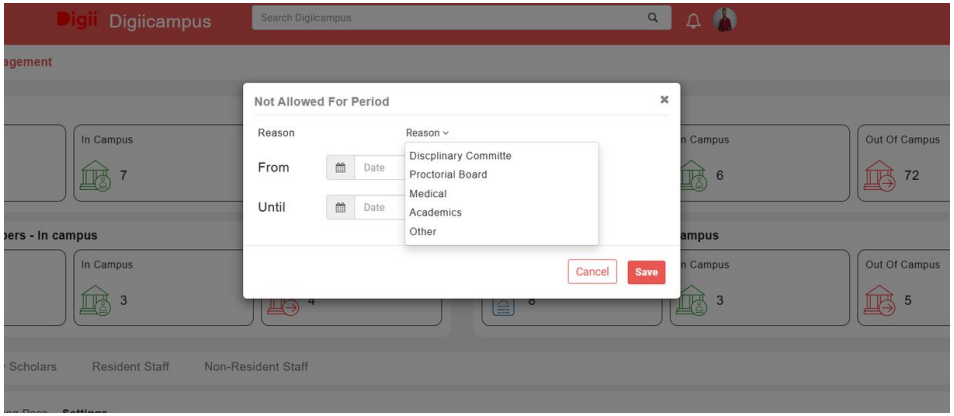

Automated Disciplinary Action
This setting allows the system to automatically restrict students for late entry to campus.

- **Enable Automatic Disciplinary Actions to activate the rule.**
- **Select the Restriction Type (Not Allowed / Not Allowed for a Period).**
- **Enter the number of days for restriction (if applicable).**
- **Choose the Restricted Pass Type (Day Pass / Long Pass).**

Once saved, the system will automatically apply restrictions based on the configured settings.

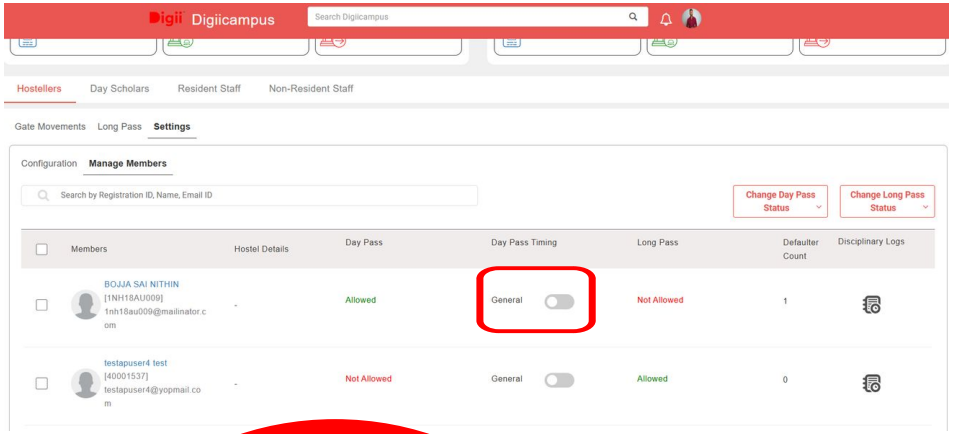

Manage Members – Pass Status

In the Manage Members tab, the admin can update the Day Pass and Long Pass status of students.
By selecting one or more students, the admin can change their status to Allowed, Not Allowed, or Not Allowed for a Period. If Not Allowed or Not Allowed for a Period is selected, a reason can also be provided.

Day Pass Timing (Custom)

The admin can enable the Day Pass Timing toggle to set custom allowed timings for a member.

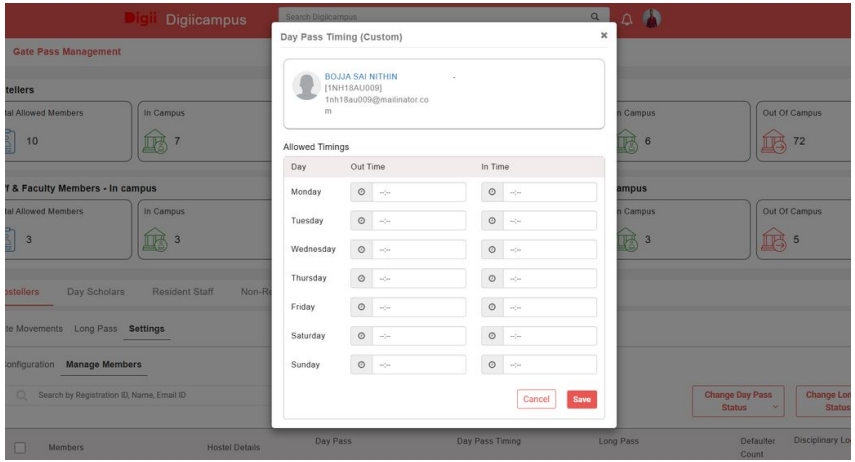

For each day (Monday–Sunday), the admin can define:

Out Time – permitted exit time

In Time – permitted return time

After setting the timings, click Save to apply the changes.

The system will allow or restrict movement based on the configured timings.

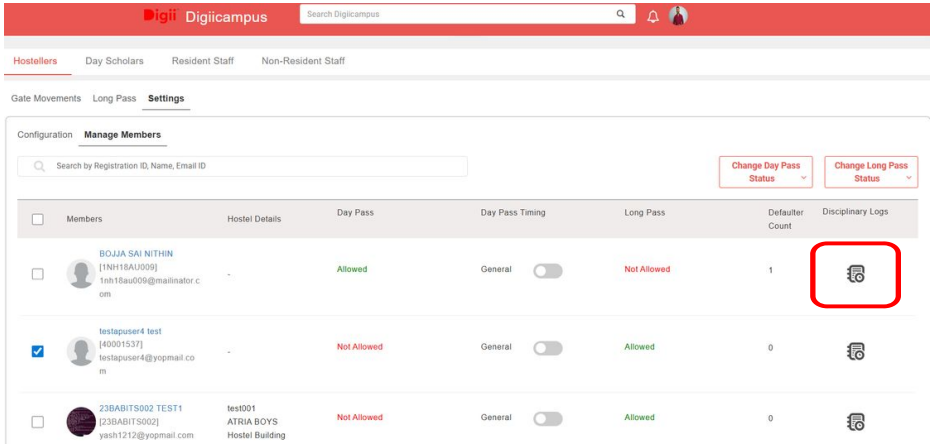

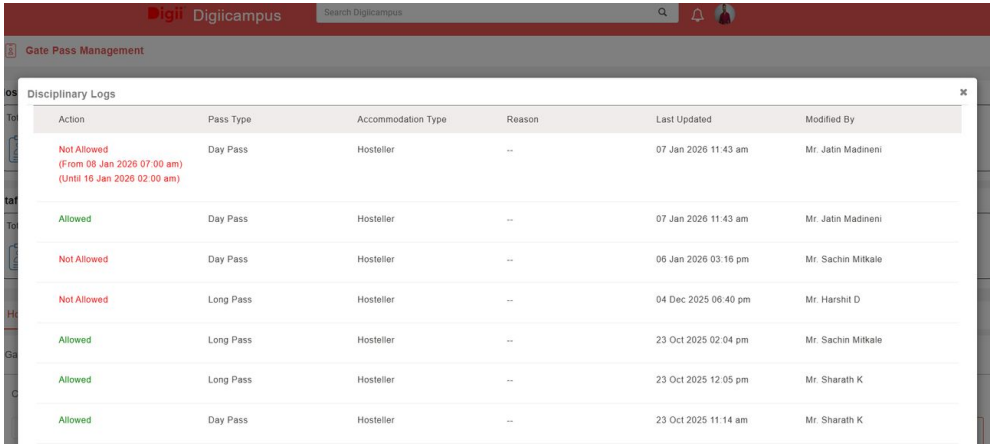

Admin Can View Disciplinary Logs

In the Manage Members section, you can view Disciplinary Logs from the last column.

Each member row has a Disciplinary Logs icon on the right side.

Click the icon to view the complete history of pass-related actions for that student.

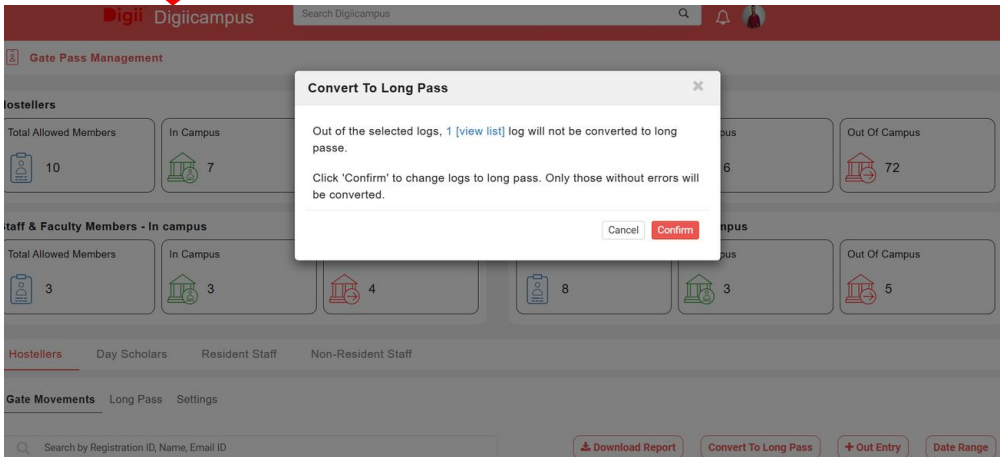

It shows details such as Allowed/Not Allowed status, pass type, restriction dates, last updated date, and modified by.

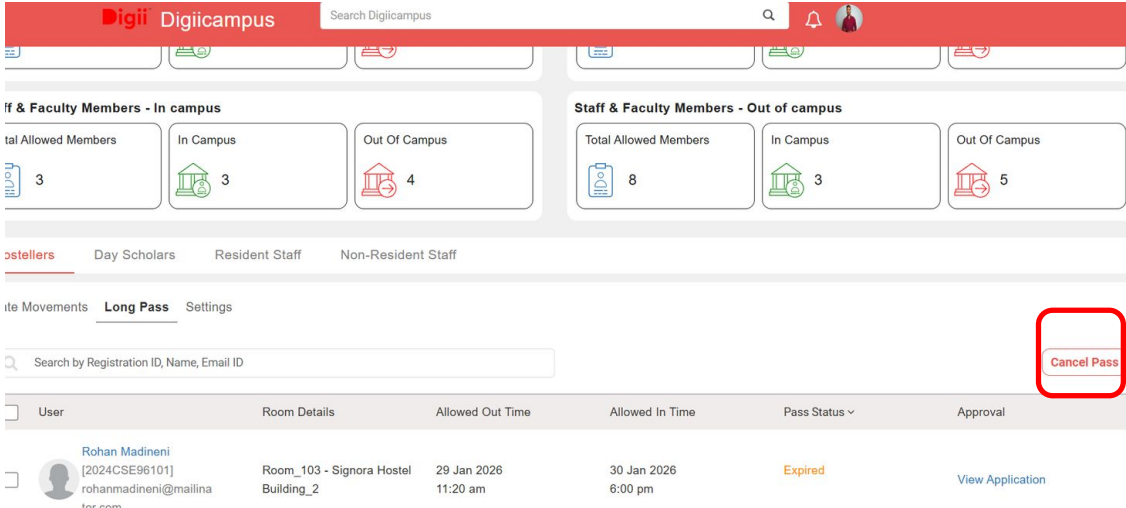

This helps admins quickly track and review any disciplinary restrictions applied to a member

Long Pass Management & Settings

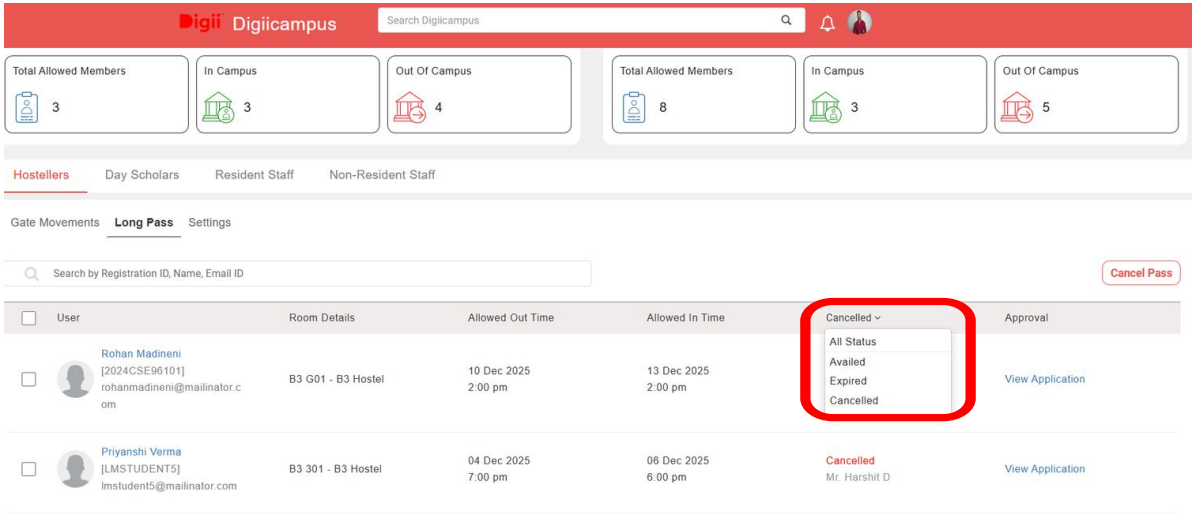

Provision to convert day pass to long pass

Manage long-pass i.e. provision to cancel by admin

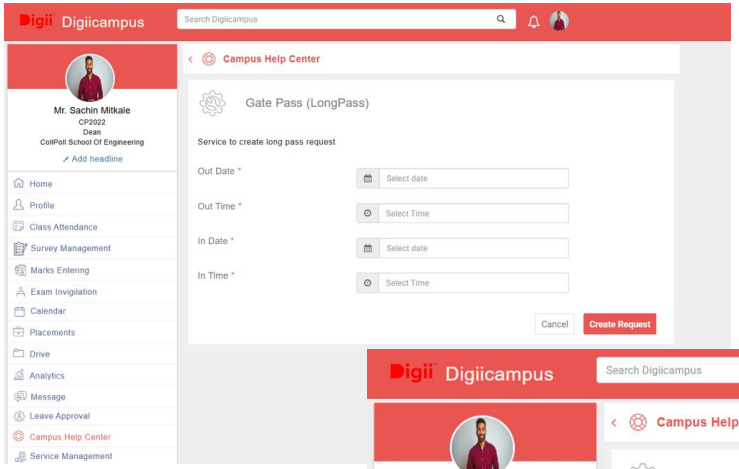

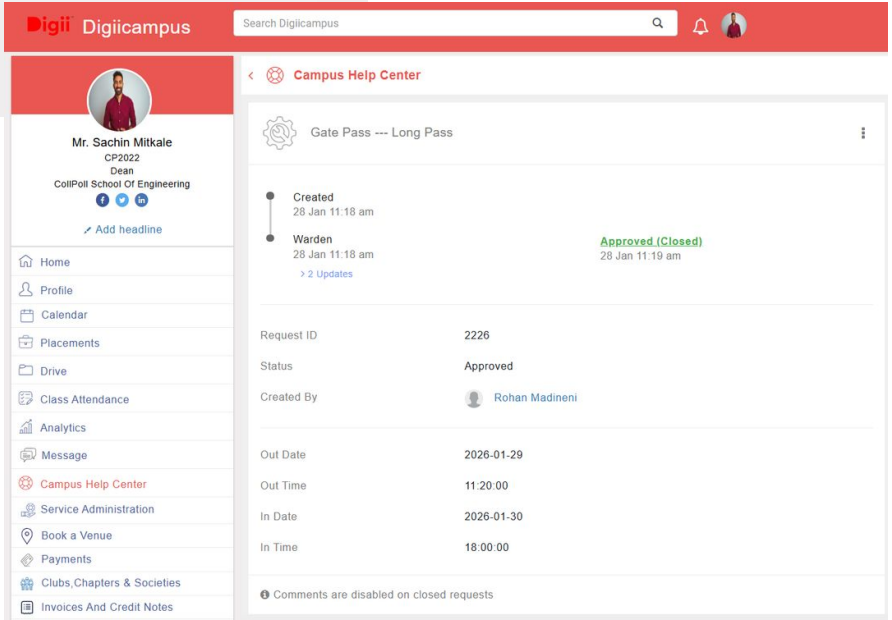

Long Pass Status

Under the Long Pass tab, the **pass status** can be viewed as Availed, Expired, or Cancelled.
If the pass is cancelled, the cancellation reason will be displayed.
By selecting View Application, the approval details and current status can be checked.

Long Pass Request – Campus Help Center

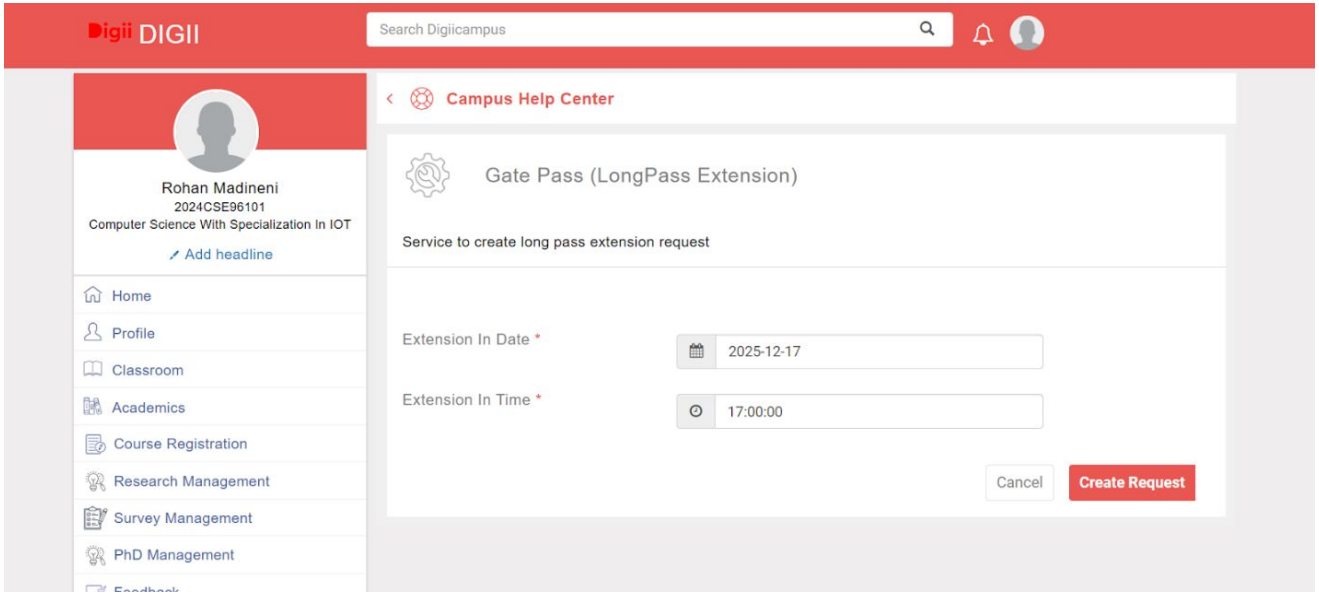

The Long Pass request can be created through the Campus Help Center as a service request form. Students can submit a request by selecting the Out Date & Time and In Date & Time, and click Create Request.

Once submitted, the request will be sent to the concerned admin for approval.

This form is customizable and can be configured as per the institution's requirements.

Note: Students must be enabled for Long Pass under Settings. Only then will they be able to raise a Long Pass request.

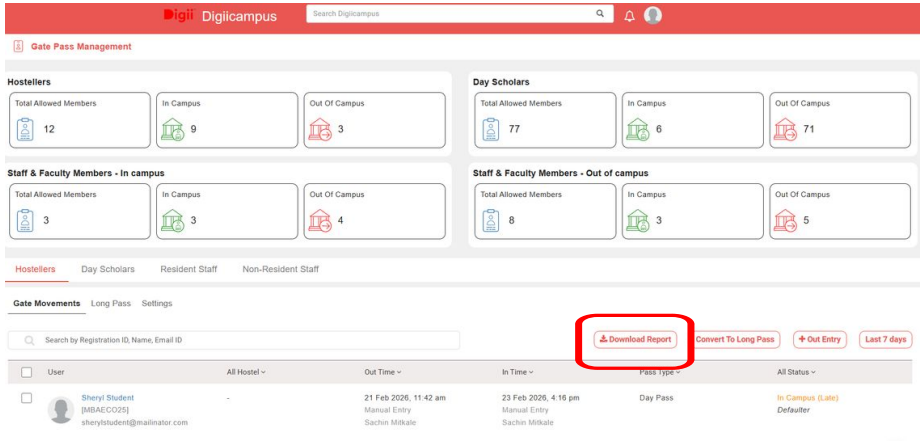

Gate Pass Extension Request Configuration

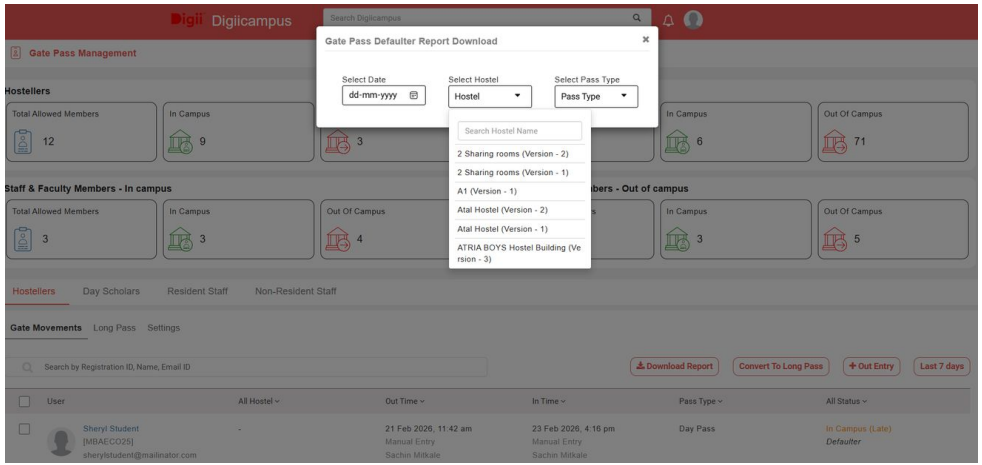

The Gate Pass Extension feature allows students to request an extension for their approved Long Pass. If a student is already on a Long Pass and is outside the campus, they can submit a Gate Pass Extension request to extend their return date or time. The request form is customizable and can be designed according to the institution's requirements. The admin can review the request and either approve or reject it.

Note: This feature will be available to students only if it is enabled by the institution.

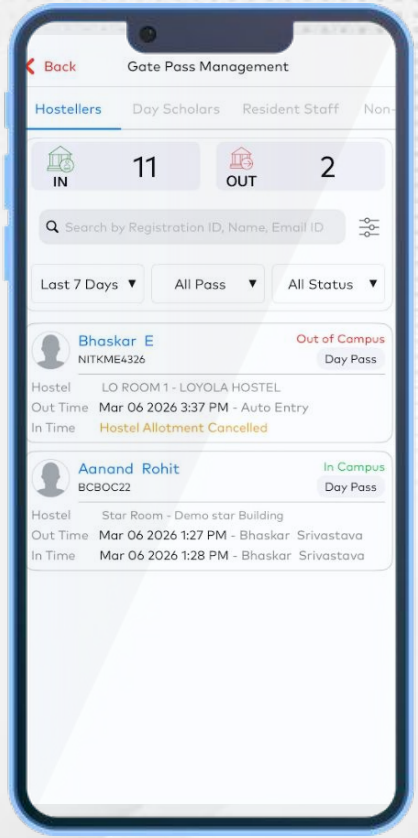

Gate Pass Reports Download

On the Gate Pass home page, the admin can download reports by applying filters such as date range, hostel, and pass type. After selecting the required criteria, the admin can generate and download the report.

BENEFITS OF USING THE GATE PASS MANAGEMENT SYSTEM!

Easily monitor all the entry/exit data from one place.
Get all the information organized as per your institution's requirement

A gate pass management system eliminates the challenges posed by paper passes.
With Digiicampus' gate pass management system, you can efficiently and effectively track any number of campus entries/exits with time duration.

Easily mark multiple users as in/out of the campus within seconds.
Customize the allowed timings for entry/exit of the users

Send real-time notifications to parents about how much time their child is spending in/out of the campus
