Placement Management Module

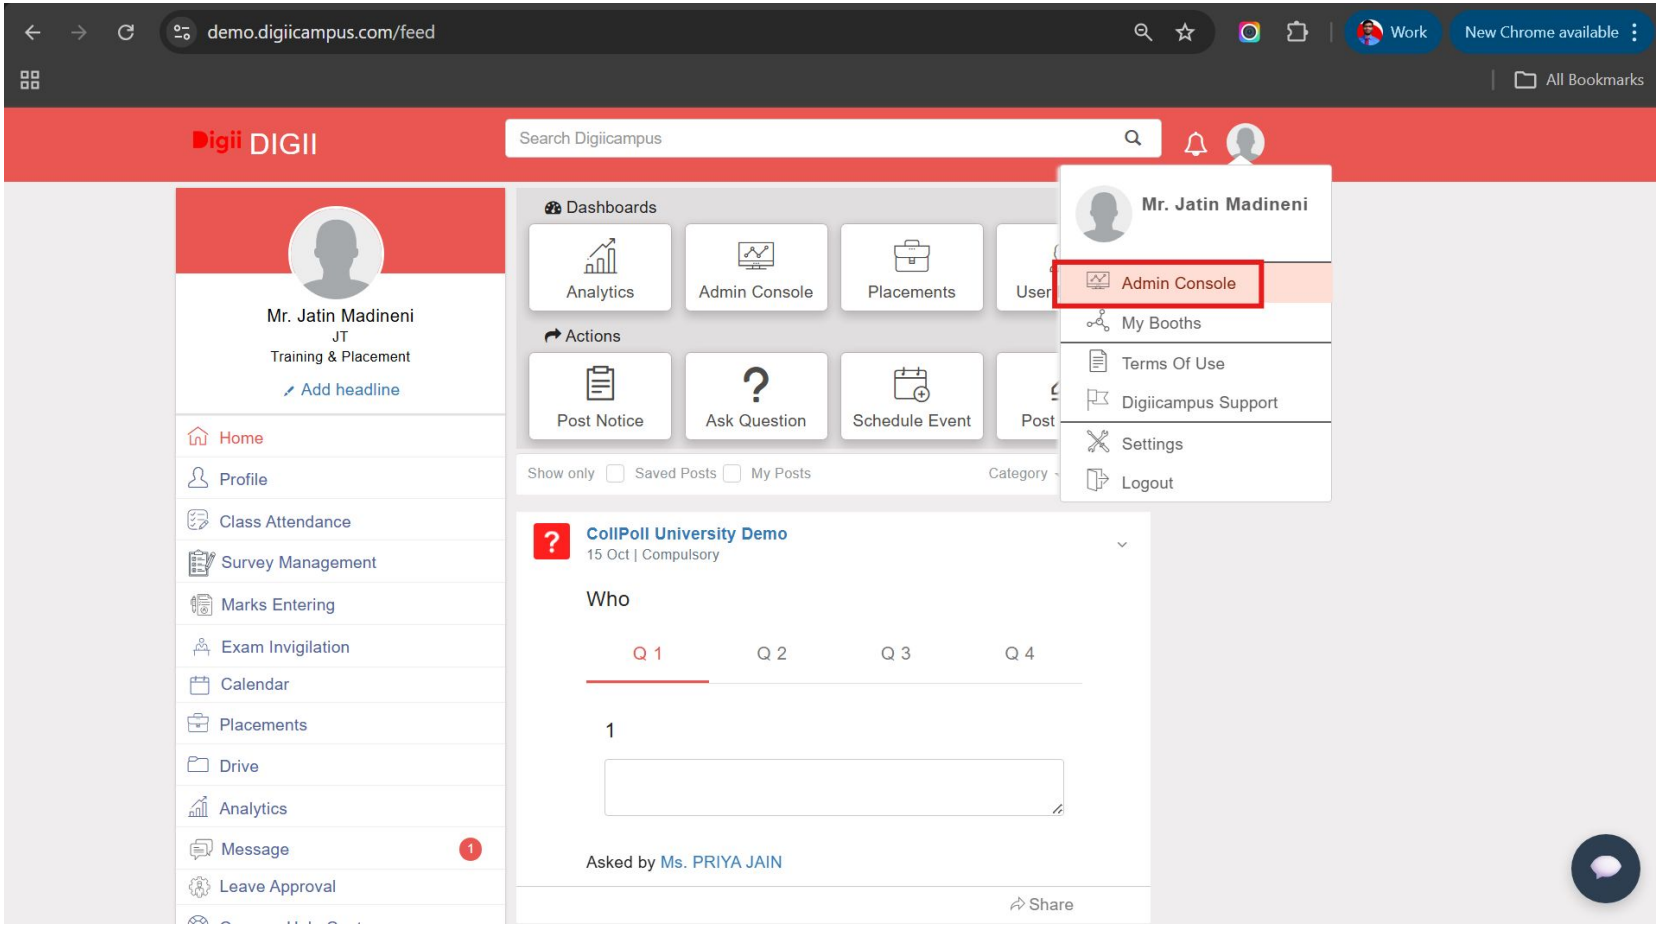

(Admin Guide)

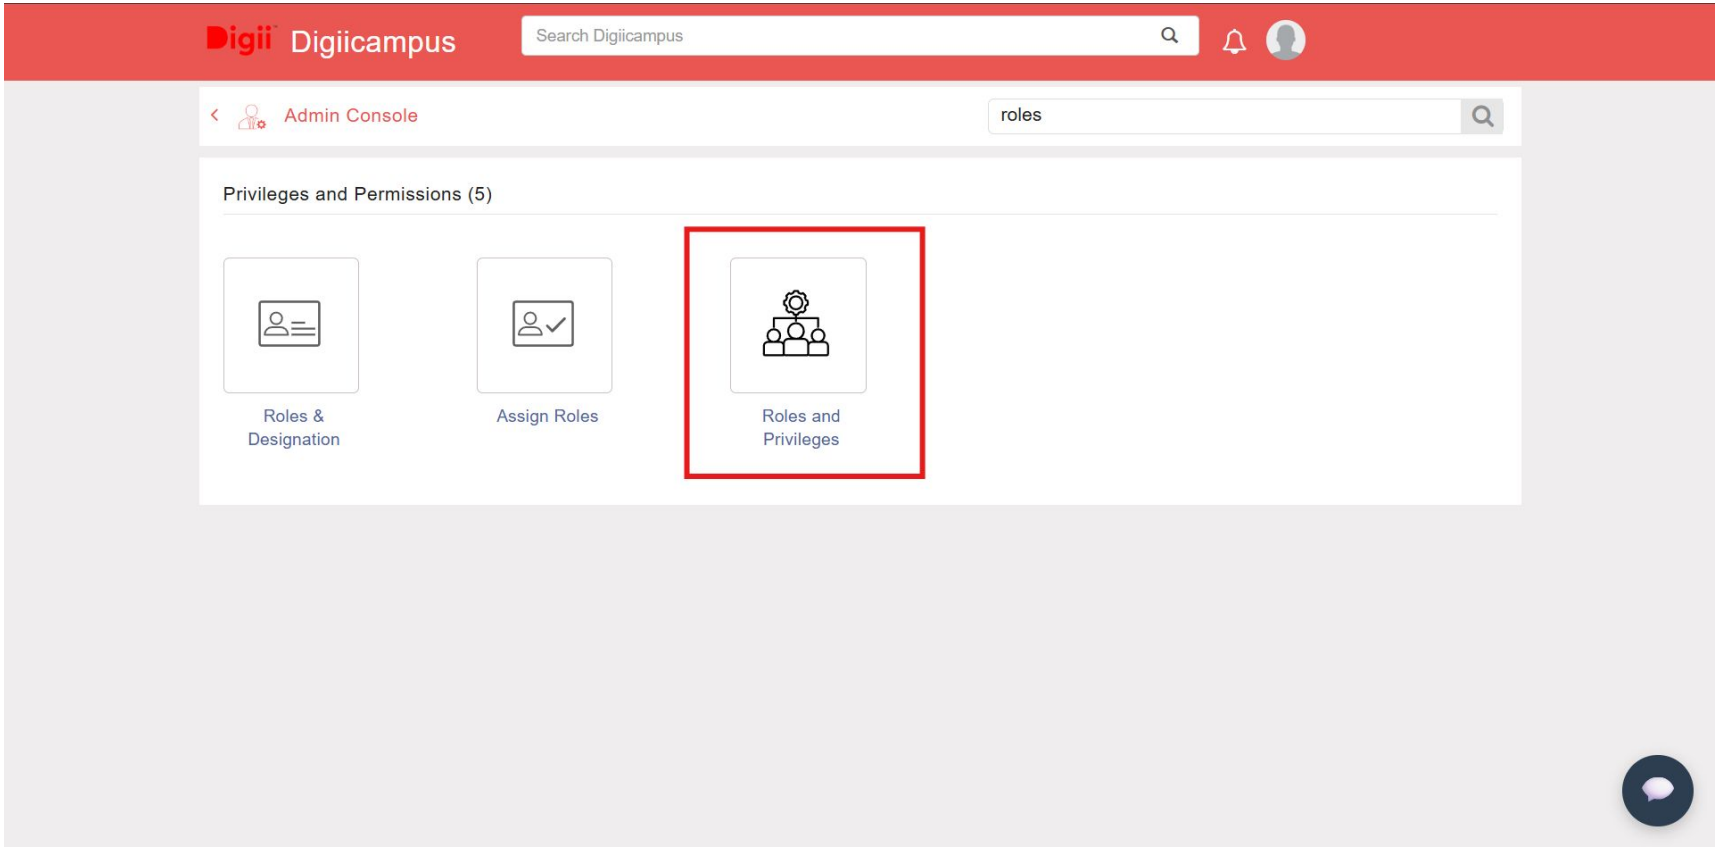

Login to the Digiicampus instance

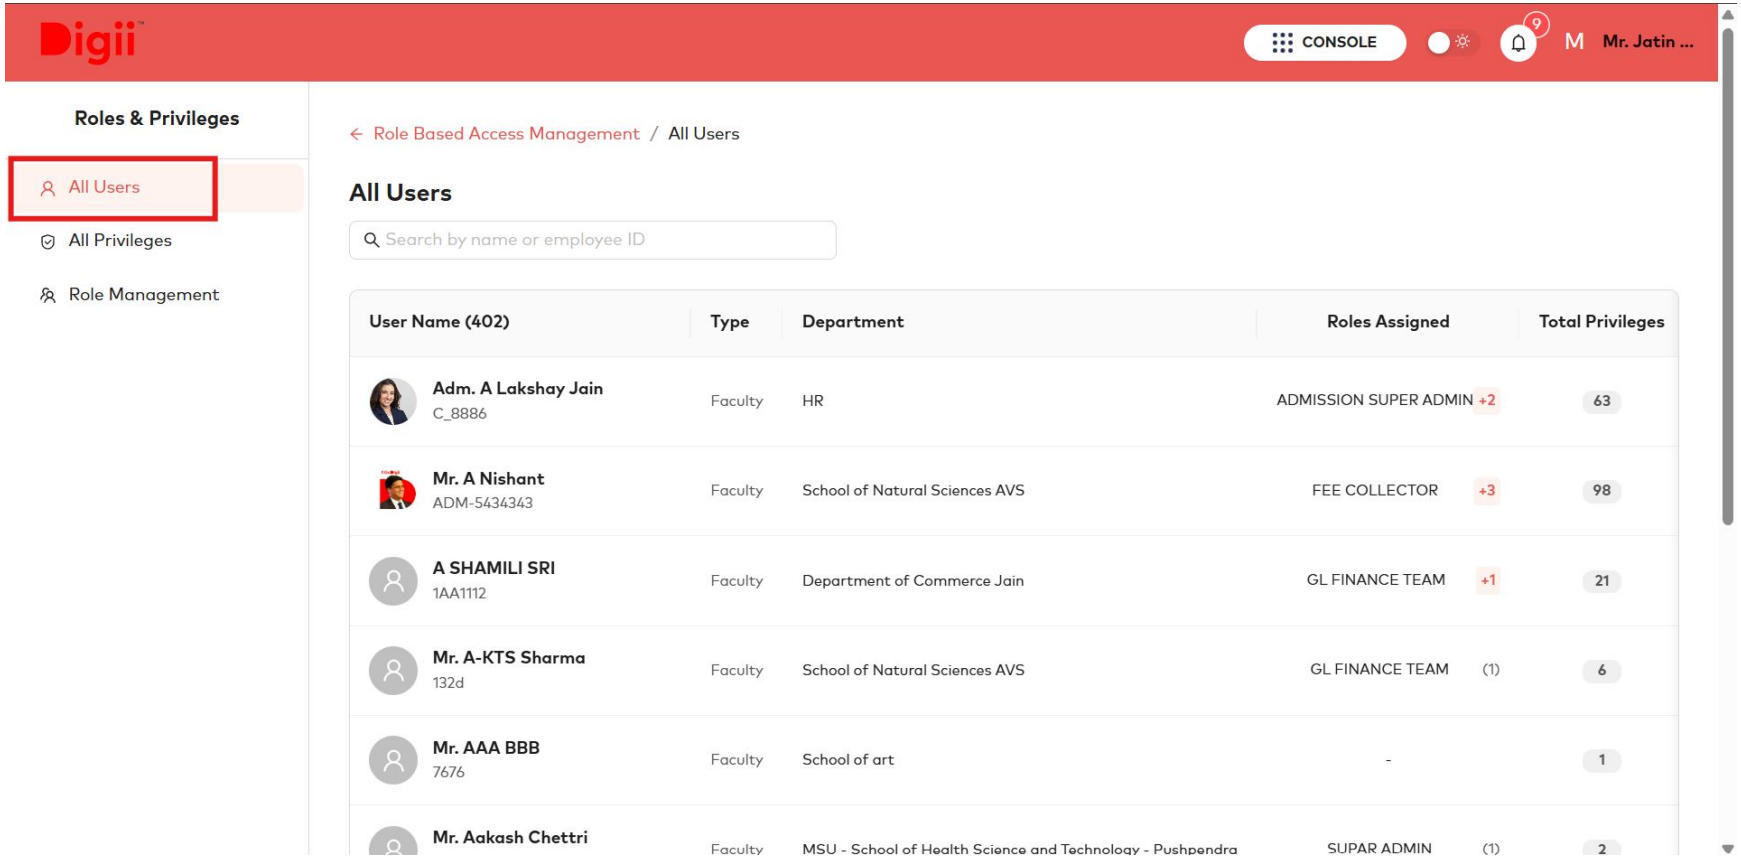

Navigate to “Admin Console” option available on the top right corner

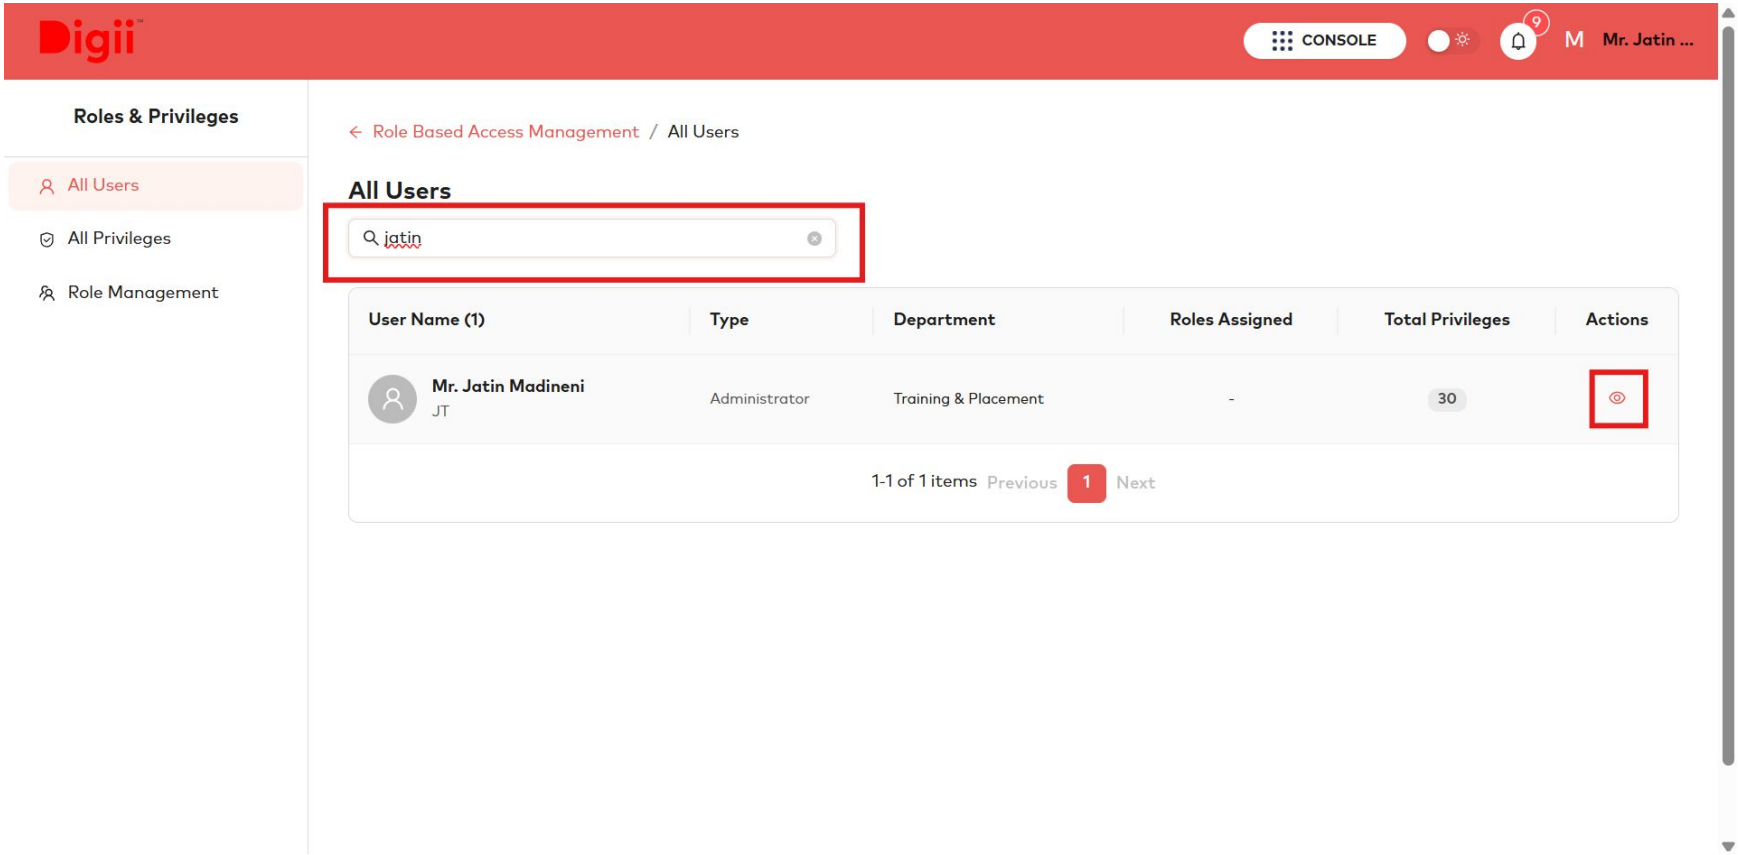

Search for “Roles and Privileges” within Admin Console

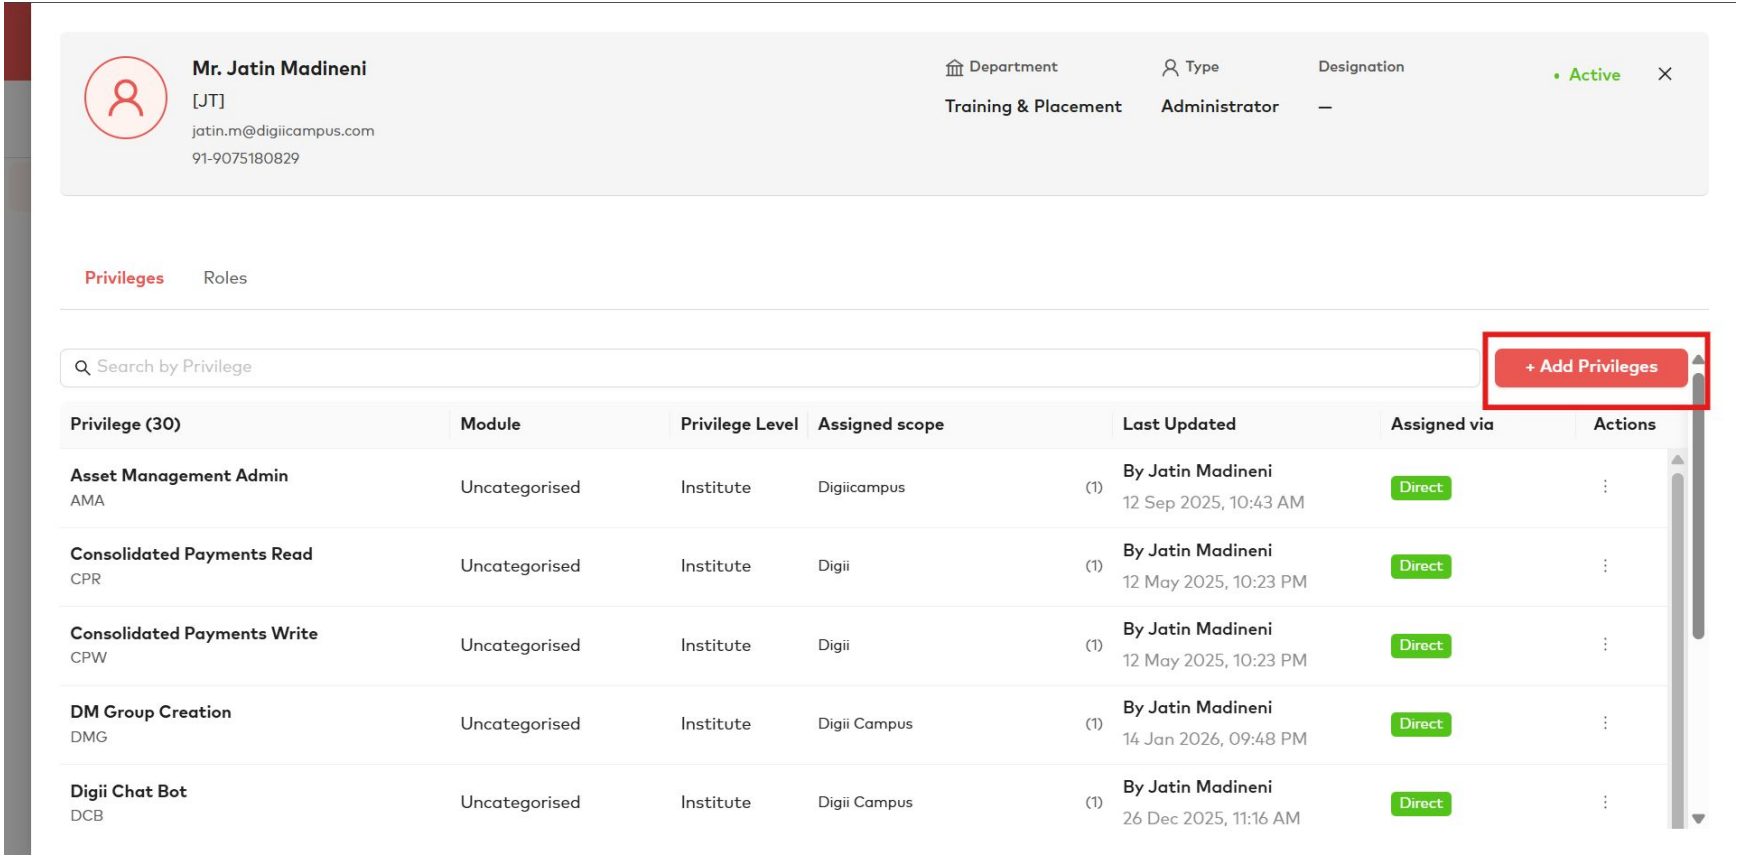

Select “All Users” available on the left hand side panel

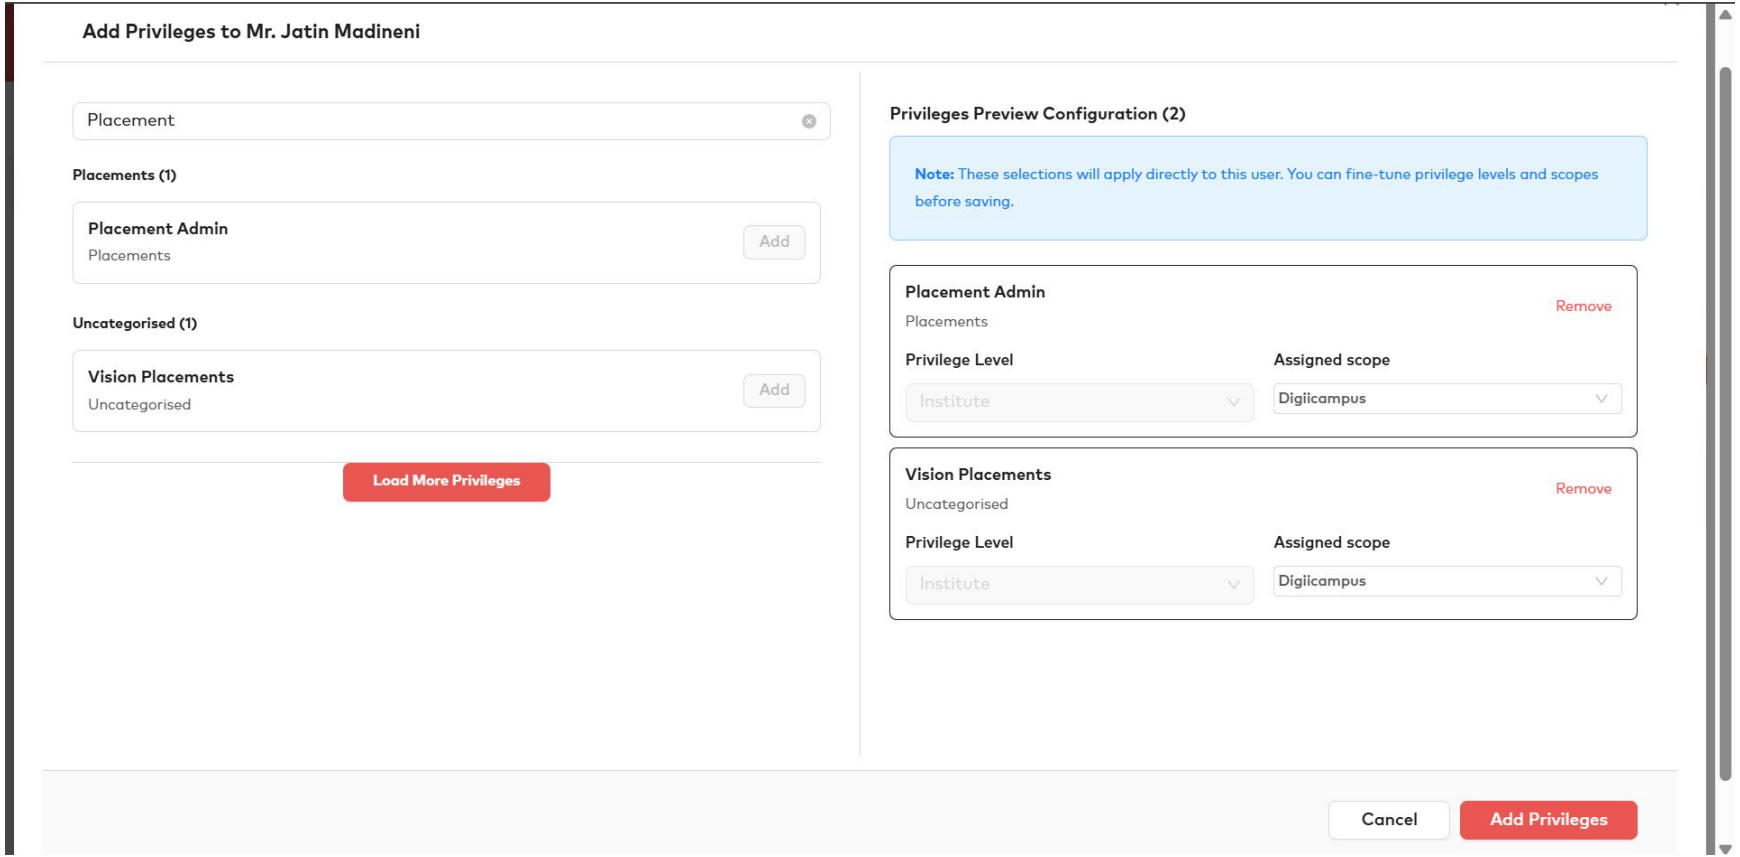

Search for a particular user in the search bar and click on actions to assign privileges

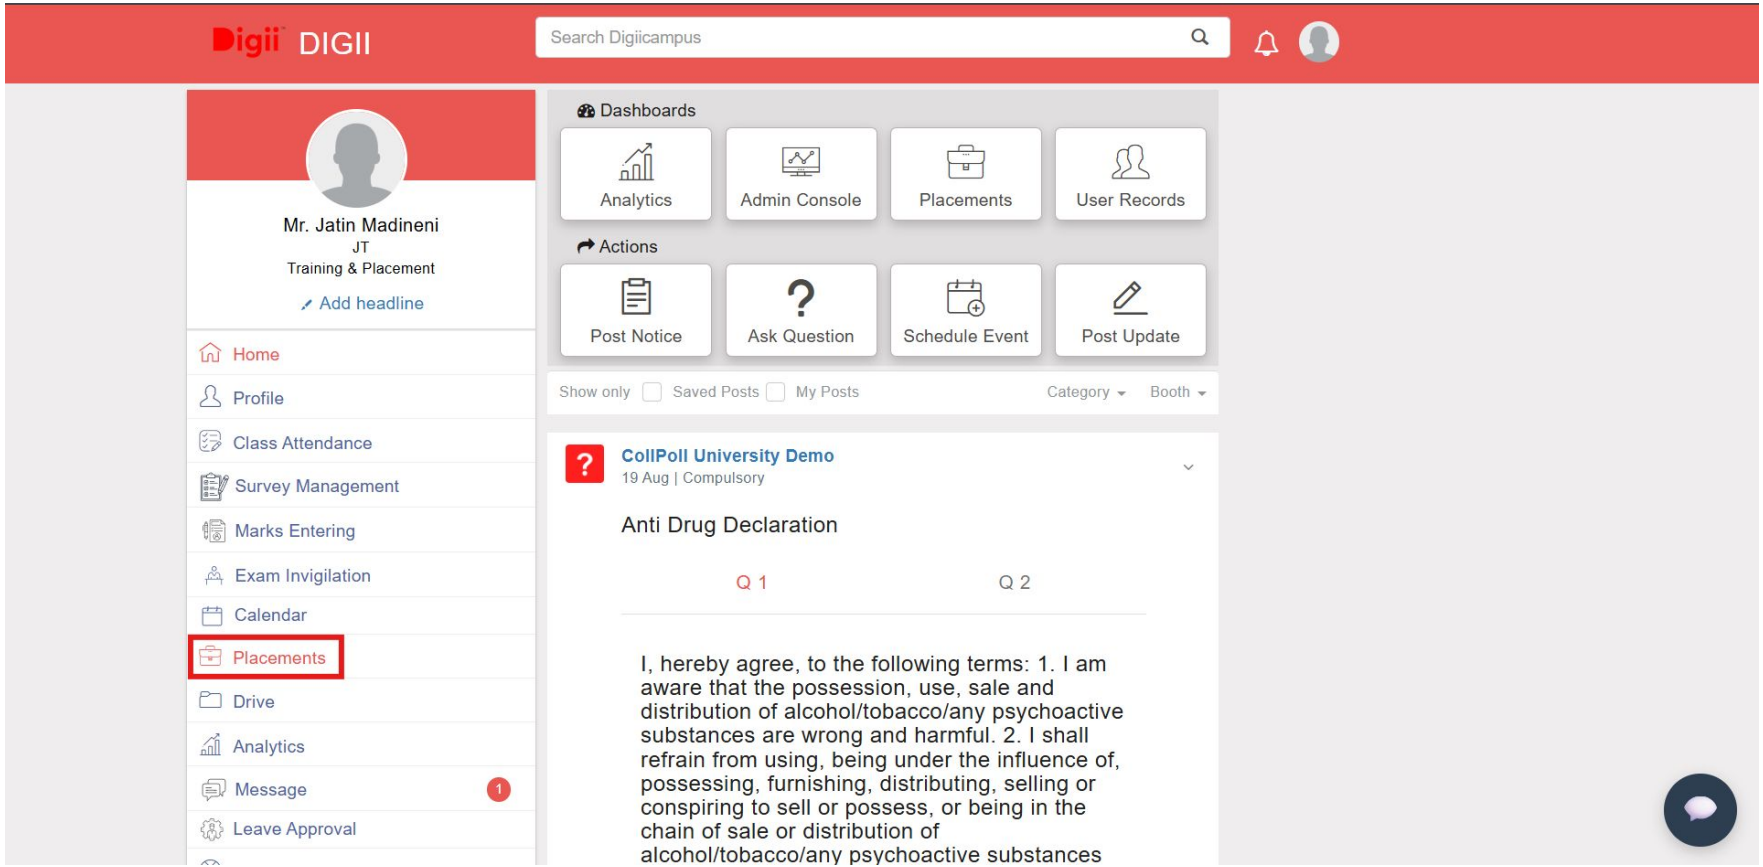

Click on “Add Privileges” to assign new privileges to a particular user

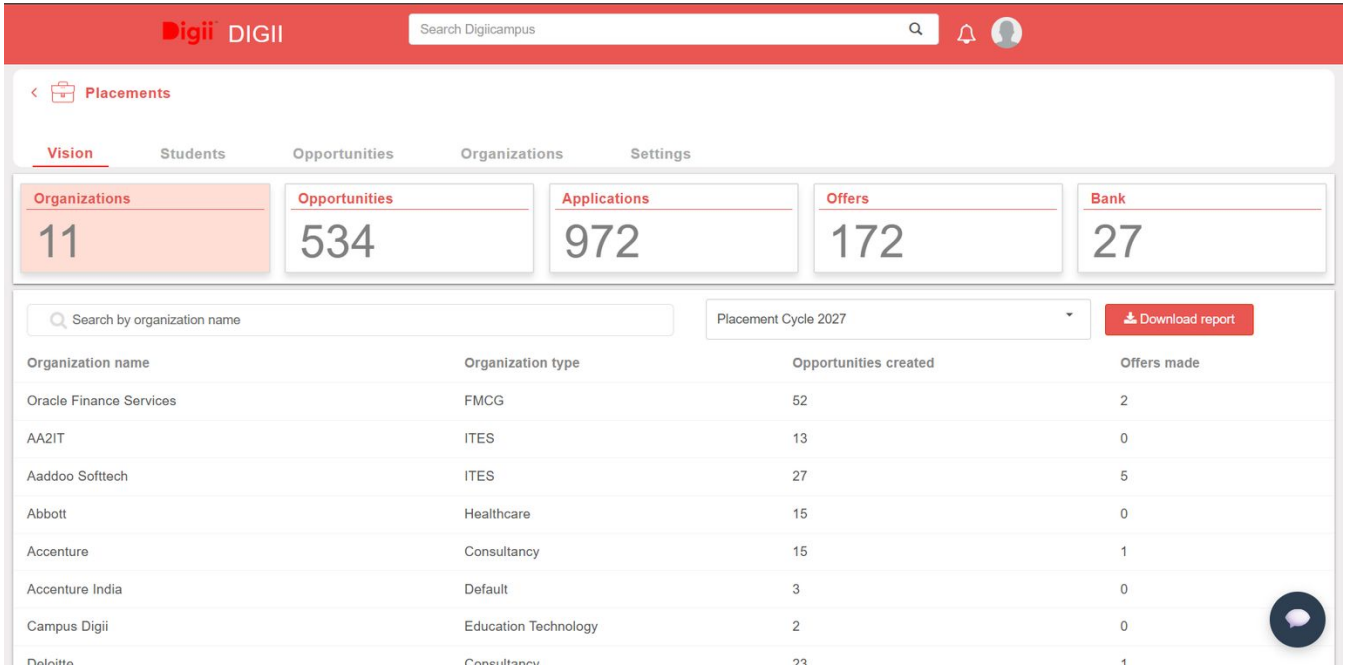

Click on “Add Privileges” to assign them and access the placement management module

Navigate to “Placements” option available on the left hand side panel

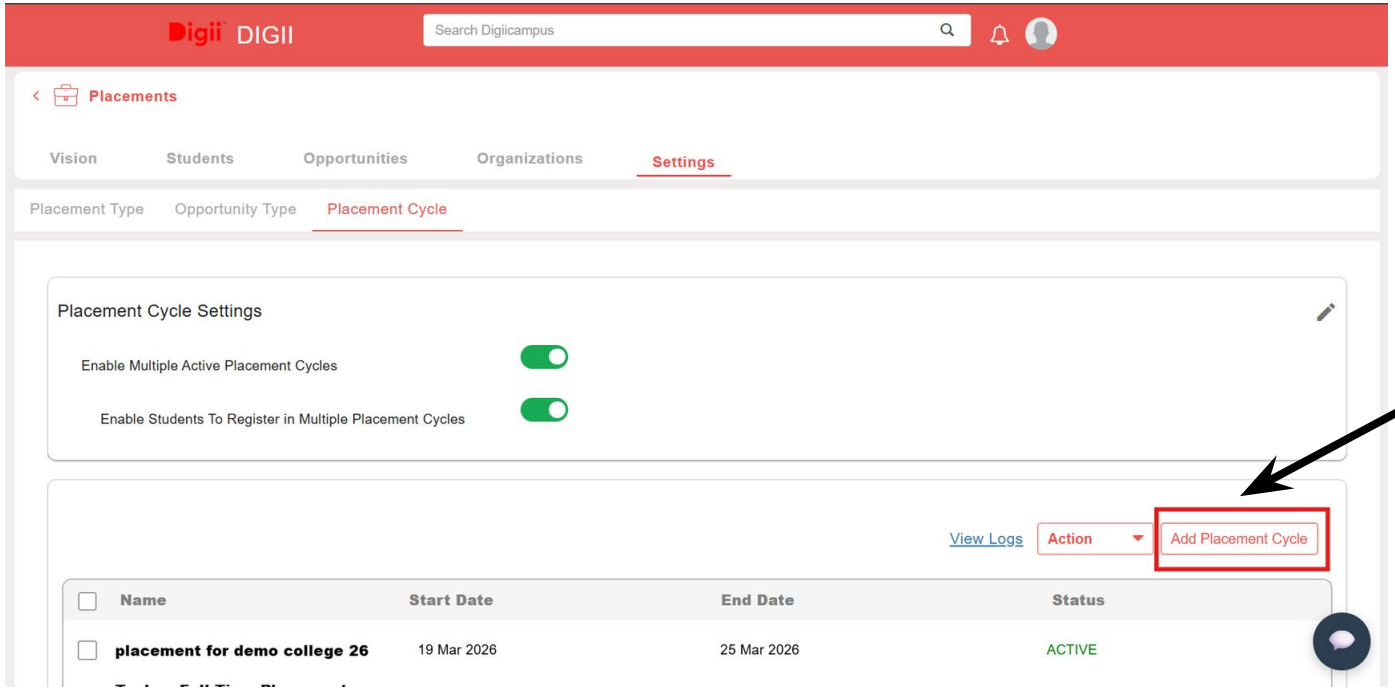

Placements - Vision Tab

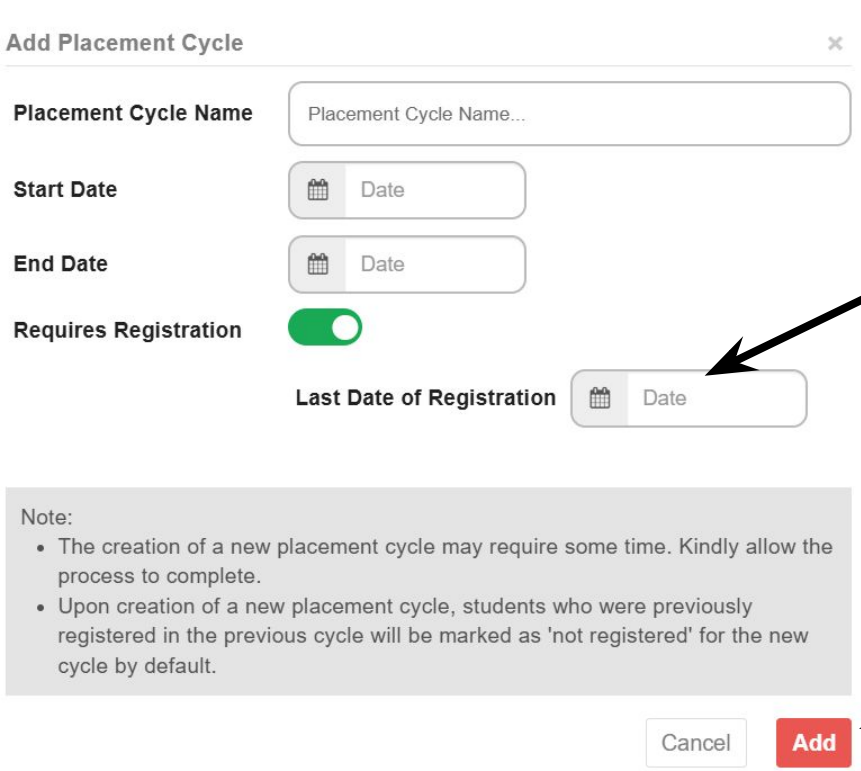

Track all the institution's placement recruitment activity here in the Vision Tab. Click on "Download Report" for better insights on each category

Placements Settings - Placement Cycle Configuration

Click on “Add Placement Cycle” to create a new placement cycle.

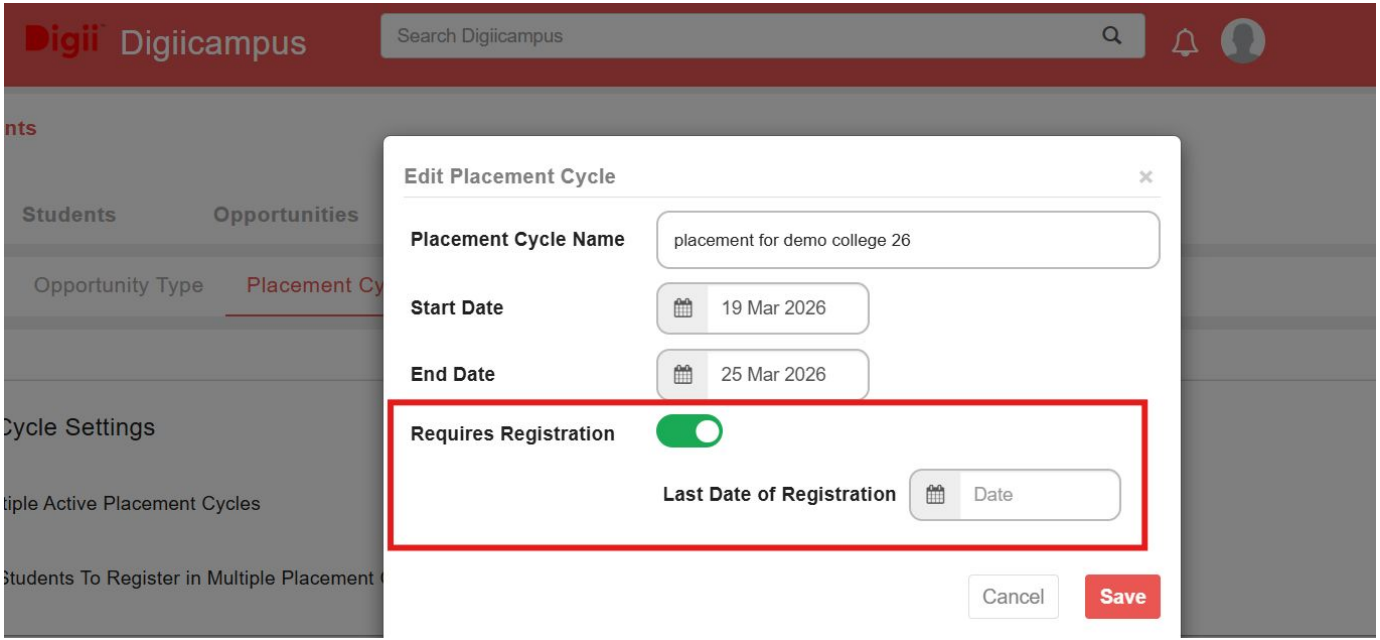

Placements Settings - Placement Cycle Configuration

Admins can also enable the “Requires Registration” option and provide last date for registration in order for students to register for the placement cycle.

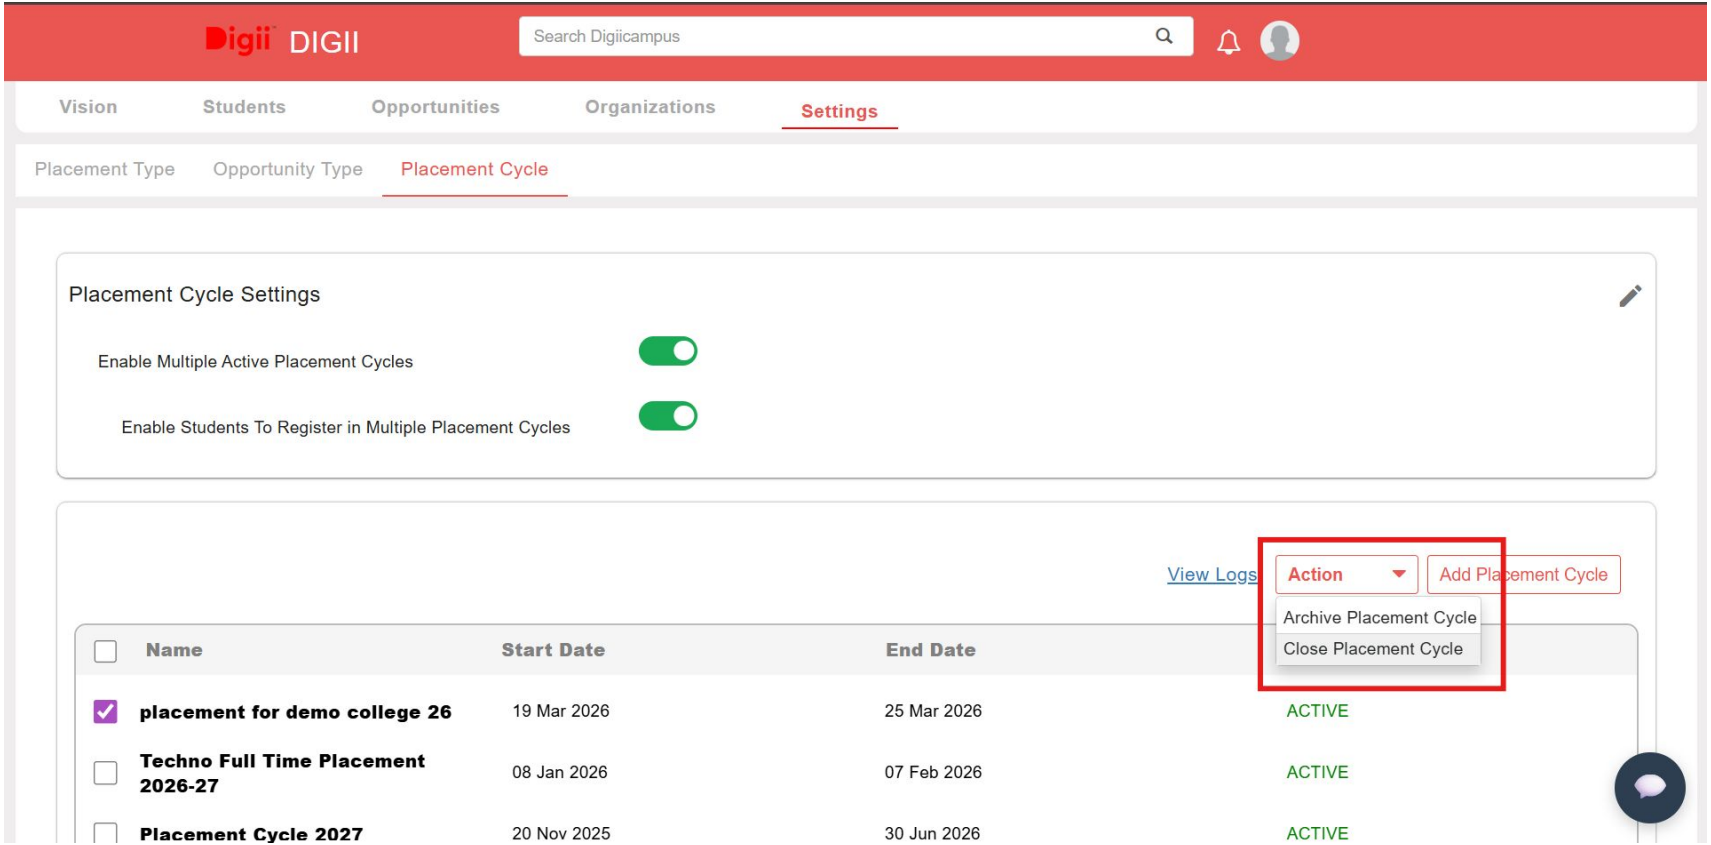

Fill in the placement cycle name, start date, end date and click on “Add” button to create a new placement cycle.

Placements Settings - Requires Registration Functionality

Admins can enable the "Requires Registration" toggle to allow students to register for the active placement cycles from their login itself. Last date of registration can also be defined. Alternatively admins can also register students for placements by navigating to the "Students" tab

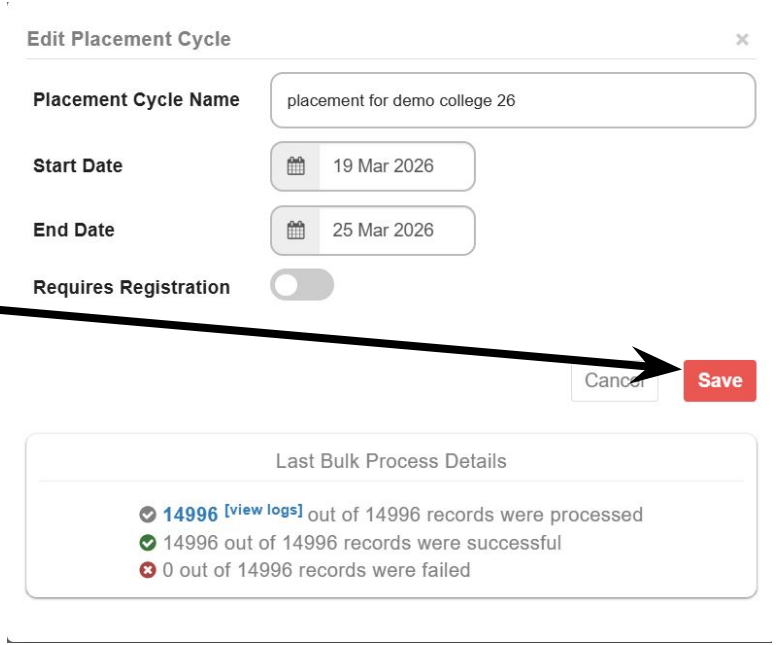

Placement Cycles can be archived and closed by clicking on the “Actions” dropdown

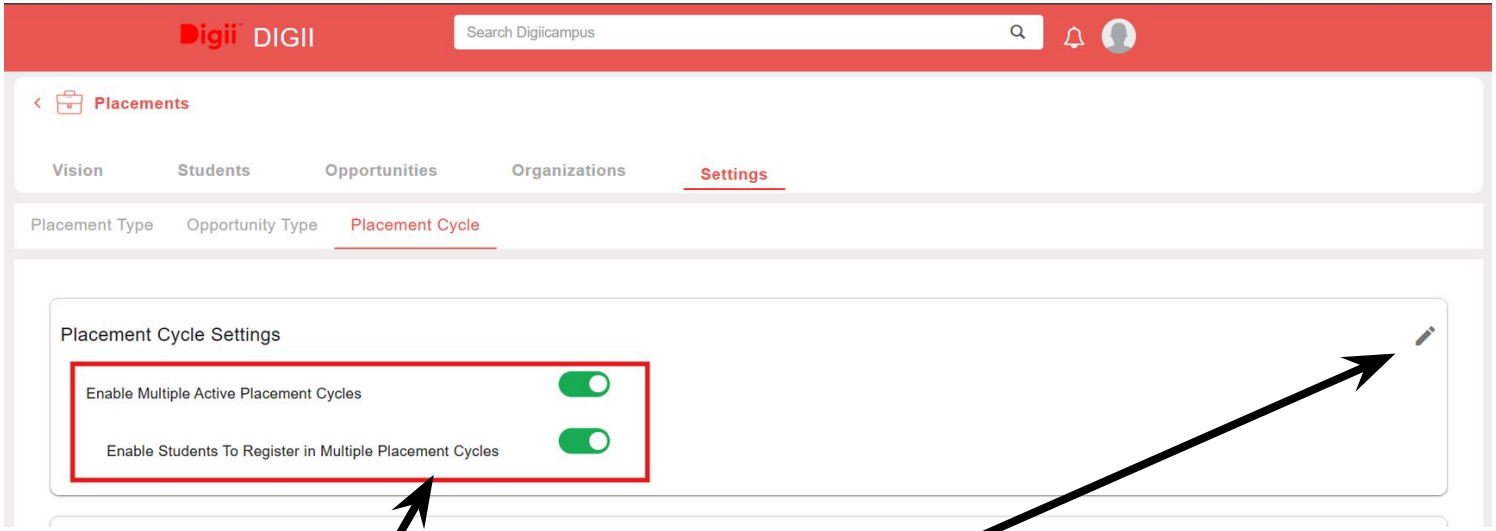

Editing of Placement Cycle Dates

Click on the placement cycle name to edit the dates as required.
Once the changes are done click on “Save” to confirm the changes

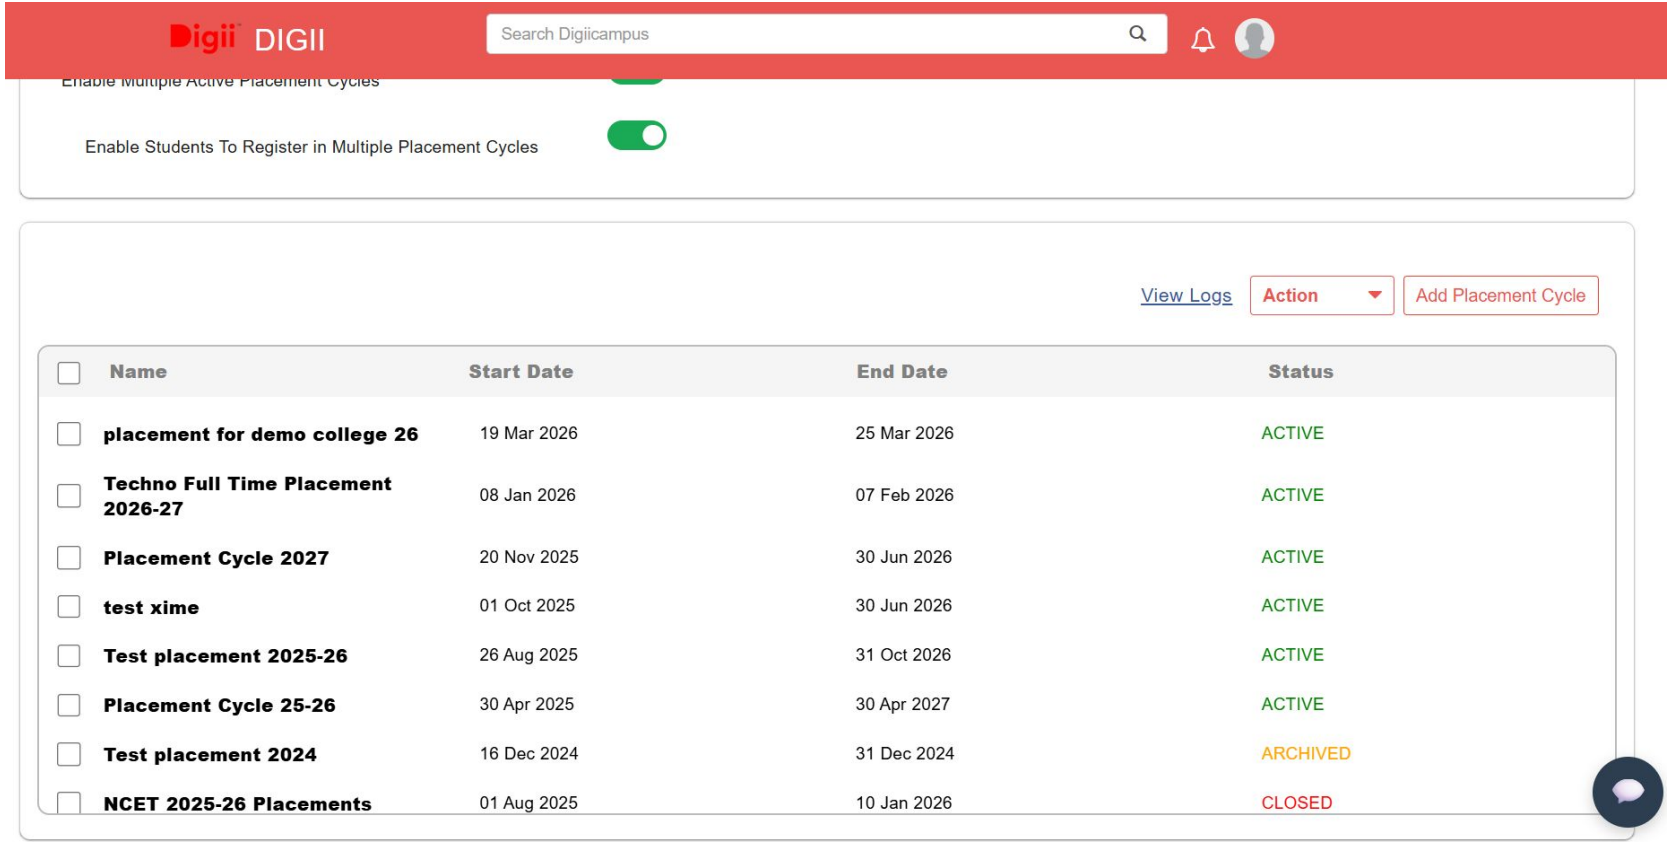

Multiple Placement Cycle

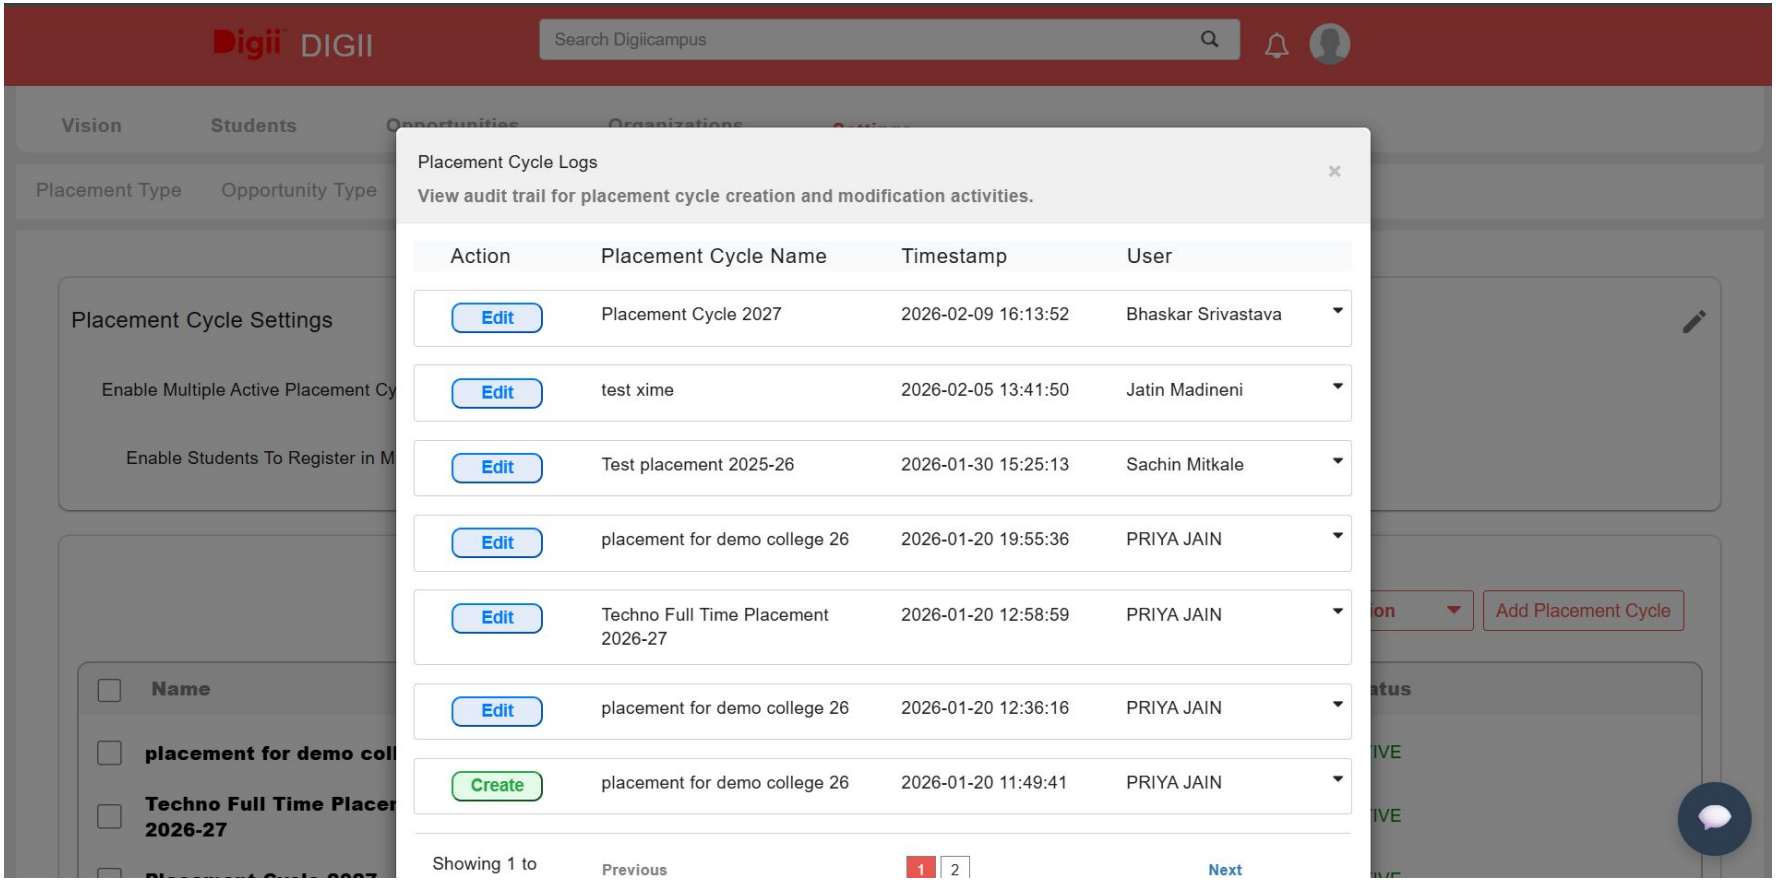

Placement Coordinators can create multiple placement cycles and can even allow students register for the same. Click on the pencil icon available on the top right to enable or disable the toggles.

Note :- If the multiple placement cycle toggle is not enabled, then creation of a new placement cycle will automatically close the existing one.

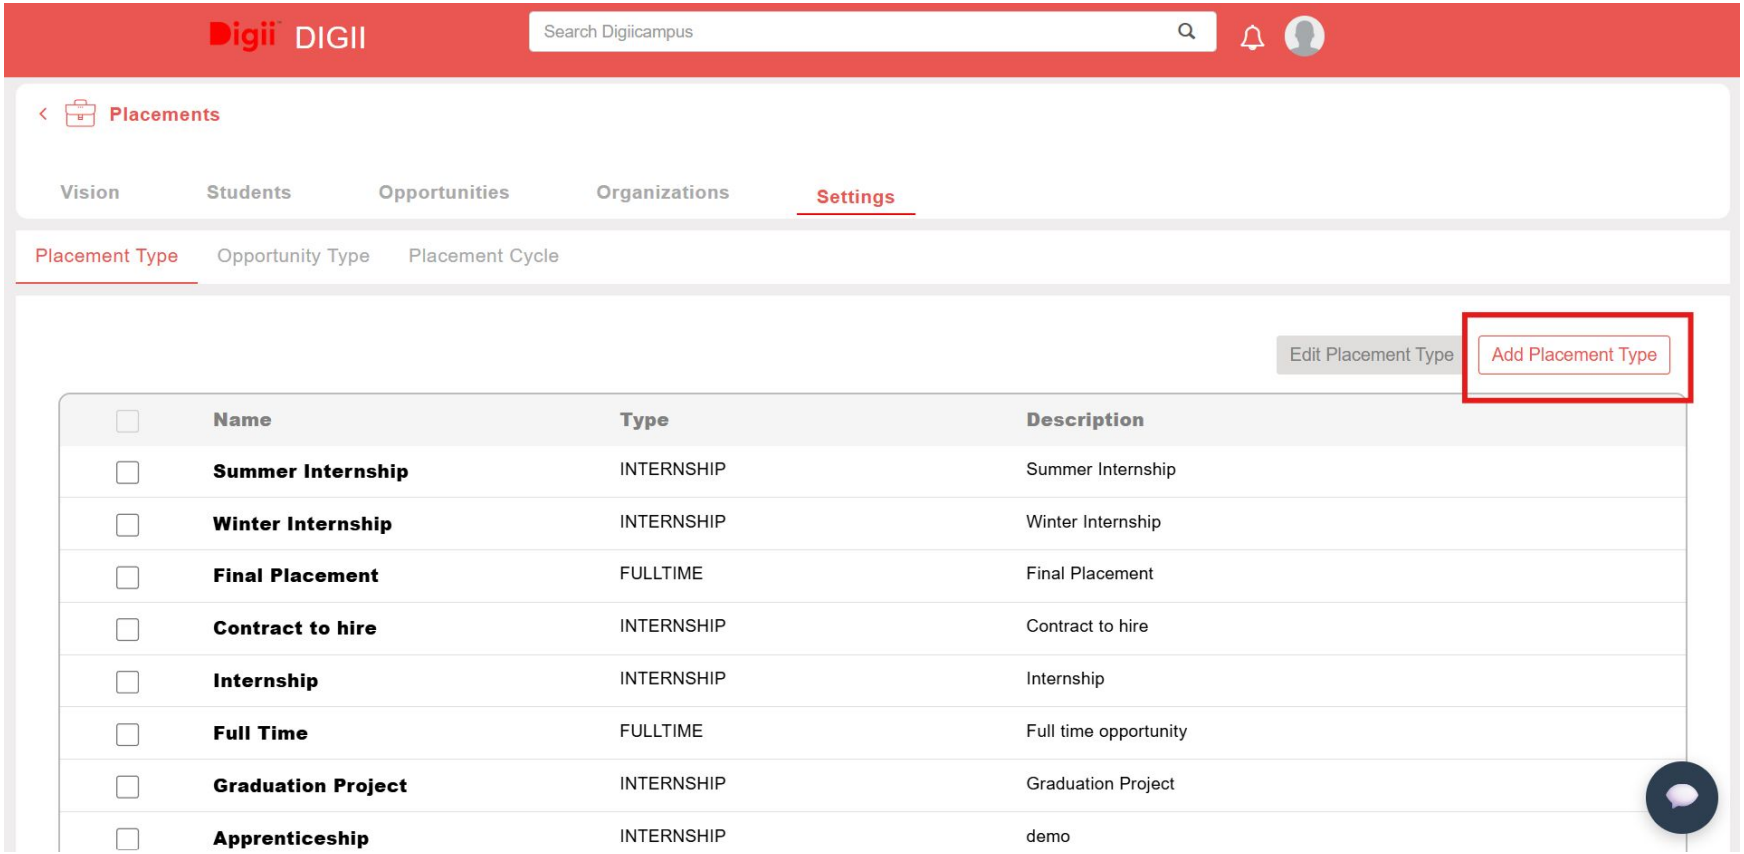

Admins can view the created placement cycles under the “Settings” tab

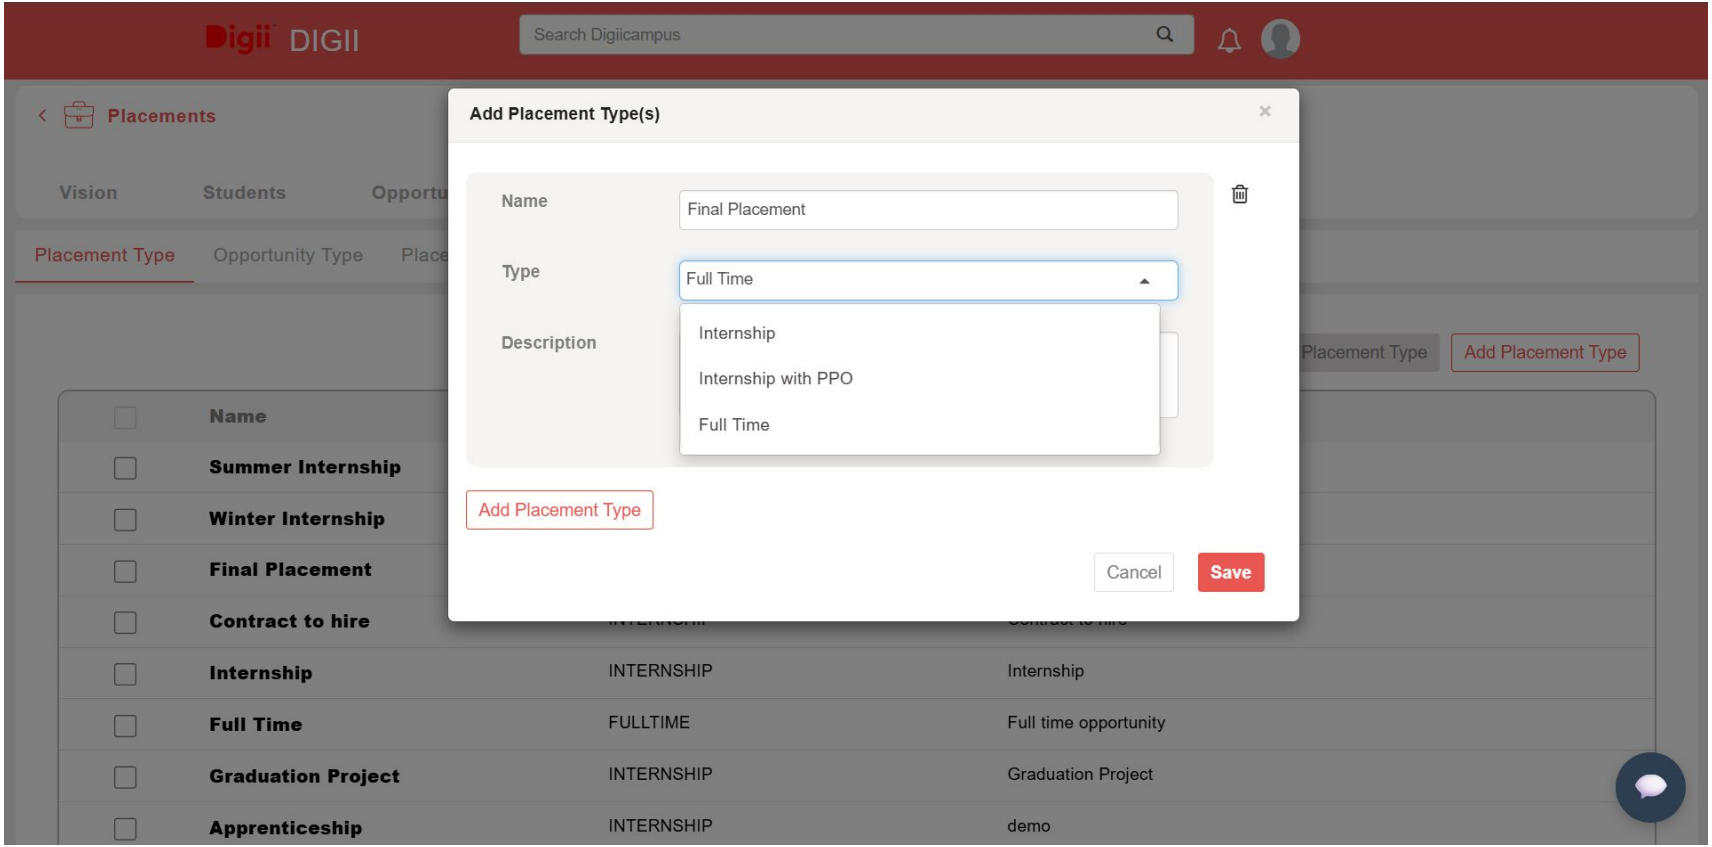

Placement coordinators can also view the “Audit Logs” by clicking on “View Logs”

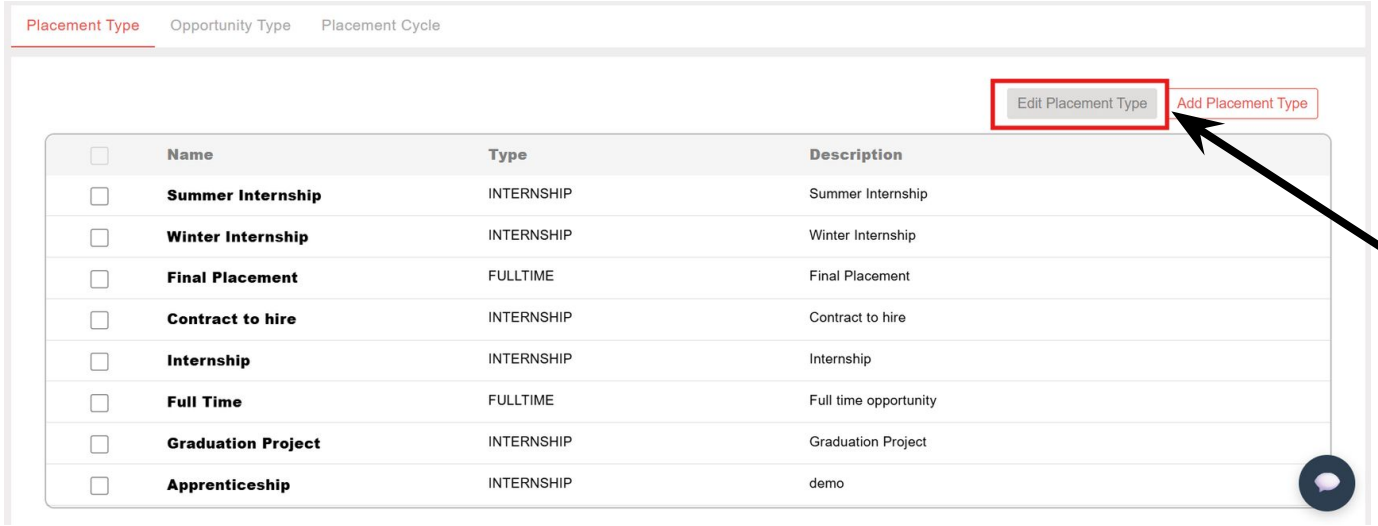

Click on “Add Placement Type” to create new placement types

Fill in the placement type details and click on “Save”

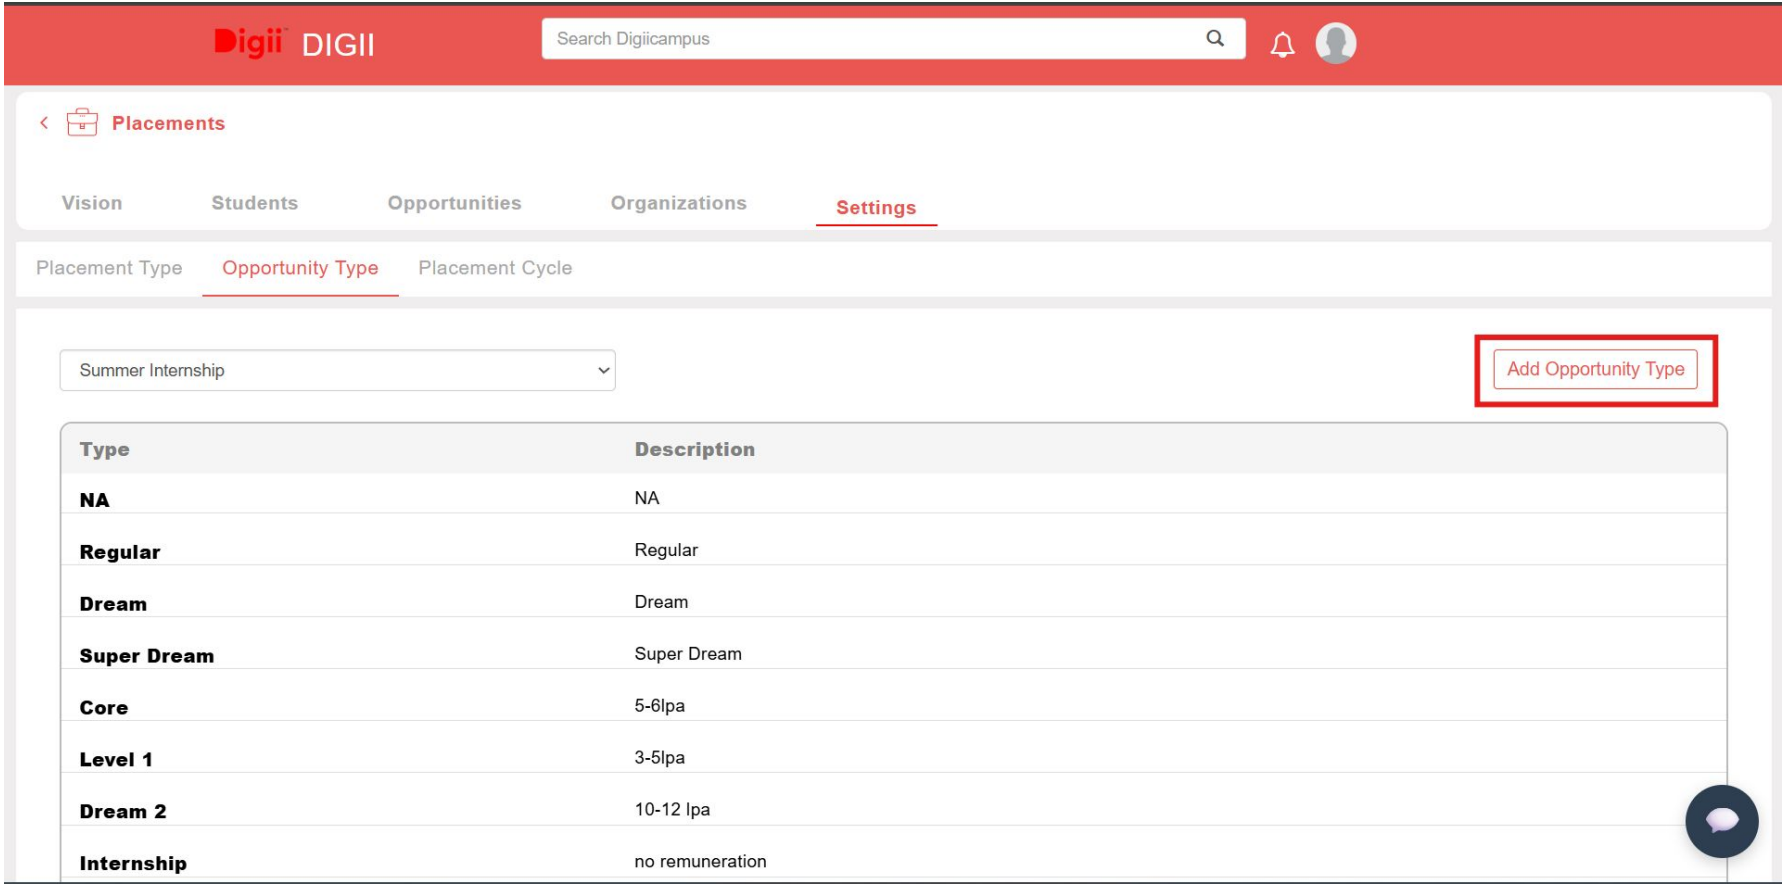

Created placement types can be viewed on the front end

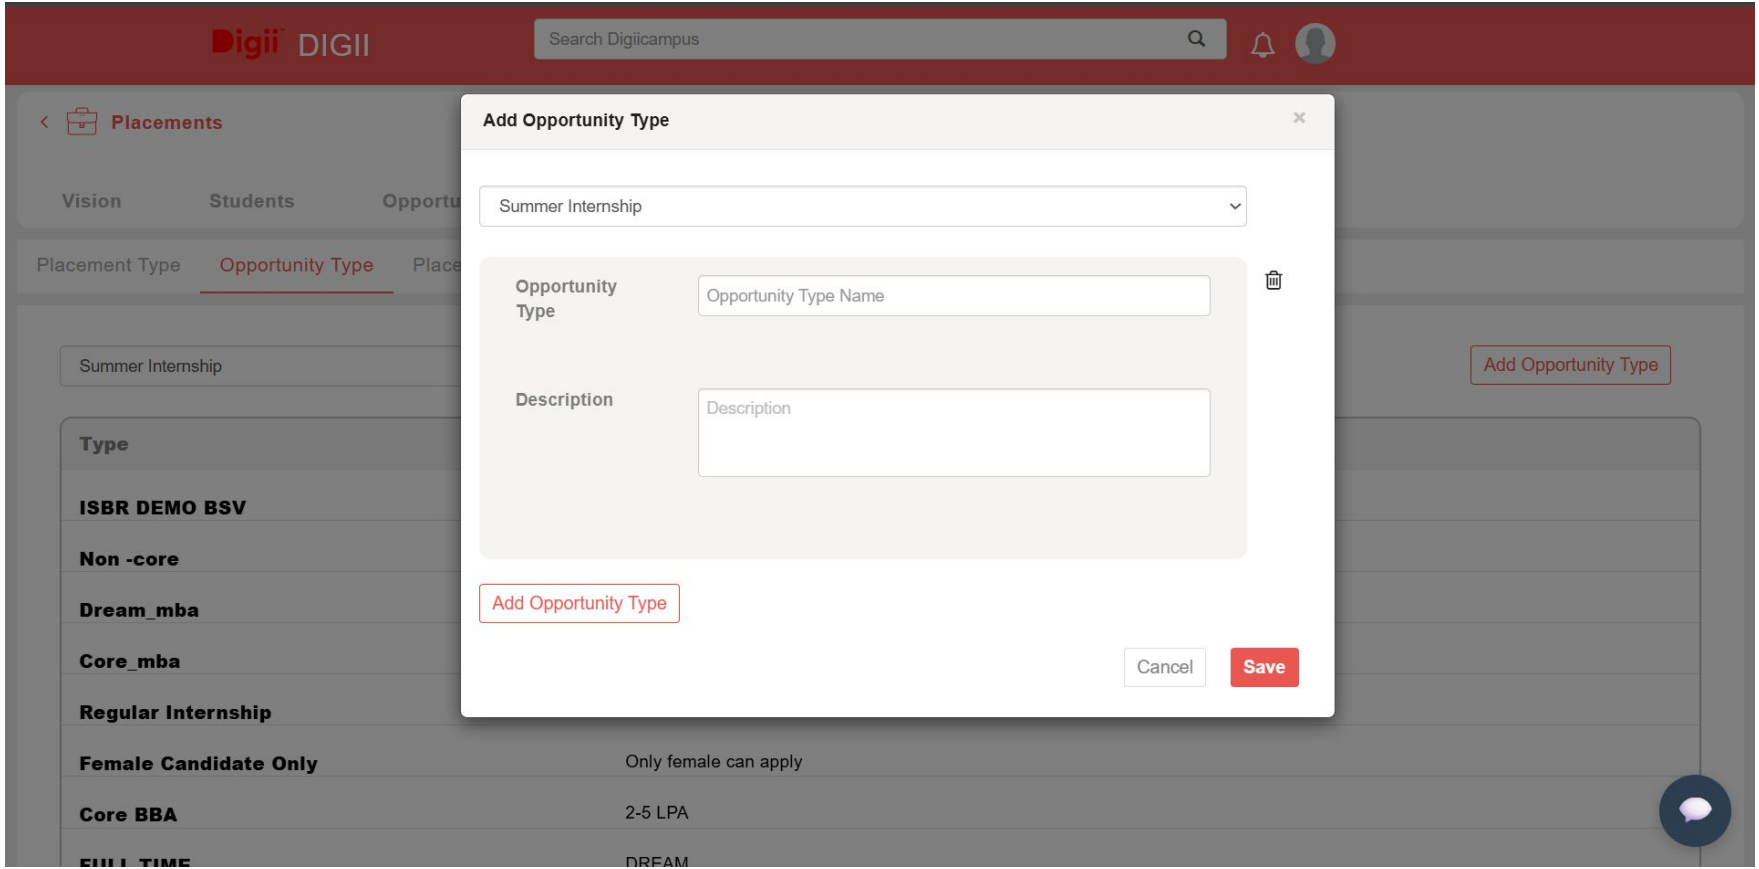

Placement coordinators can also edit existing placement type s.

Note :- Placement Types cannot be deleted once they have been created

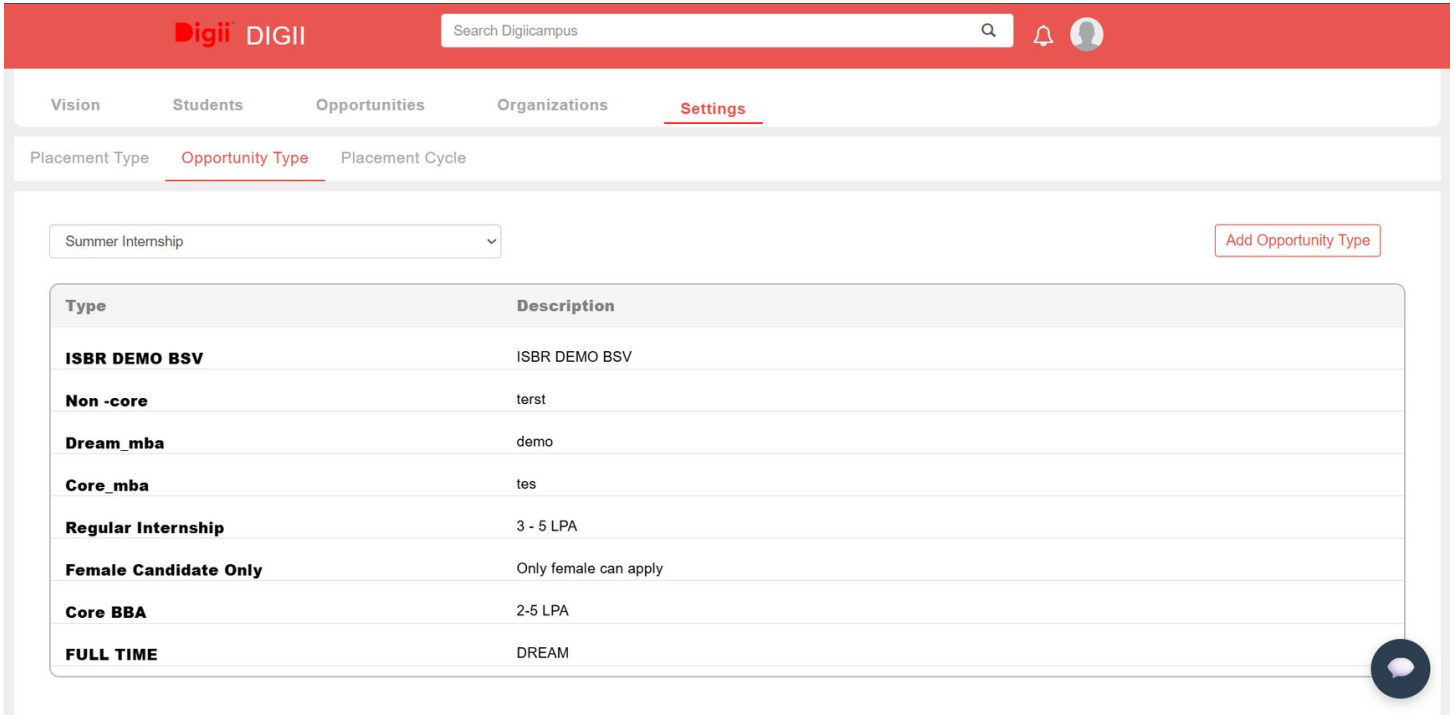

Click on “Add Opportunity Type” to create new placement types

Fill in the opportunity type details and click on “Save”

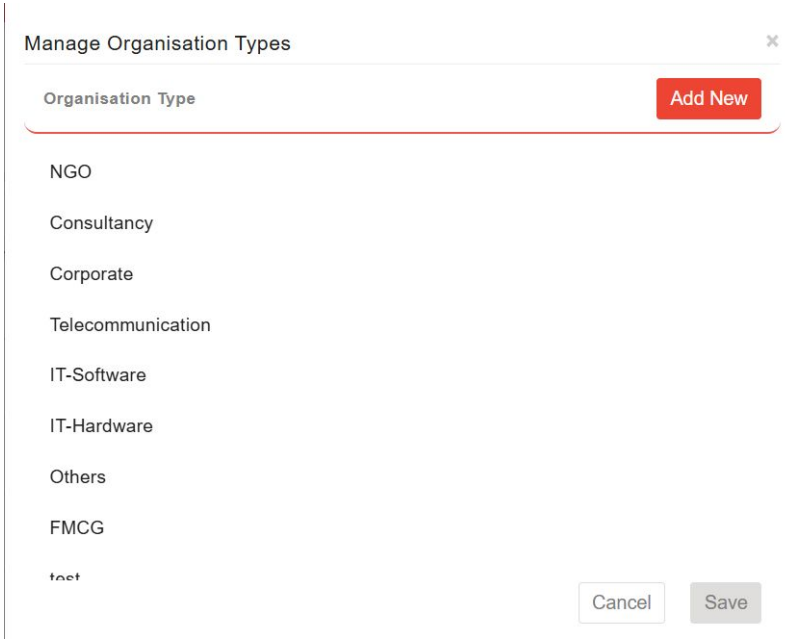

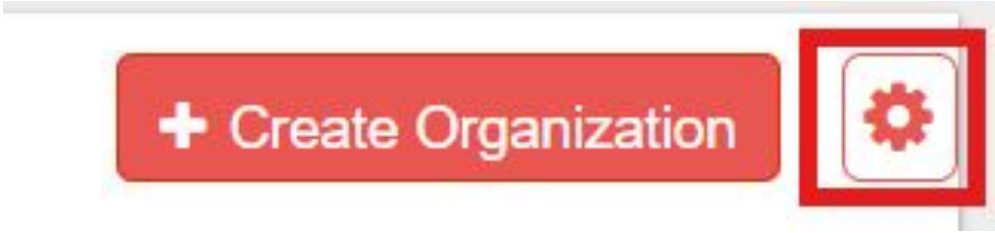

Created opportunity types can be viewed on the front end

Note :- Opportunity Types cannot be edited or deleted once they have been created

Click on the Settings Icon available on the right hand corner to add organization types

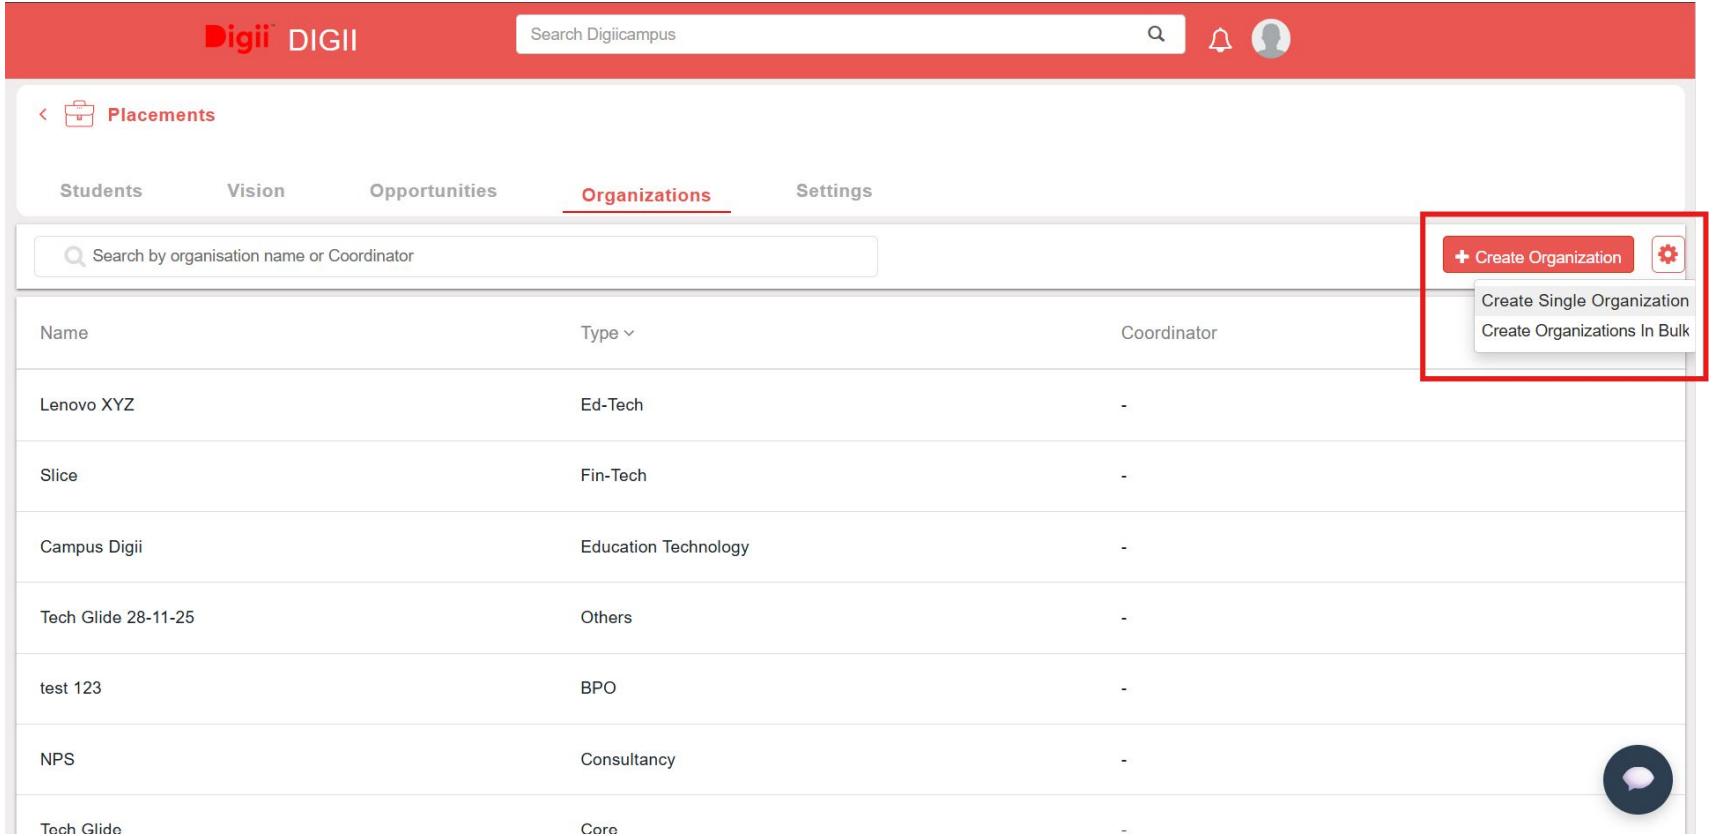

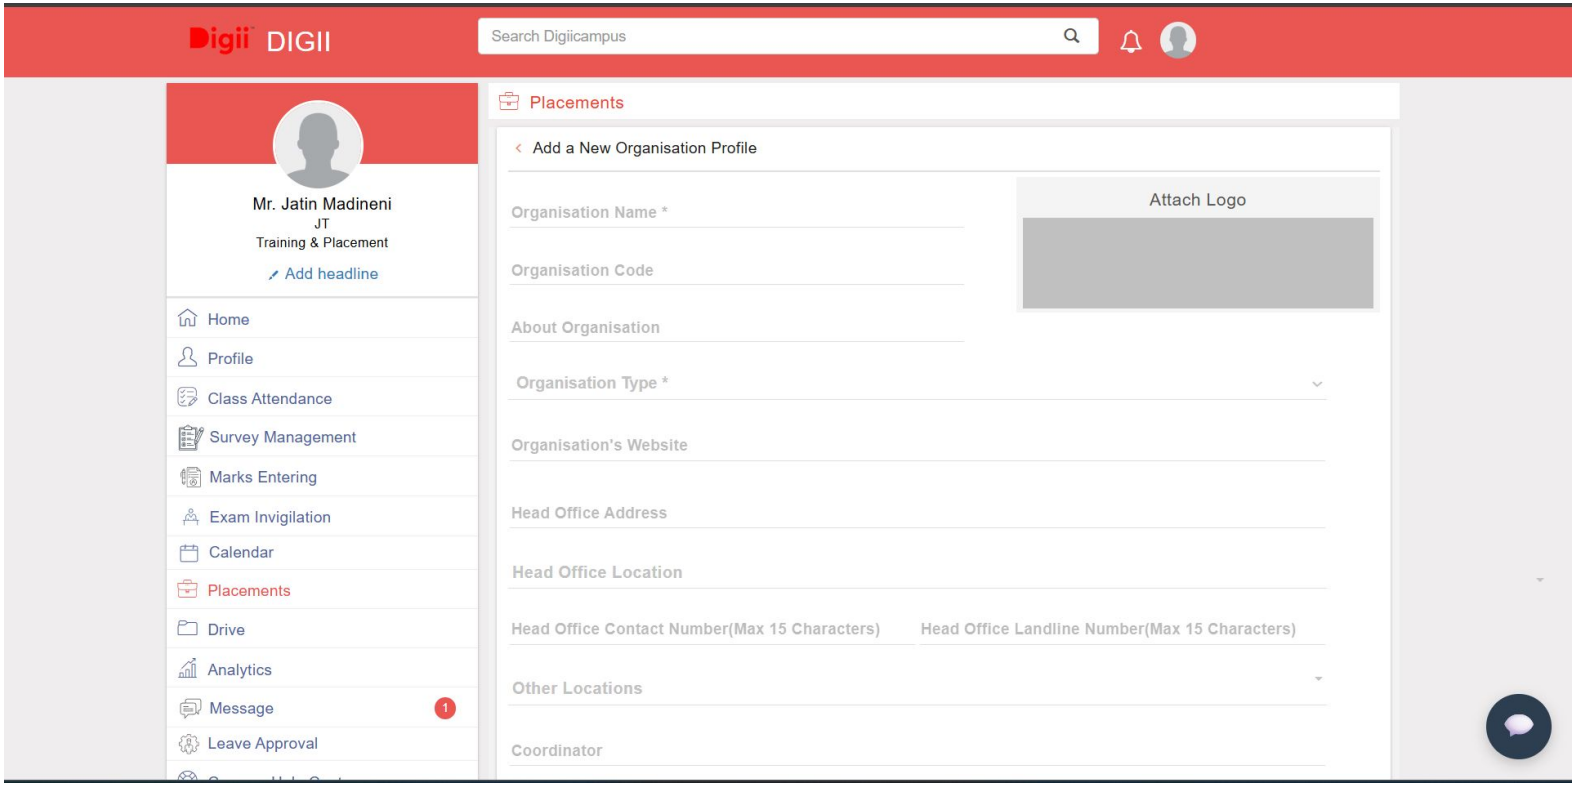

Click on the “Add New” button to create new organization types.
Once done, click on “Save” to confirm the changes.

Note :- Organization Types cannot be edited or deleted once they have been created

Click on “Create Single Organization” to navigate to the organization details page

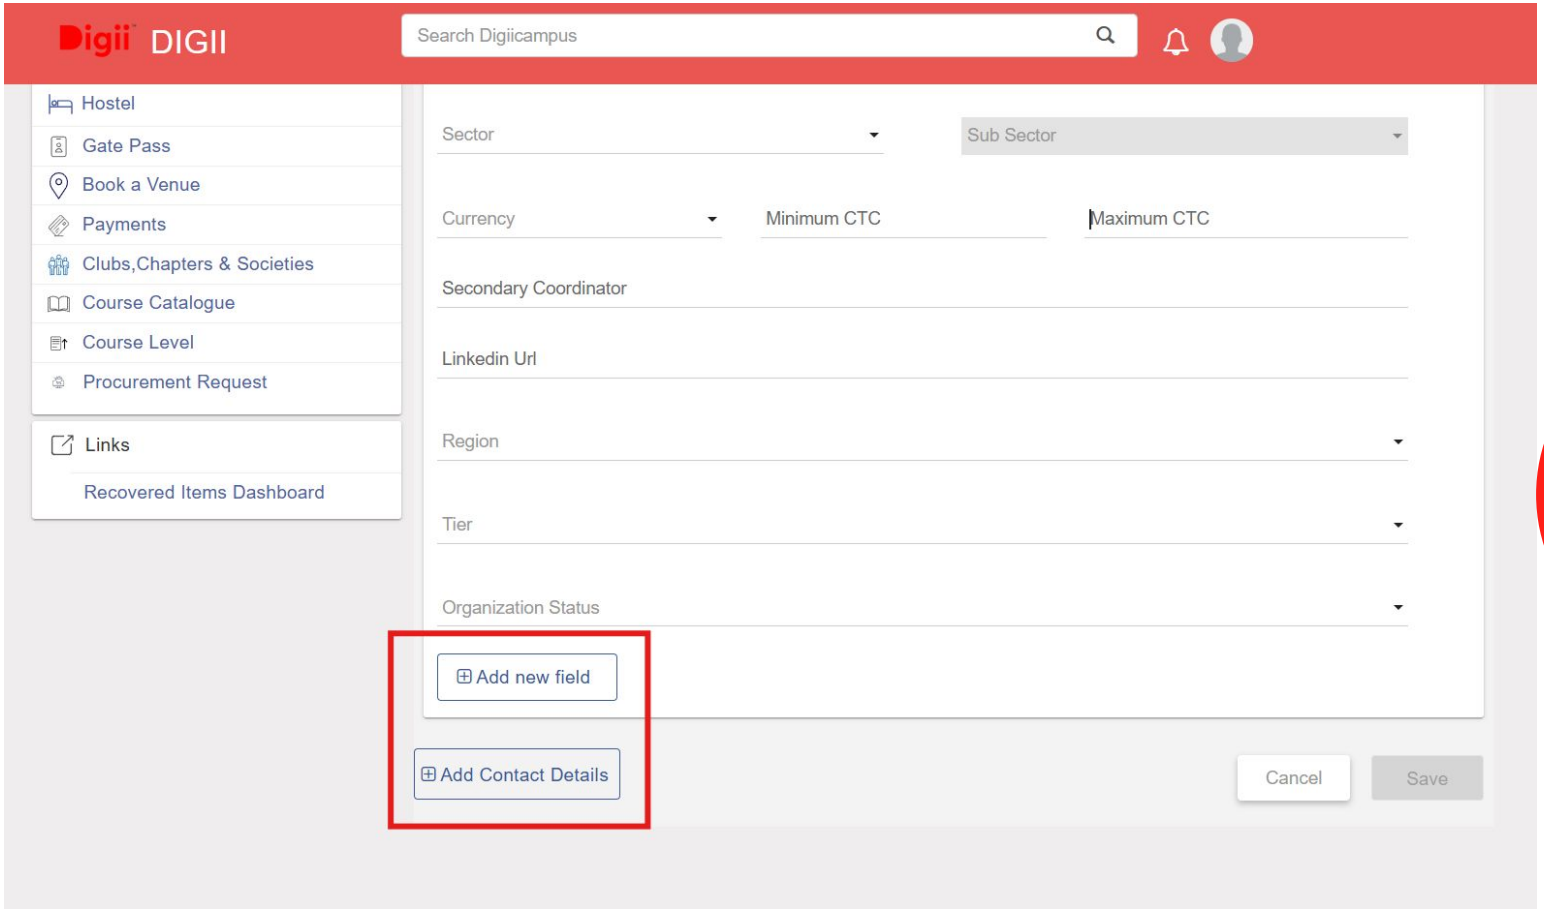

Fill in the basic organization details and click on “Save” to create a new organization

Note :- Organization name and Organization Type are mandatory fields required to create an organization.

Defining Organization details

Admins can create their own customizable fields while adding an organization. Contact details of the SPOC can also be added.

Bulk Uploading Organizations

Digii campus

Bulk Upload Organizations

Add Organizations by uploading an Excel file.

Download Sample Excel

Upload File

Note:

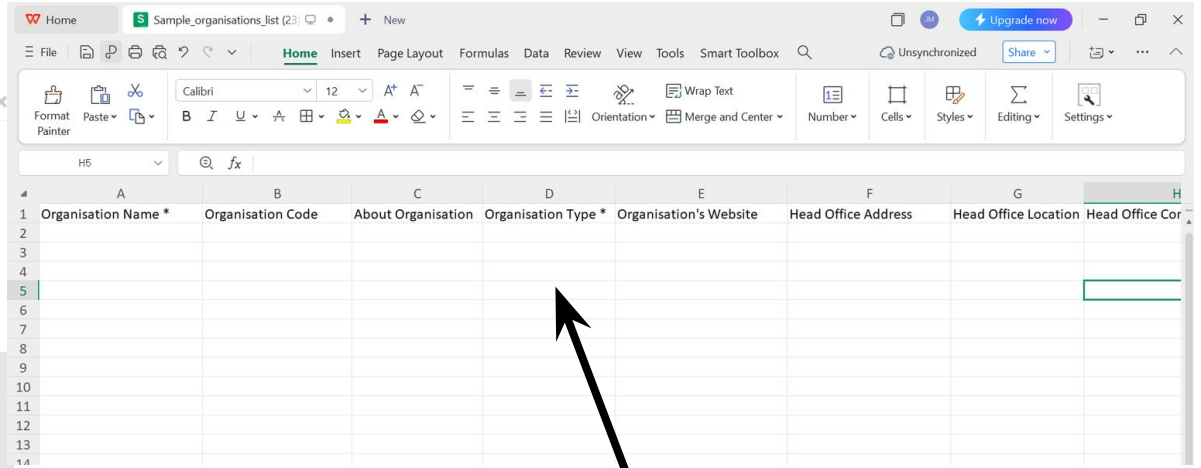

1. Mandatory fields: Organization Name and Organization Type
2. If an organization has more than 1 location, add the locations in the 'Other Locations' column separated by '/'.
3. Select Organization Type from the given list.

   NGO
   Consultancy
   Corporate

4. Select Currency Code from the given list.

   AFN
   ALL
   DZD

5. Select Region from the given list: NORTH,SOUTH,EAST,WEST
6. Select Tier V2 from the given list: TIER_1,TIER_2,TIER_3
7. Select Status from the given list: HOT,WARM,COLD

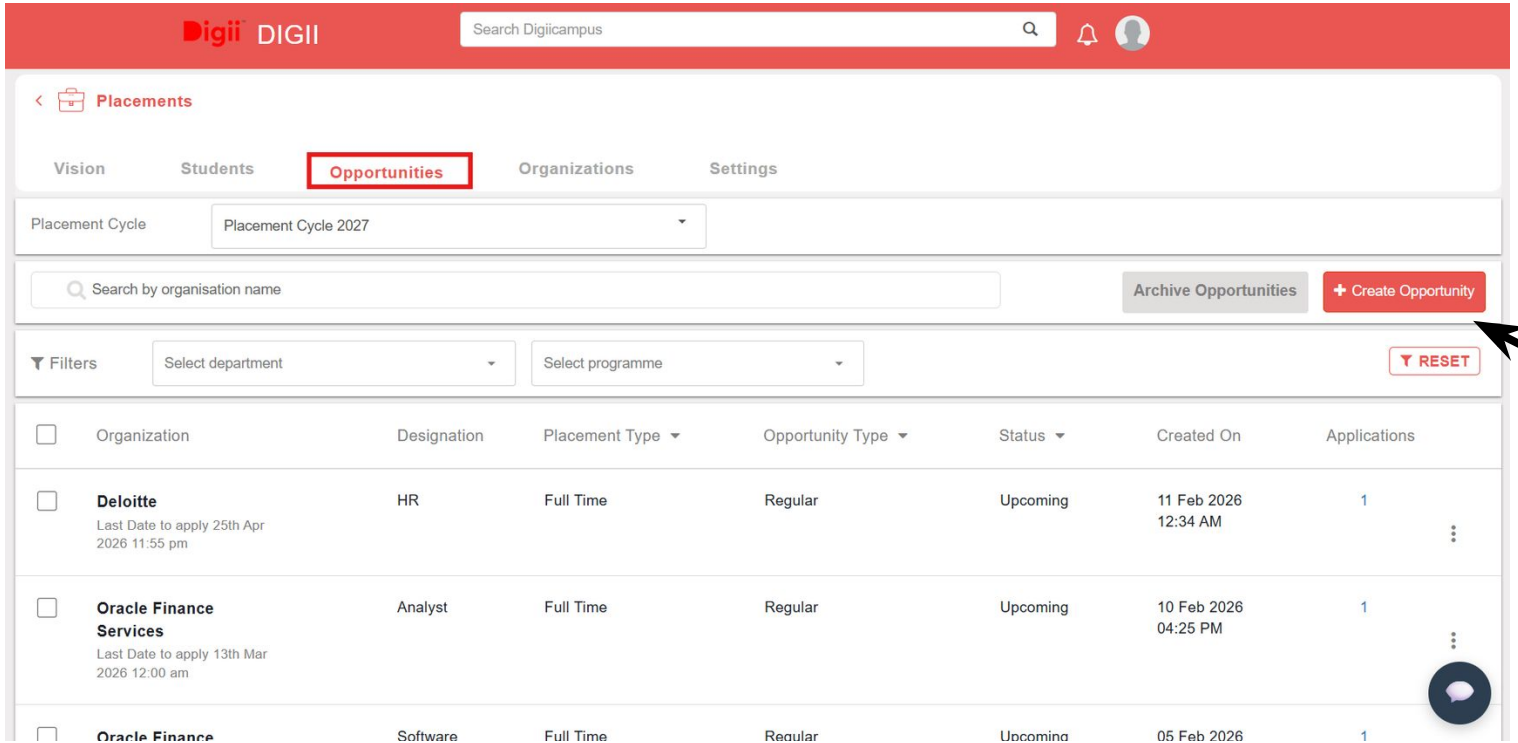

Download the sample template provided on the platform. Fill in the Excel template with the organization details and upload it in the placement management module.

Organizations can also be edited and deleted in the placement module.

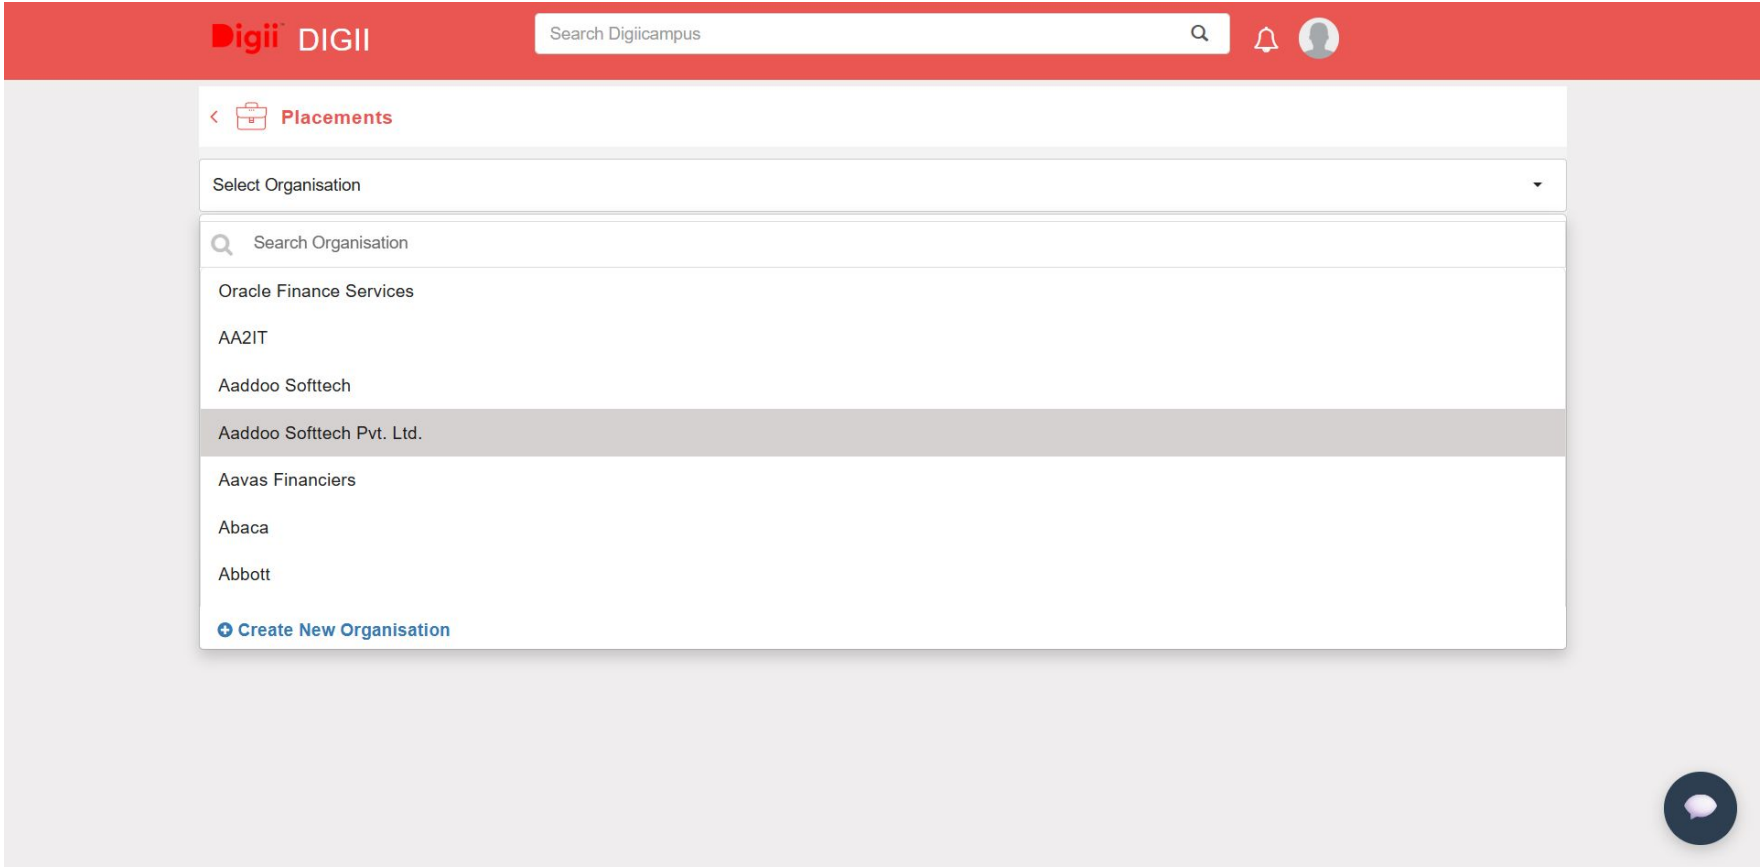

Note :- Organizations can only be deleted if there are no opportunities mapped within it.

Navigate to the “Opportunities” tab to create and manage opportunity details

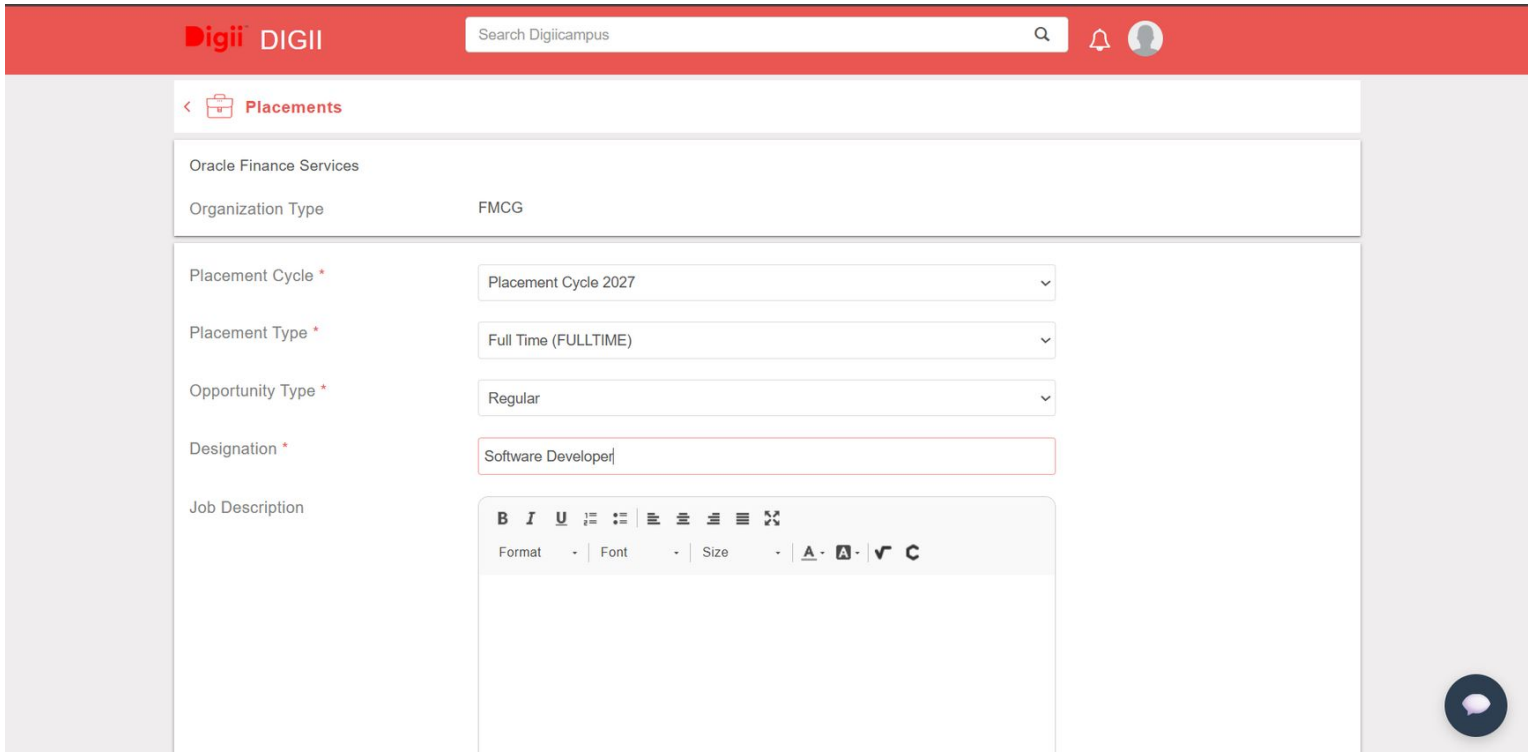

Click on “Create Opportunity” to post a new opportunity in the placement module.

Select the organization for which you would like to post the opportunity

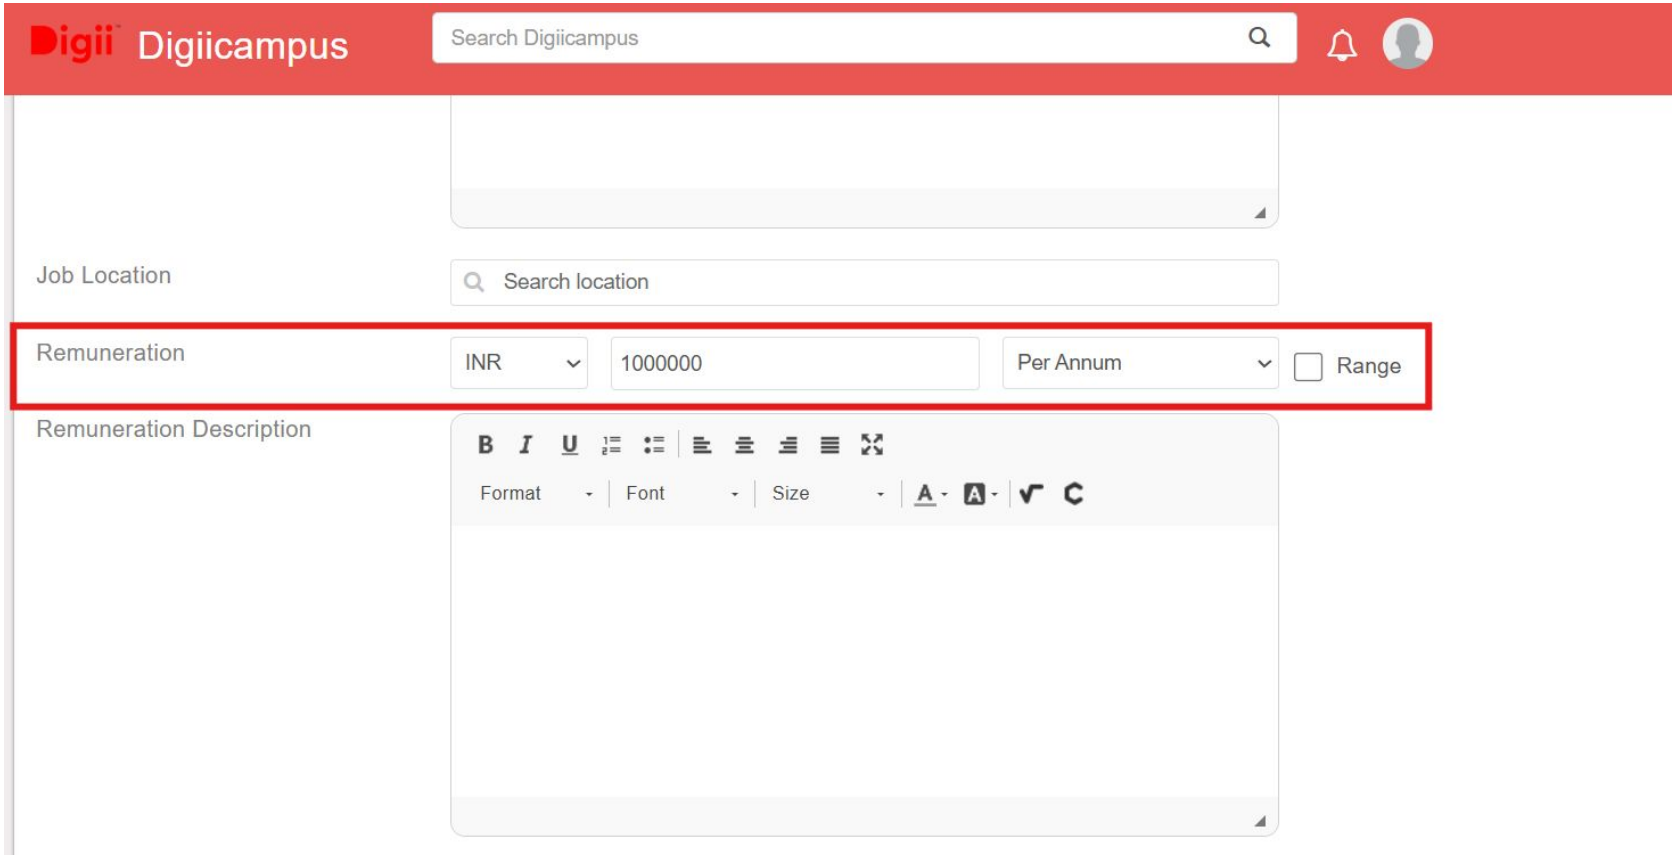

Fill in the placement opportunity details

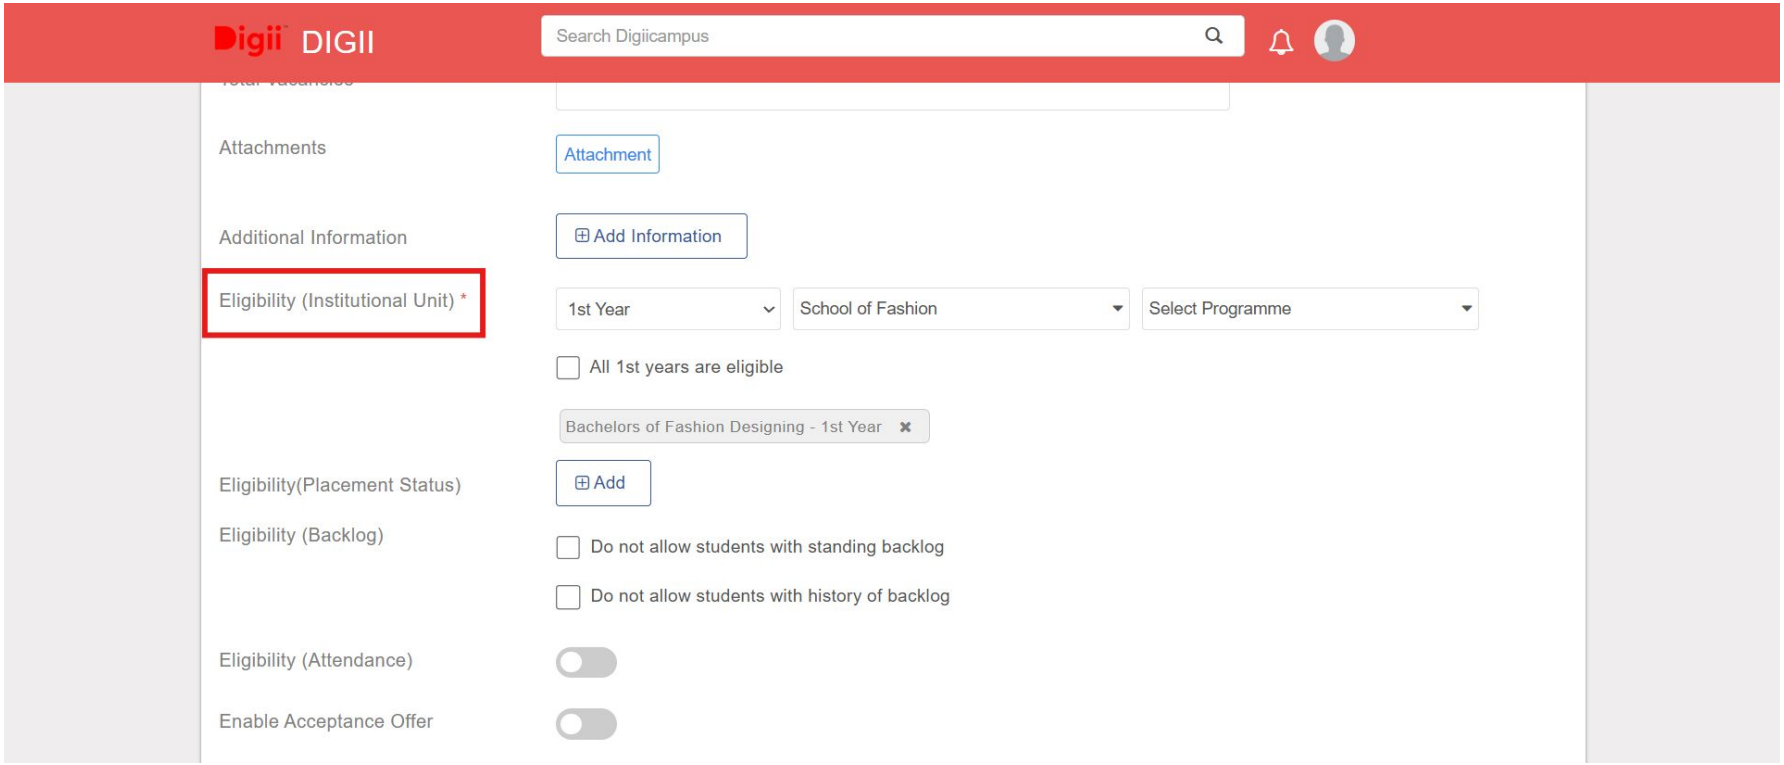

Note :- The placement cycle and type details available in the dropdown here has to be initially configured in the placement cycle settings.

Admins can define the renumeration offered by the companies annually or month wise

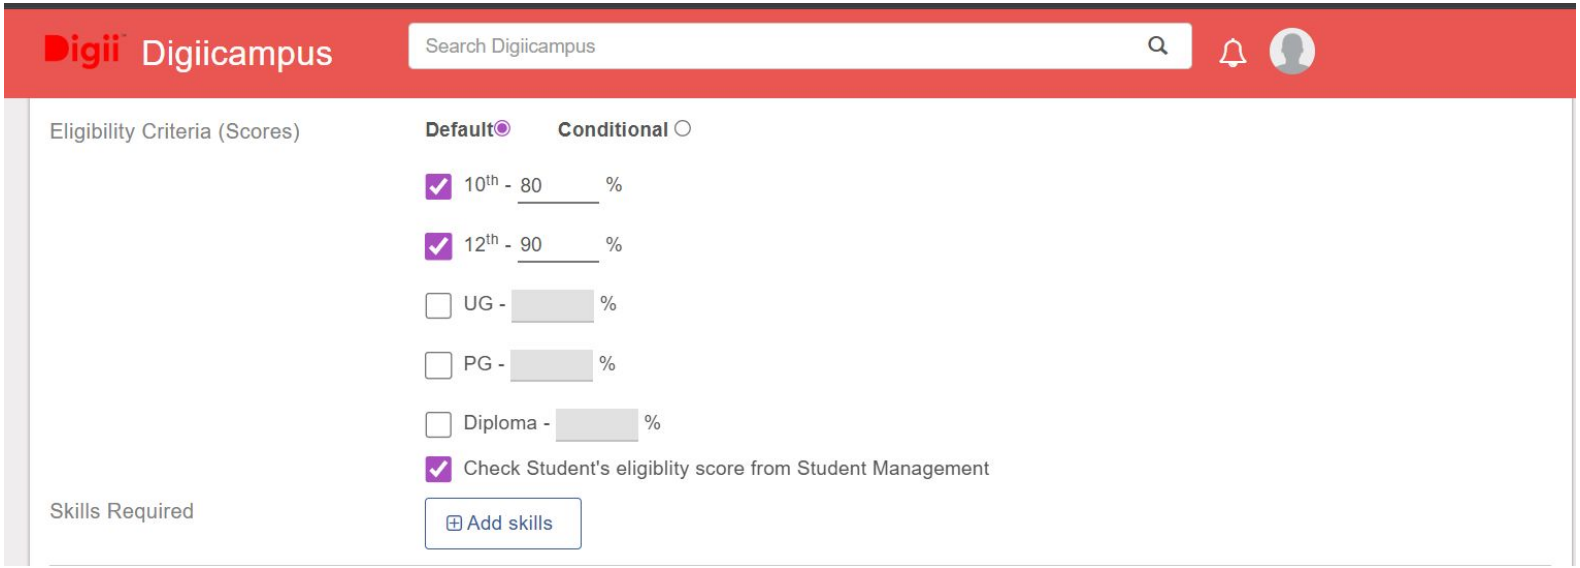

Fill in the institutional eligiblity of the students eligible for this opportunity.

Note :- The departments and programmes have to configured in the structure module as a prerequisite

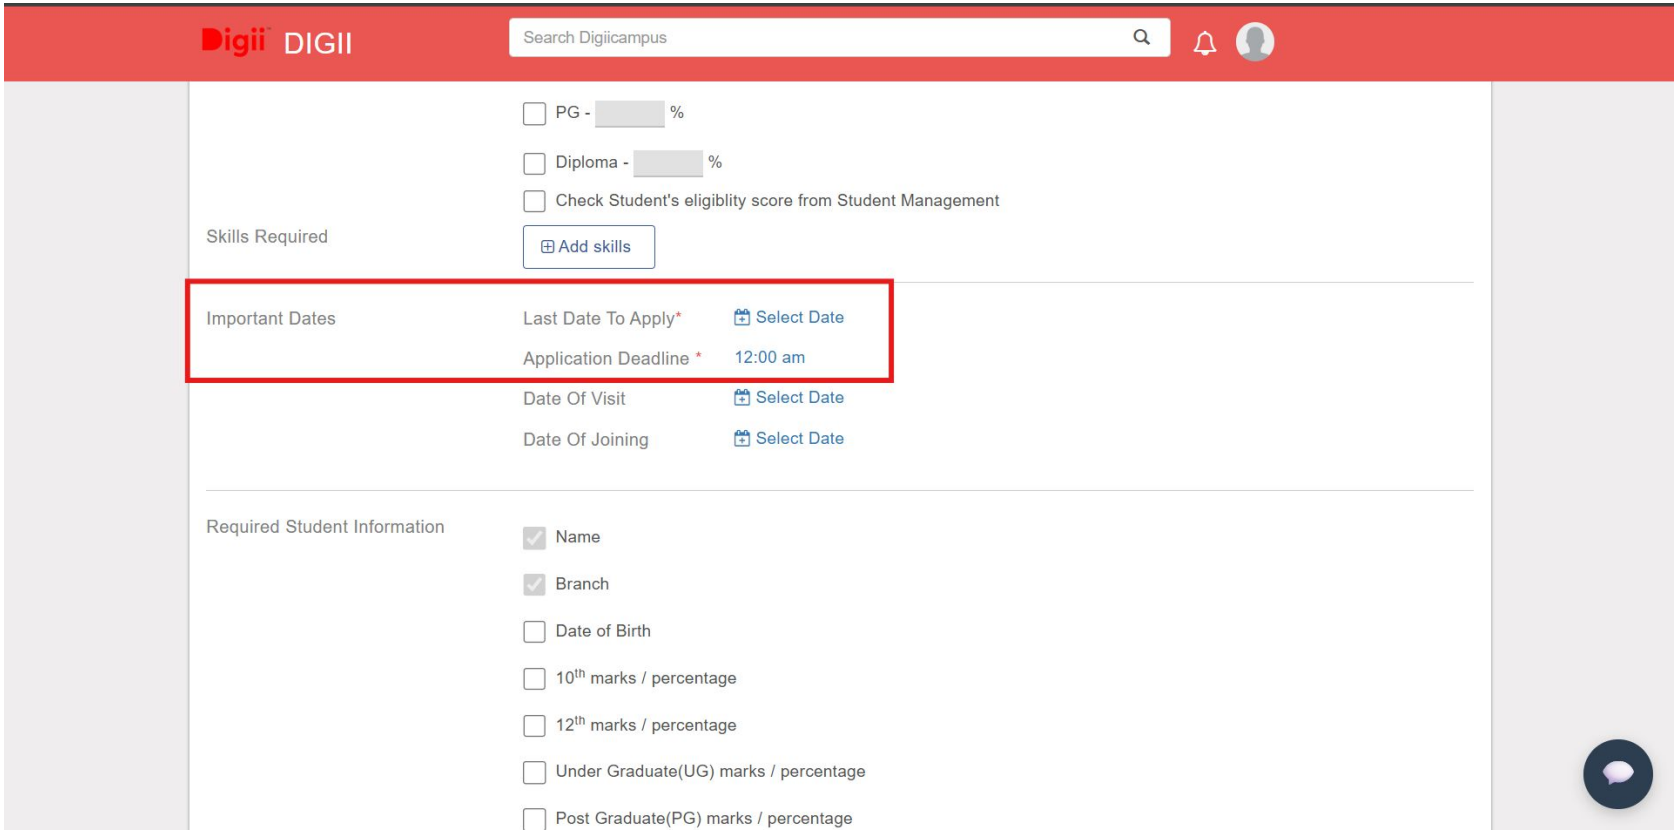

Define the academic scores eligibility for students participating in this opportunity

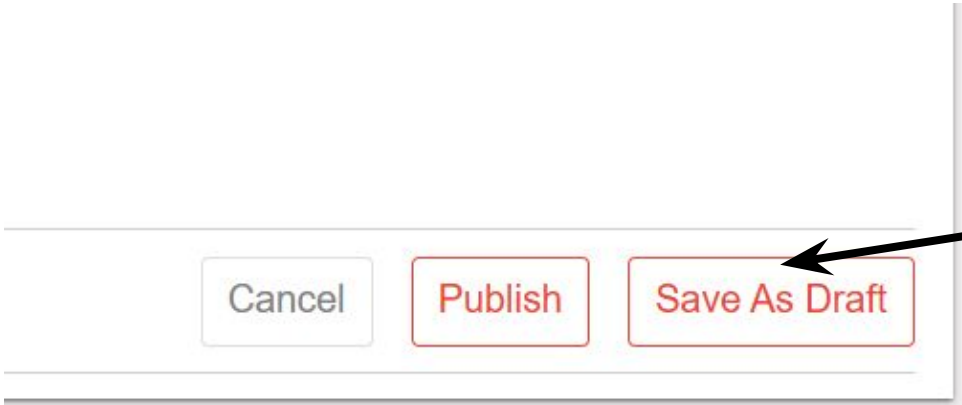

Once the academic scores eligiblity has been defined, students will be prompted to enter their 10th and 12th marks while applying for the opportunity. However if the “Check Student's eligiblity score from Student Management” option is selected, then the system will automatically validate the student’s academic eligibility from the student management module.

Note :- The “Check Student's eligiblity score from Student Management” feature will only work if the students’ academic details i.e. 10th, 12th etc are updated in the student management module.

Fill in the last date and time provided to the students to apply for this opportunity

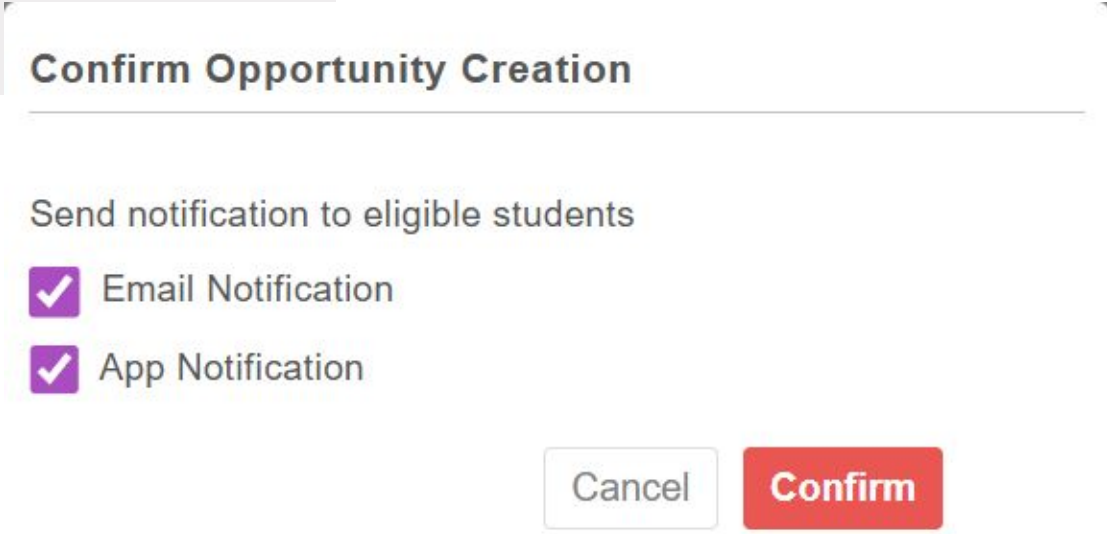

Admins will have the option to “Publish” the opportunity or save it as a draft

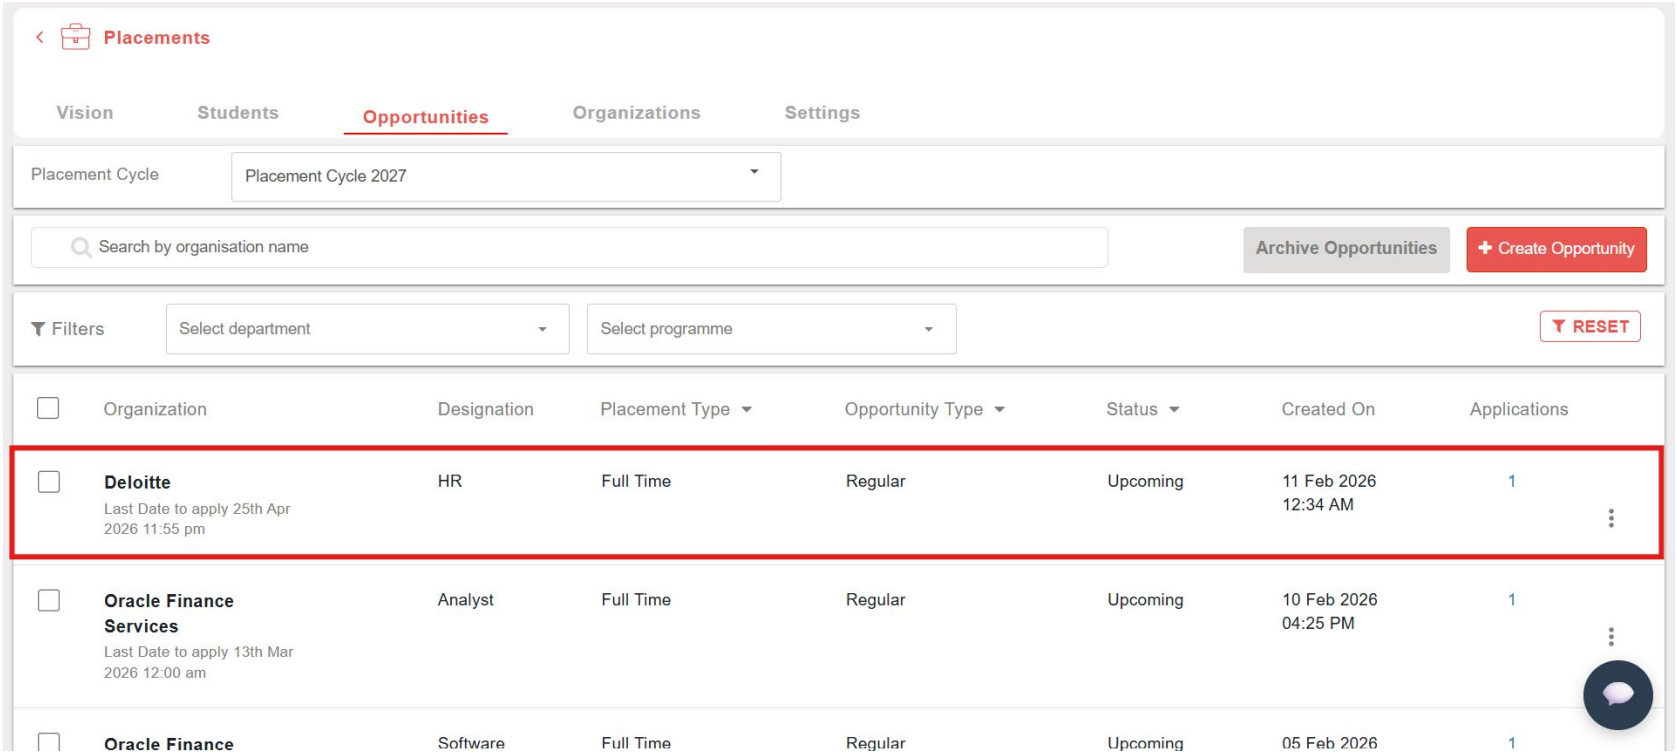

Saving the opportunity as a draft will allow the placement admins to continue and resume the process from where they left off.

Placement coordinators can choose to send opportunity notifications to the eligible students

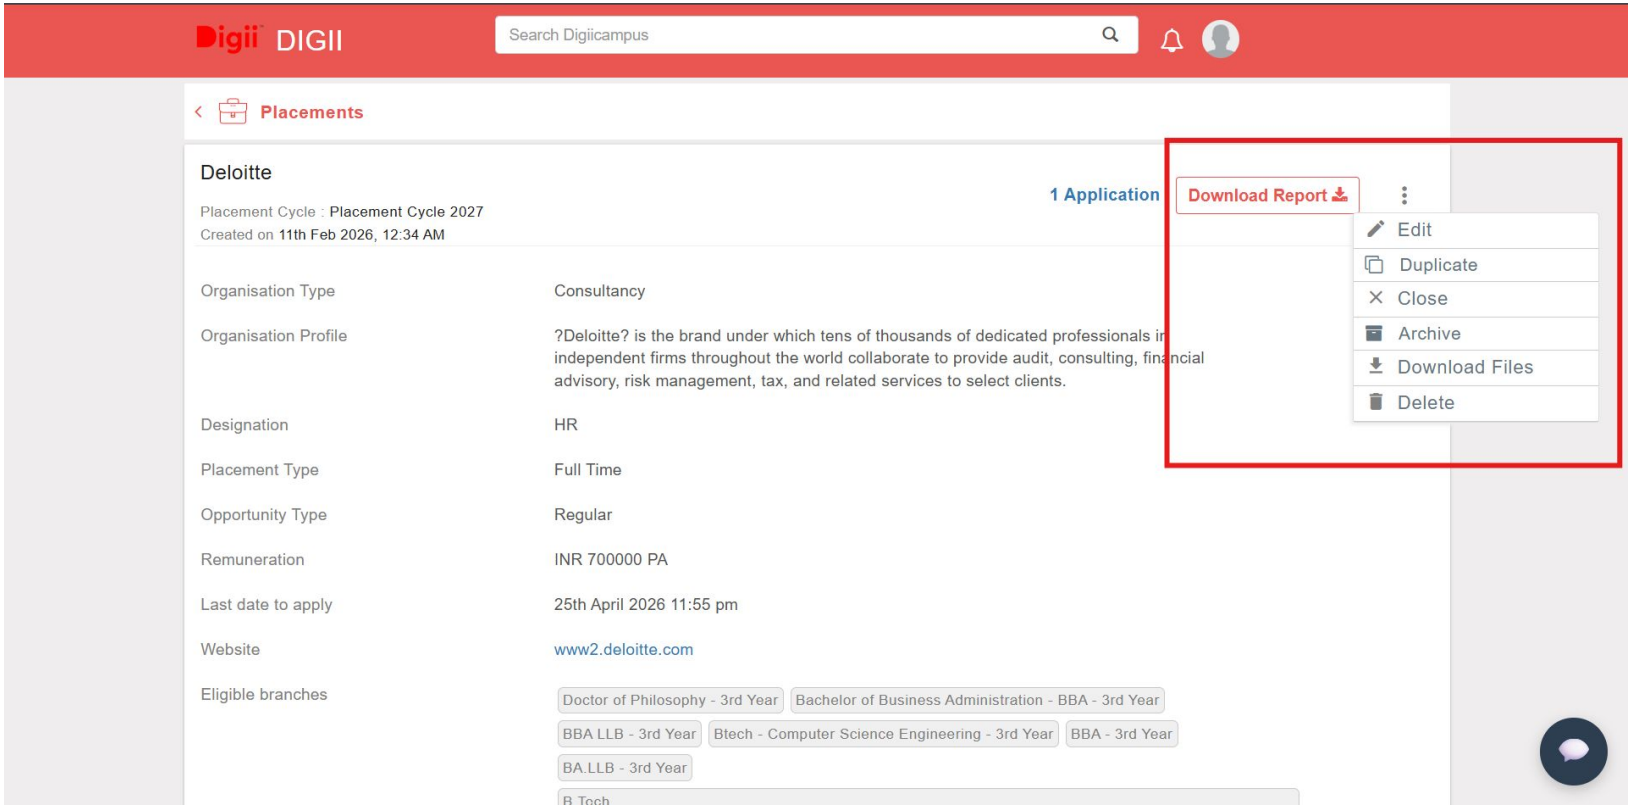

New opportunities created will be visible on the home page of the opportunities tab

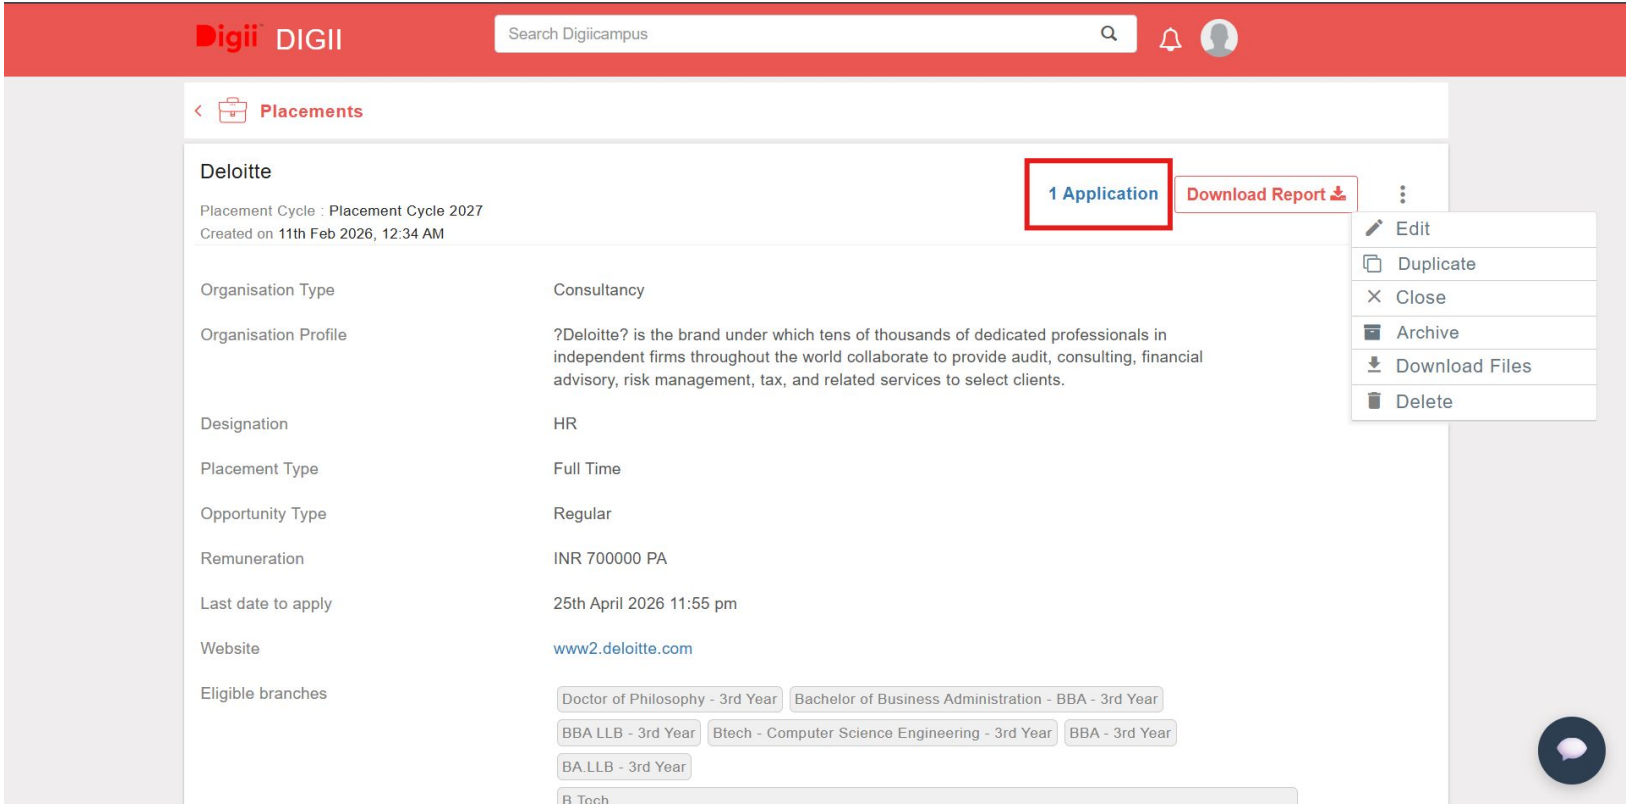

Note :- Opportunities can also be searched by organization name and can be filtered based on the eligible department and programme.

Active Opportunities can be edited, deleted, duplicated, closed and archived

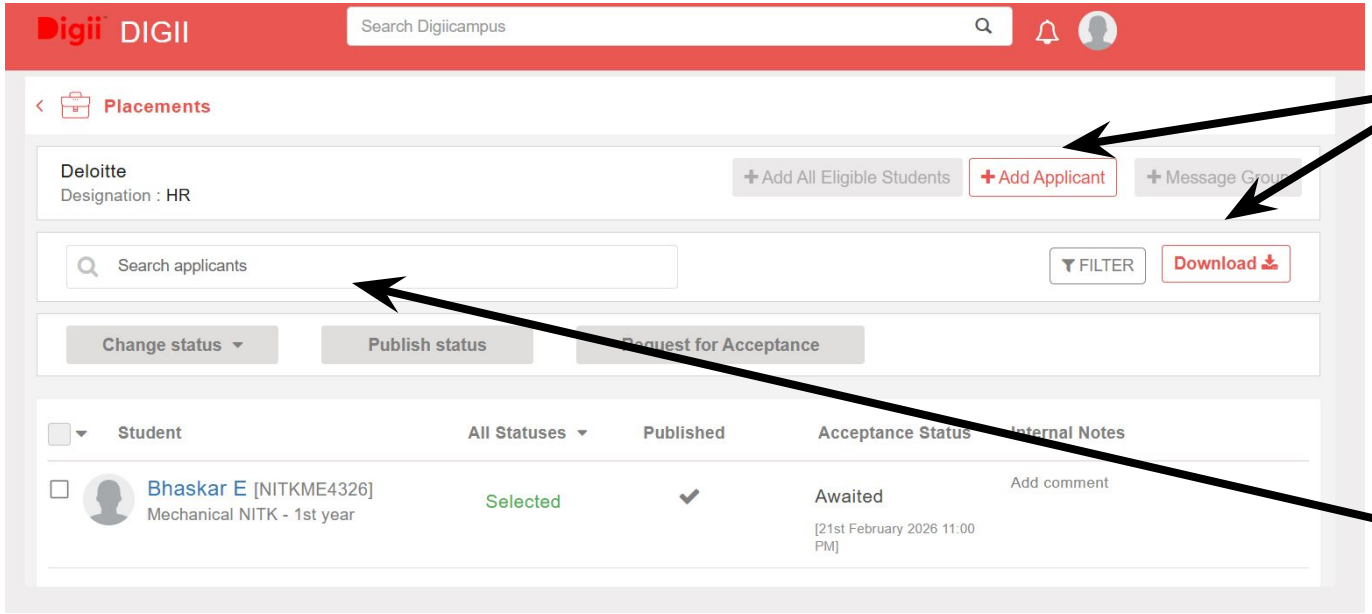

Note :- Opportunities can only be edited/closed/archived if there are no student application dependencies associated with it.

Admins can view and the list of students applied by clicking on “Applications”

Opportunity Specific Applications

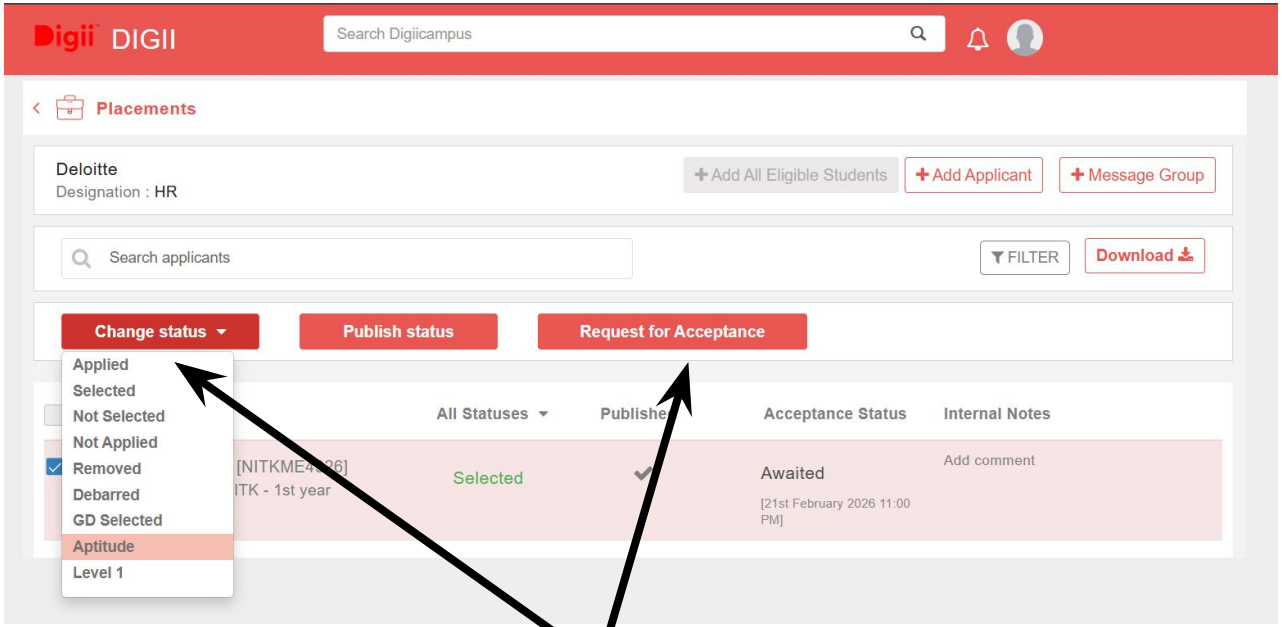

Placement Admins can download reports, add applicants and create message group from here

Admins can view,search the list of applicants here and can filter them accordingly.

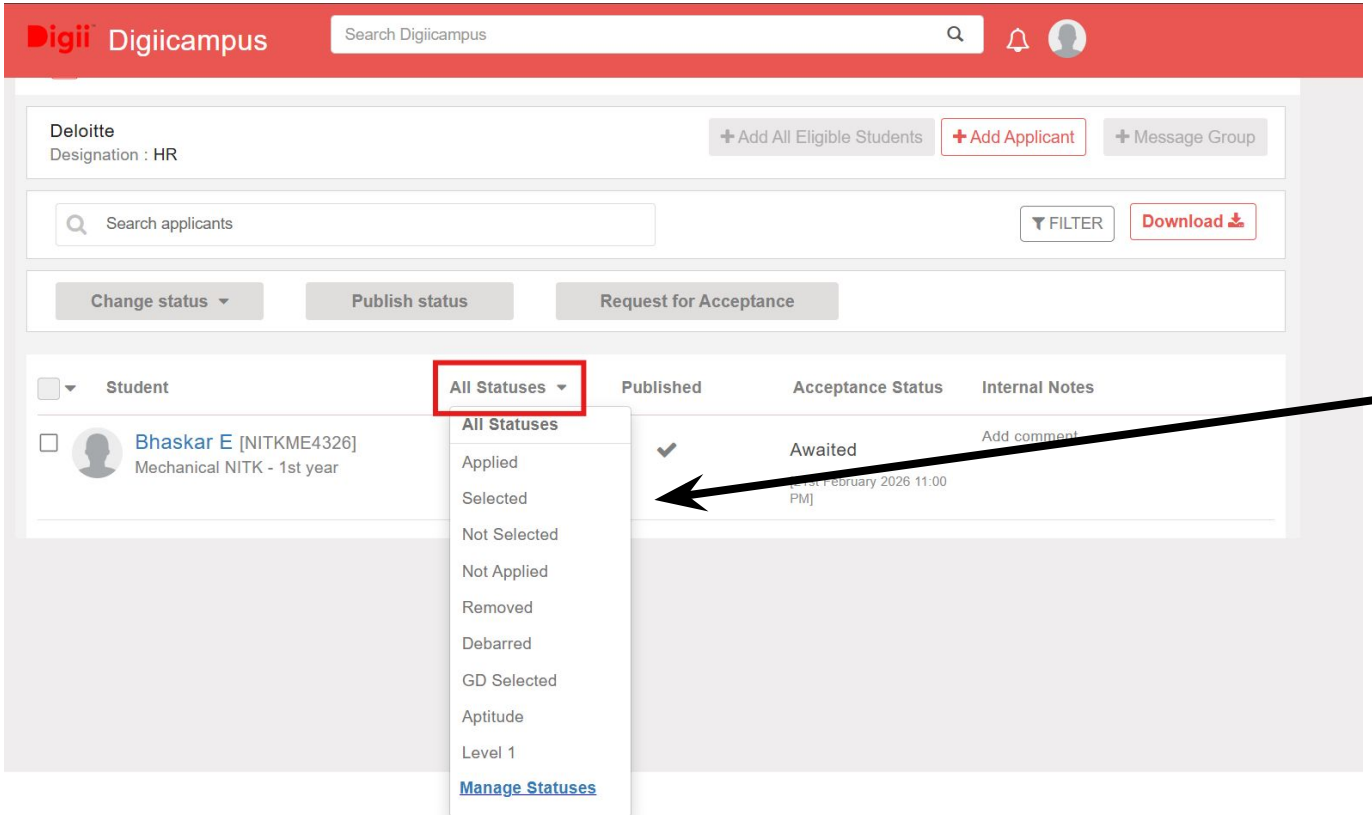

Note :- Once students have been added in an opportunity, they cannot be removed.

Opportunity Specific Applications

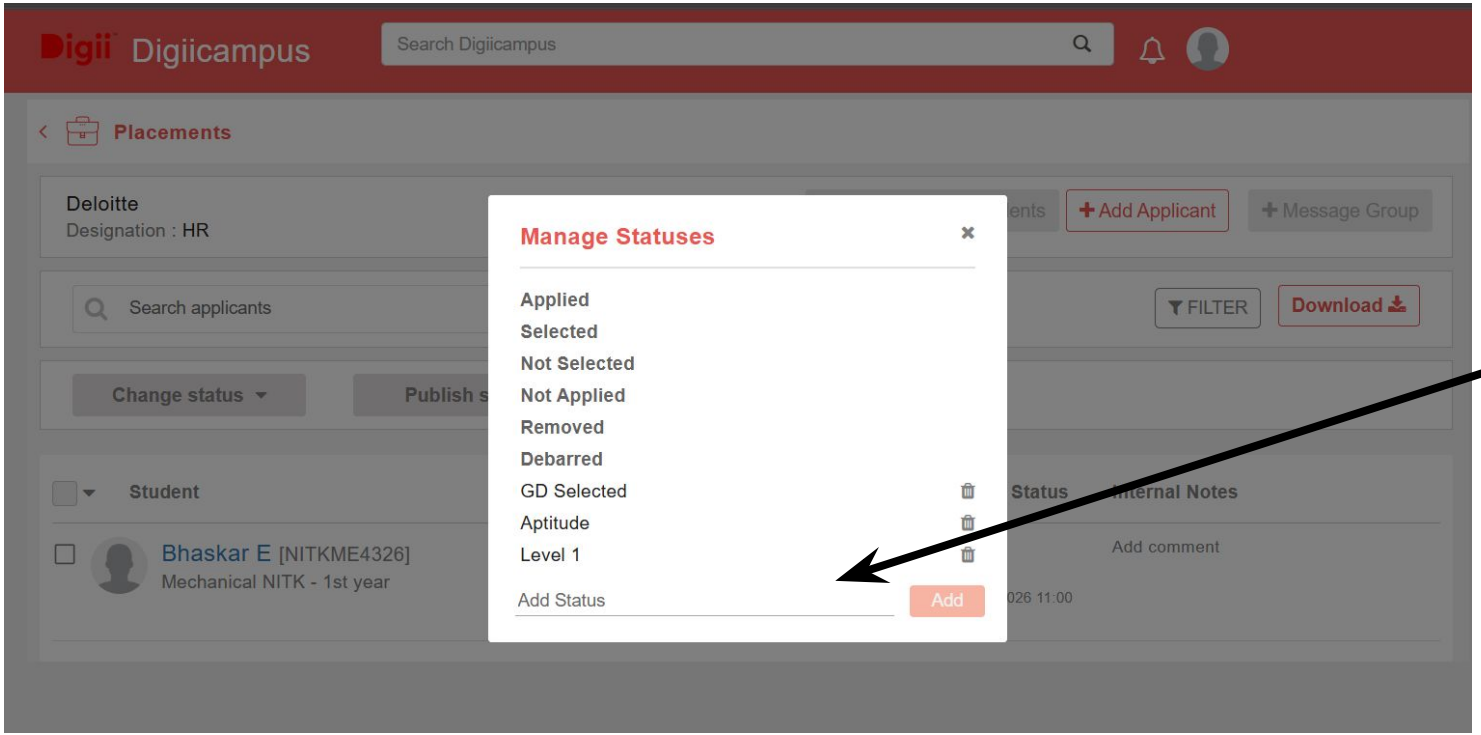

Admins can change the placement status of the students by clicking on “Change Status”. Alternatively admins can request candidates for an acceptance of their placement offer by selecting the “Request for Acceptance” option once their status has been published as “Selected”.

Admins can create their own custom placement status for students

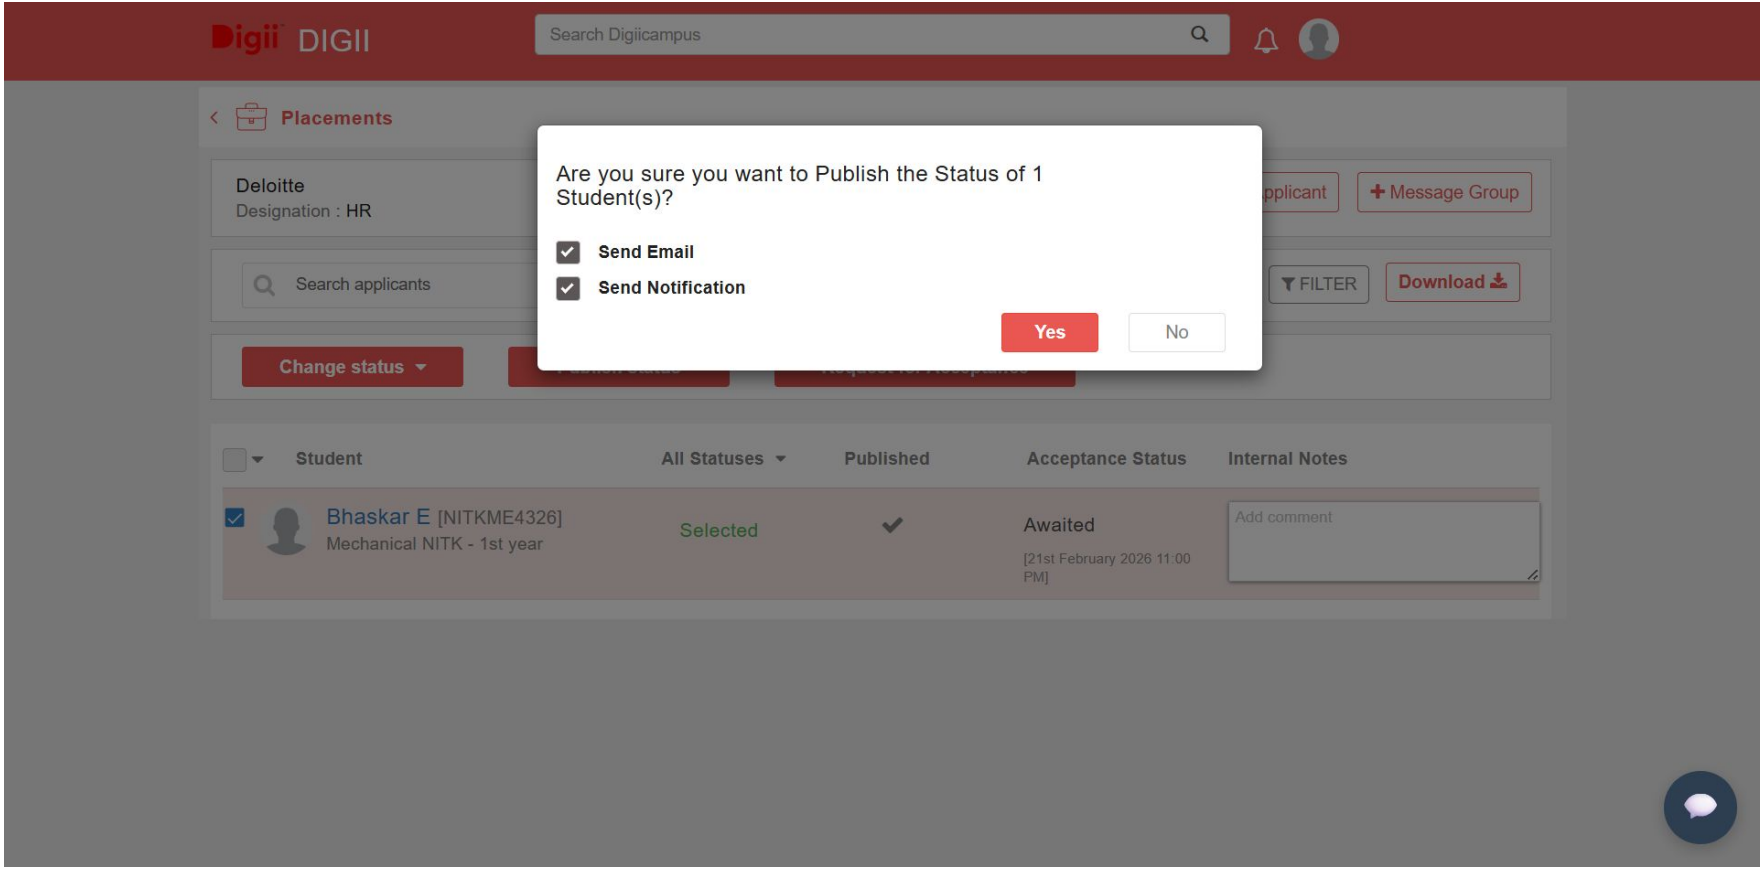

Click on “All Statuses” followed by “Manage Statuses” to create your own custom placement status

Admins can create their own custom placement status for students

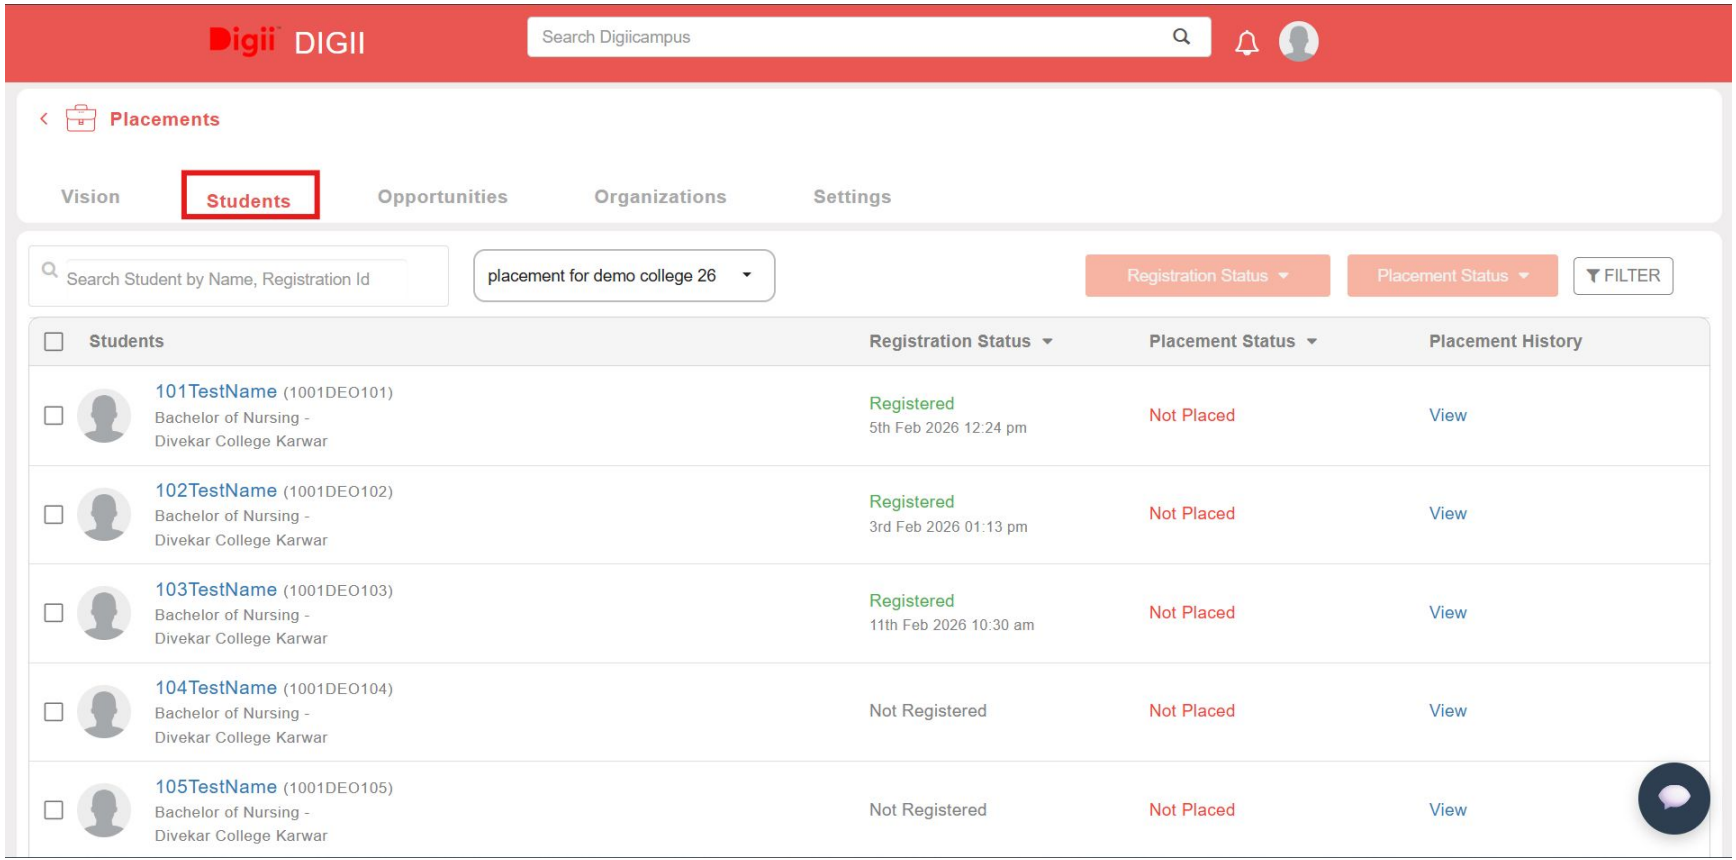

Once done, enter the new custom status and click on “add”. These custom status can be deleted as well by clicking on the “bin” icon

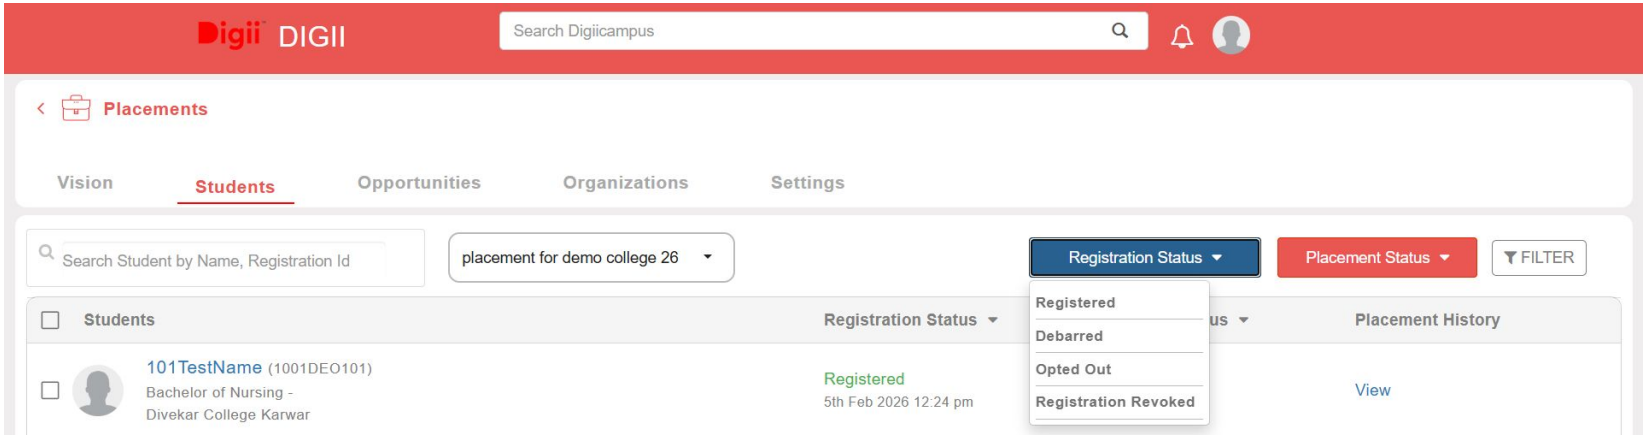

Admins can publish the applicant's placement status in order to notify them

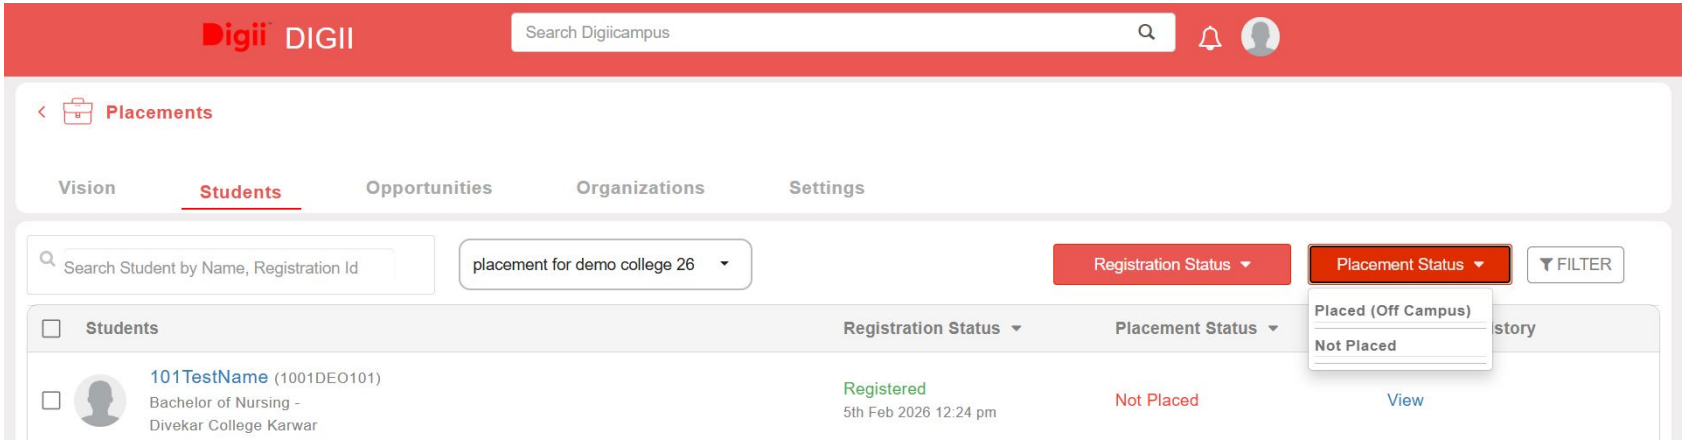

Navigate to the “Students” tab to manage student registration and placement details

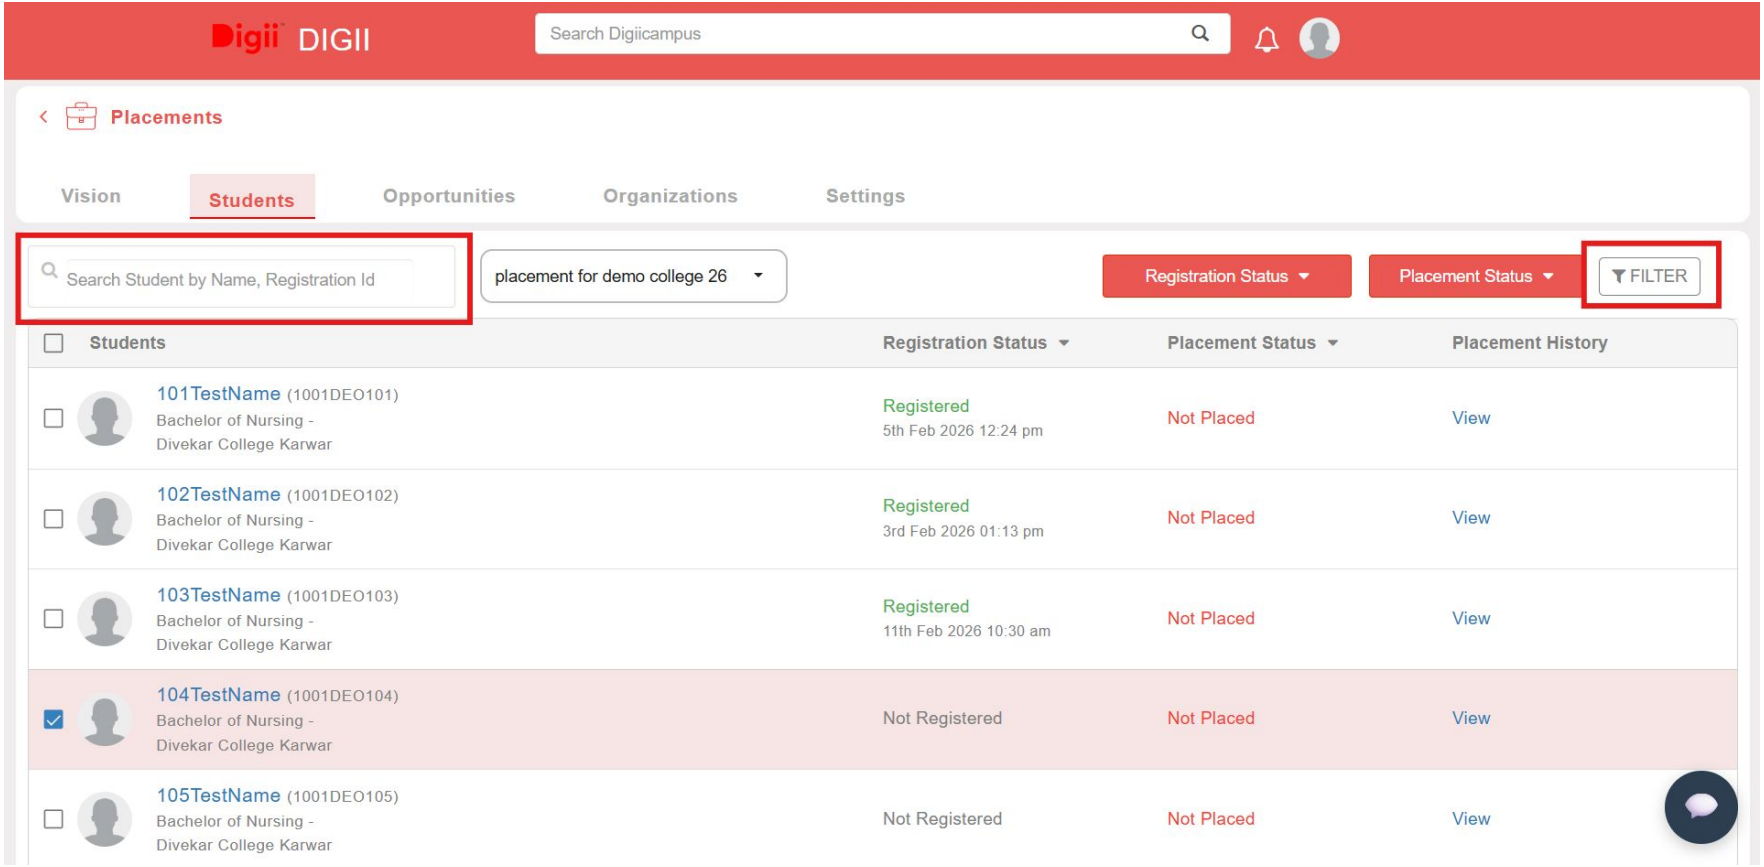

Placement admins can change the “Registration” and “Placement” status of students

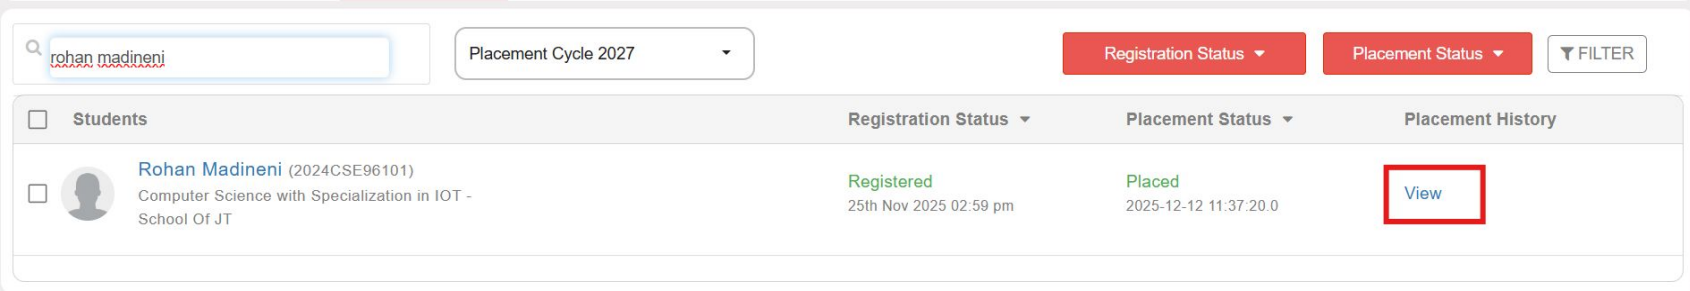

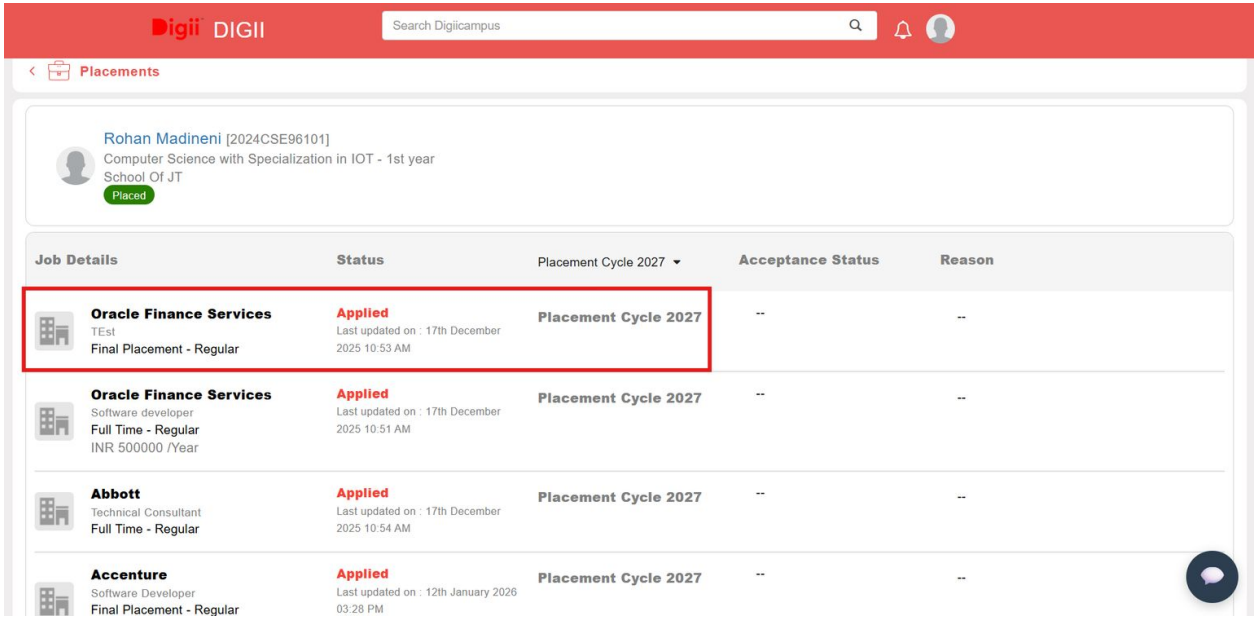

Admins can search for students and filter them out based on certain critera

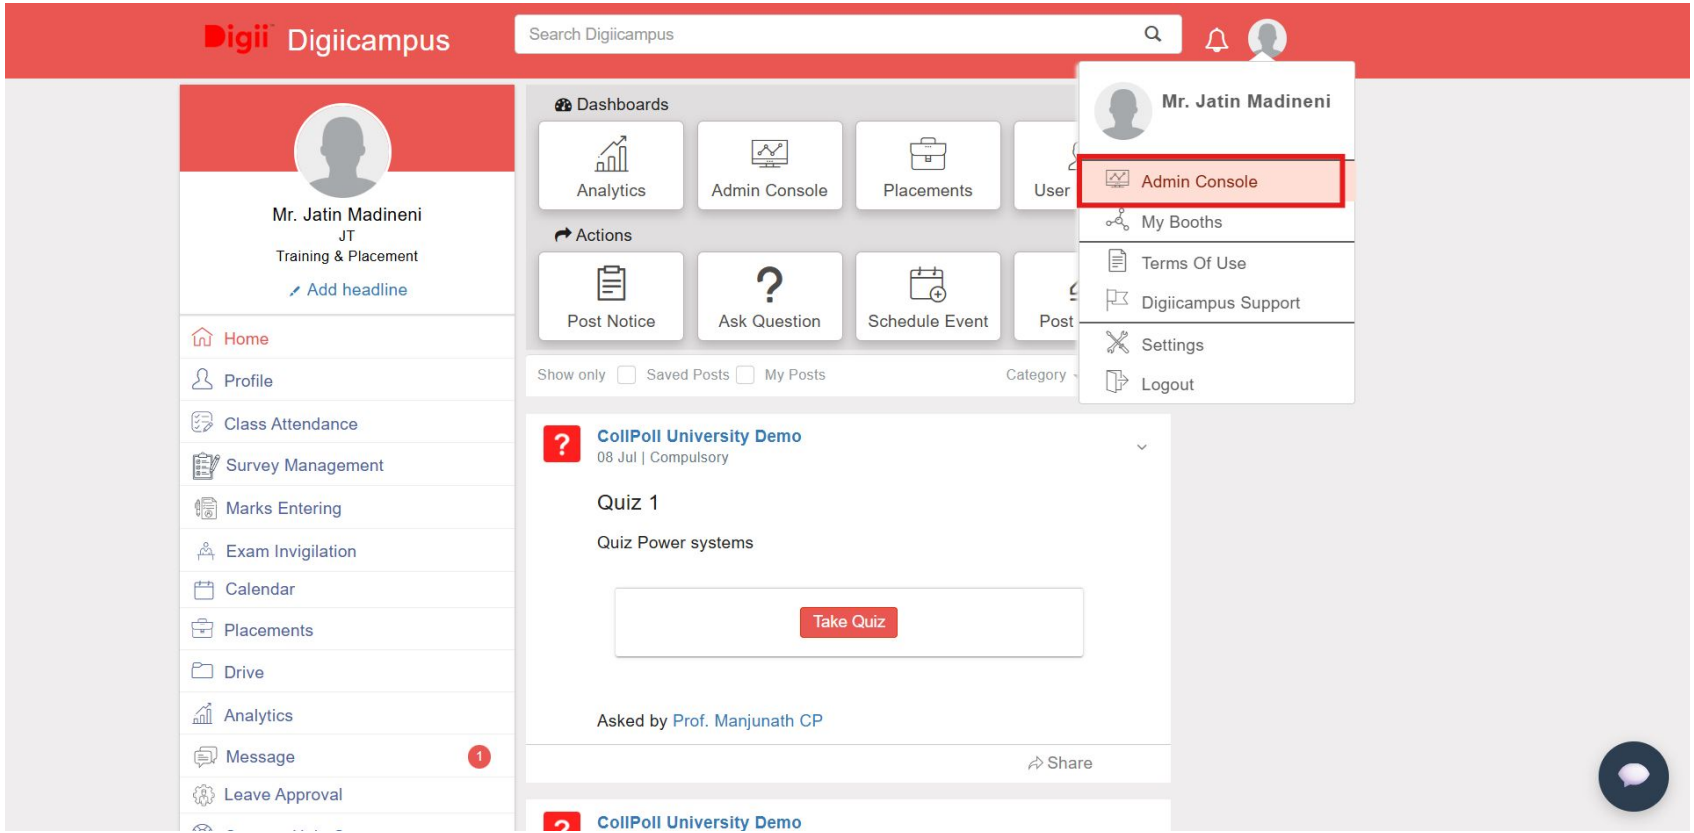

Placcement Admins can view a students placement history as well by clicking on “View”

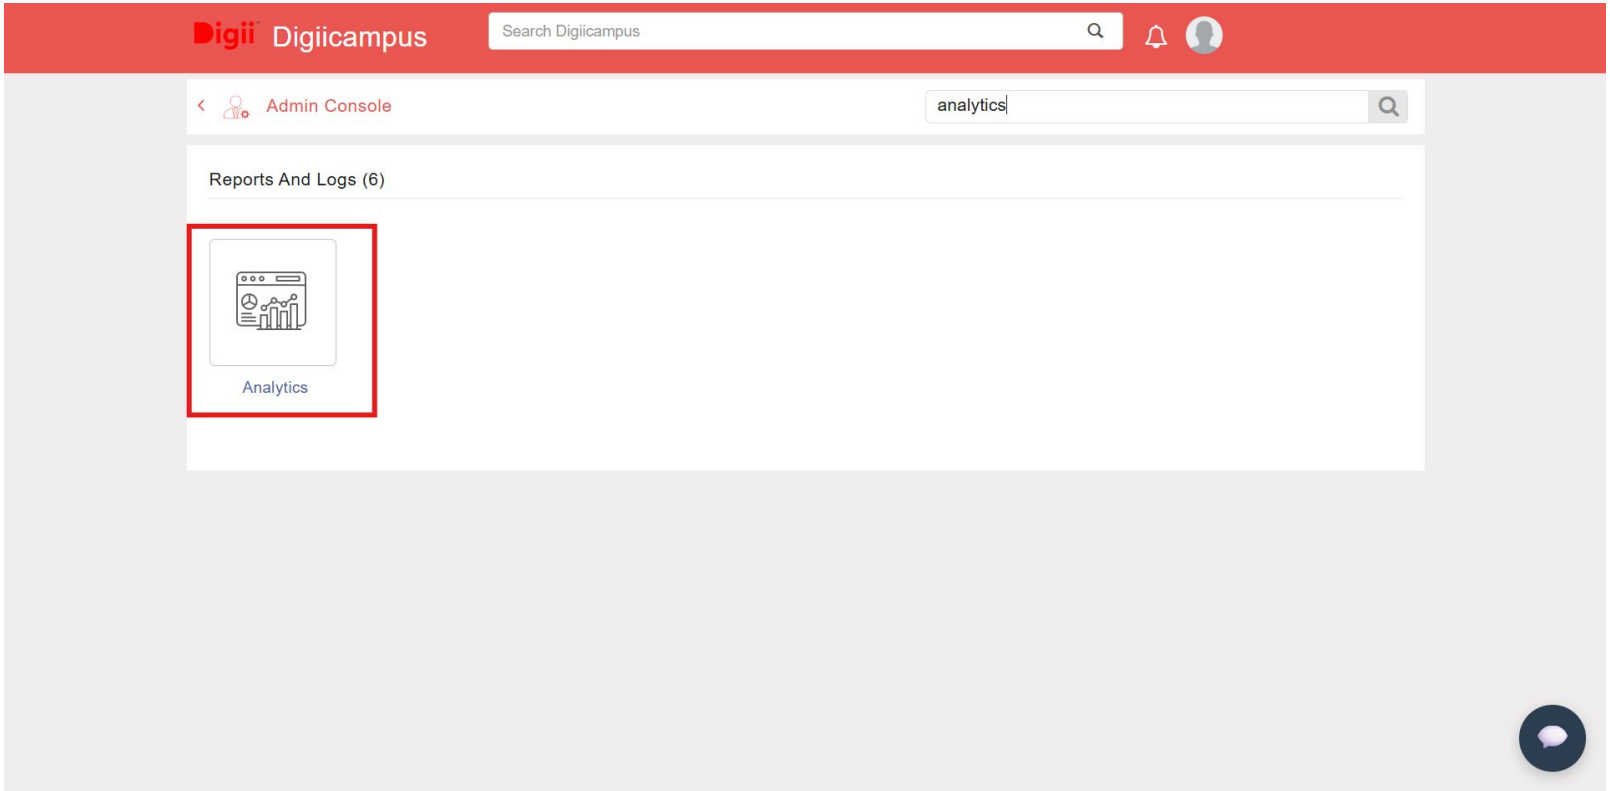

For an in-depth analysis of the module, admins can navigate to “Analytics” dashboard

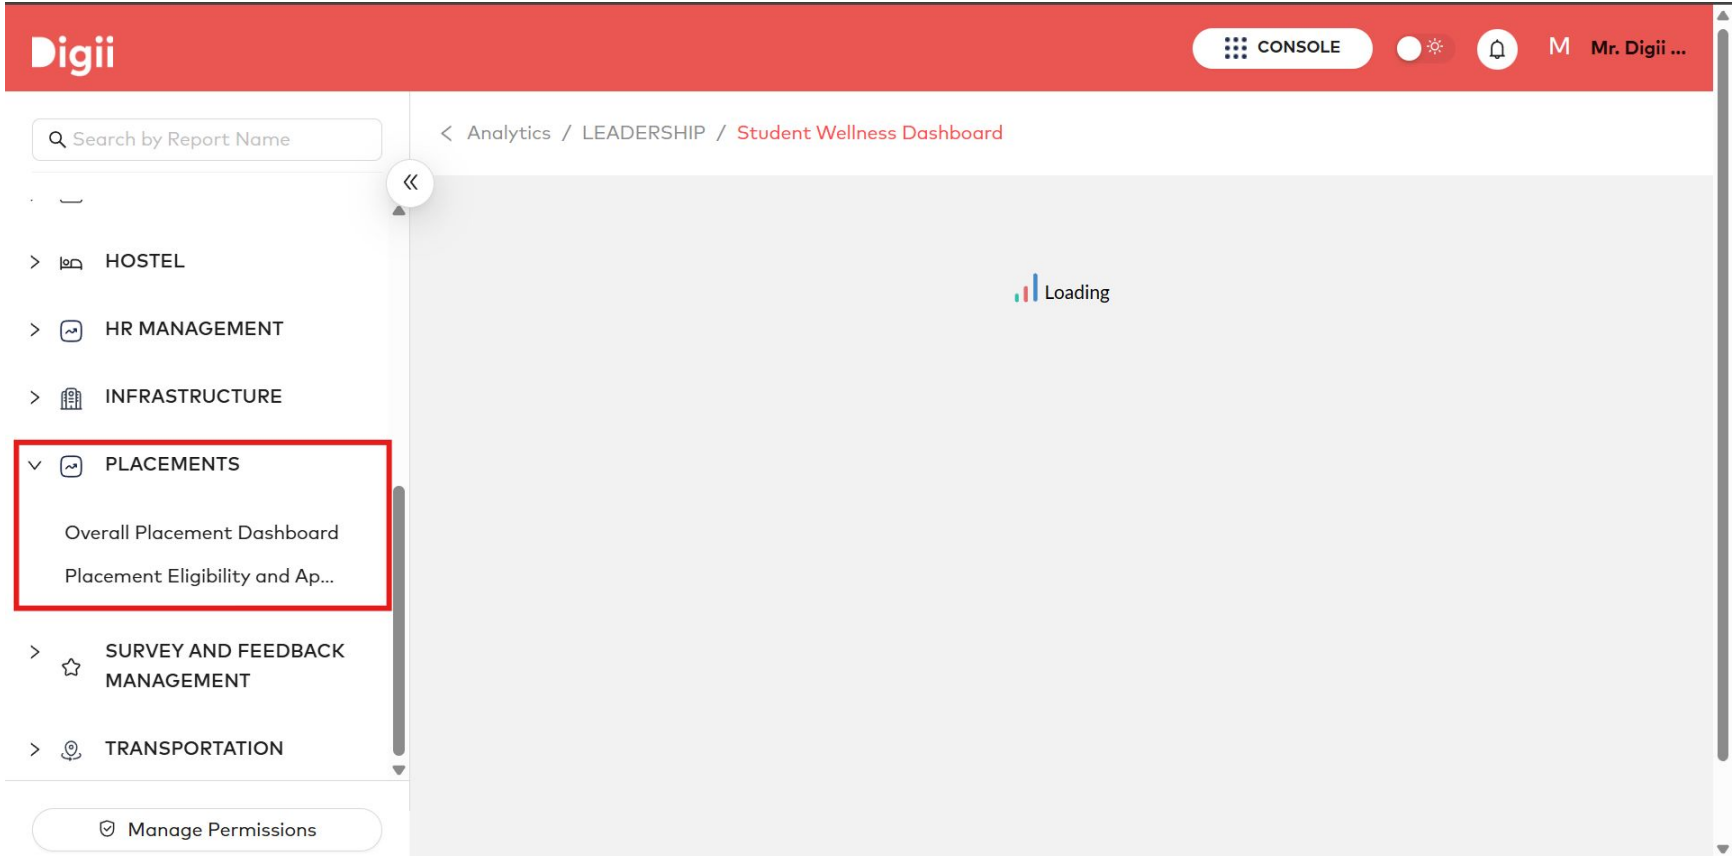

Navigate to “Admin Console” to access the analytics dashboard

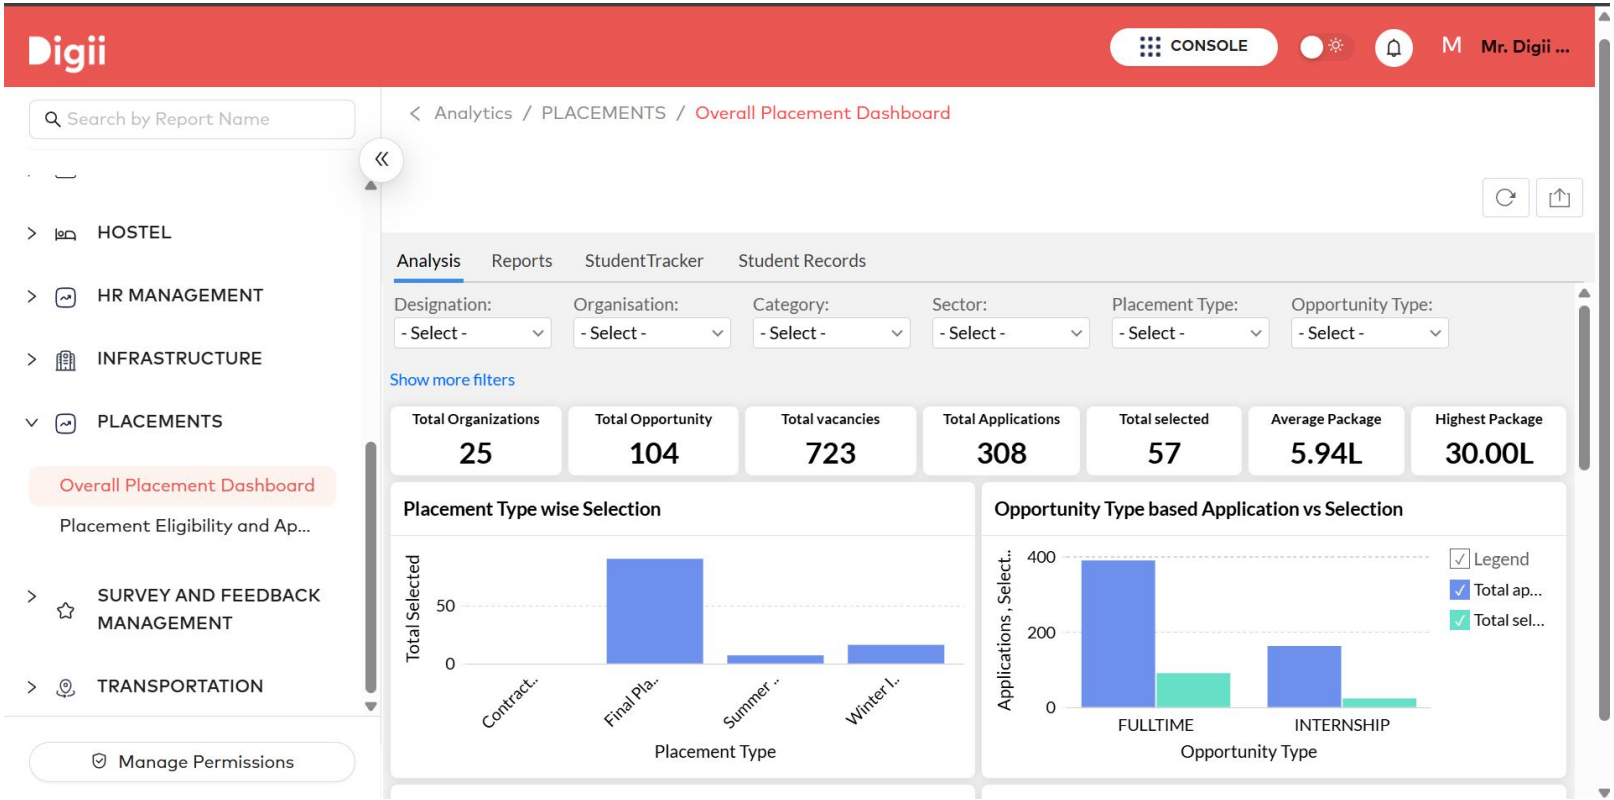

Search for the “Analytics” dashboard under admin console

Click on the “Placements” tab available on the left hand side panel

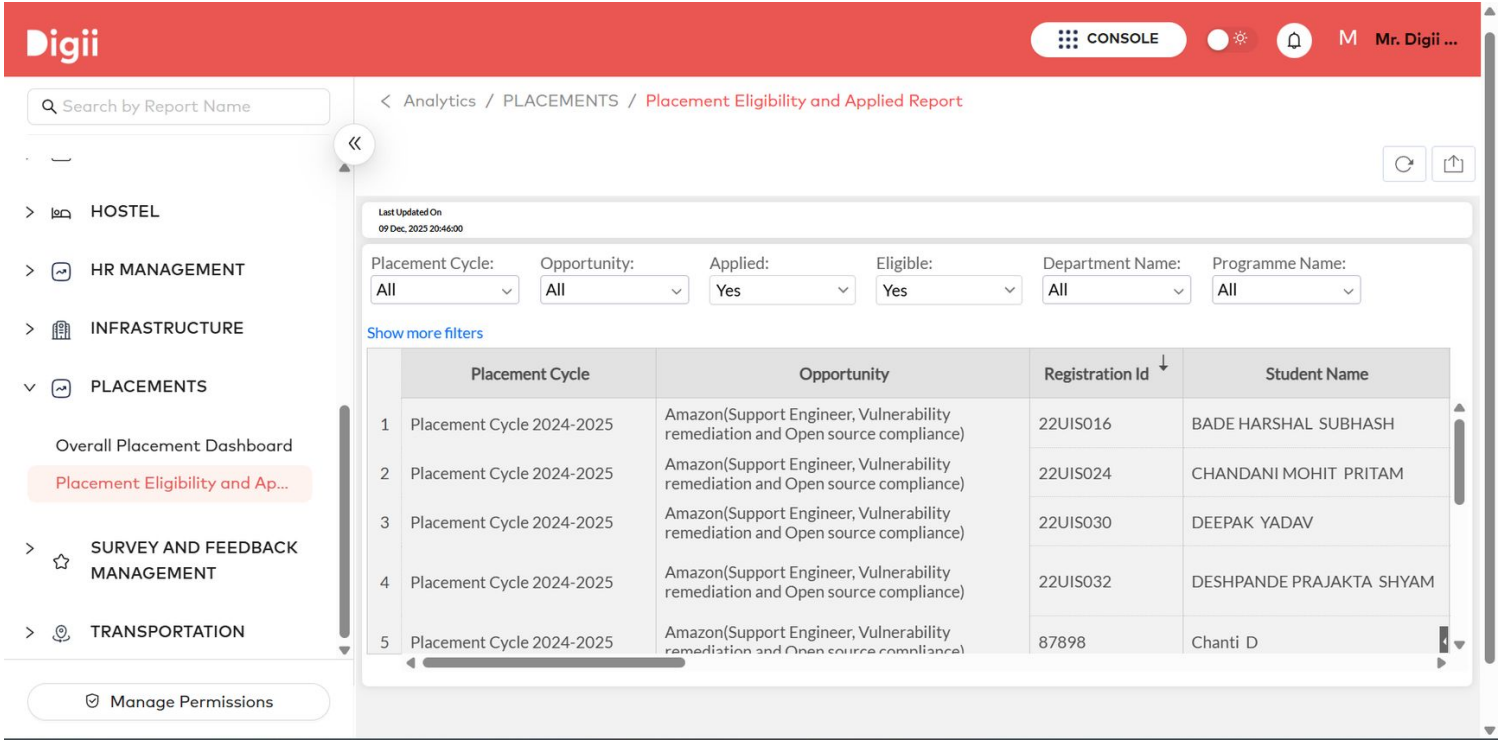

Overall Placement Dashboard

The “Overall Placement Dashboard” is currently divided into 4 different segments each focusing on different aspects of the placement management module.

Placement Eligibility and Applied Report

The “Placement Eligibility and Applied Report ” focuses on providing placement coordinators with the list of eligible students for a particular opportunity and whether they have applied for it or not.
