- ☑ Add New Building

Admin Privileges

- ☑ Infrastructure Management

INTRODUCTION

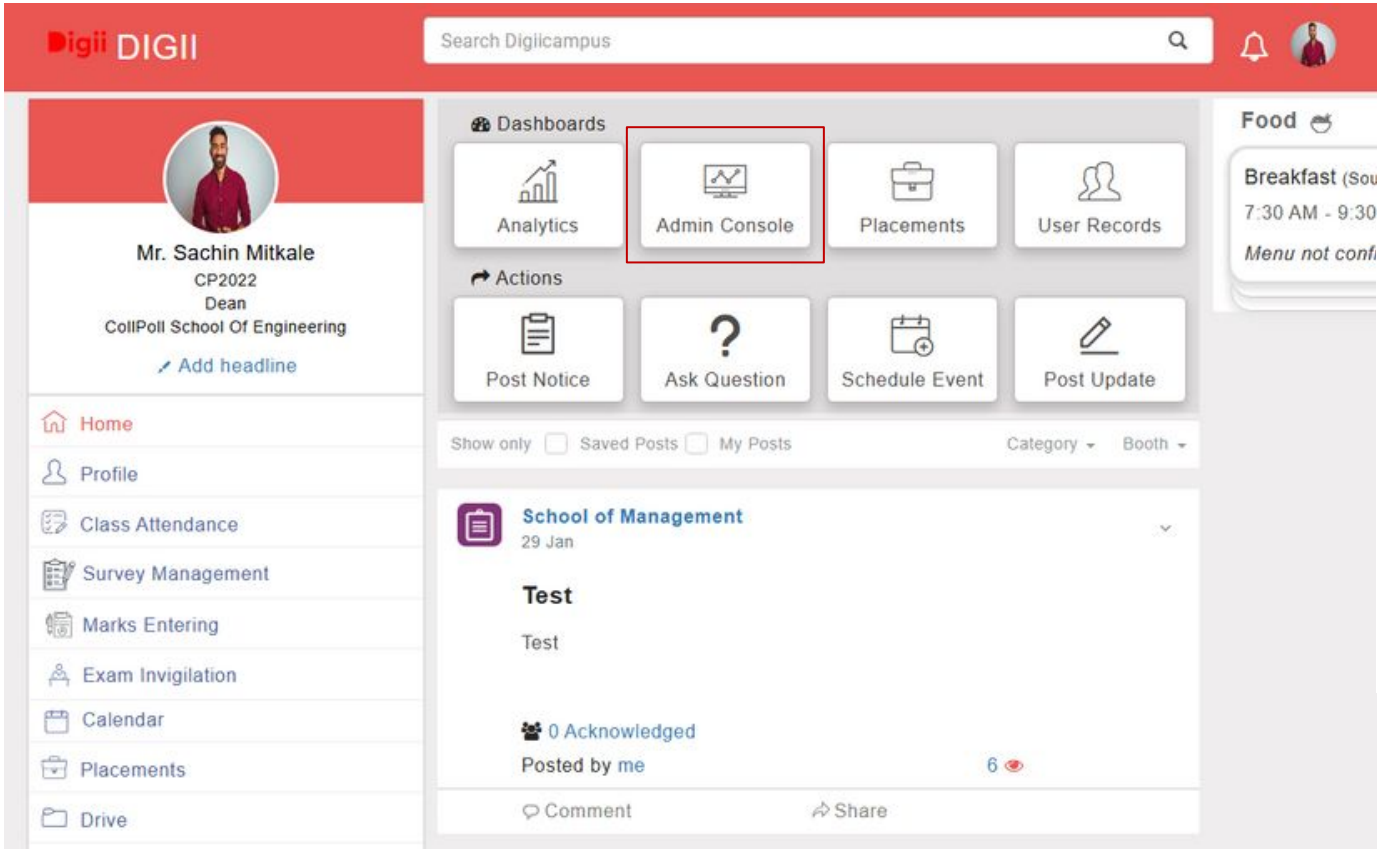

Digii campus

- Infrastructure Management is like a Database of all the Infrastructure present in the Institution.

- All the details about various buildings within the campus like Departments, Classrooms, Messes, Hostel Rooms, Library, Labs and all the facilities present in these buildings are maintained in Infrastructure Management.

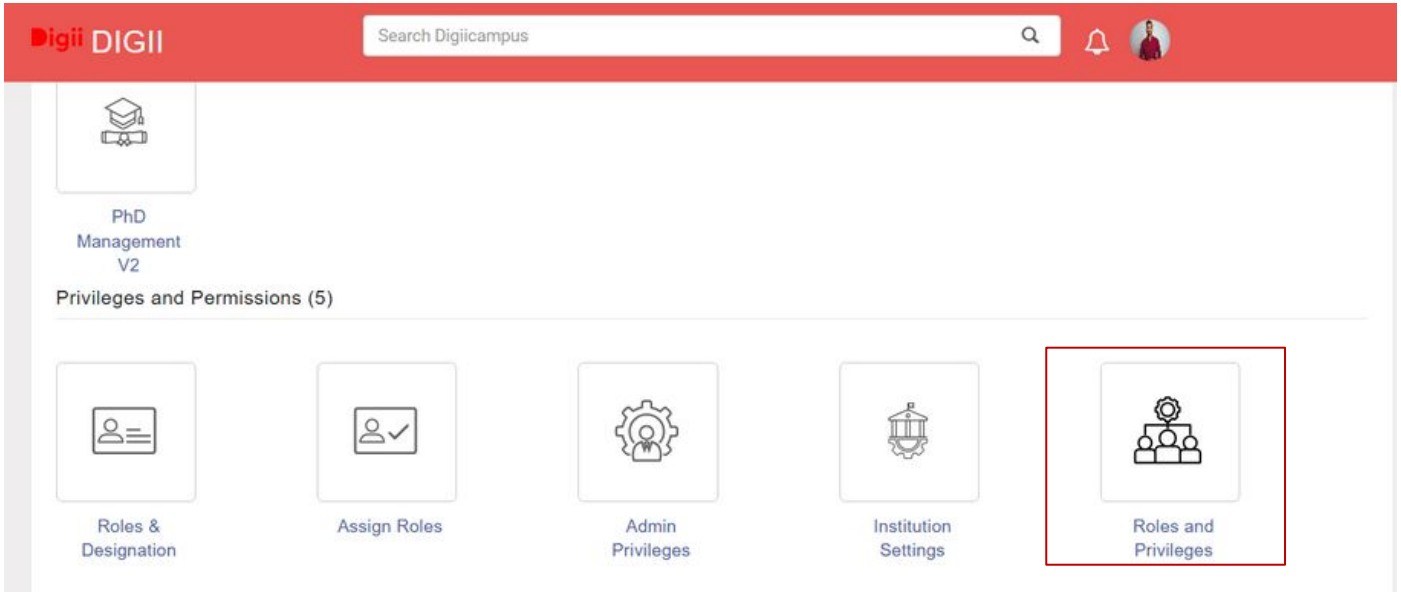

- These details can be used in other Modules like Hostel Management, Mess Management, Venue Booking etc.

Navigate to Admin Console

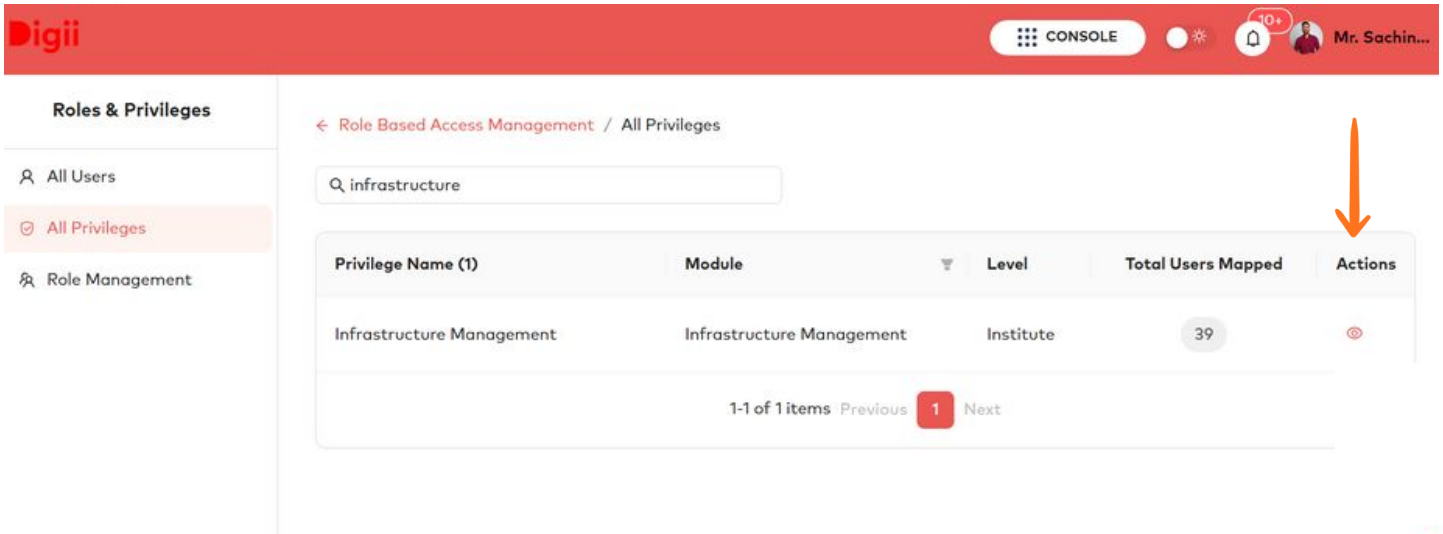

Login into the Admin Account go to **Admin Console**

Roles and Privileges for Infrastructure Management

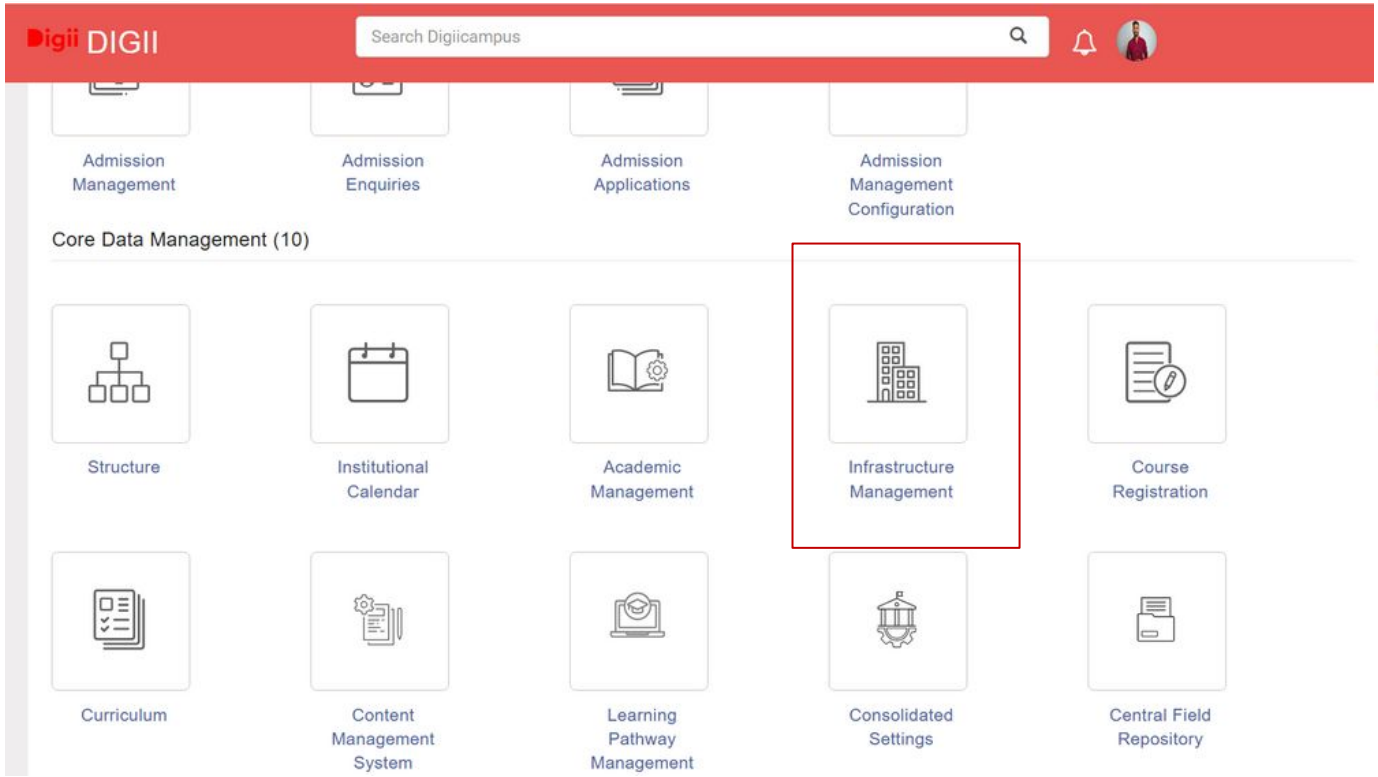

Go to **Roles and Privileges** under Admin Console

Privileges for Infrastructure Management

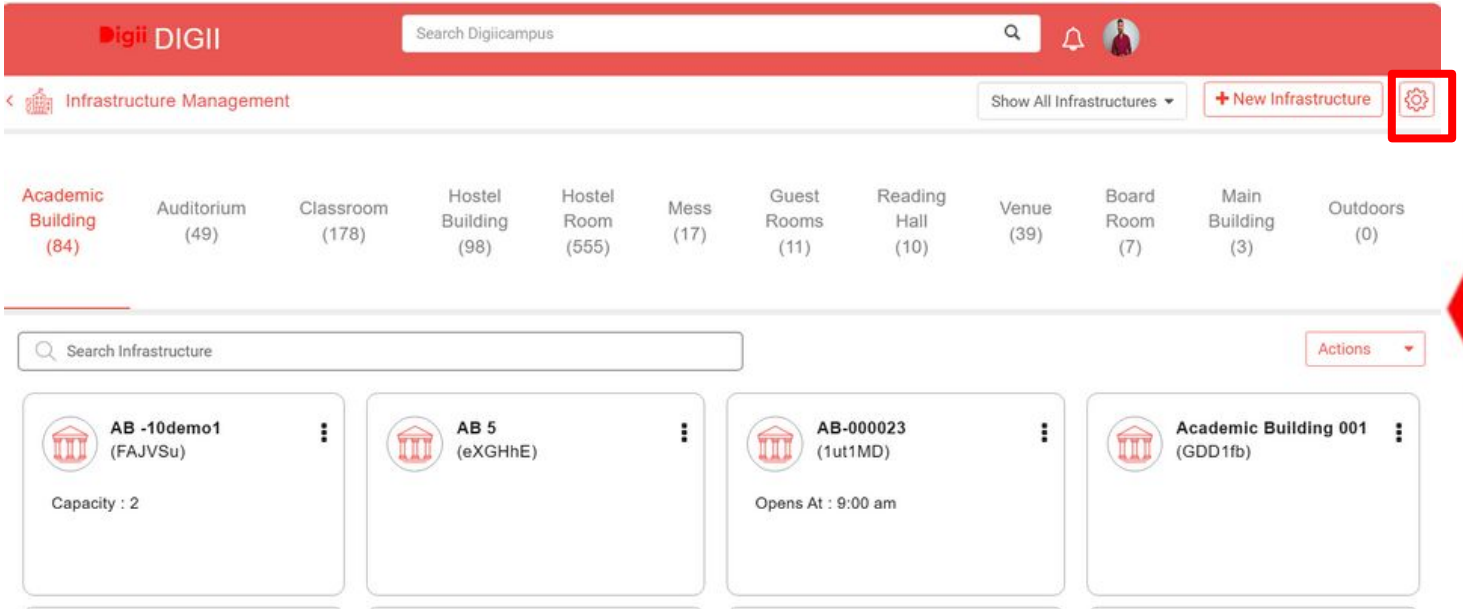

In the **All Privileges tab**, search for Infrastructure, click **Actions**, and add the required admin.

Navigation to Infrastructure Management

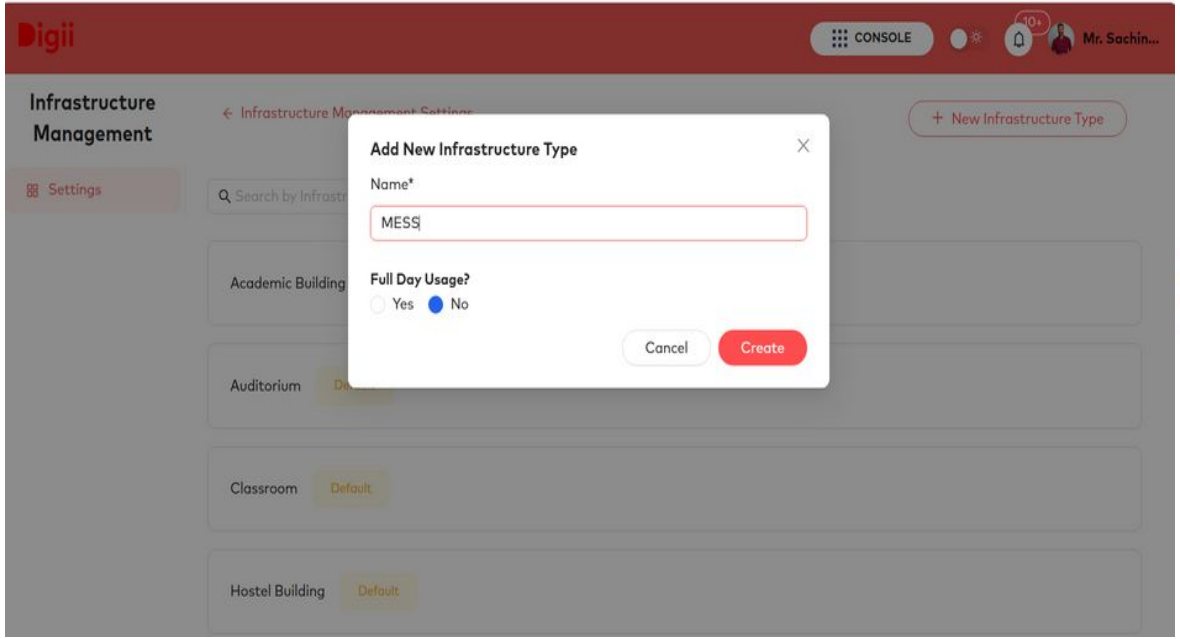

Go to **Infrastructure Management** under **Admin Console**

Add Infrastructure Type

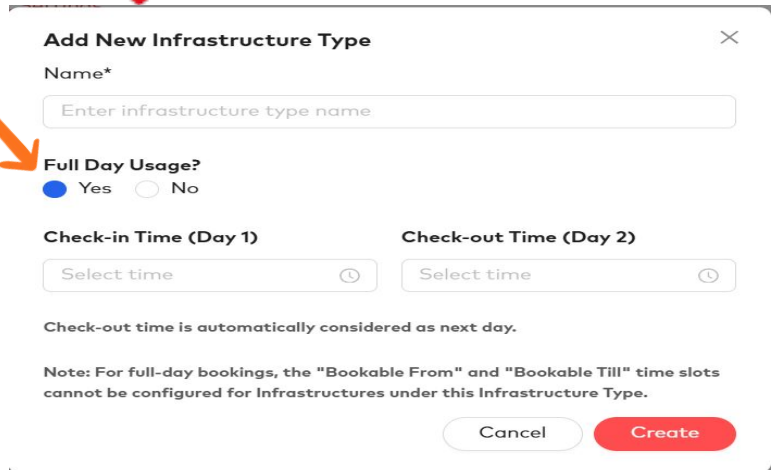

Go to **Settings** to add a new infrastructure type

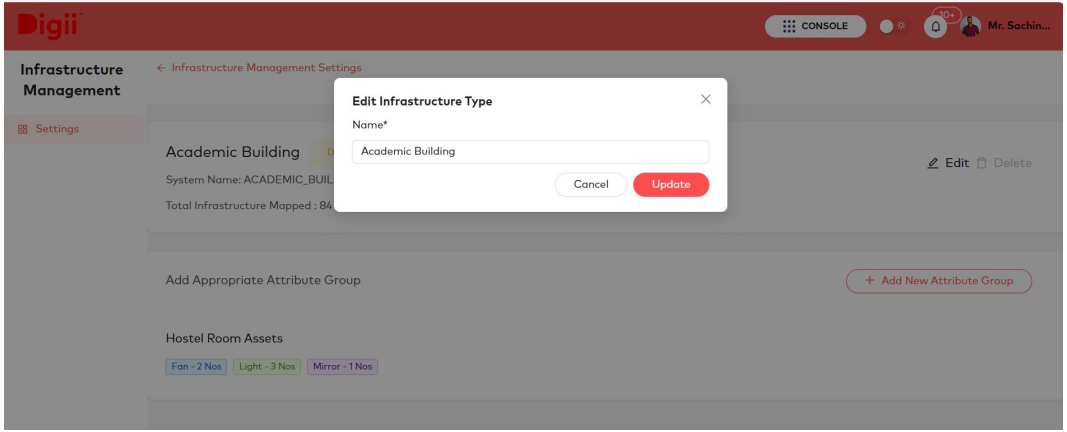

Add Infrastructure Type

Enter the name of **infrastructure type** & click on create

Add Infrastructure Type

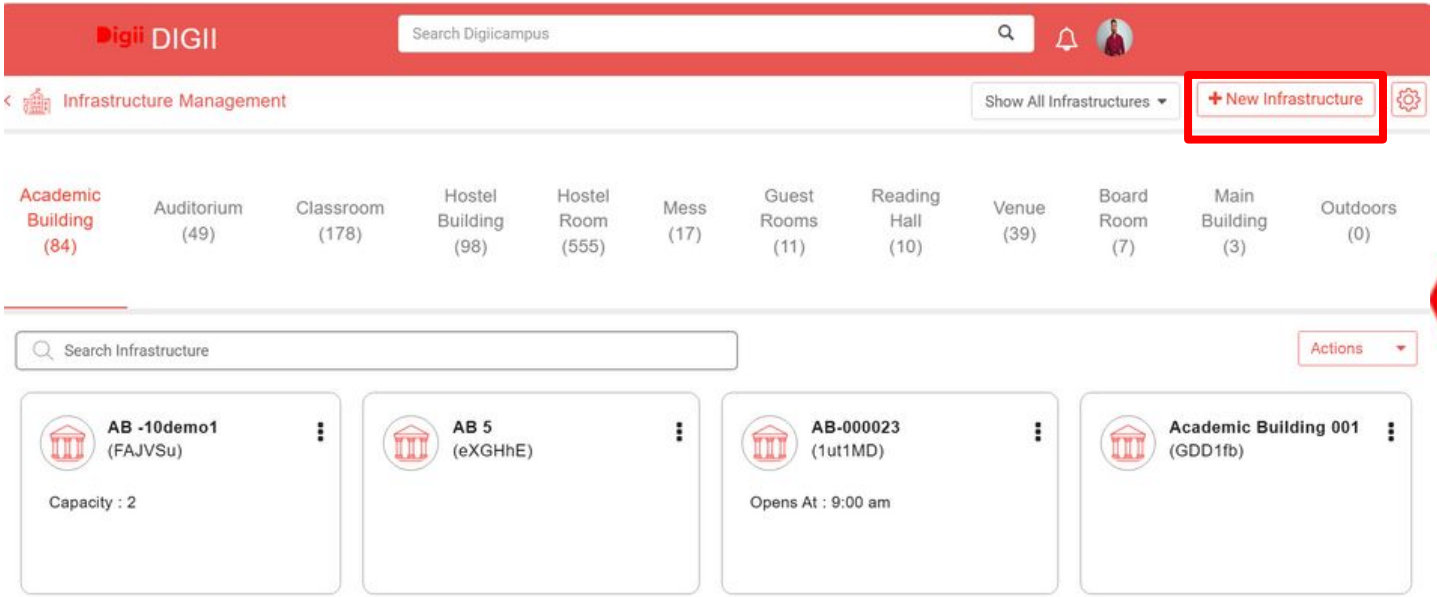

- **Full Day Usage – Yes:**
  Use this option for facilities like guest rooms or custom infrastructure types that require check-in and check-out. When enabled, **Check-in and Check-out timings are mandatory**. The system automatically treats the check-out as the **next day of check-in**, and same-day check-out or a check-out earlier than check-in is not allowed.

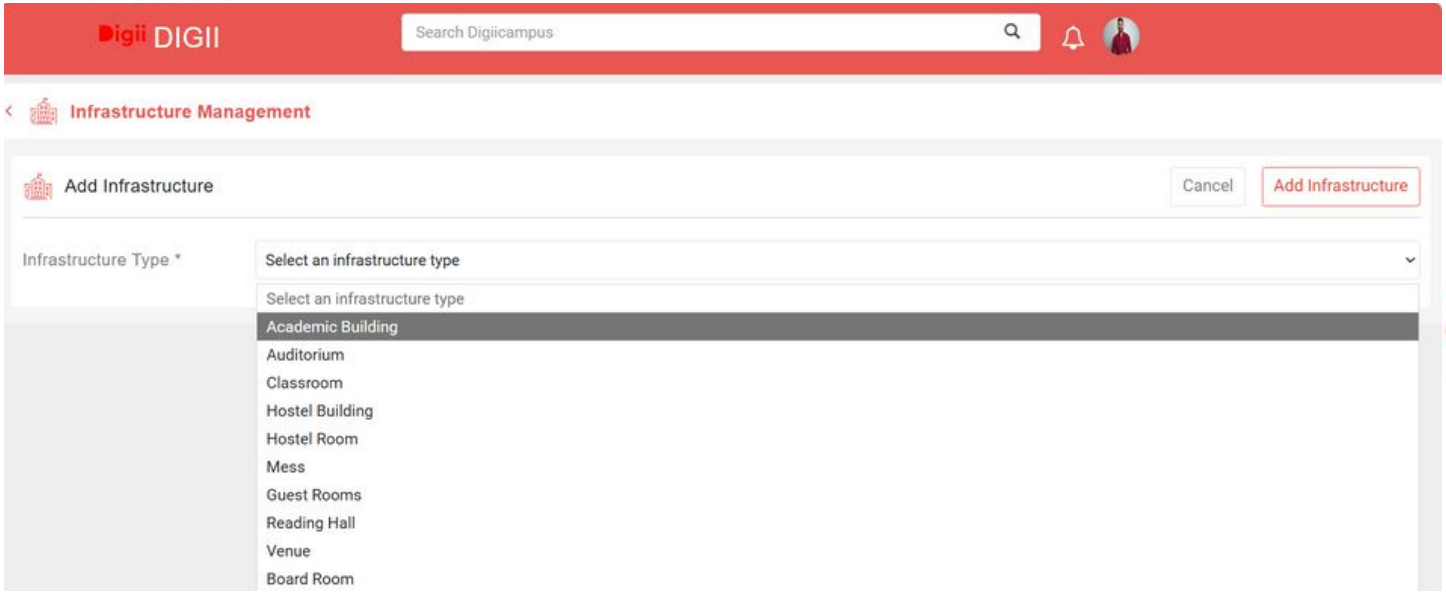

- Admins can **edit** and rename default infrastructure types to match institutional terminology (e.g., Guest House → Executive Housing, Library → Reading Room).
  The system will still treat them as their original core infrastructure type in the backend

Add New Infrastructure

Click on **+ New Infrastructure** Button

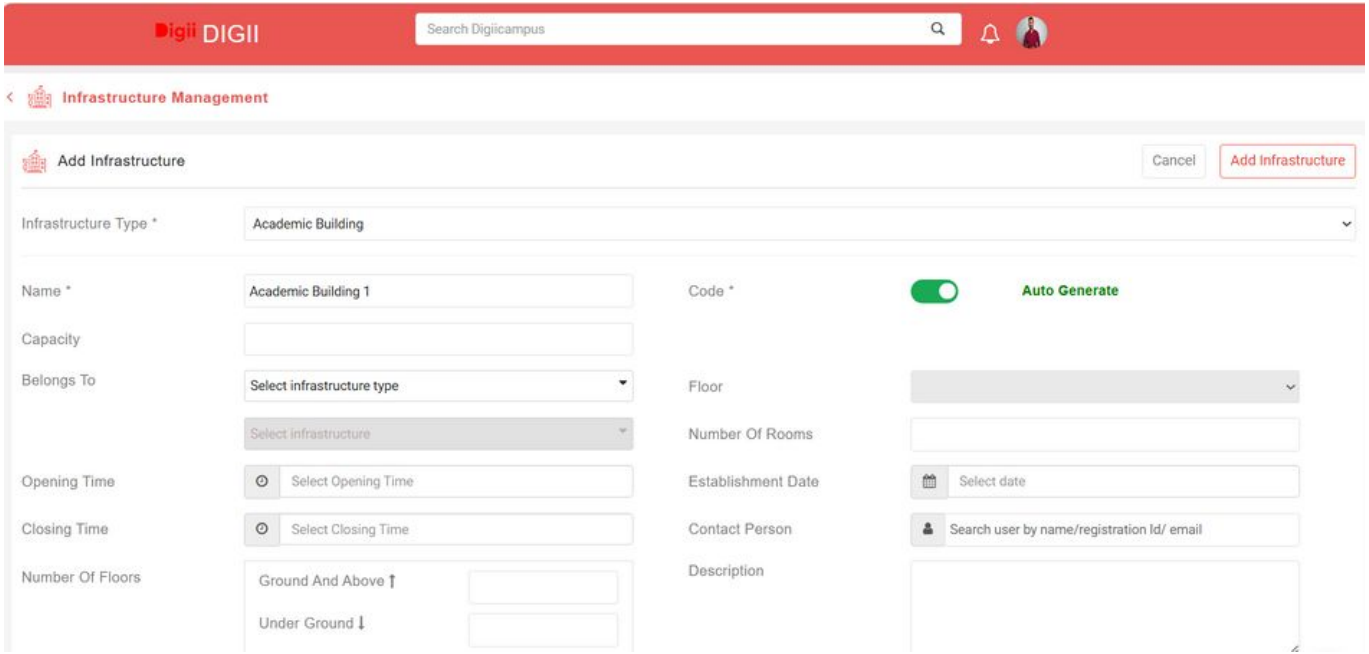

Add New Infrastructure

Select the infrastructure type from the dropdown

Add New Infrastructure

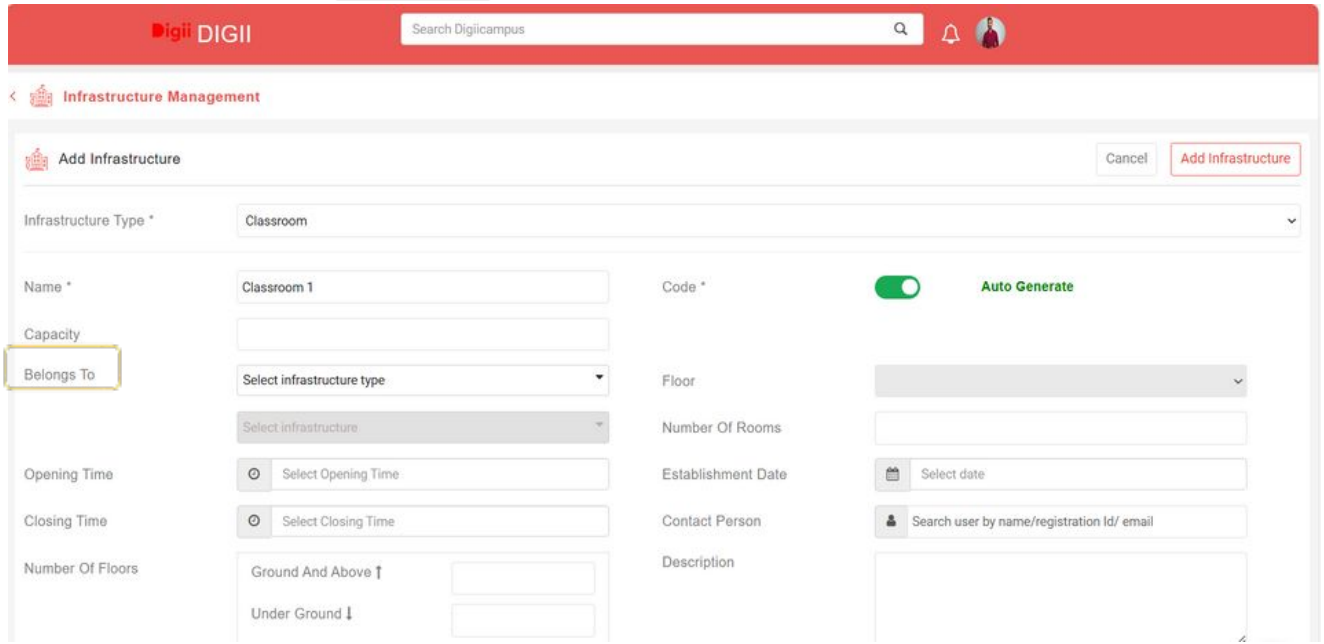

Digii campus

- Add all the Infrastructure details and also code can be auto generate or manual can enter the code and click on ‘Add Infrastructure’.
- While adding independent infrastructure (like buildings for example) do not add “Belongs To” field details.

Note: The Ground Floor is included in the total floor count. For example, a building comprising a Ground Floor, 1st Floor, and 2nd Floor will be considered as a 3-floor building.

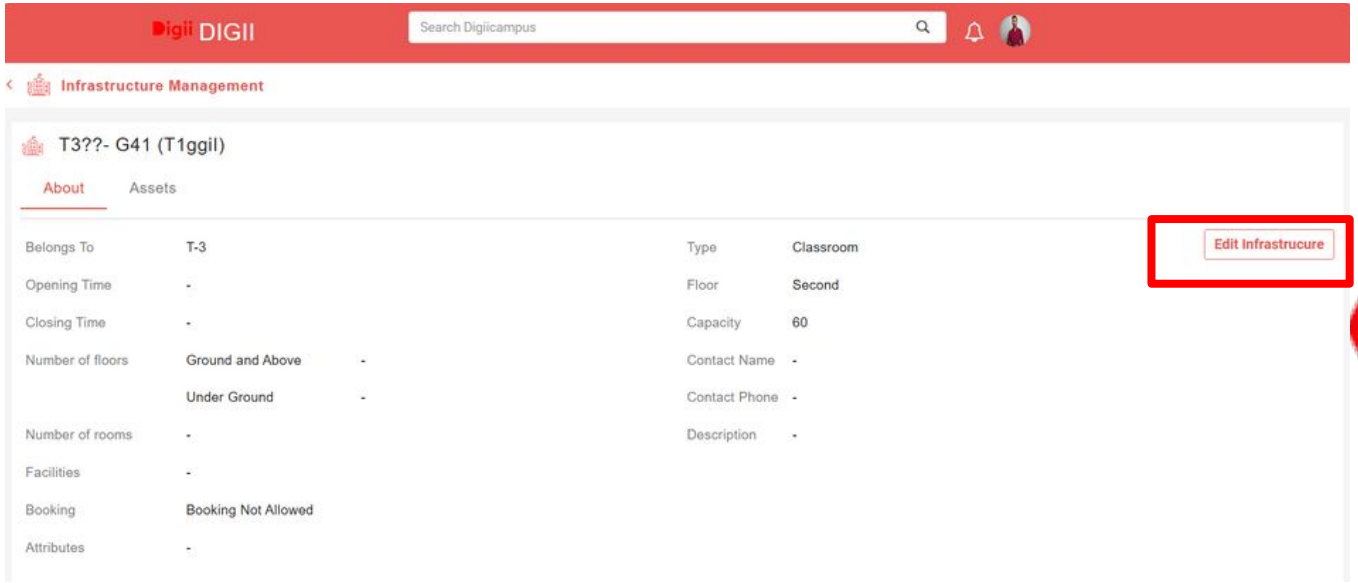

Add New Infrastructure

If the infrastructure is not an independent building, it must be mapped to its **parent building** using the **"Belongs To"** dropdown.

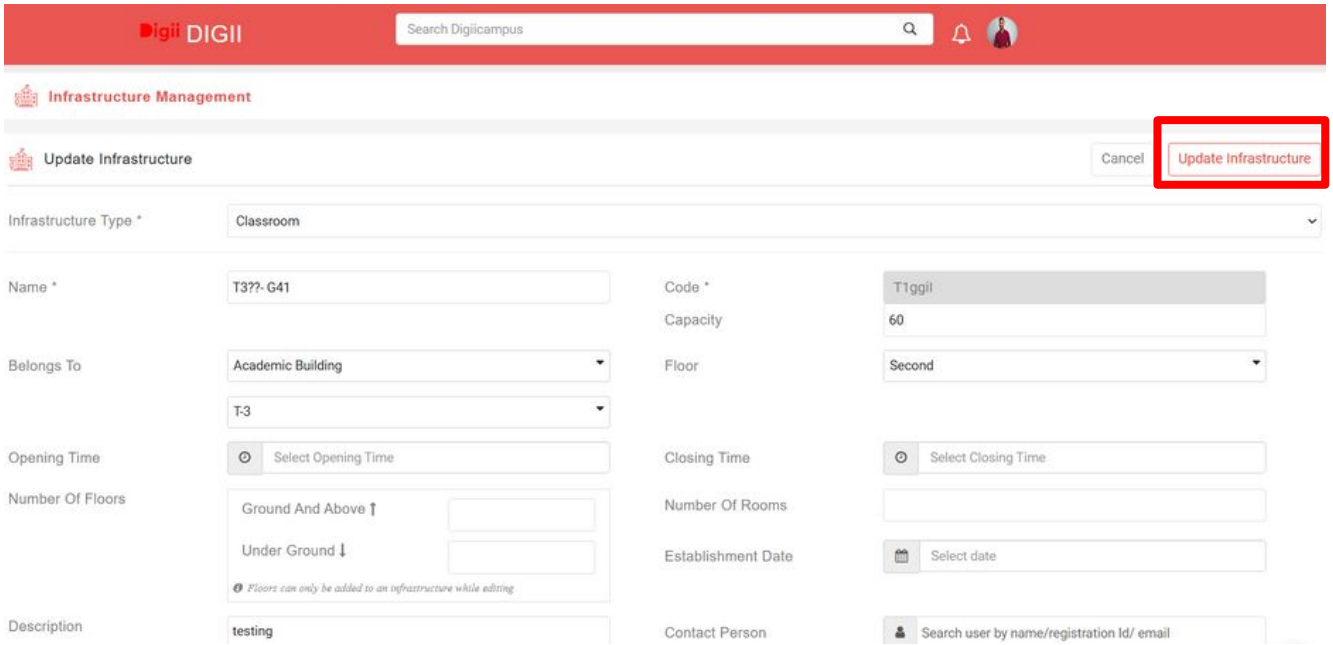

For example, an **Academic Building** itself does not require a *Belongs To* selection. However, when creating infrastructures such as **Classrooms**, the **Academic Building** should be selected as the parent in the **"Belongs To"** field.

Edit Infrastructure Type

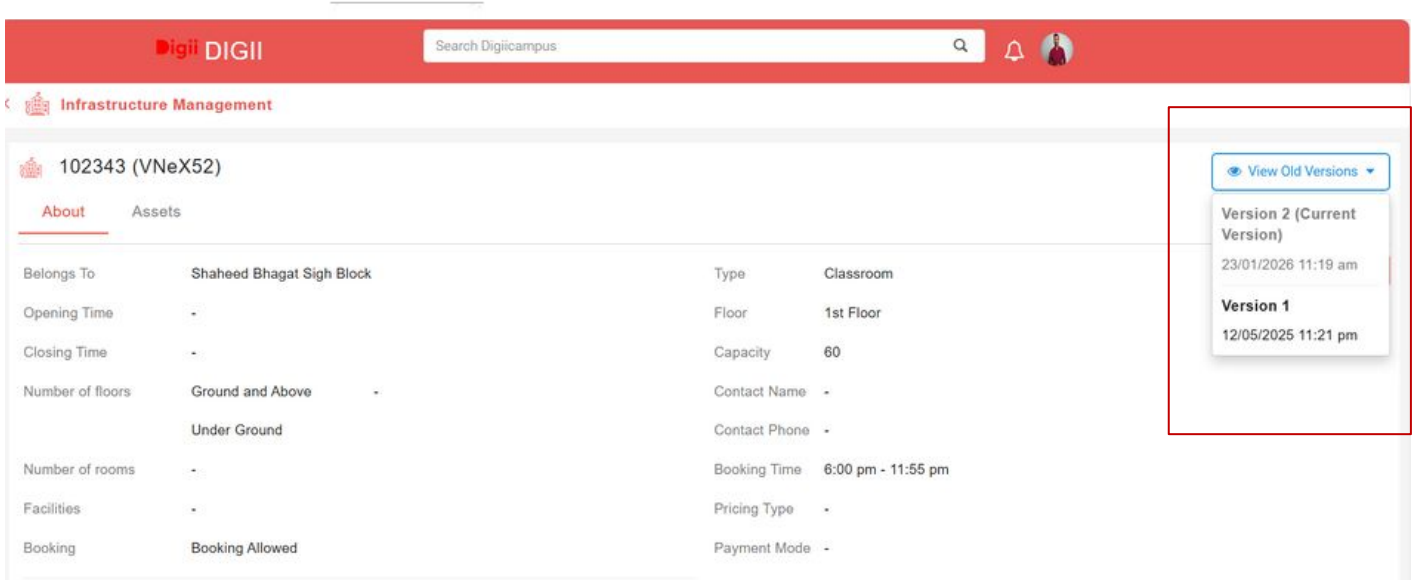

Once the Infrastructure Type is created, it can be edited by clicking on **Edit Infrastructure**

Update Infrastructure Type

Once the required details are updated, click **Update Infrastructure** to save the changes

Update Infrastructure Type

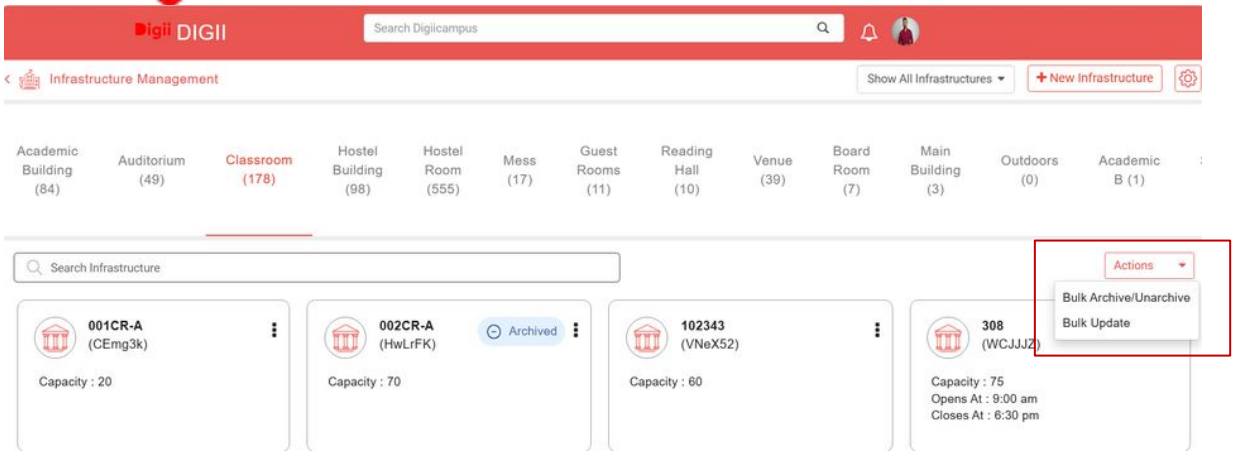

- After updating eligible fiel new version will be gener automatically. Previous versions can be accesse using **"View Old Version**

- A new version is creat when the following det are modified: Name, Capacity, Belongs To, Number of Rooms, Number of Floors, or Bookable (Enabled/Disabled).

- Note: Changes to Establish Date, Conta Person, Description, Disclaimer, and Opening/Closing Time not create a new versi

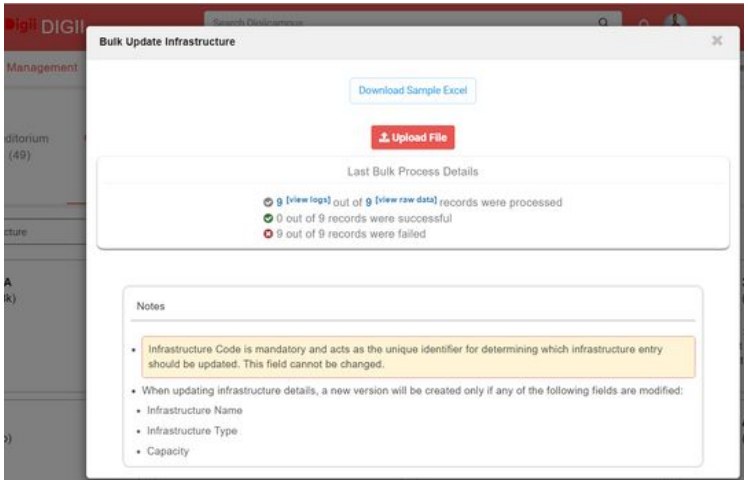

Update Infrastructure Type In Bulk

Digii campus

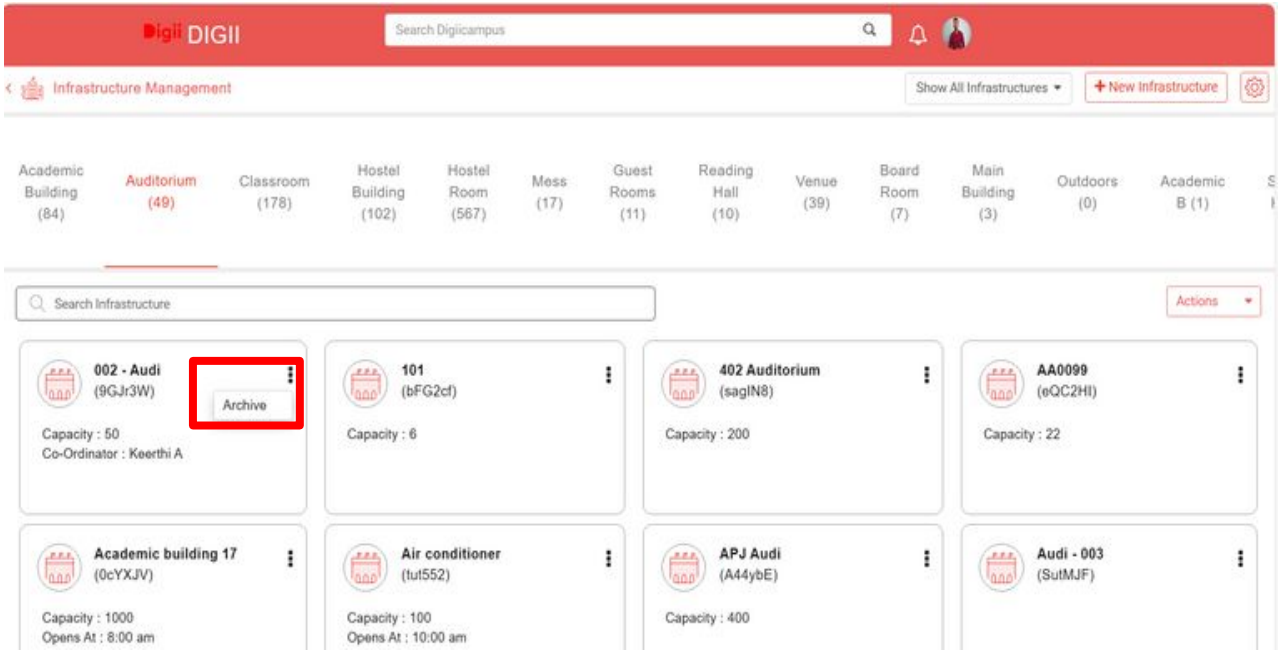

Infrastructure Types can be bulk updated by clicking on **Actions** and selecting **Bulk Update**

Click **Download Sample Excel** to download the file, enter the **mandatory Infrastructure Code**, update the required details, and then upload the file.

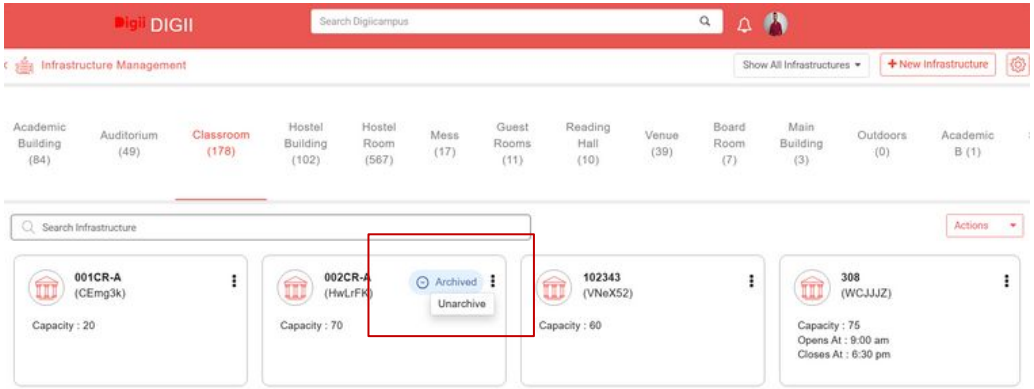

Infrastructure Type Can Be Archived and Unarchived

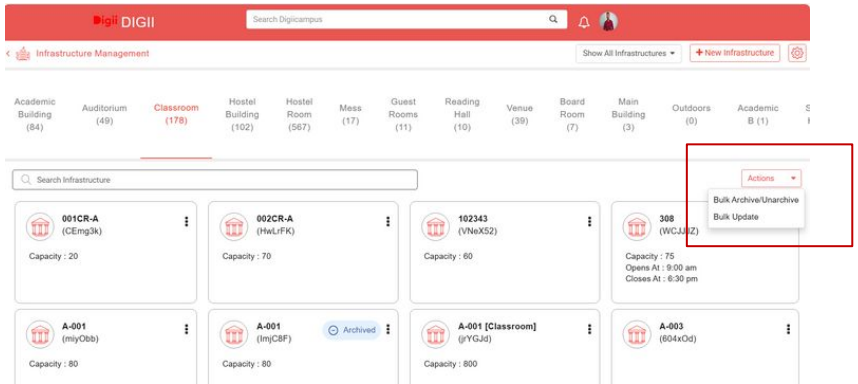

Infrastructure can Be **Archived**

Note: Archiving an infrastructure (room/venue/building) deactivates it without deleting past records. Previous bookings, approvals, reports, and payment history are retained for reference and audit, while new bookings are restricted. The infrastructure can be unarchived anytime if required.

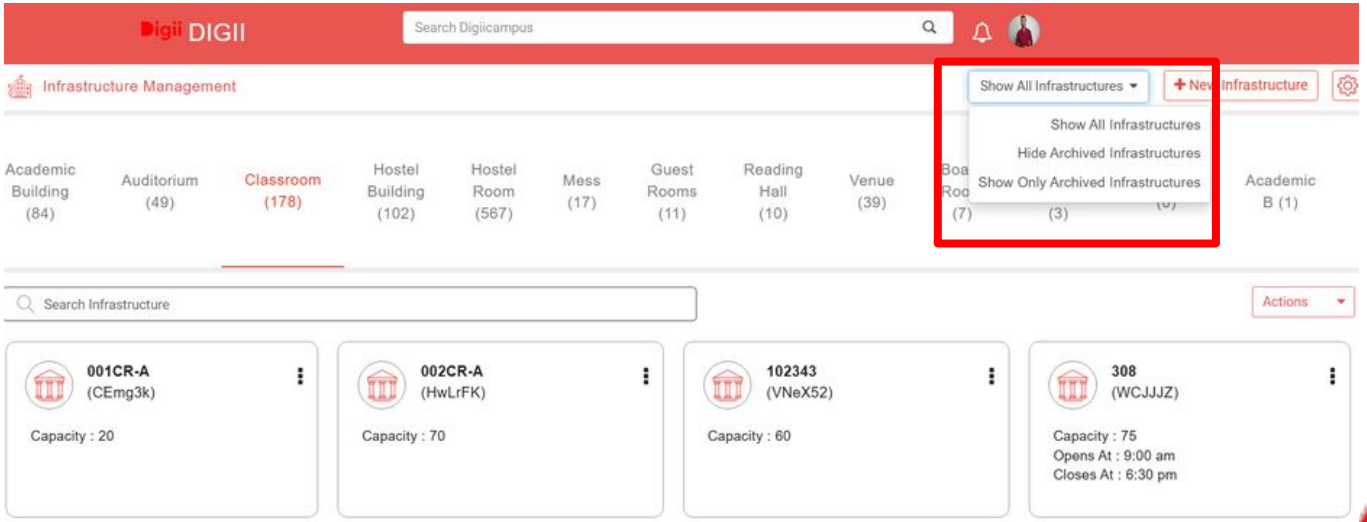

Infrastructure Type Can Be Archived and Unarchived

Infrastructure Types can also be **unarchived** as needed and managed in bulk via **Actions → Bulk Archive/Unarchive**

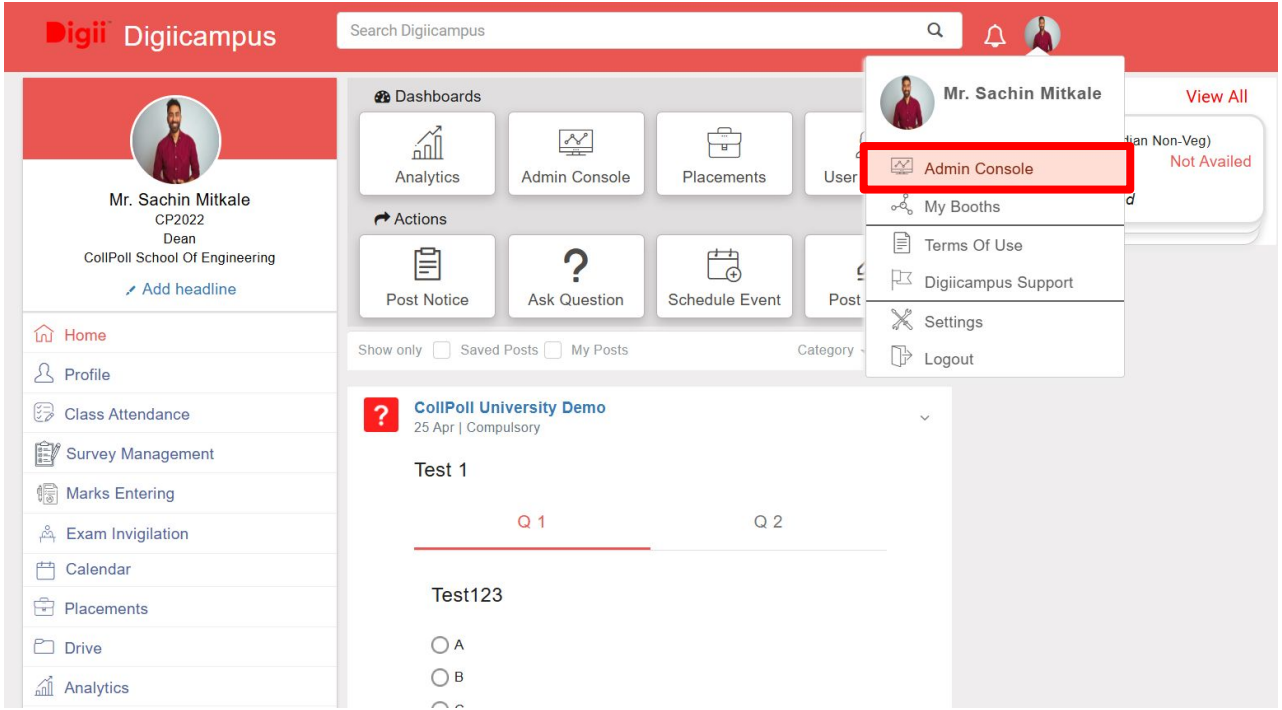

Filtering Infrastructure Records

Infrastructure records can be filtered using the options: **Show All Infrastructures**, **Hide Archived Infrastructures**, and **Show Only Archived Infrastructures**.

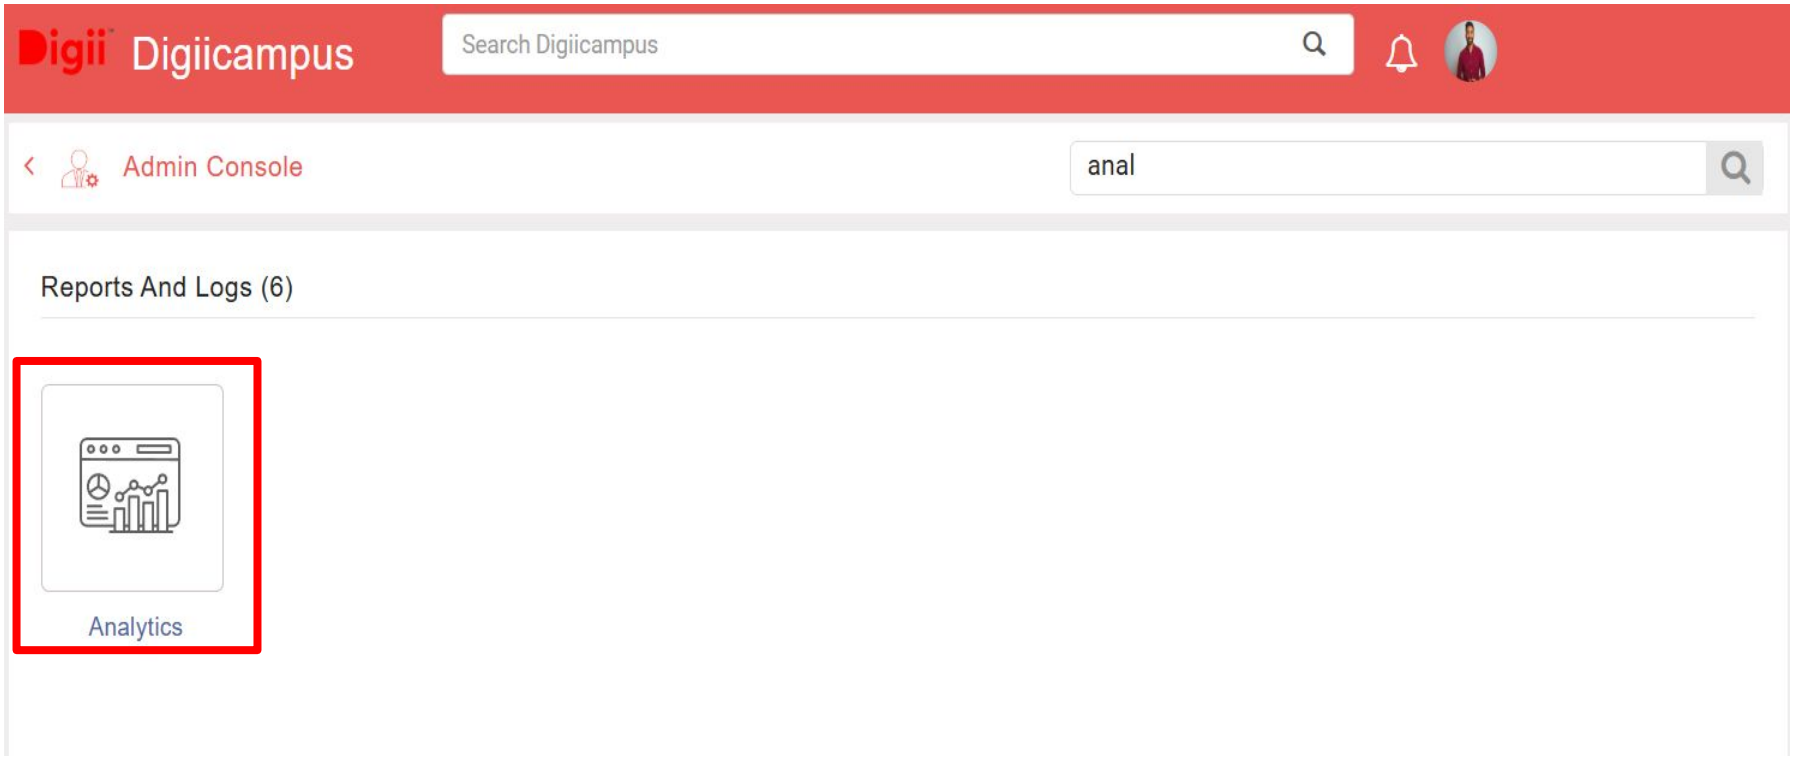

Admins can view infrastructure usage and booking insights in the ‘Infrastructure Analytics’ dashboard

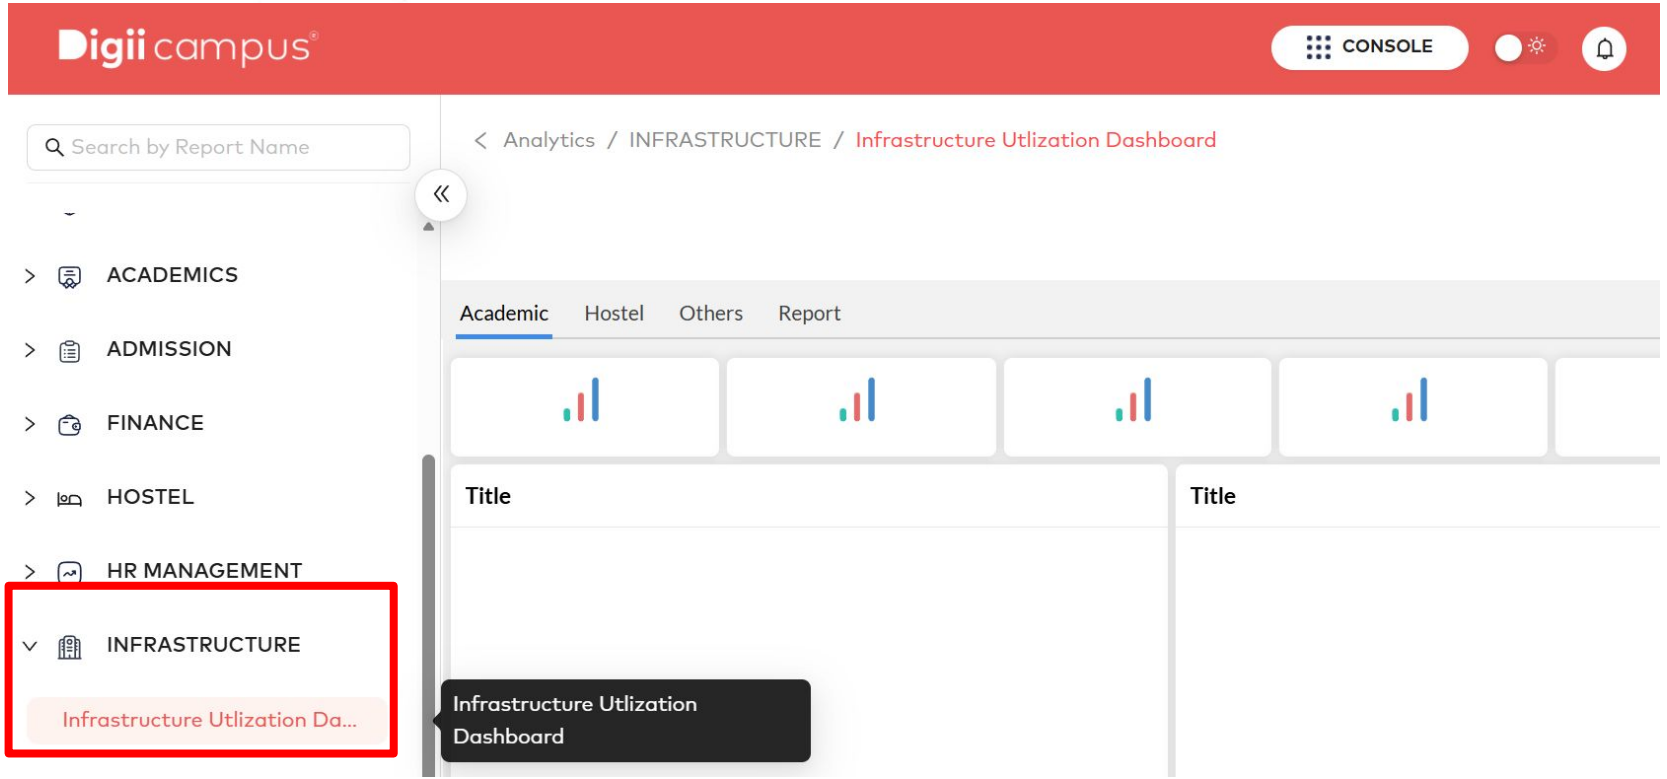

Navigate to the

Admin Console

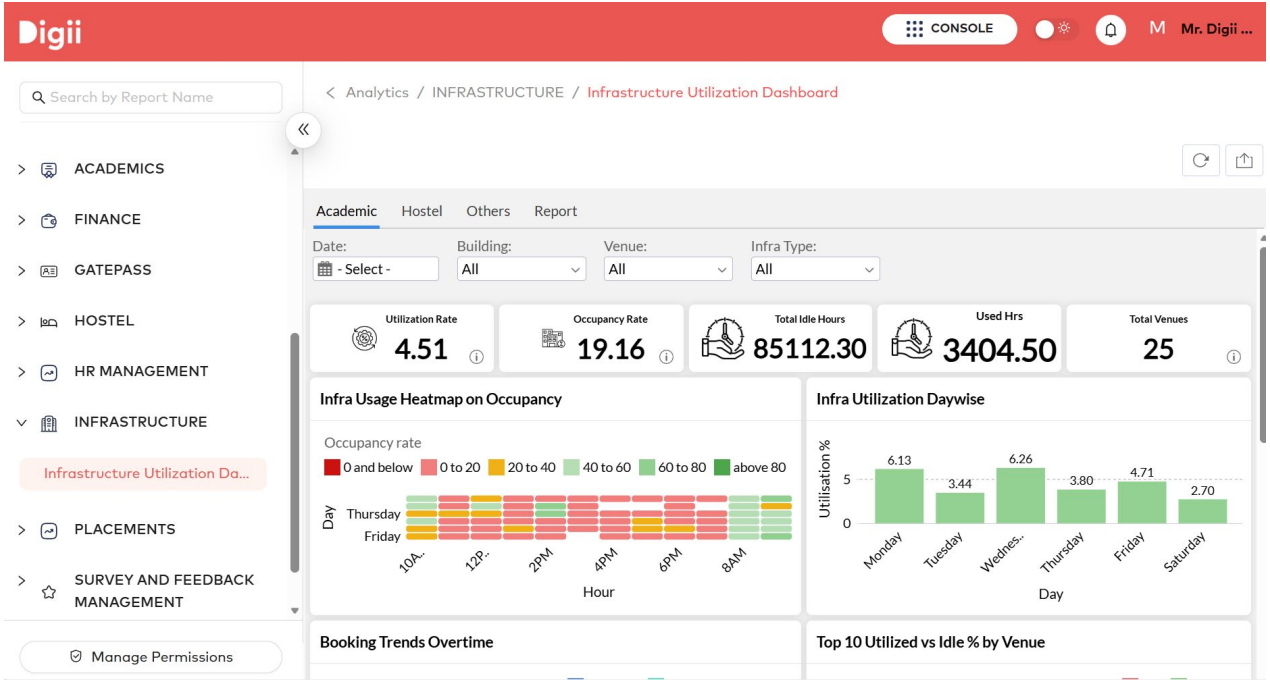

Search for the “Analytics” dashboard under Admin Console

Click on Infrastructure Tab on the left Side Panel

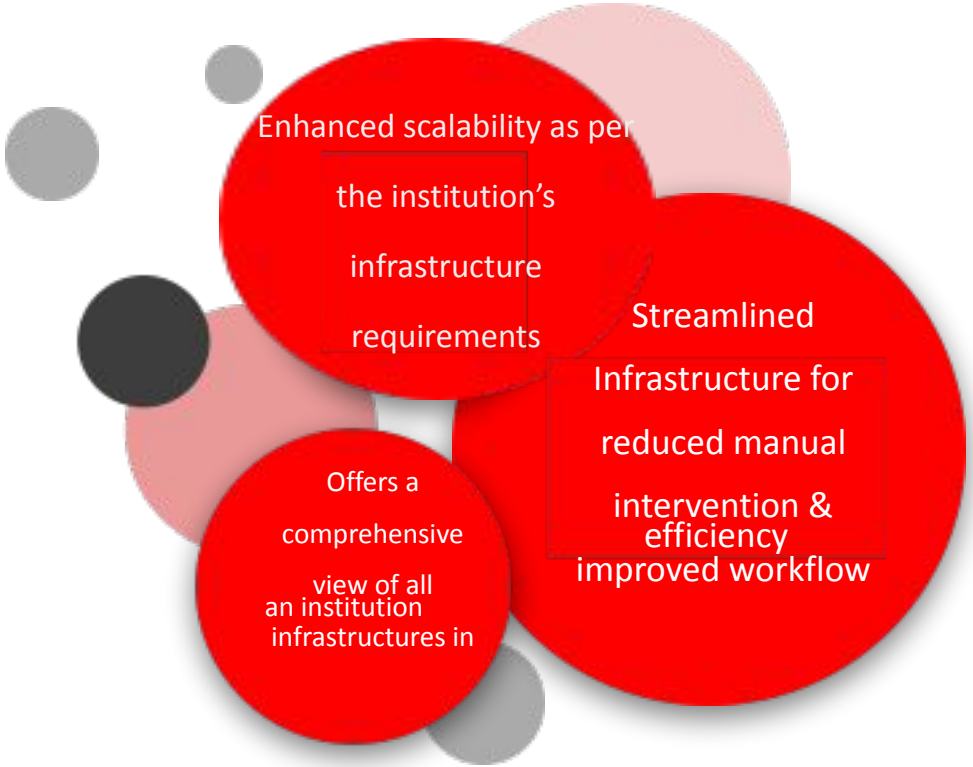

Click on Infrastructure Tab on the left Side Panel

- The “Infrastructure Utilization Dashboard” provides an overview of campus venue and facility usage.
- To access this dashboard, admin needs to have the embedded analytics privilege or privilege should be given to view this specific dashboard.
- Admins can filter data by date, building, venue, and infrastructure type to view utilization rate, occupancy rate, used hours, idle hours, and total venues.
- The dashboard is organized into four segments : Academic, Hostel, Others, Report — and also displays occupancy heatmaps and booking trends to help monitor how effectively infrastructure is being utilized
