Transport Management Module

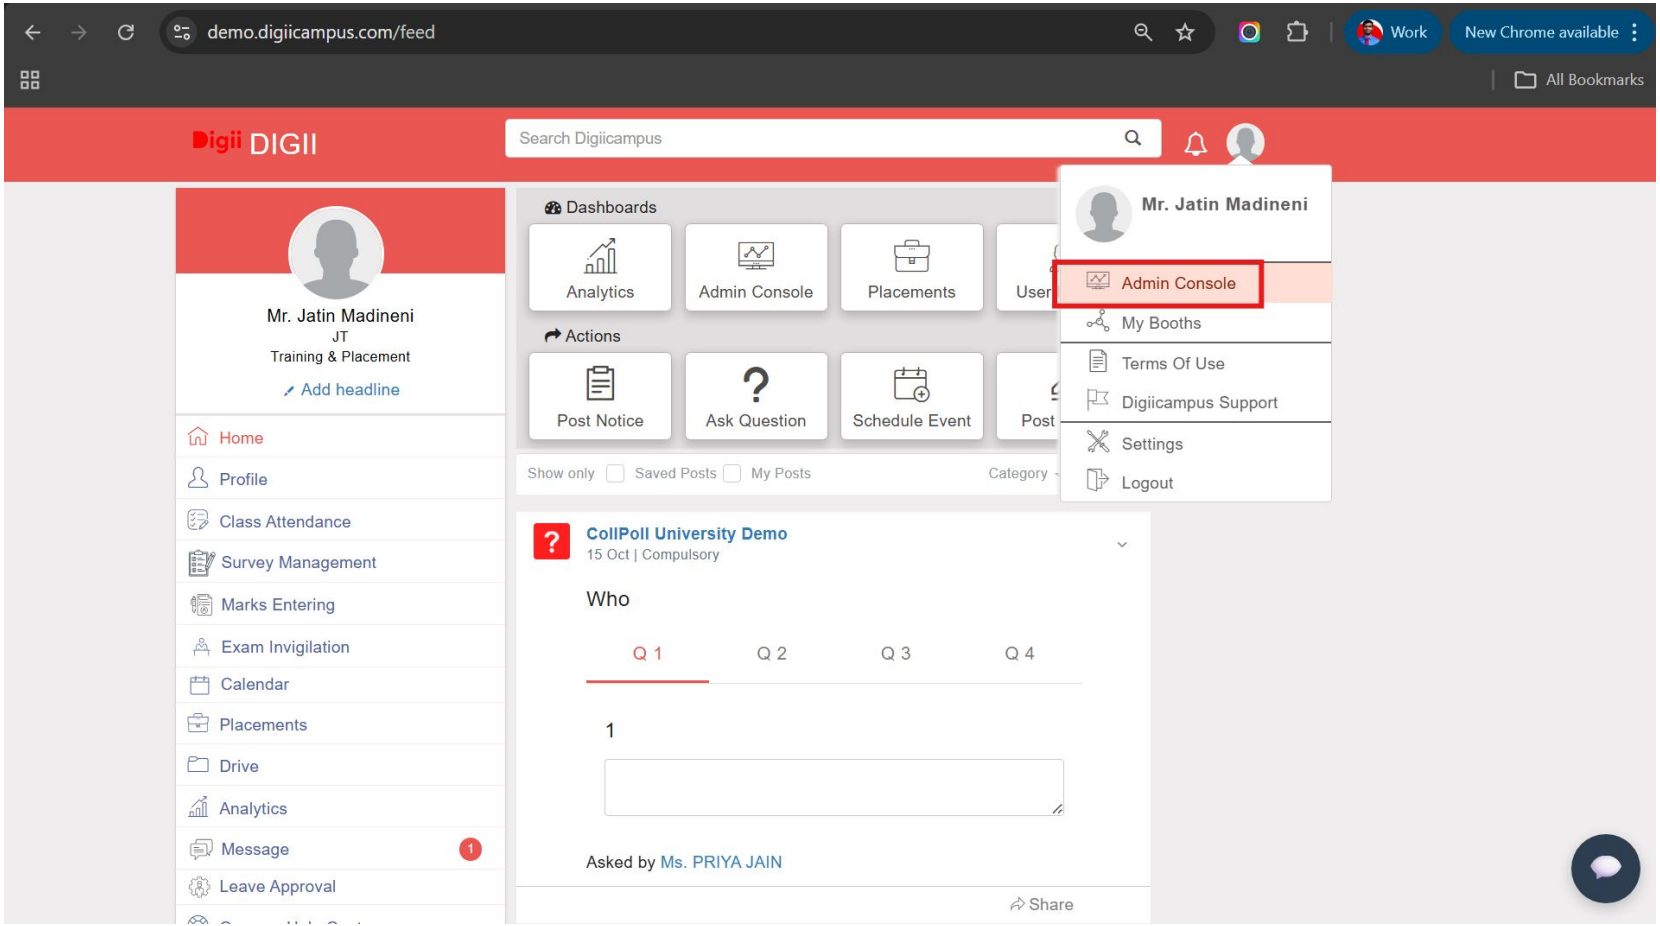

(Admin Guide)

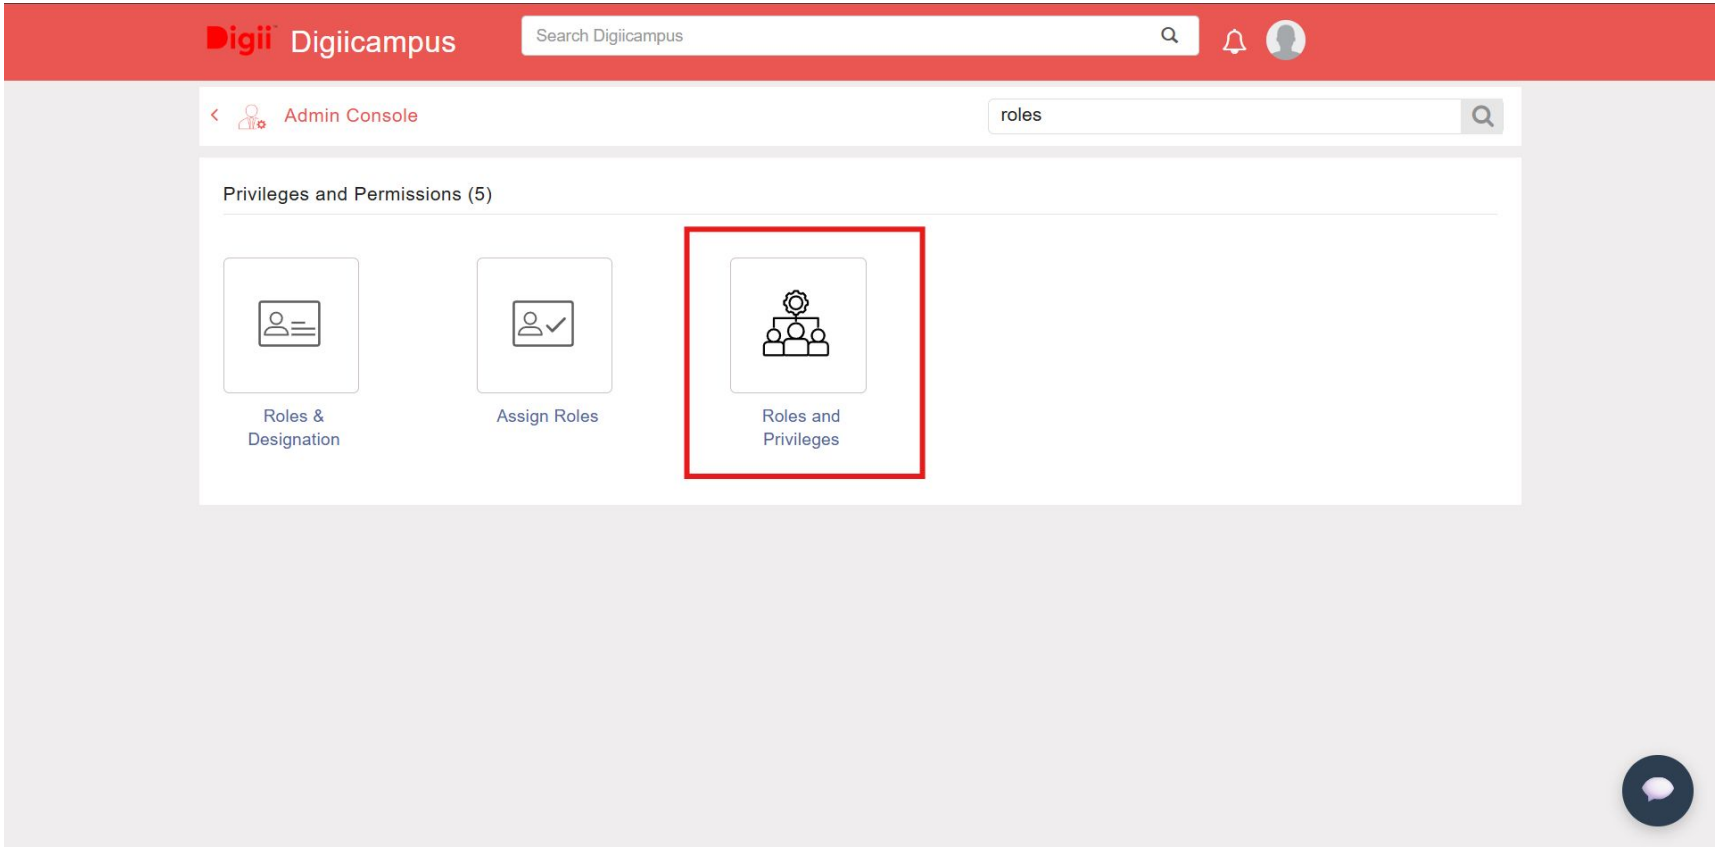

Login to the Digiicampus instance

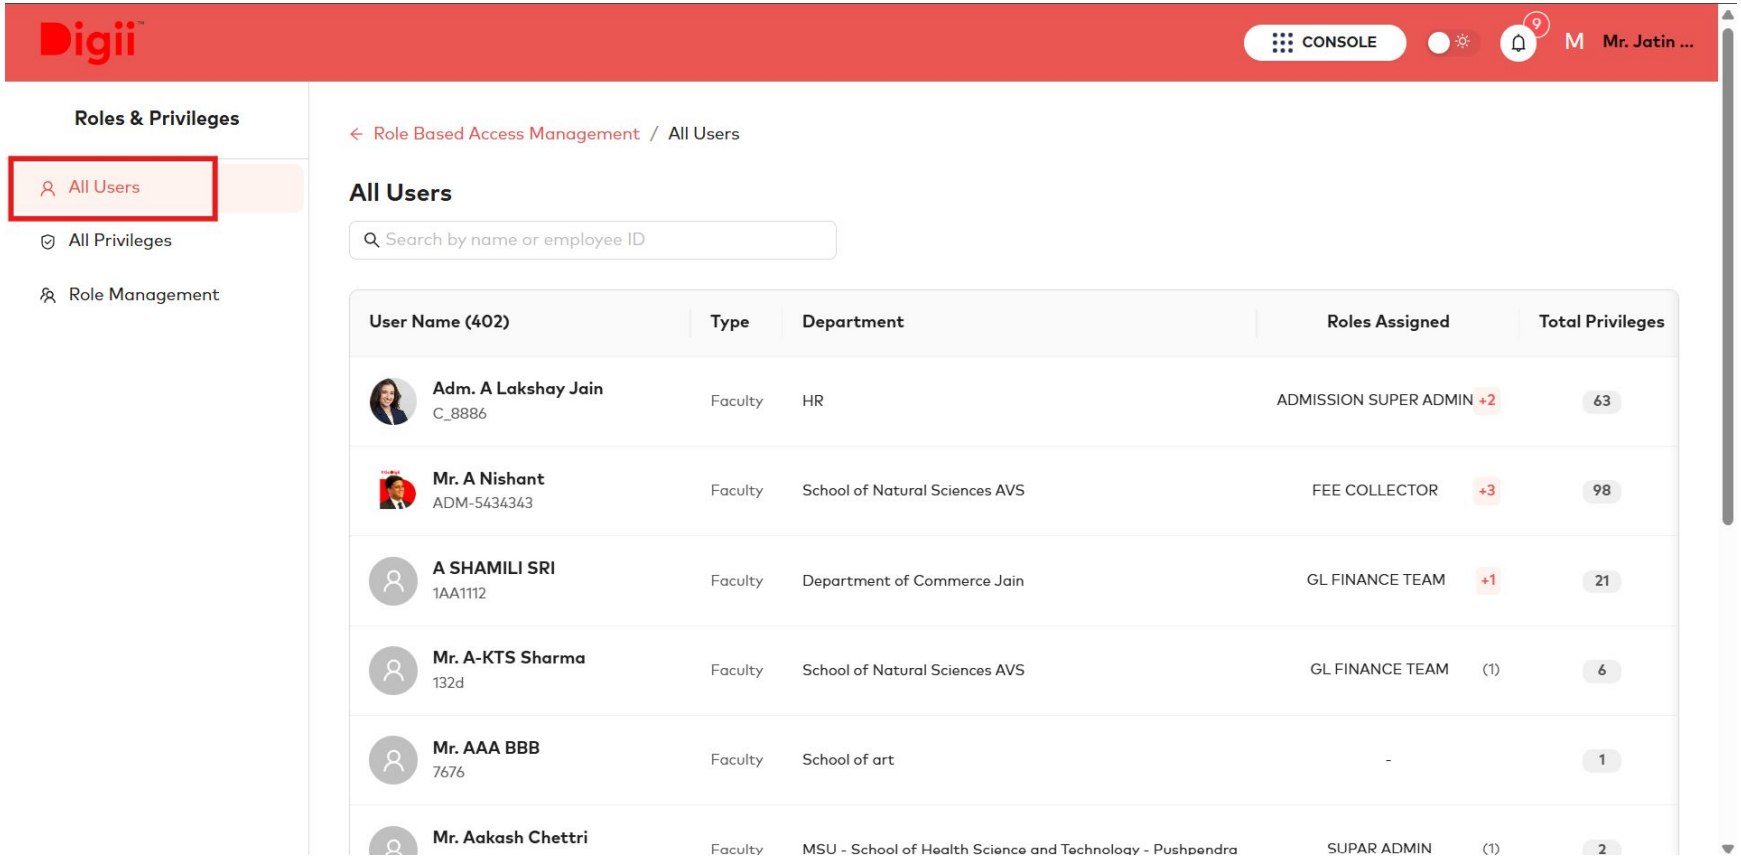

Navigate to “Admin Console” option available on the top right corner

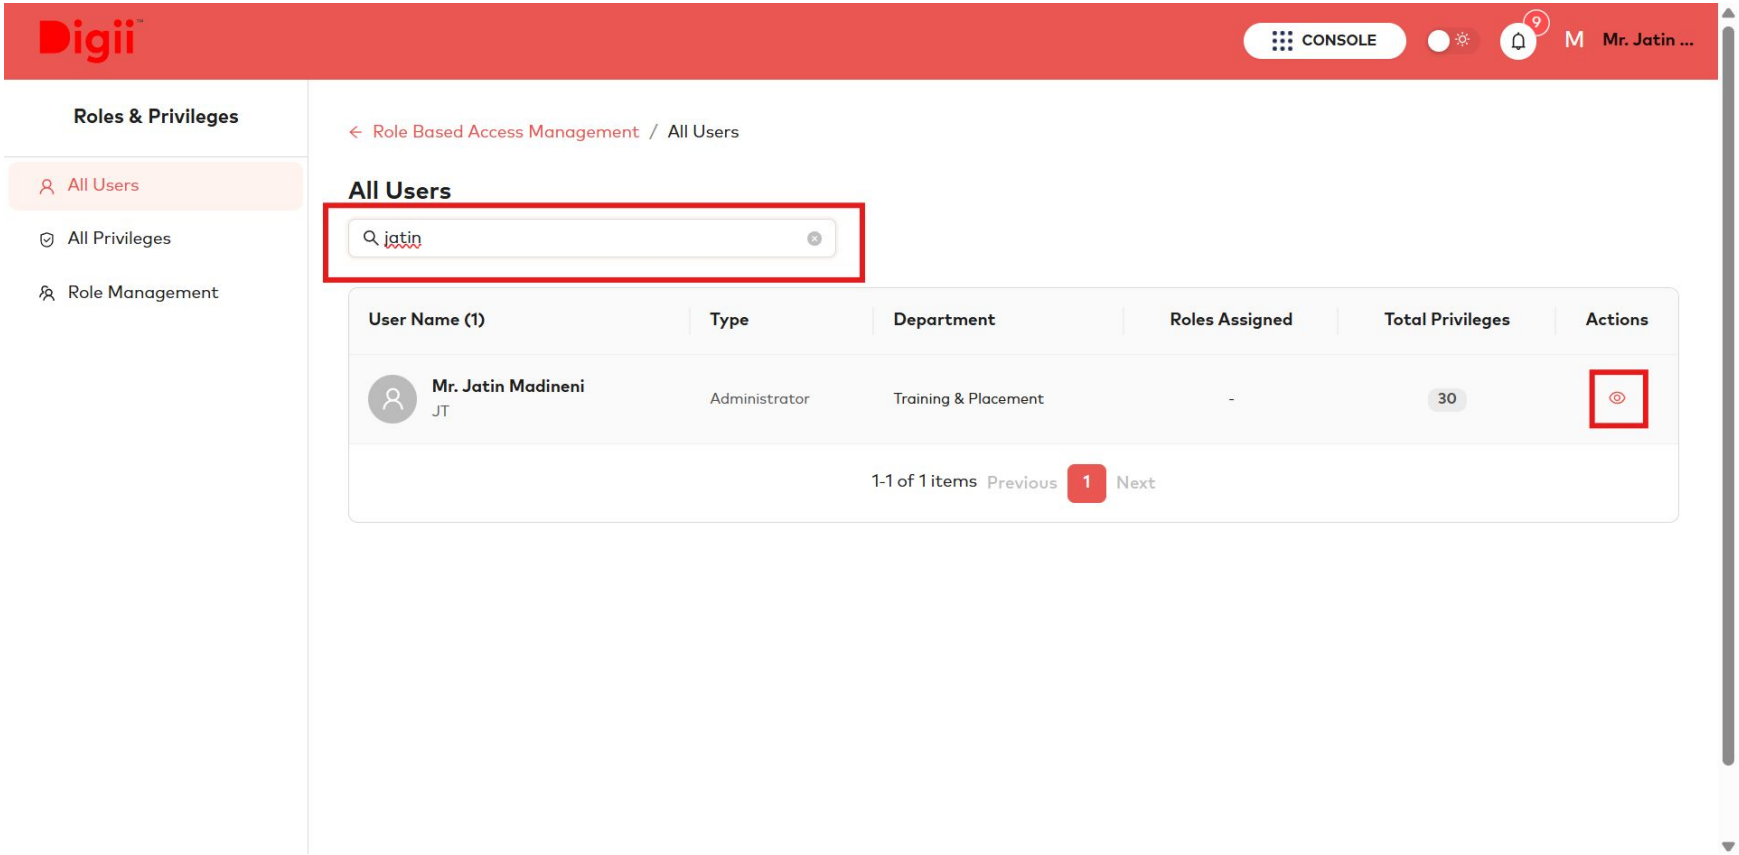

Search for “Roles and Privileges” within Admin Console

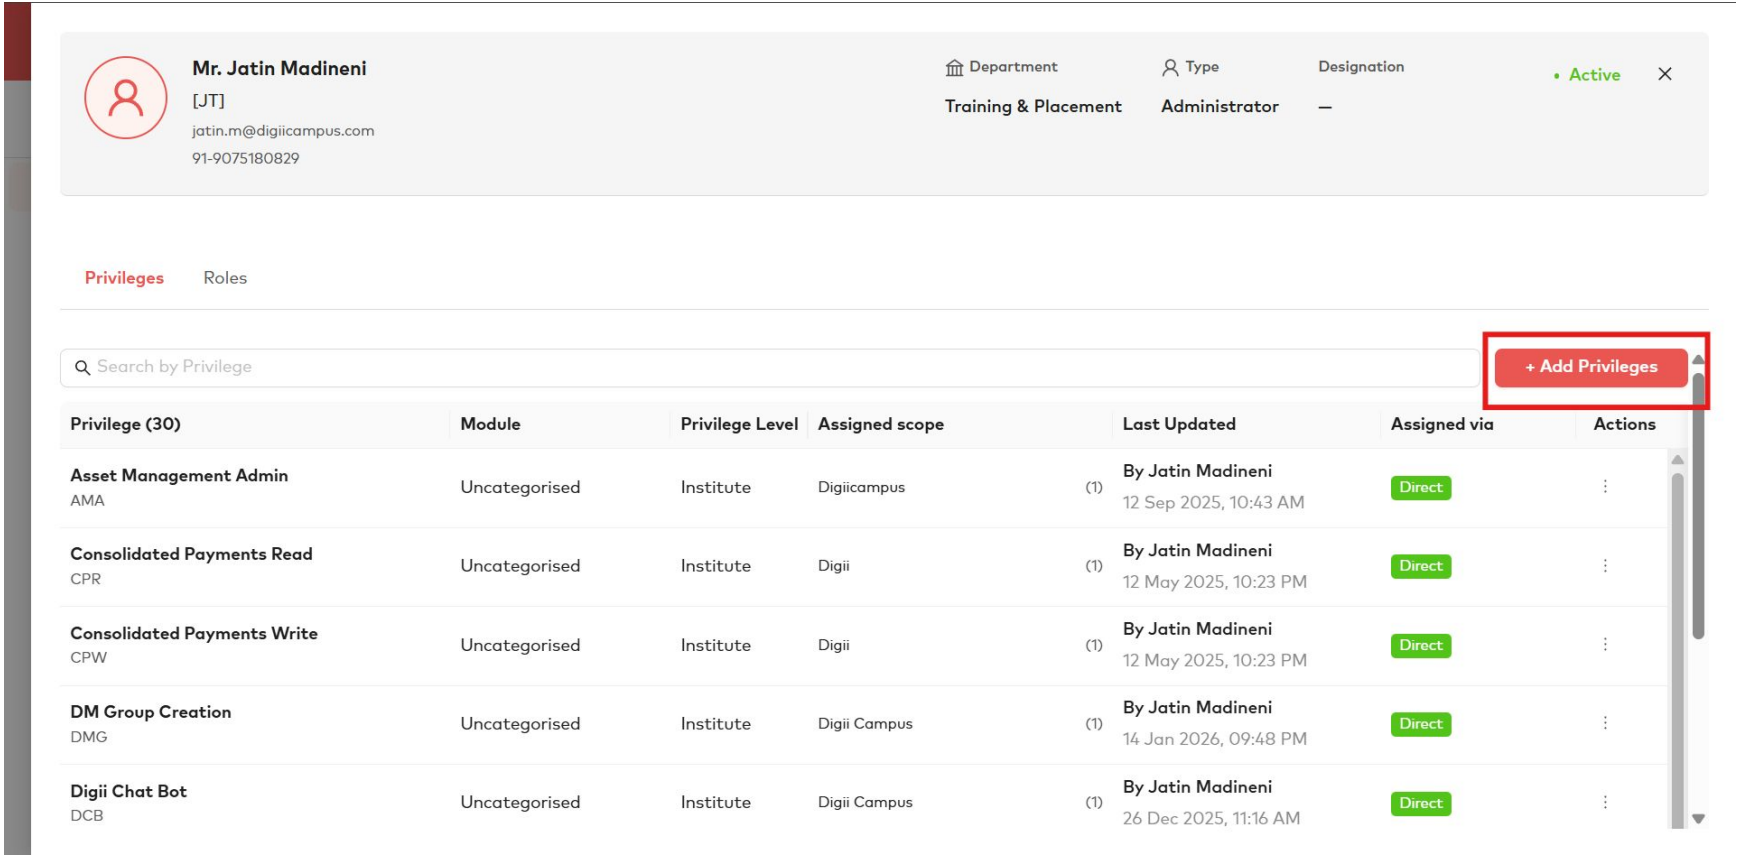

Select “All Users” available on the left hand side panel

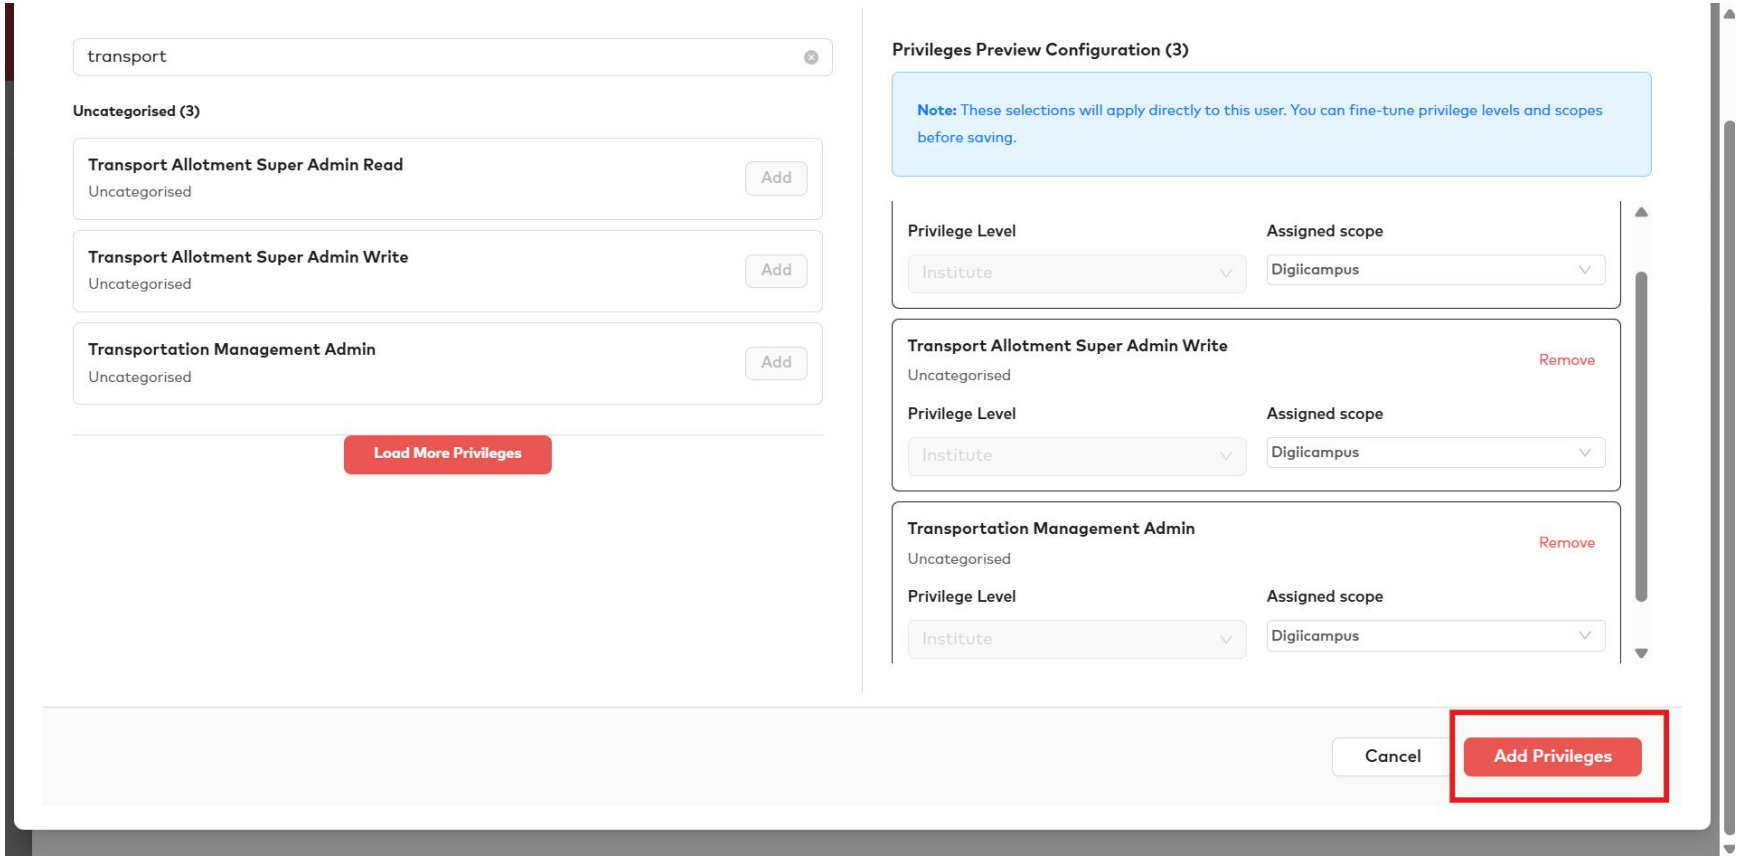

Search for a particular user in the search bar and click on actions to assign privileges

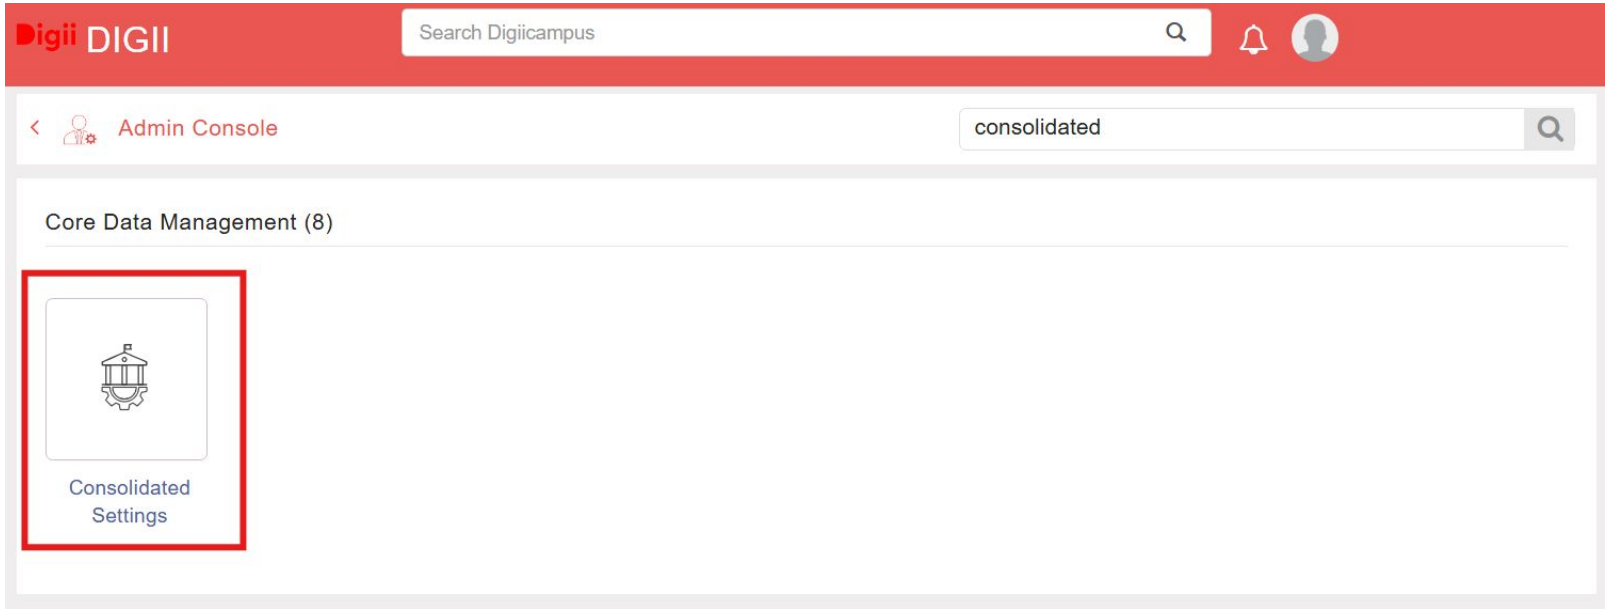

Click on “Add Privileges” to assign new privileges to a particular user

Click on “Add Privileges” to assign them and access the transport management module

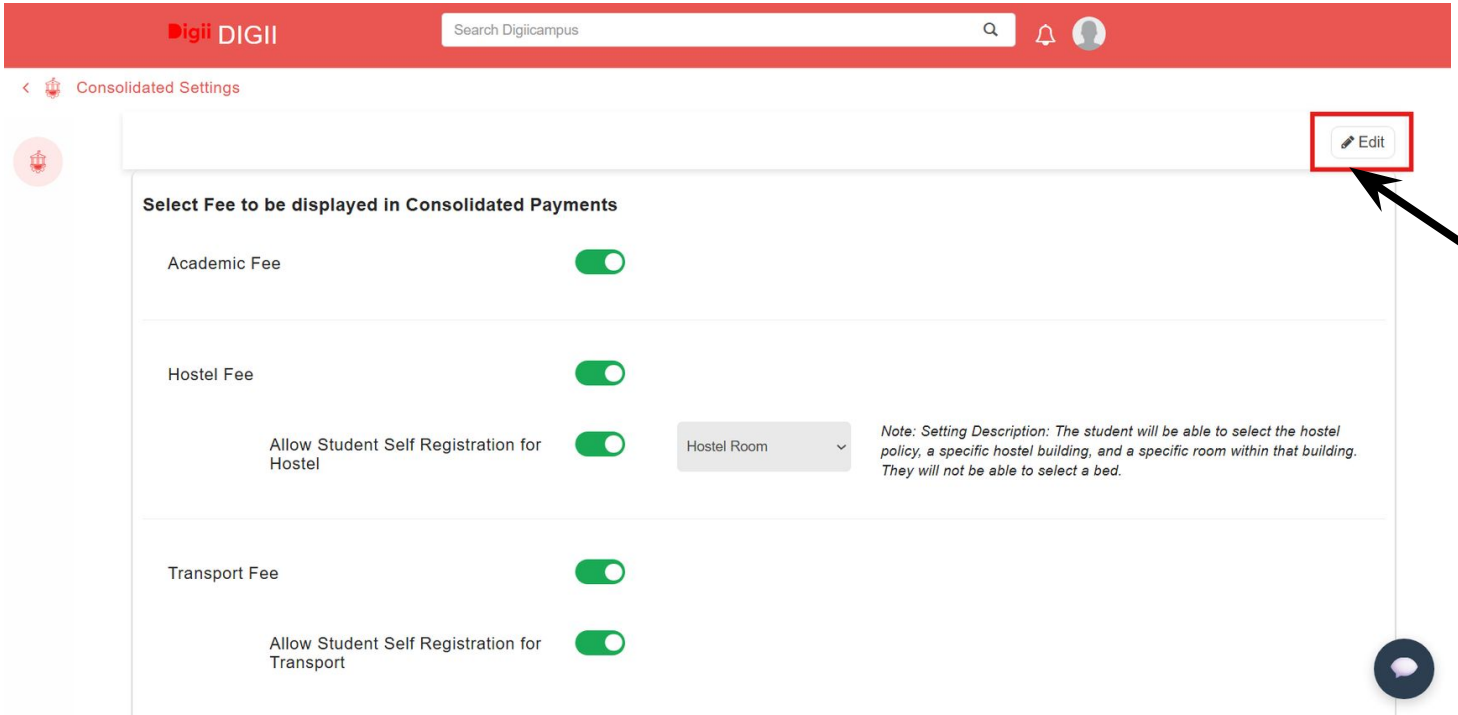

Search for “Consolidated Settings” in the search bar

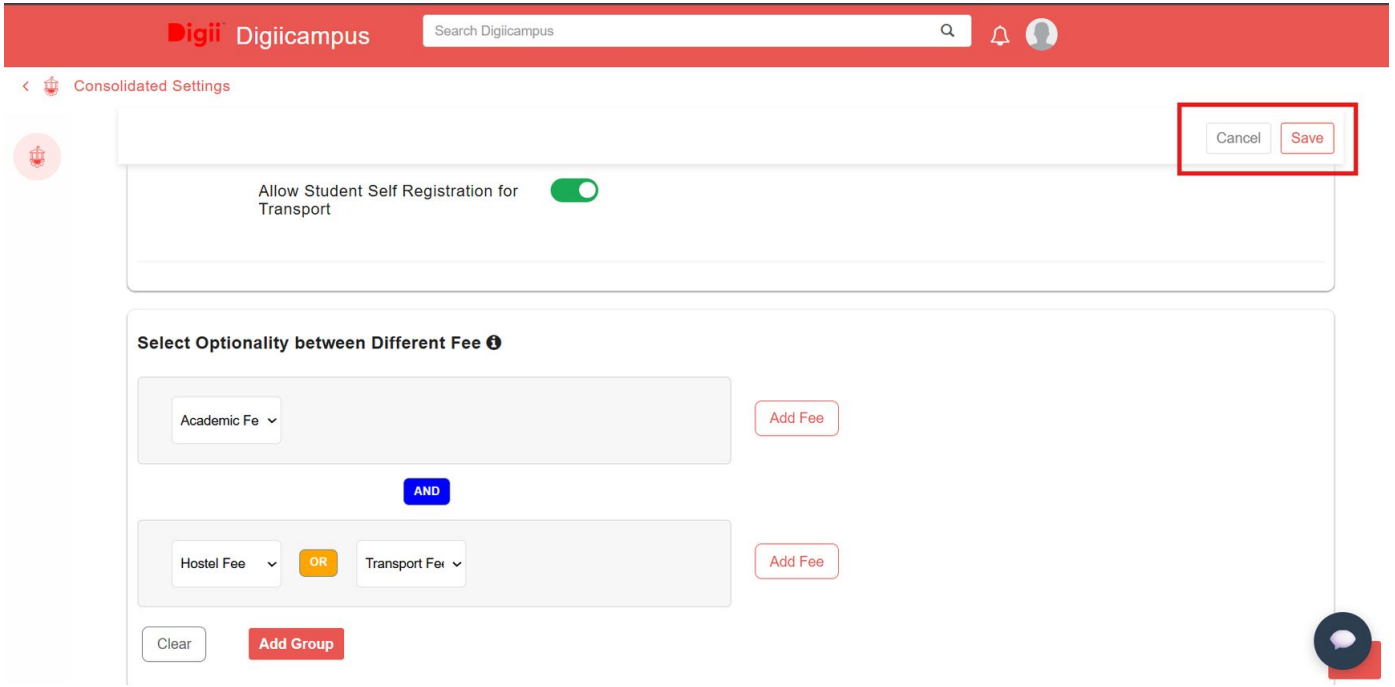

Navigate to “Consolidated Settings” available under “Core Data Management”

Scroll down to “Transport Fee” and allow “Student Registration” if required

Click on the “Edit” icon to manage the fee and regsitration toggles.

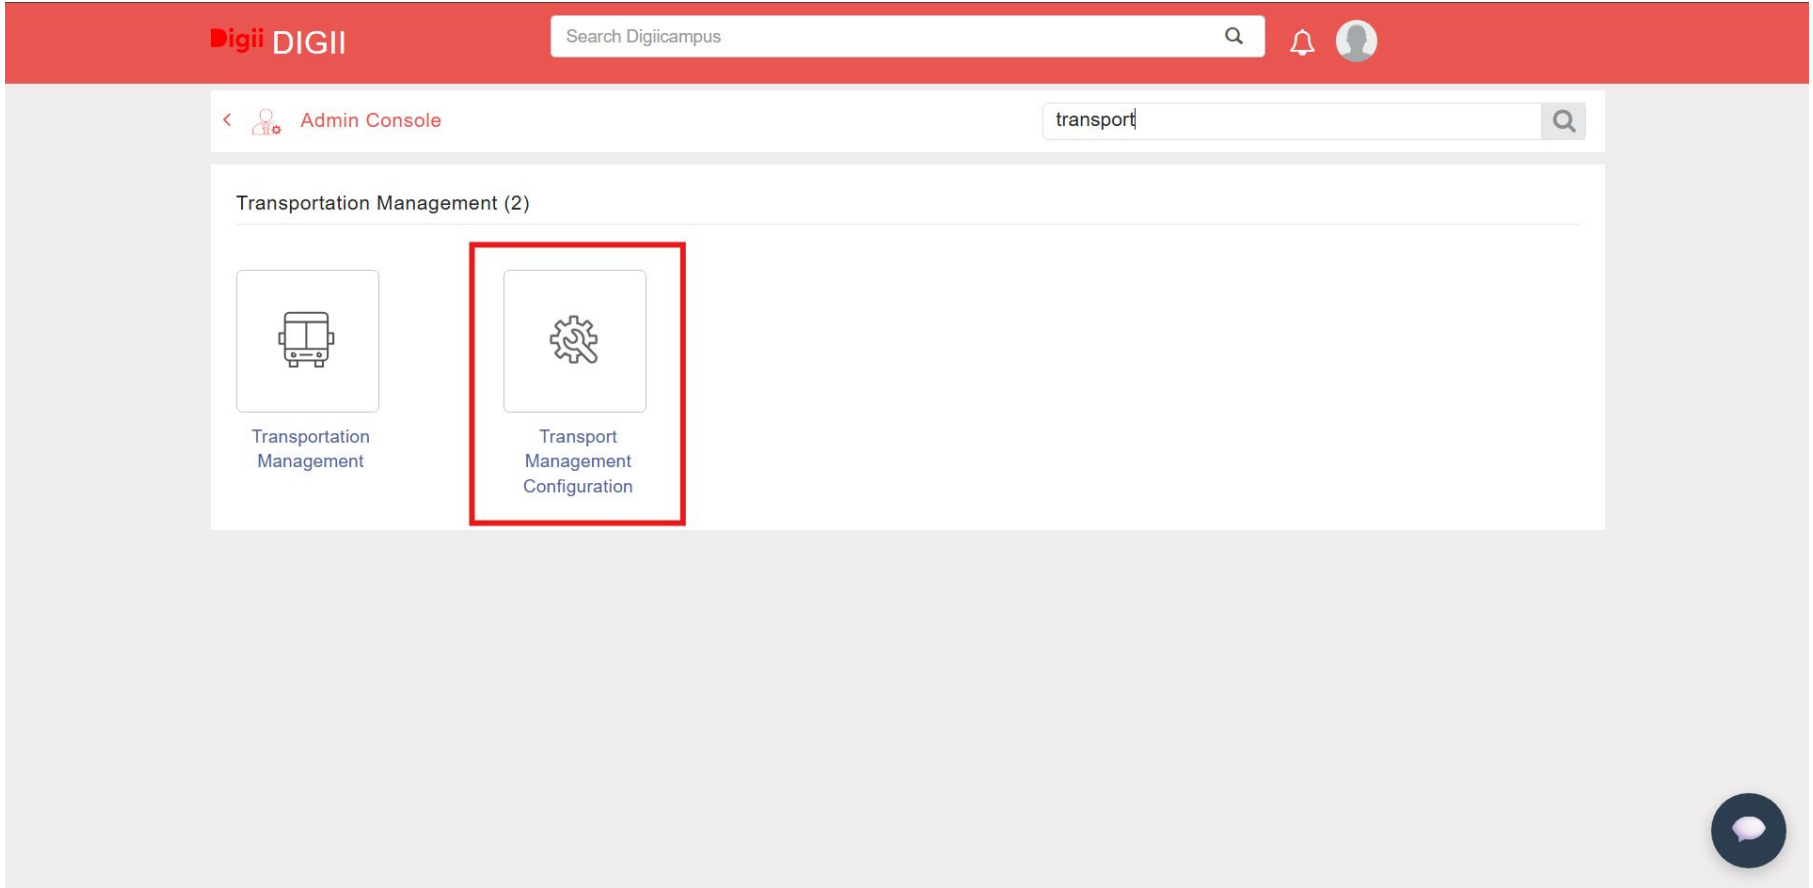

Consolidated Settings

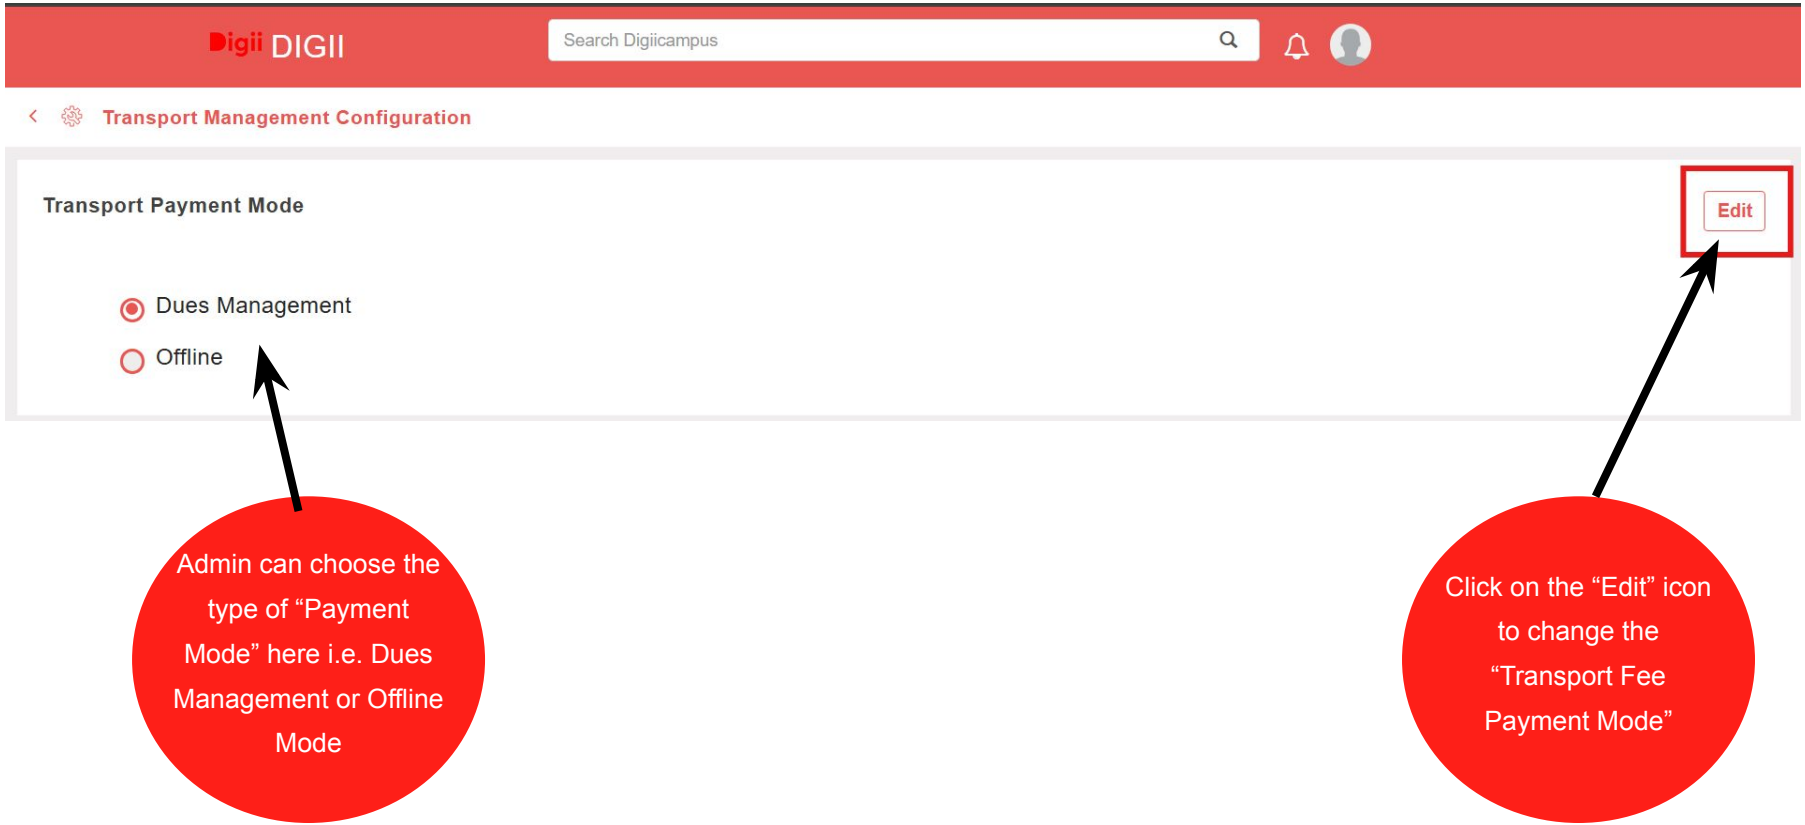

Once the changes are done, click on “Save” to confirm the changes and settings.

Note:- This step is a prerequisite for allowing students to register themsleves for the transport module via their module.

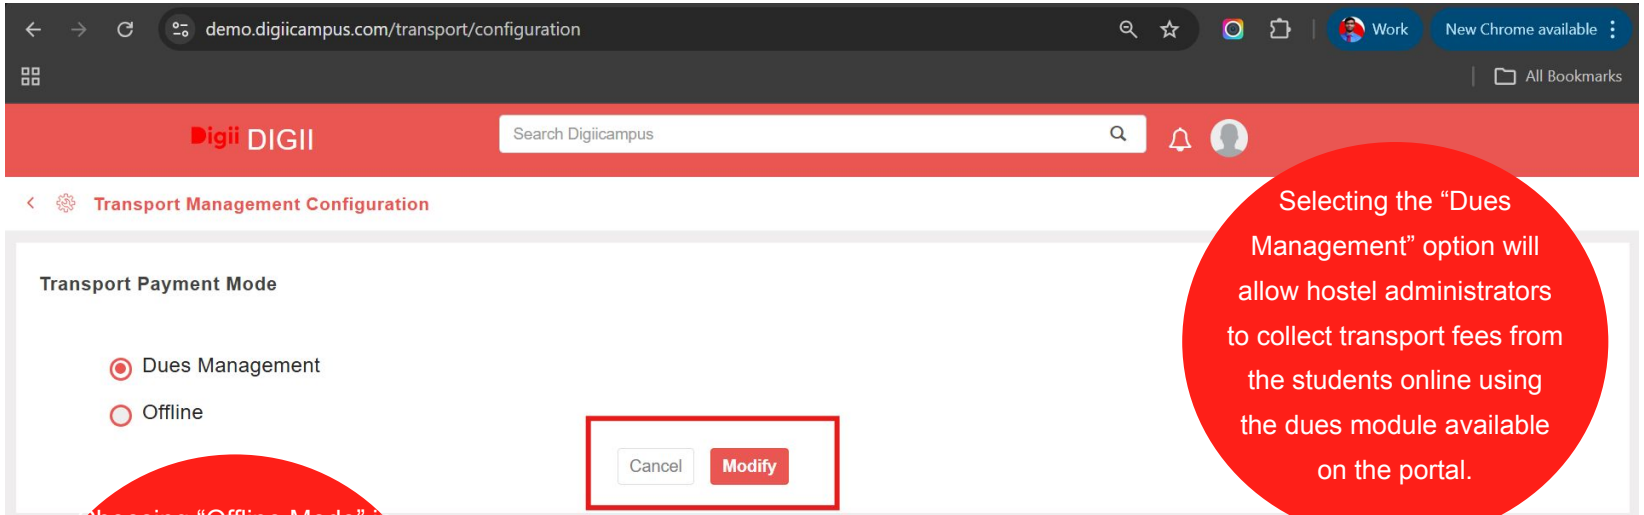

Navigate to “Transport Management Configuration” under “Admin Console”

Transport Management Configuration

Once the “Payment Mode” is selected, click on “Modify” to save the changes

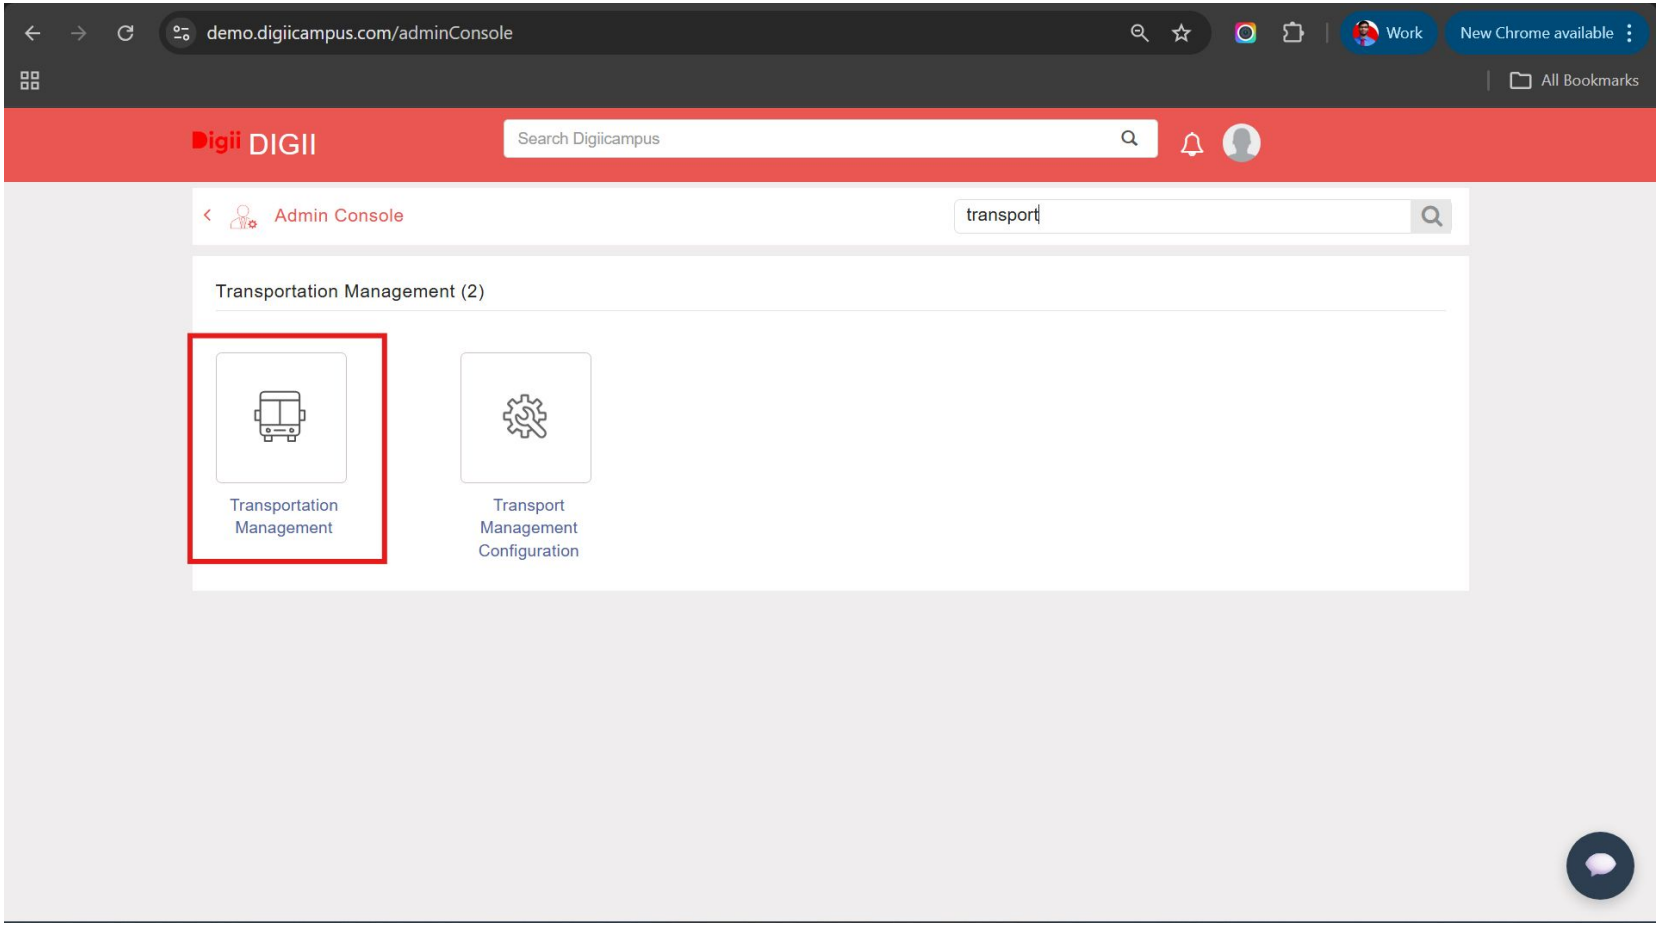

Selecting the “Dues Management” option will allow hostel administrators to collect transport fees from the students online using the dues module available on the portal.

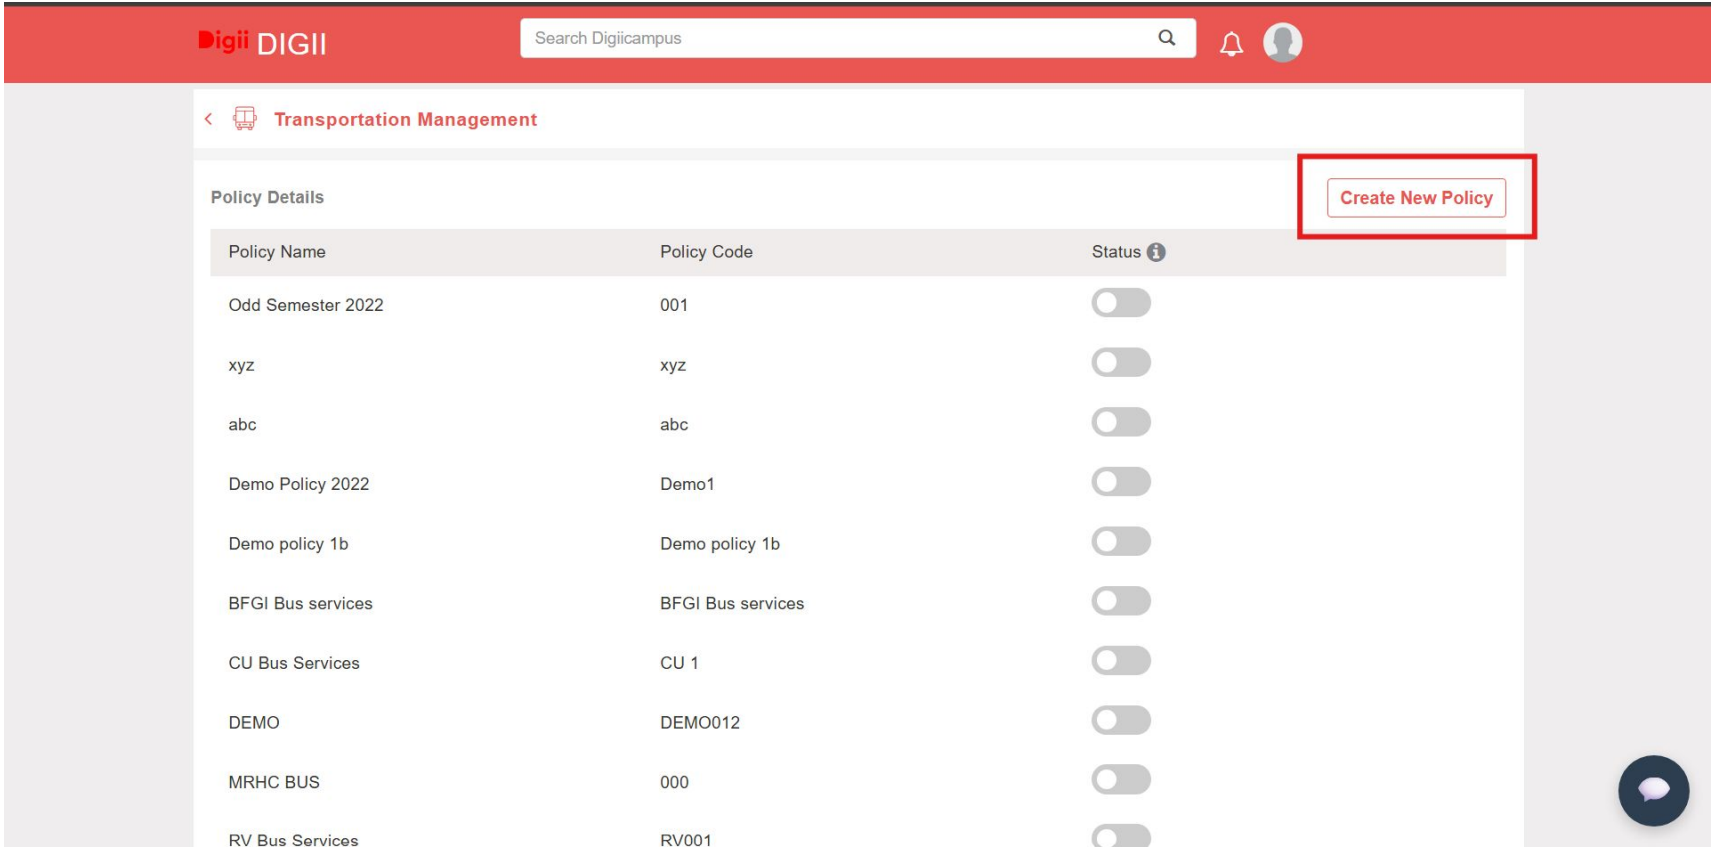

Choosing “Offline Mode” in the transport module indicates that an offline payment has been collected by the institution from the students. i.e in cash, cheque etc

Note :- Transport allotments made in the “Dues” mode will generate dues in the student logins for them to pay. Allotments in “Offline” mode will not result in the generation of any dues.

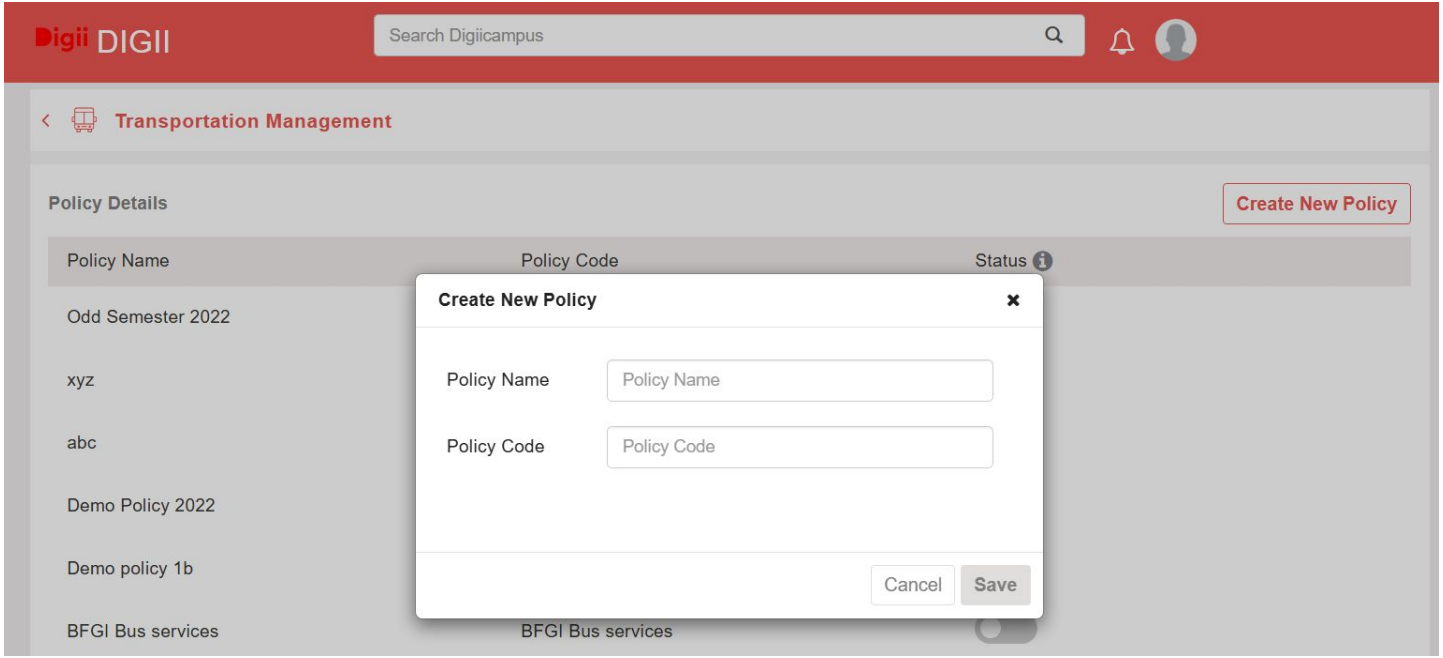

Navigate to “Transport Management” under “Admin Console”

Click on “Create New Policy” button to define a new transport policy

Defining a new transport policy

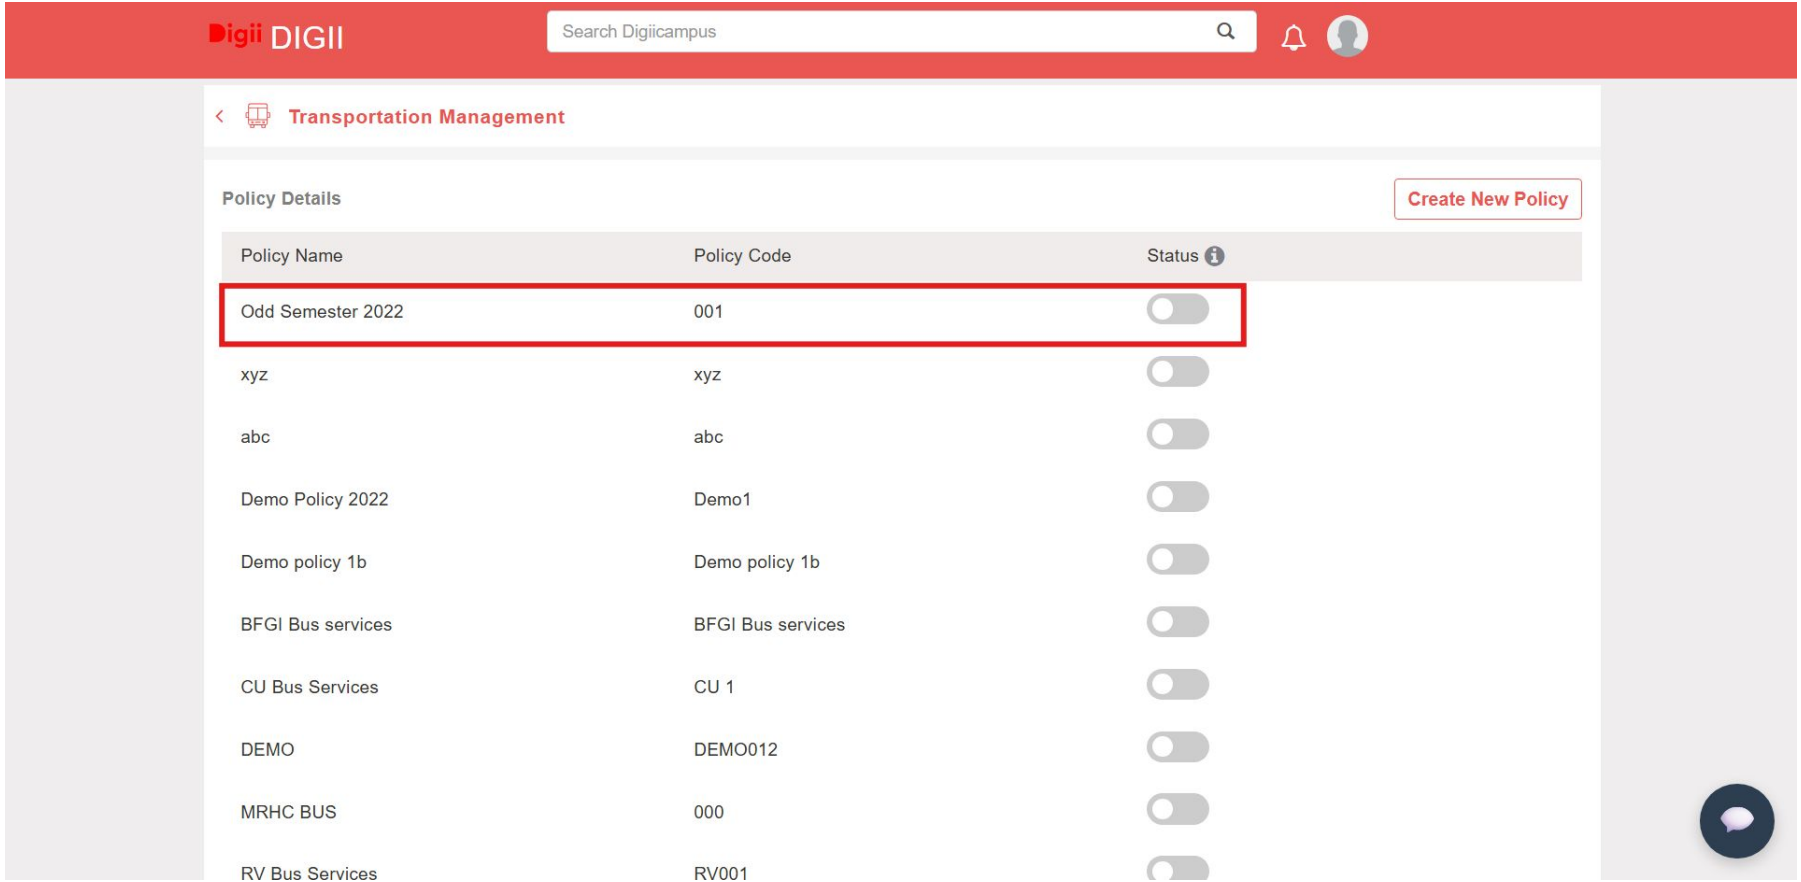

Enter a new policy name and policy code here. Once done click on “Save”, to create a new policy.

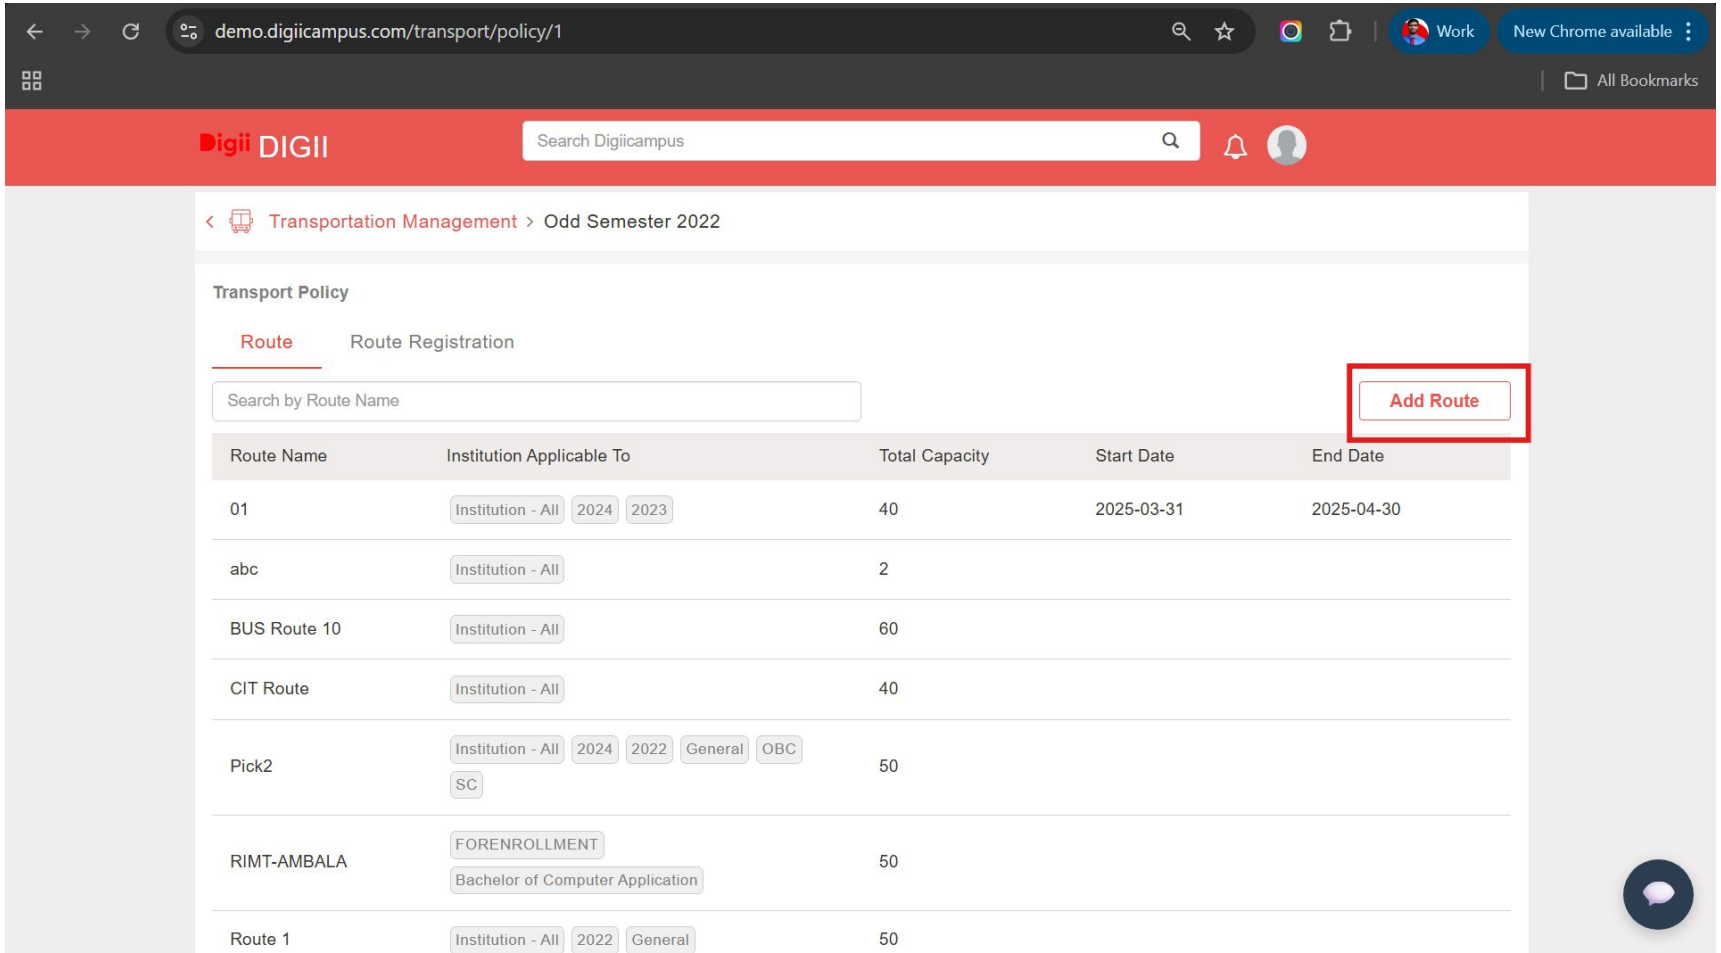

Note :- 1. Policy name and code should be unique. Duplicate values are not allowed.

2. Policies one created, cannot be edited or deleted.

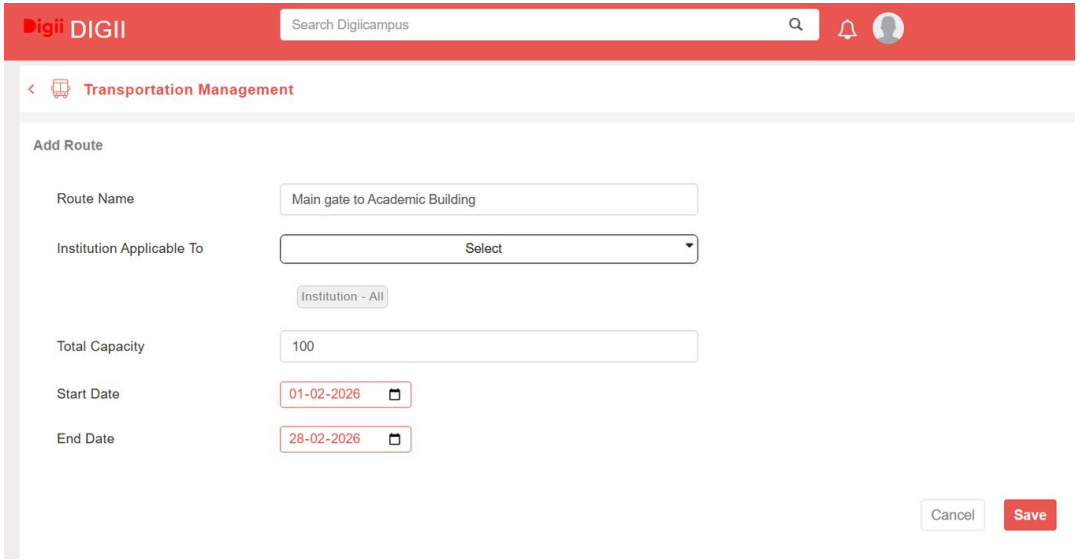

Click on any one of the transport policies created to add routes within it

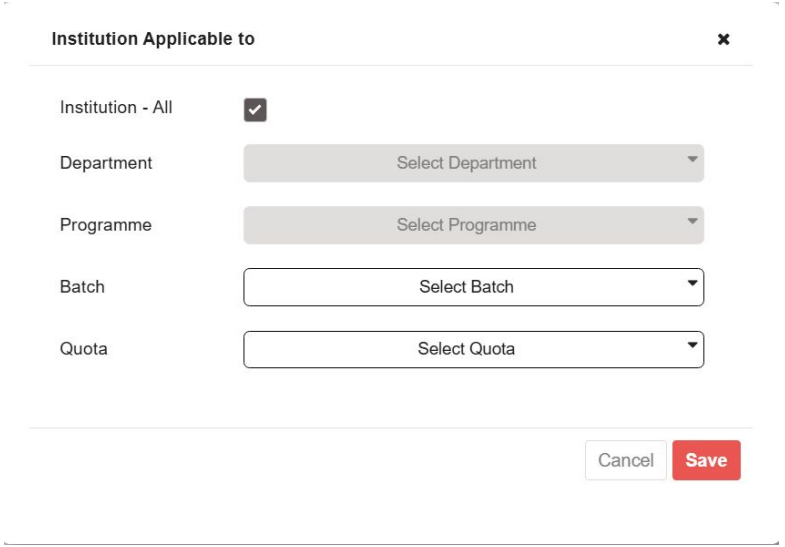

Click on “Add Route” to create new routes within the module

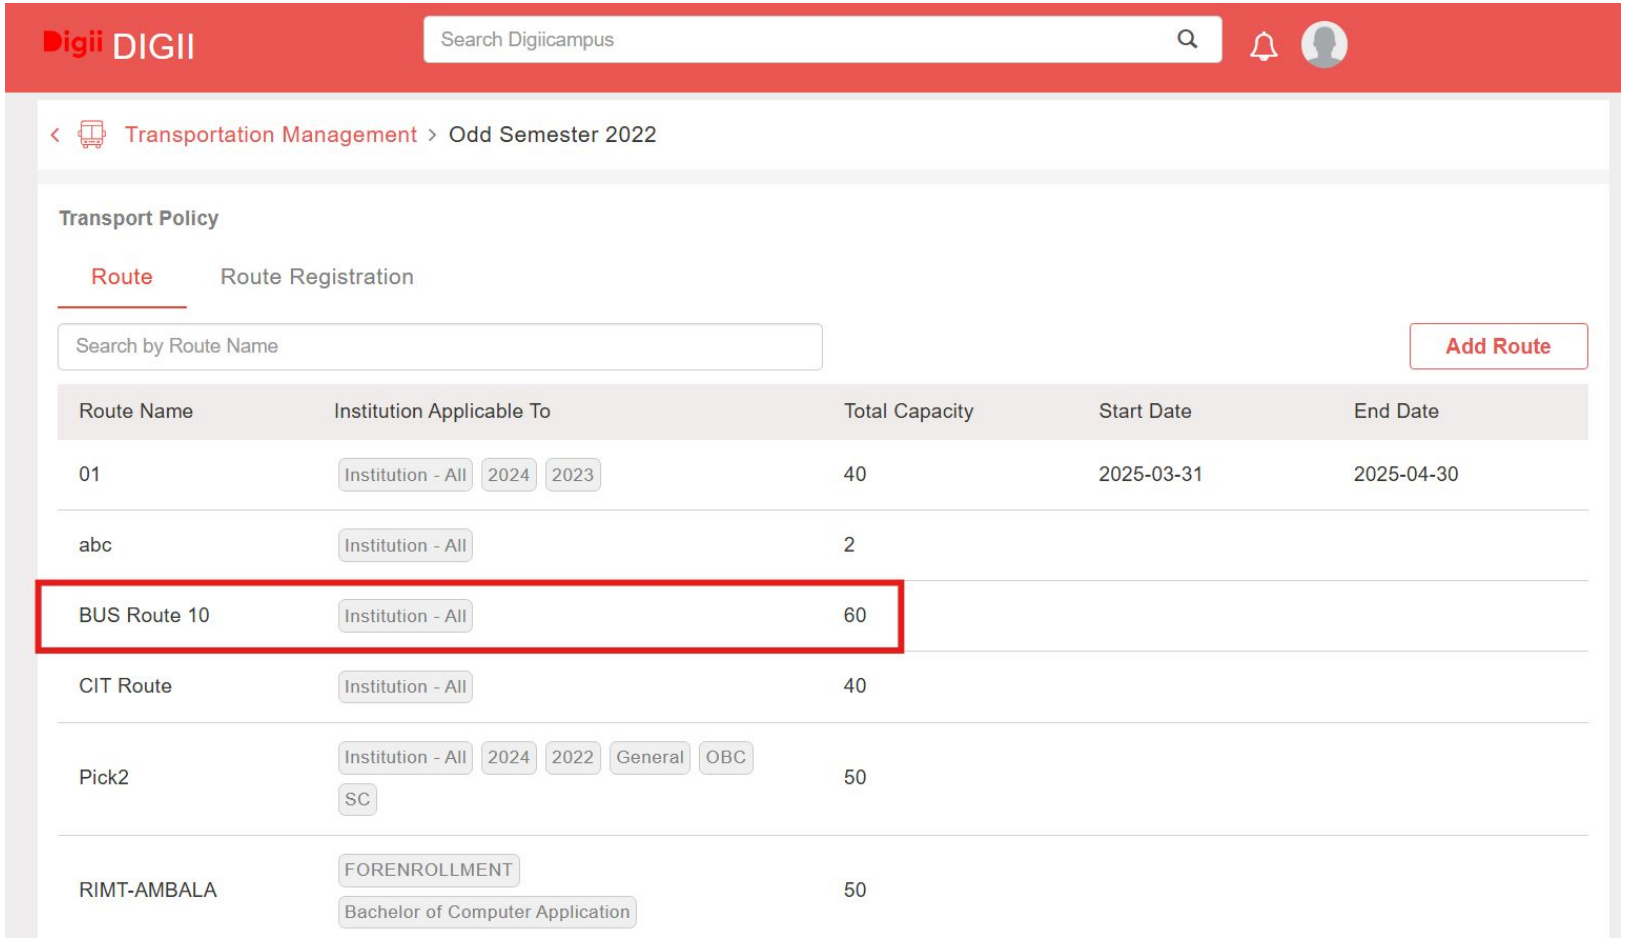

Fill in the route details as required

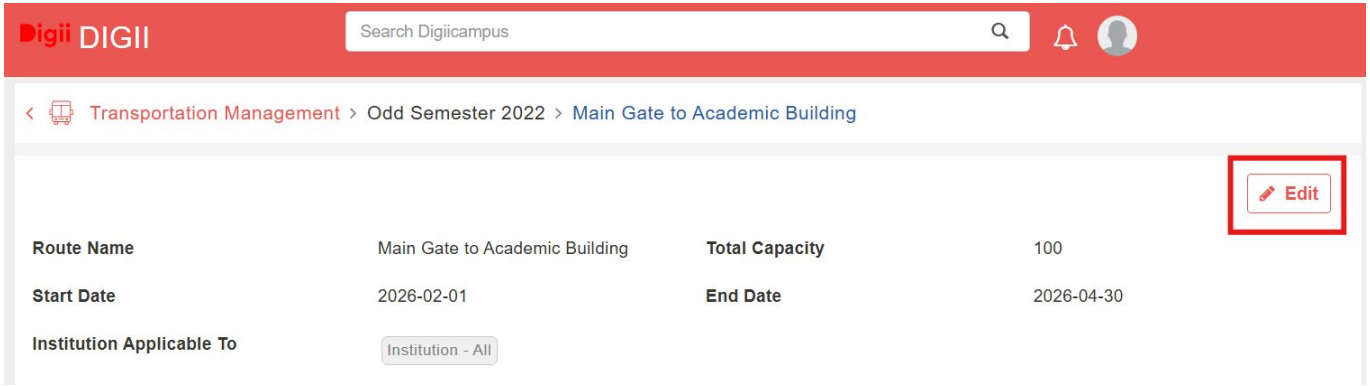

Transport Admins can define the route name, institutional eligibility, capacity and start/end dates while creating a new route.

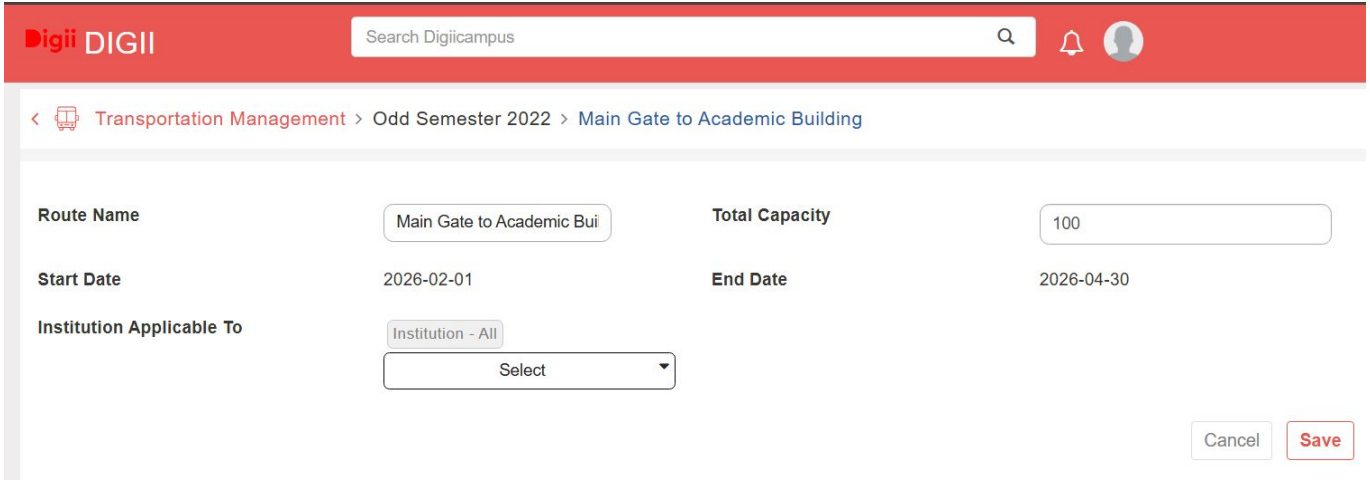

All the created routes, will be visible and can be access from the module's home page

Editing and saving route details

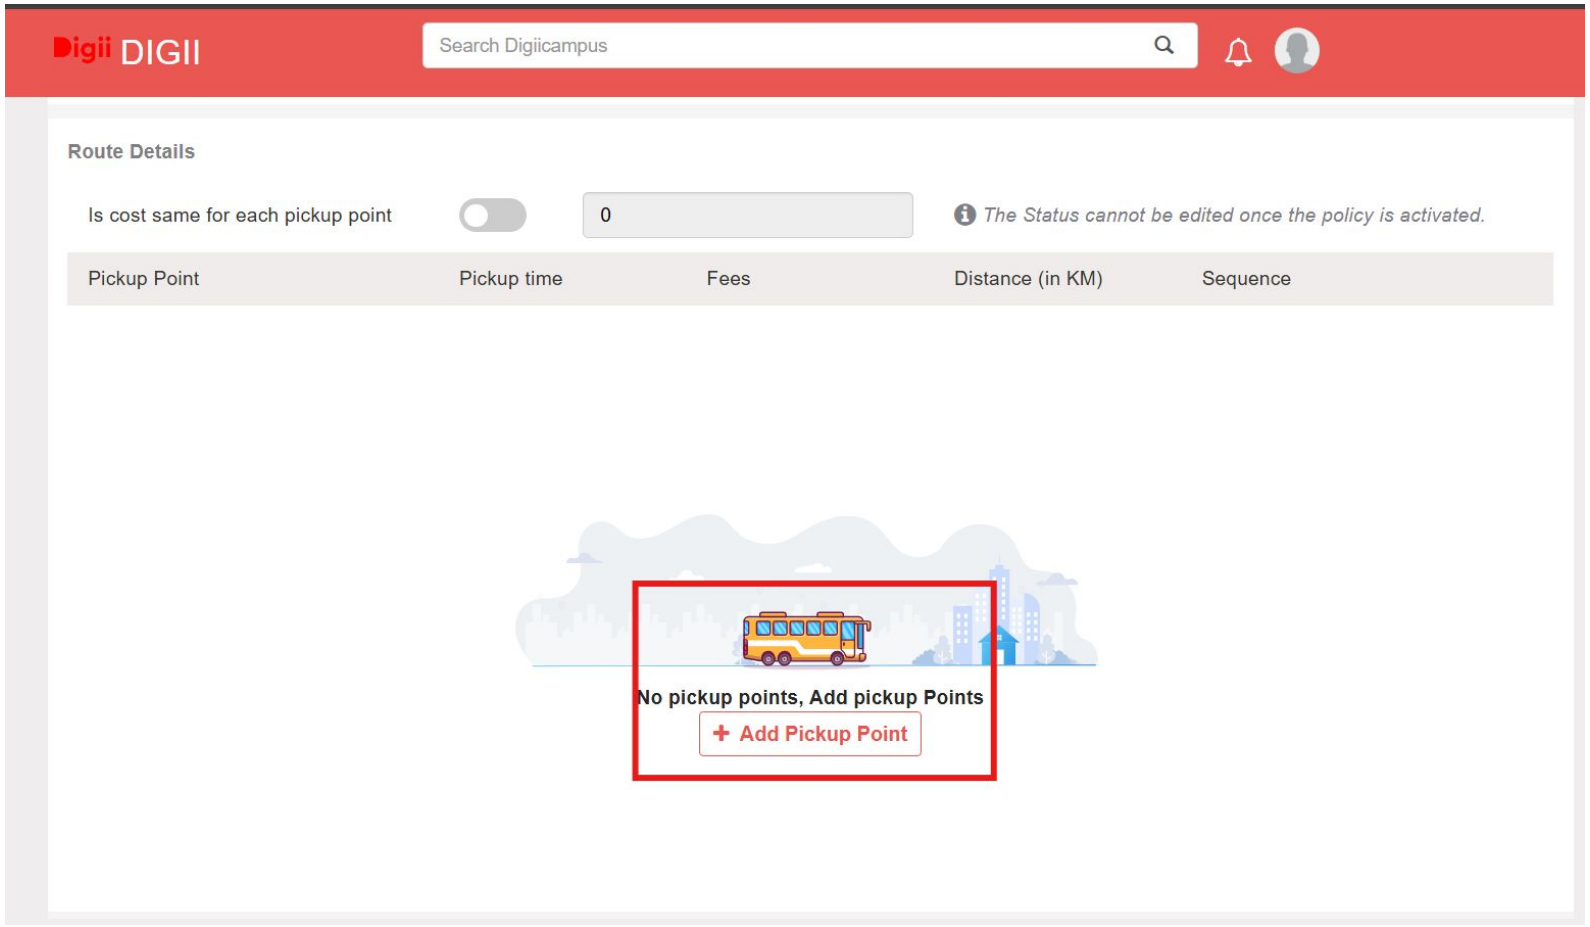

Click on “Edit” icon to make limited changes to the route details.

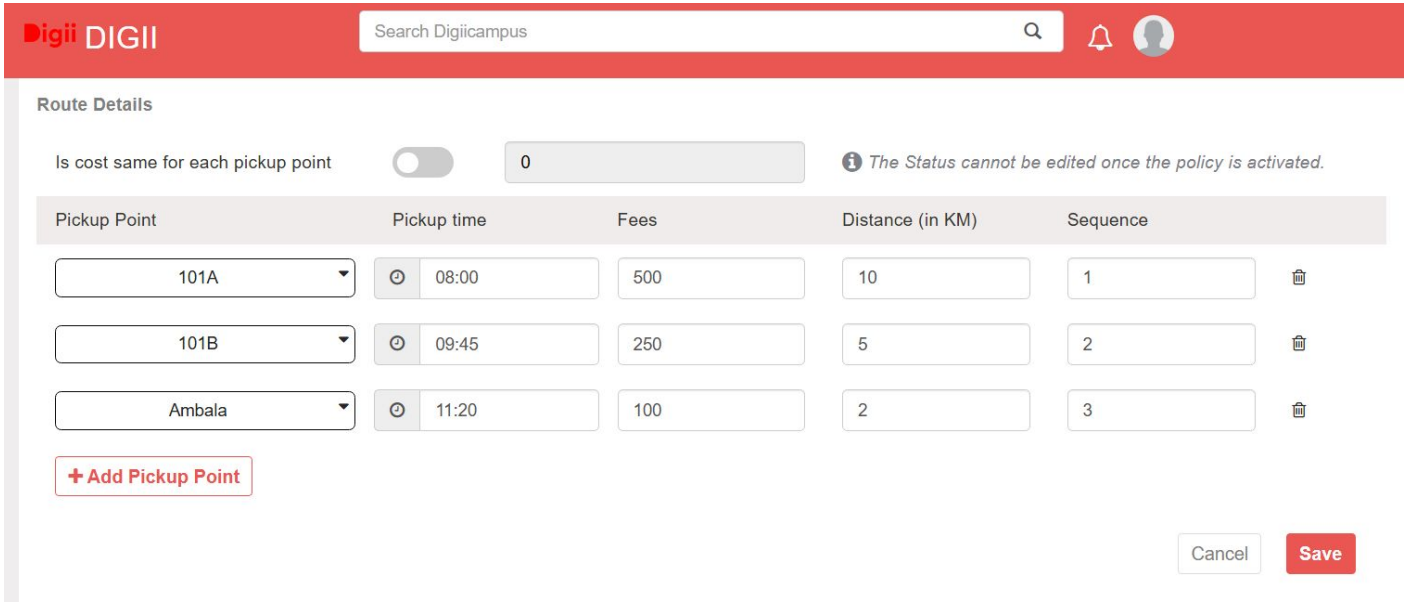

Please do note that once the policy has been activated, we can only edit the route capacity.

Click on “Add Pick Points” to define pick points for this particular route

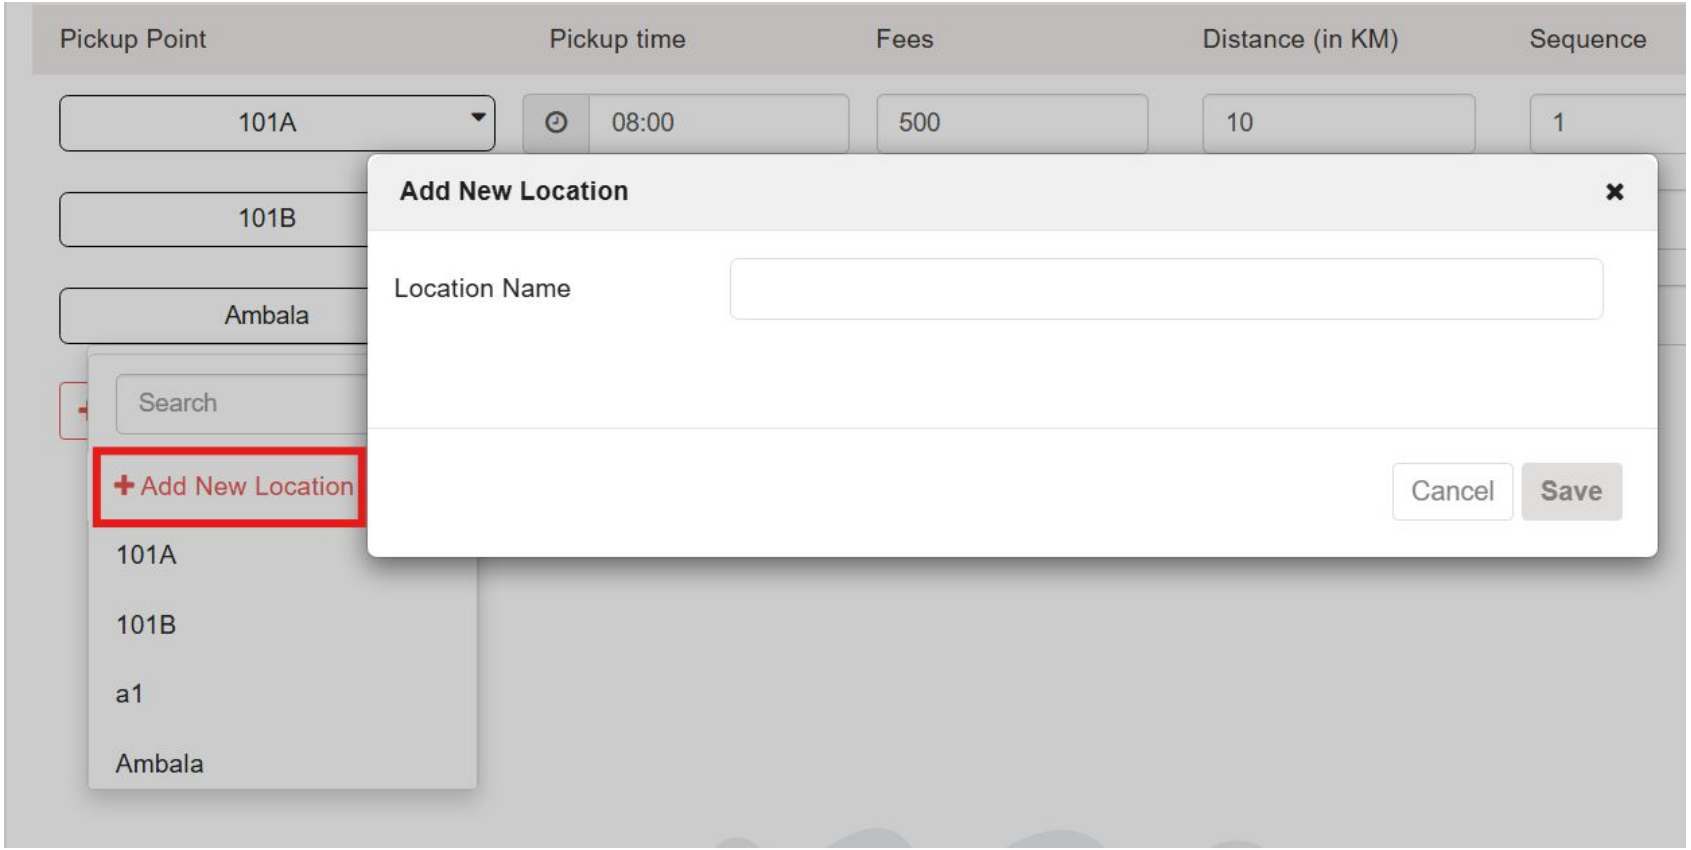

Defining fees and pick points for a particular route

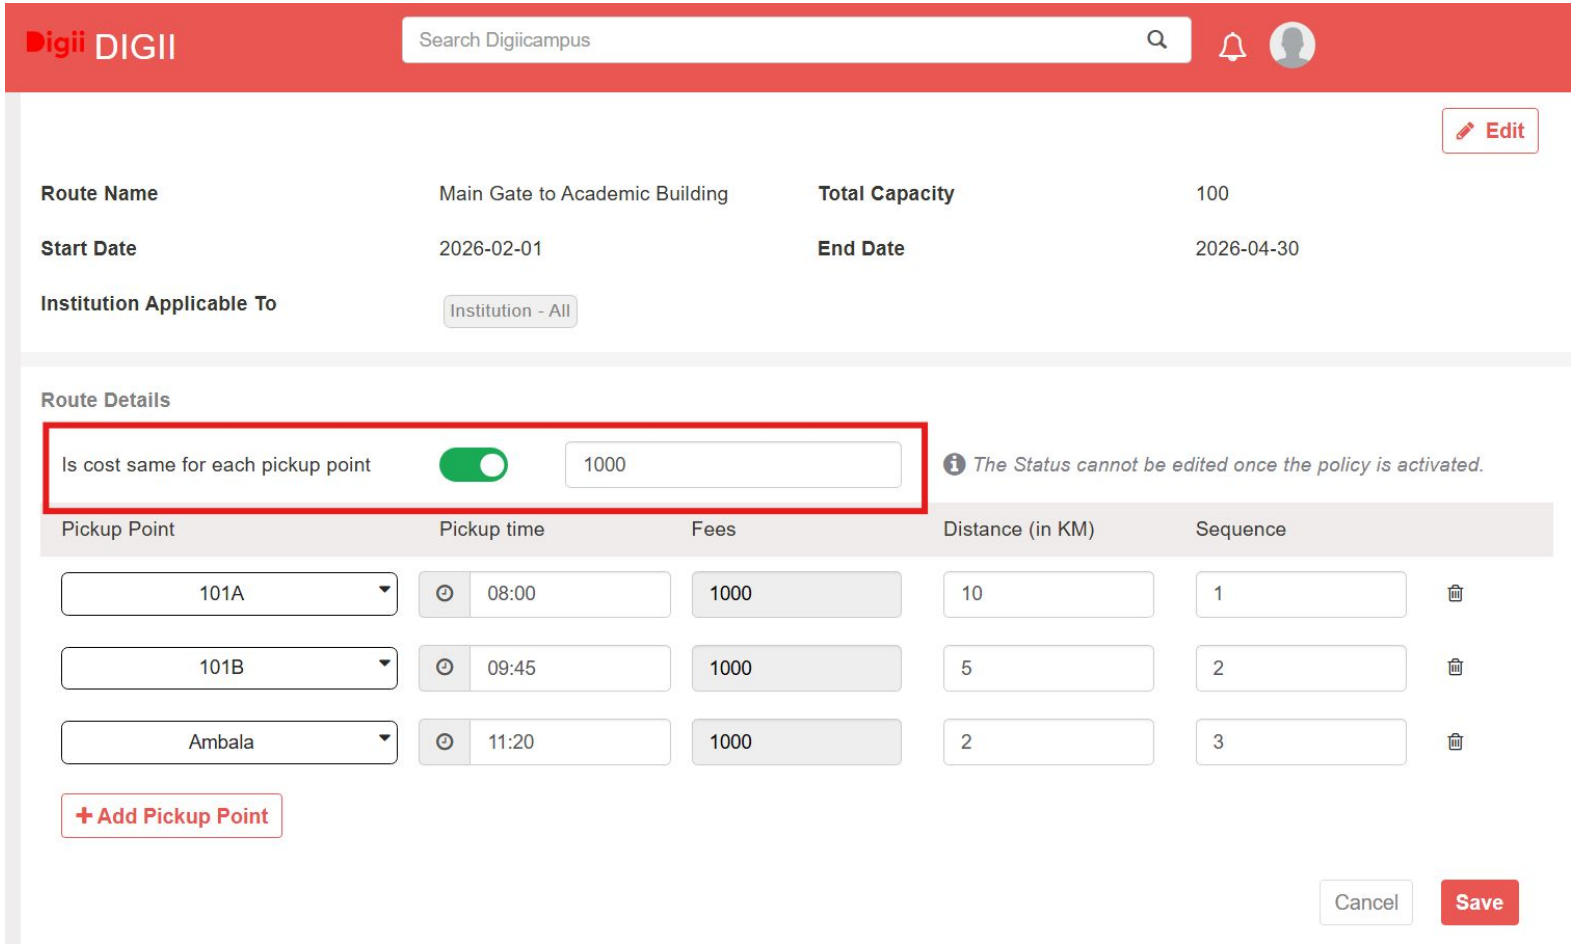

Enter the pick point location, time, fees, distance and sequence for this particular route. Click on “Save” to confirm the changes

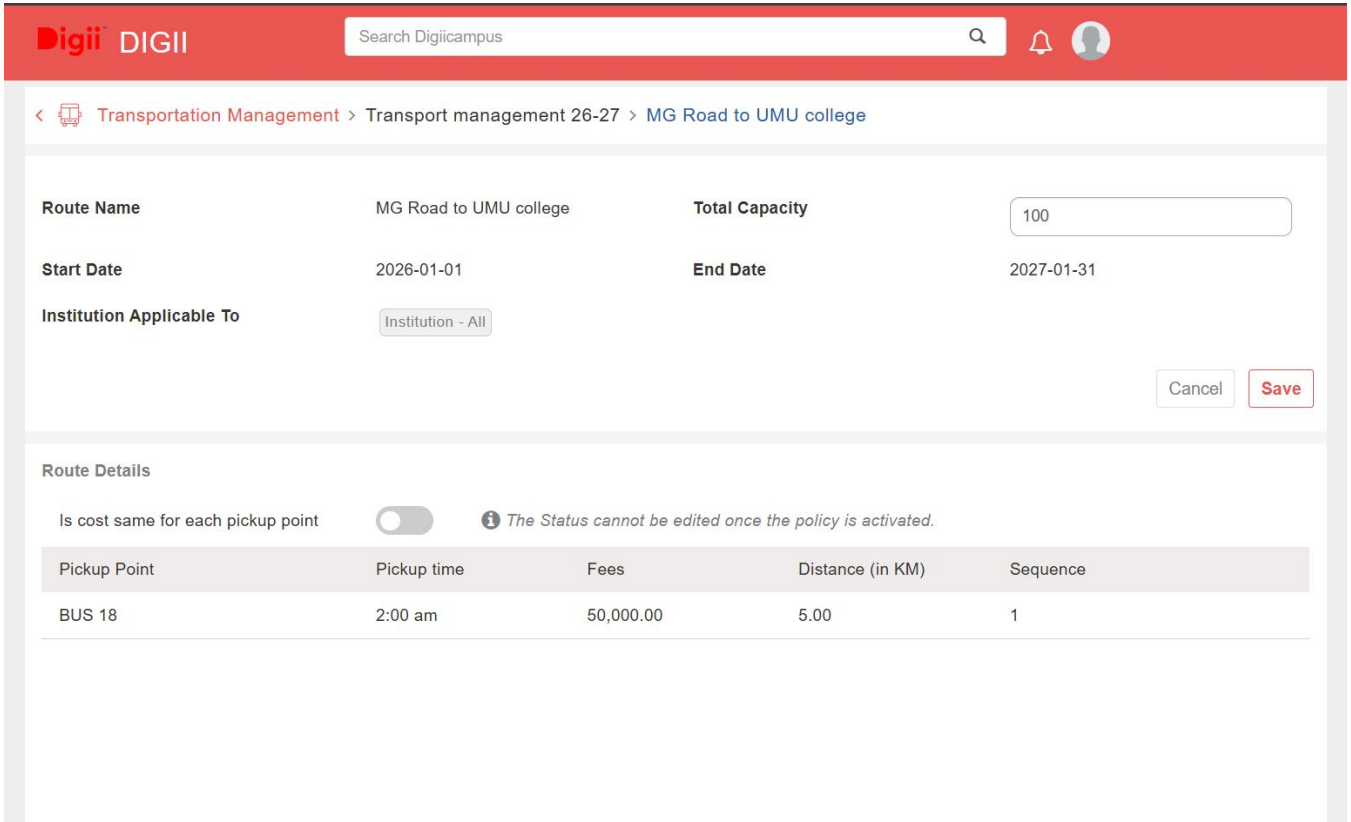

New pick point lcoations can be added by selecting the dropdown option

Admins can also define common fees for all pickup points by enabling this toggle

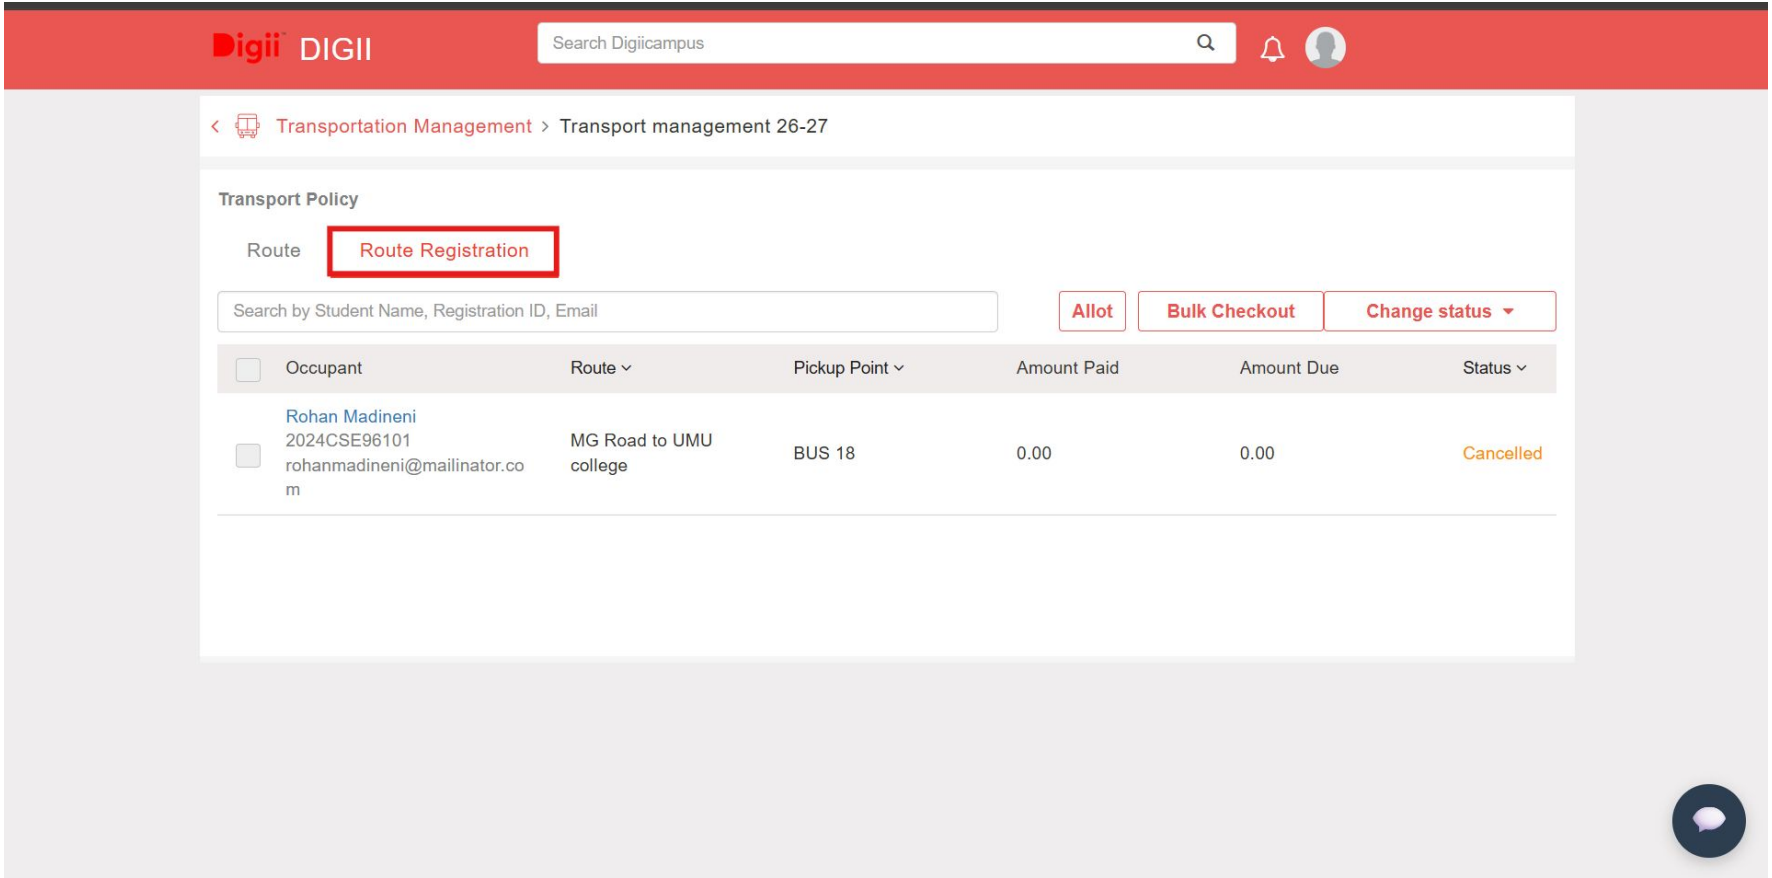

Editing and Deleting Route Details

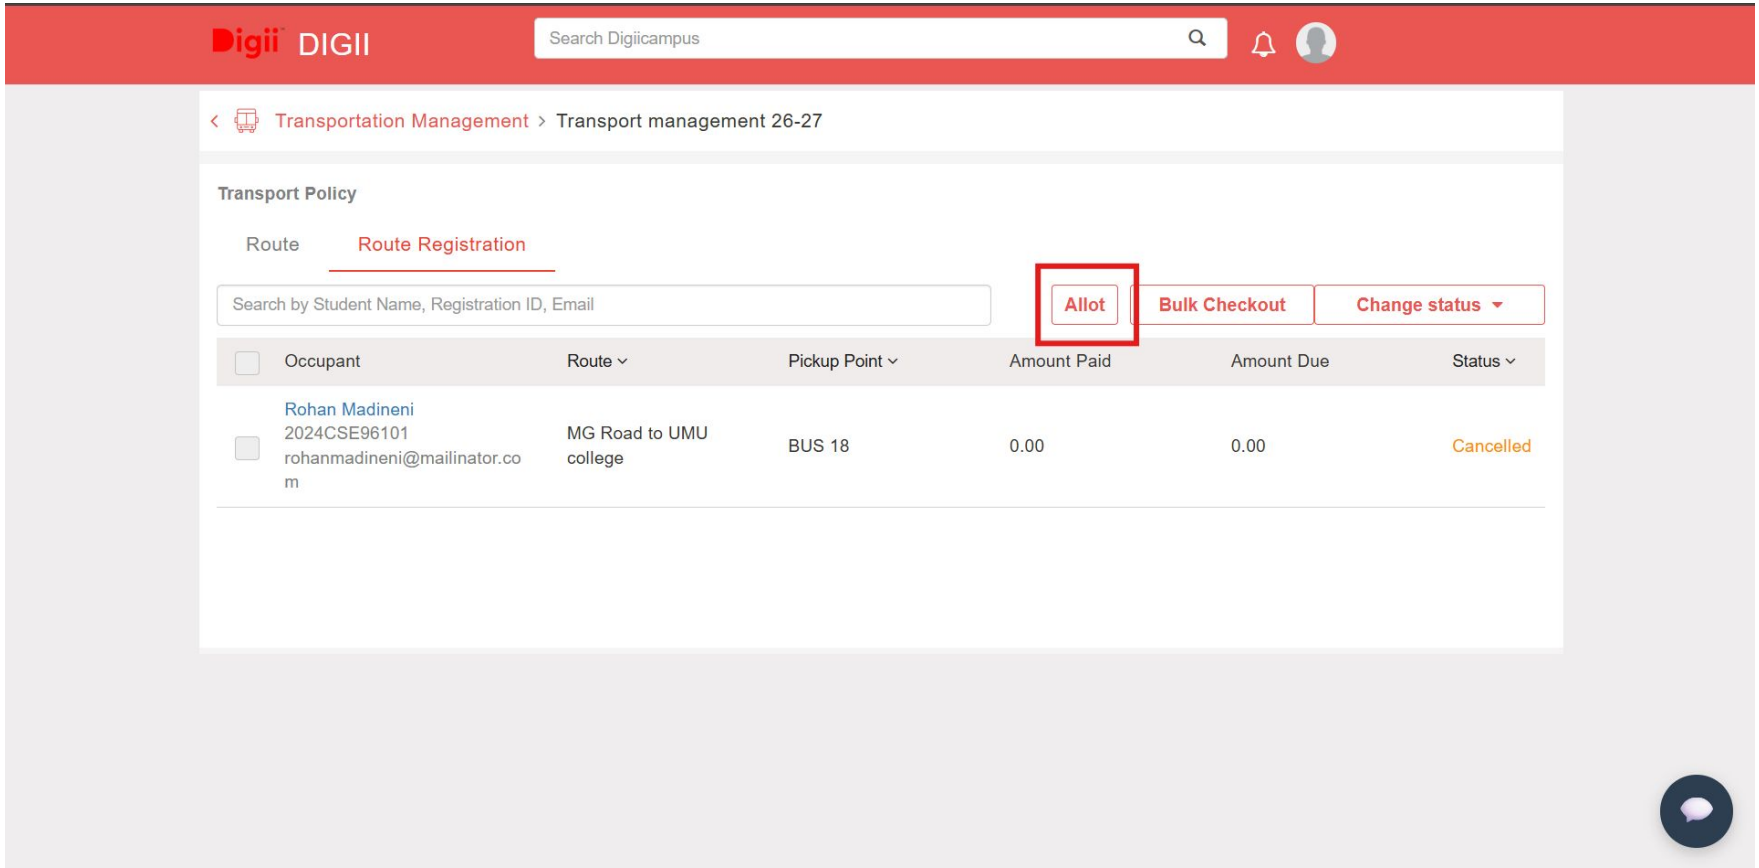

Please do note that once a transport policy has been activated, we cannot make any changes to route. Only the route capacity can be increased.

Transport routes cannot be deleted once they have been created within the module.

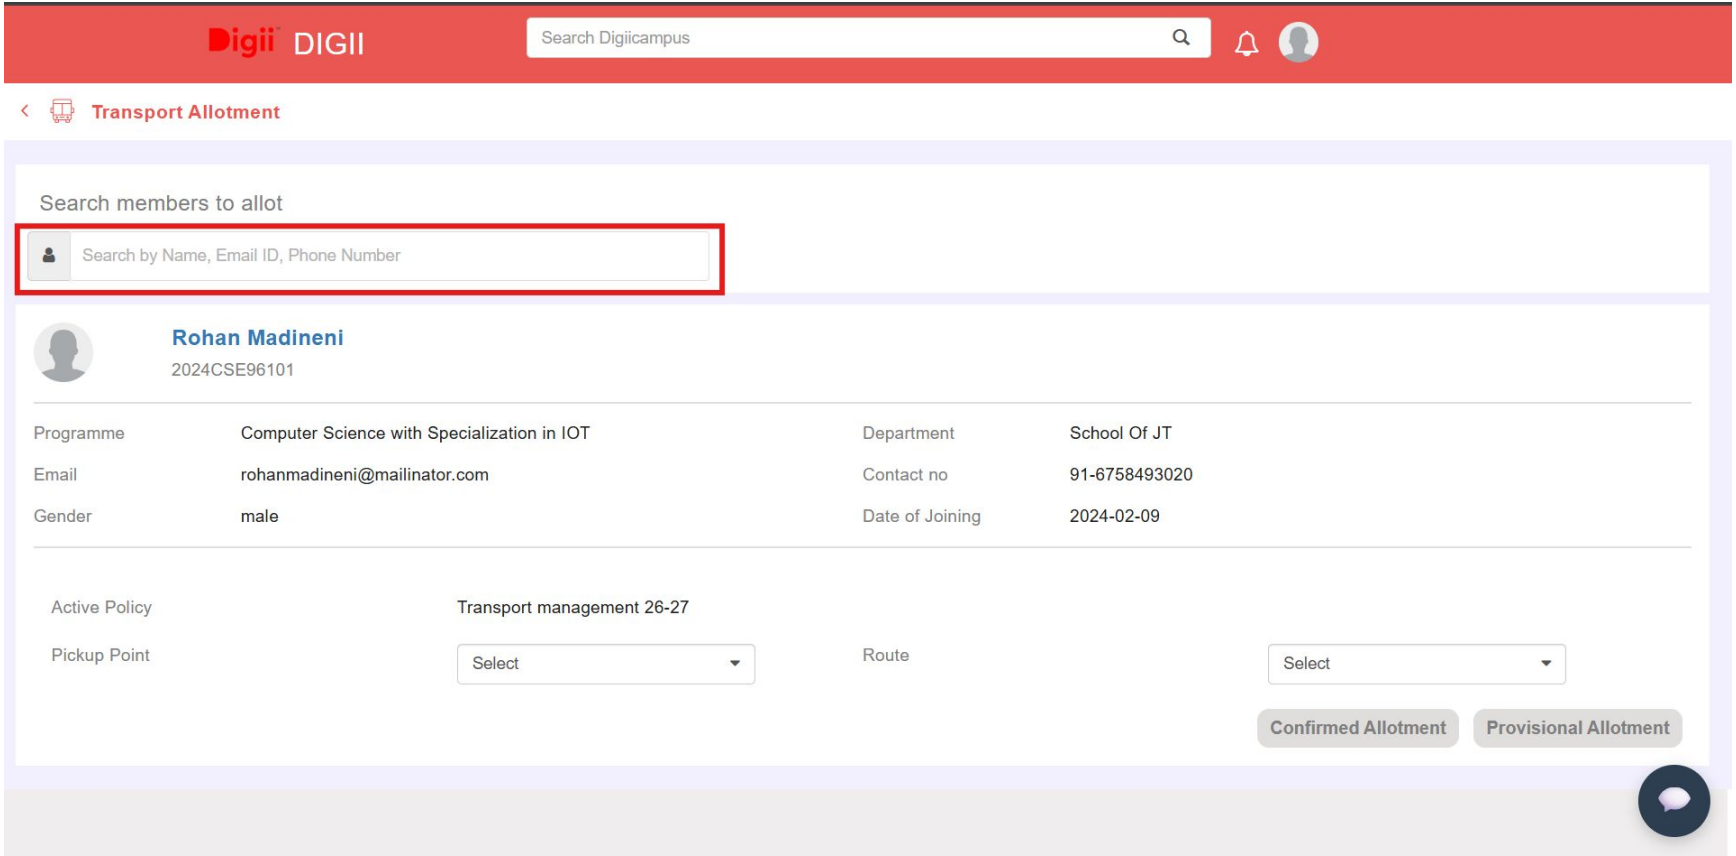

Allotments for students can be made under the “Route Registration” tab

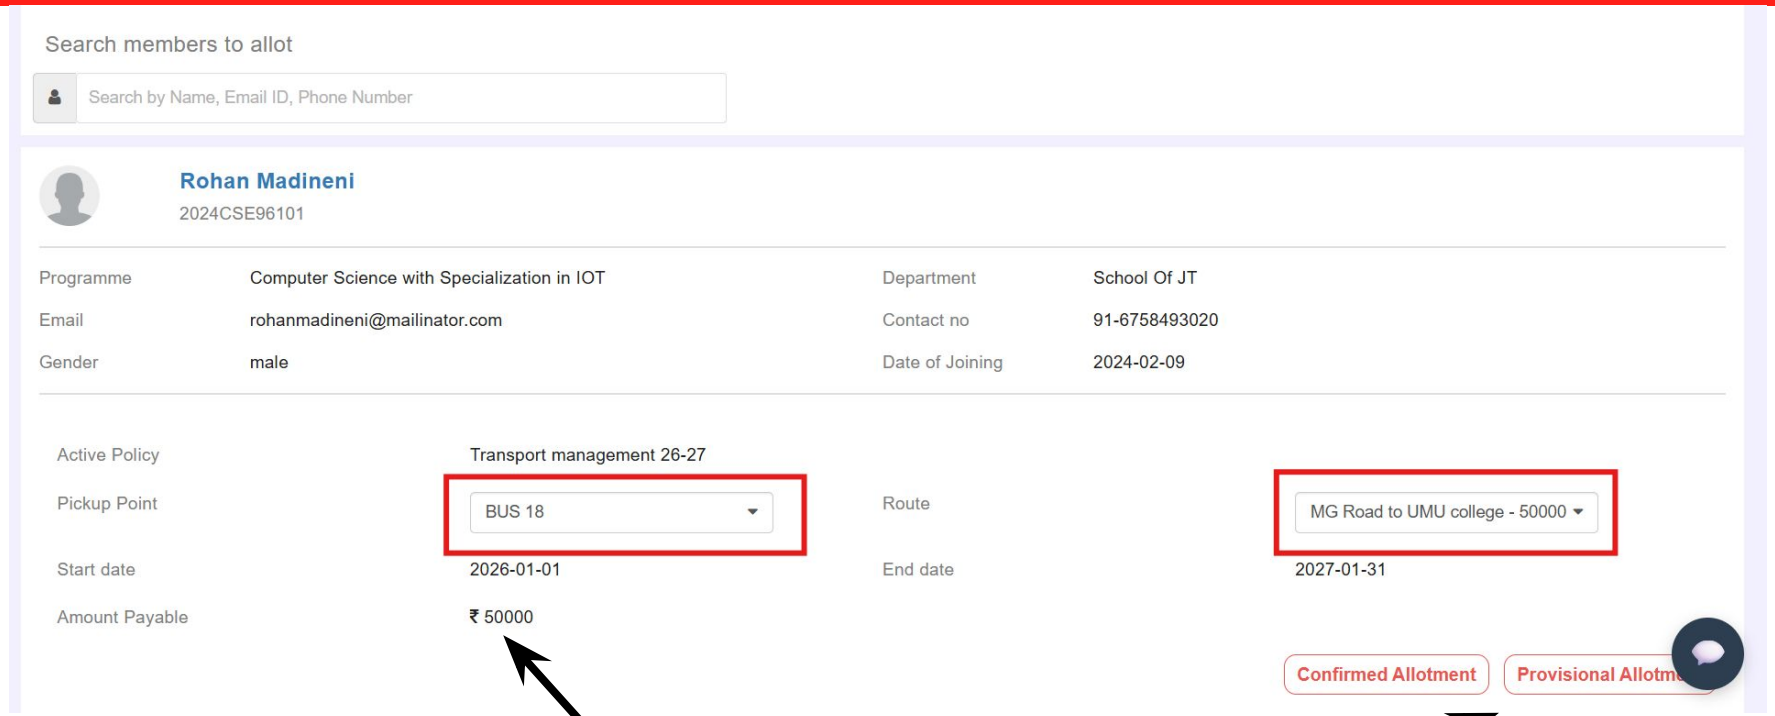

Click on “Allot” button to navigate to student allotments page

Search for the respective student using his name, email or phone number

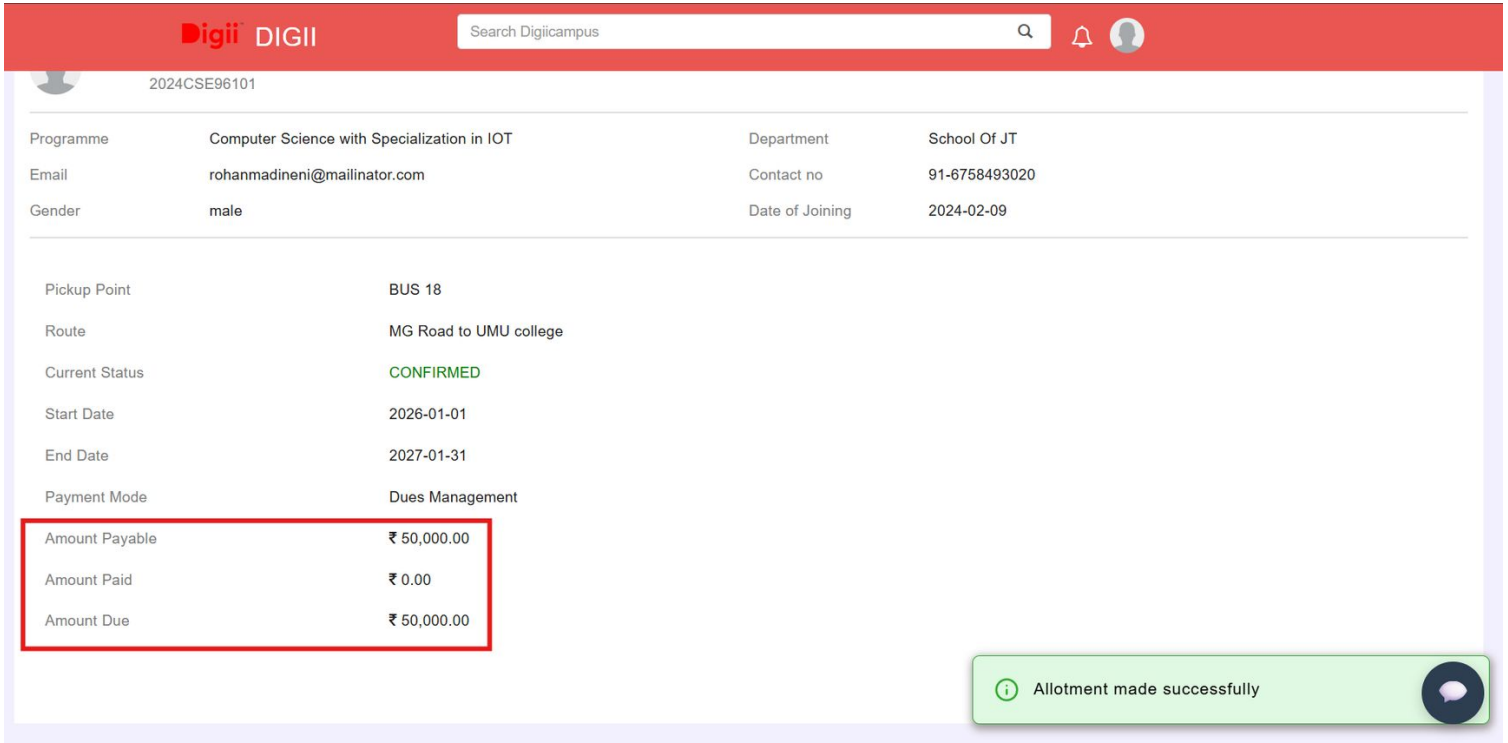

Choose the route and pickpoint for the student from the options available

Once the route and pick point has been selected, the amount payable for the student will be automatically displayed. Transport admins can then proceed with either by performing a confirmed or provisional allotment.

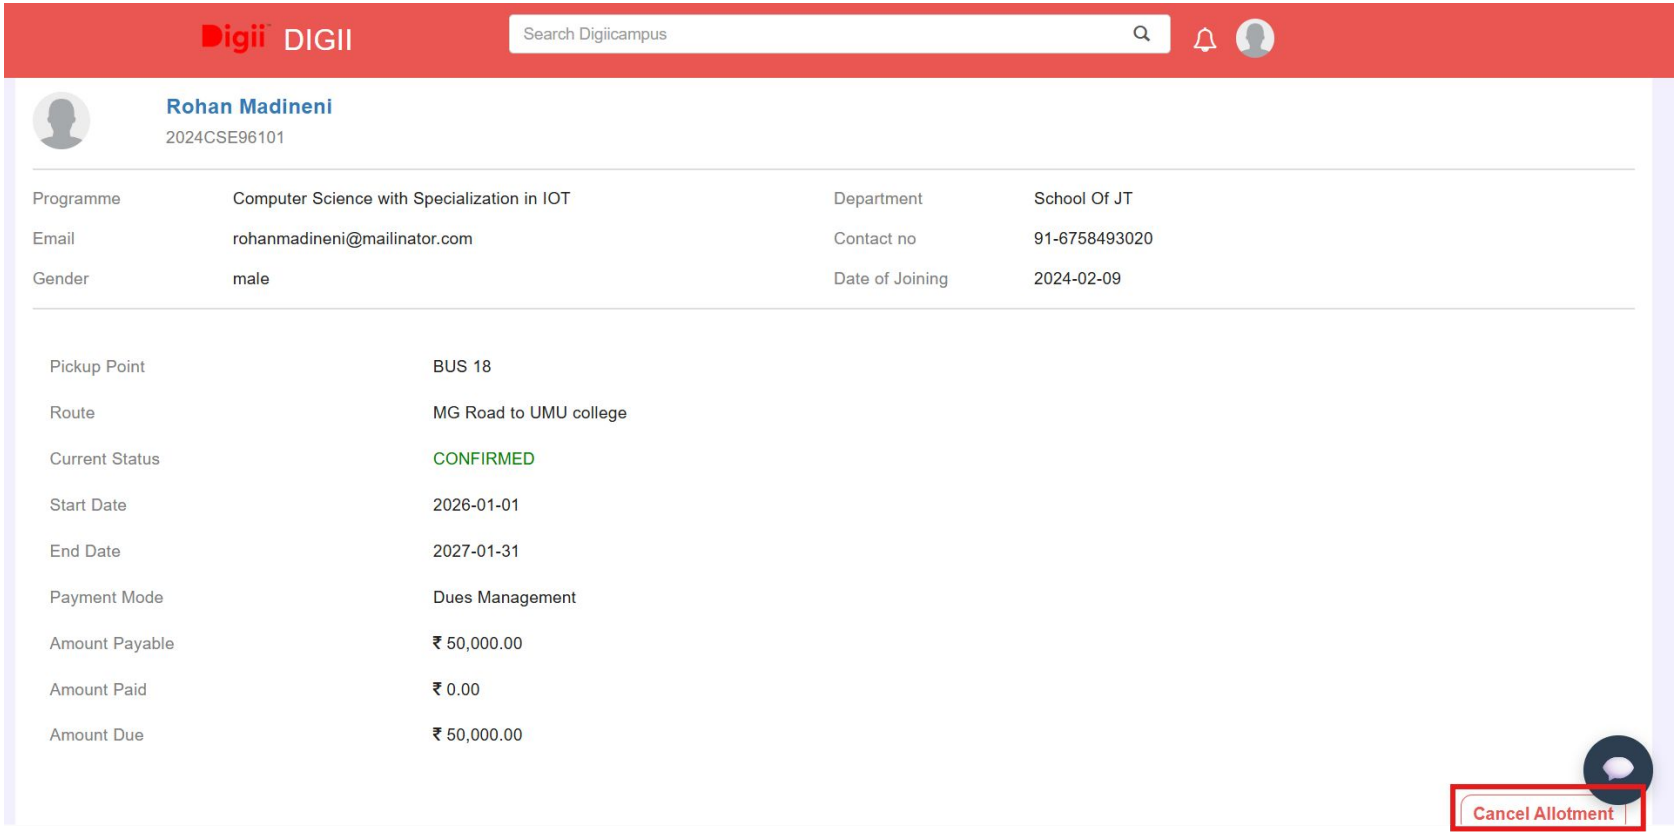

Route Allotment Confirmation

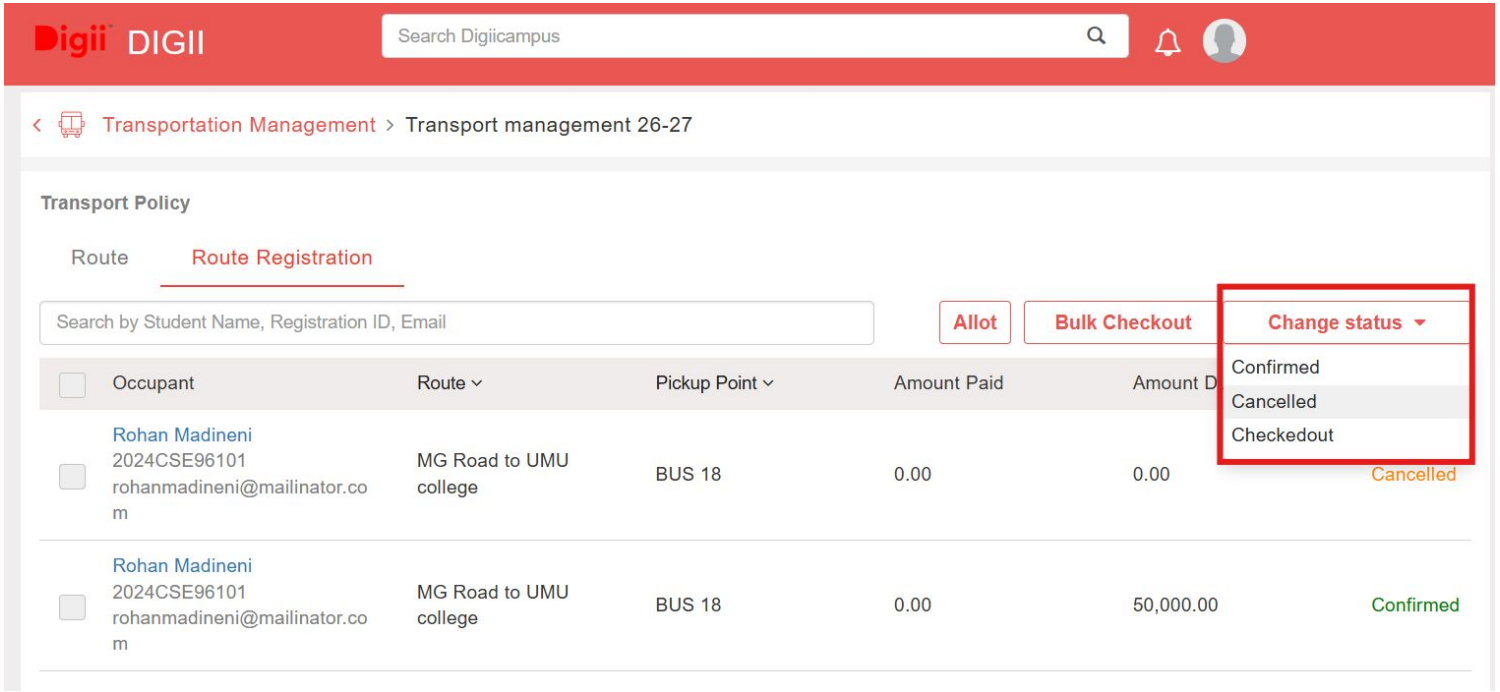

Once the allotment has been made successfully for a student, the fees will be automatically generated in the dues management module.

Transport admins can also check the “Amound Payable”, “Amount Paid” and “Amount Due” with respect to the student.

Transport Admins can also cancel a students current route allotment

Transport Admins can change a student's allotment status by clicking on dropdown

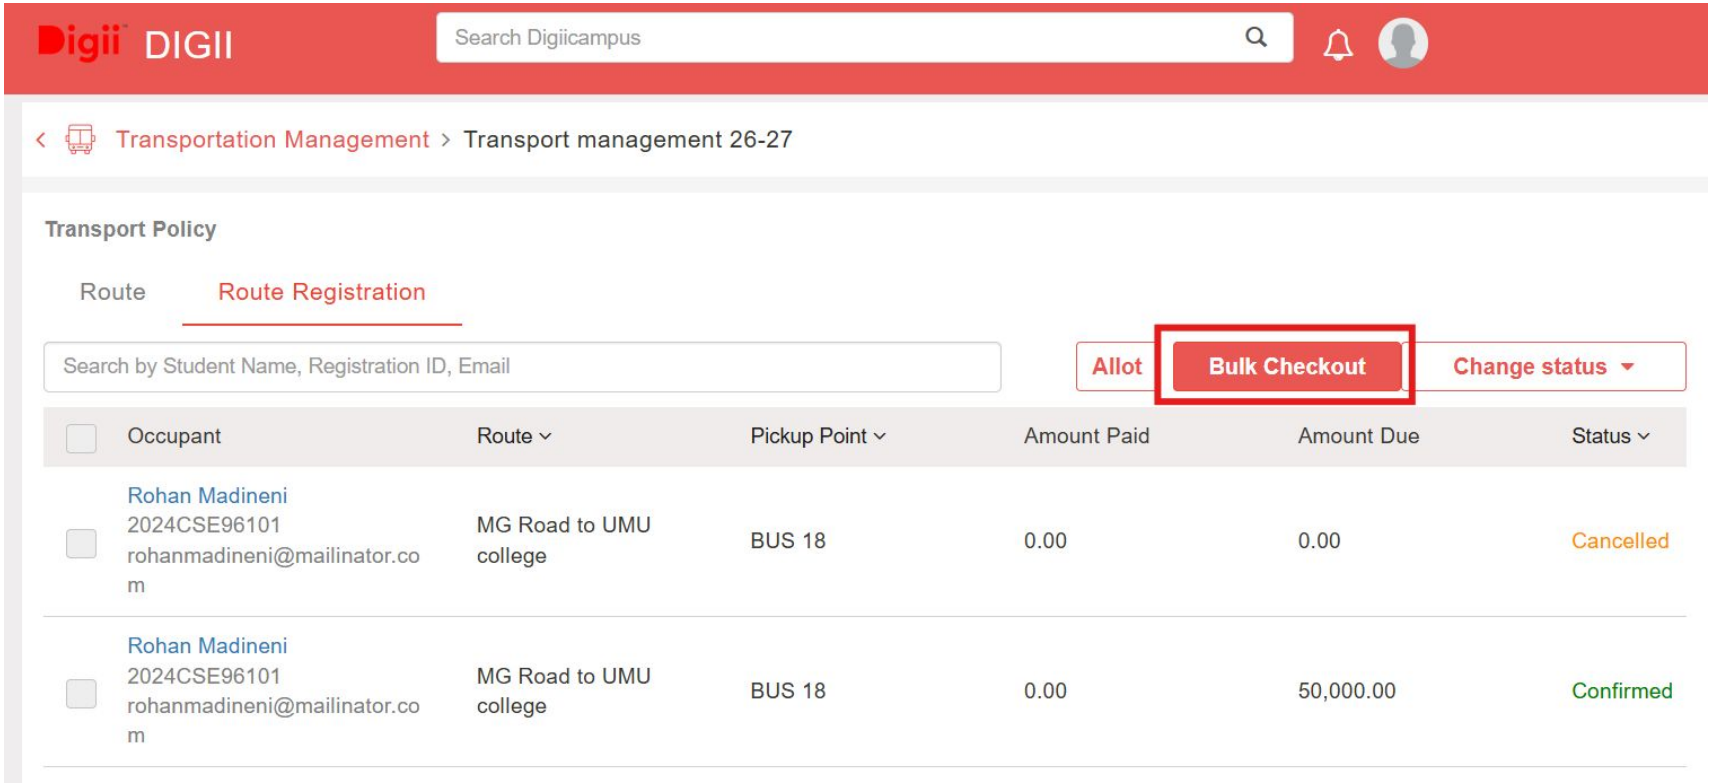

Admins can cancel a students current allotment status and allot new routes and pick up points to him

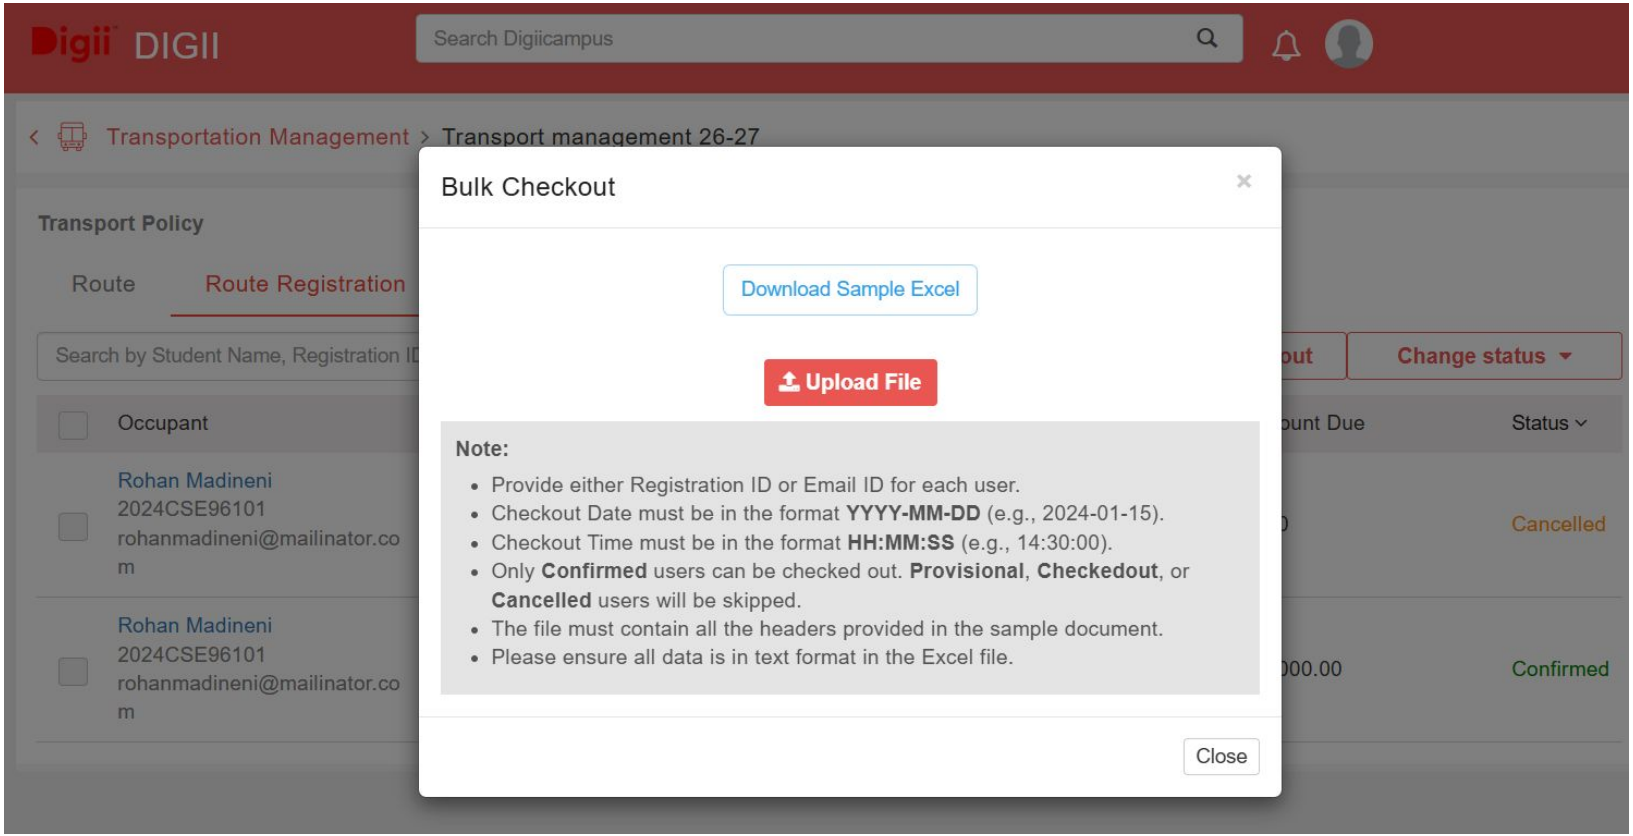

Admins can also checkout students from the current policy and again re-allot them in a new policy

Note :- Admins can also convert student's provisional allotment status to confirmed but the reverse cannot be done.

Students can also be checked out in bulk by choosing the “Bulk Checkout” option

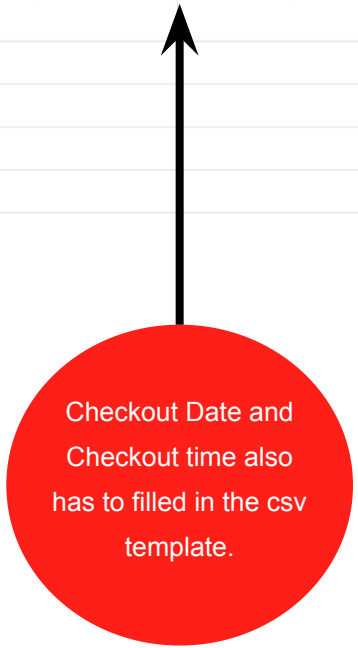

Bulk Check Out Process - Download the template and upload it after filling the details

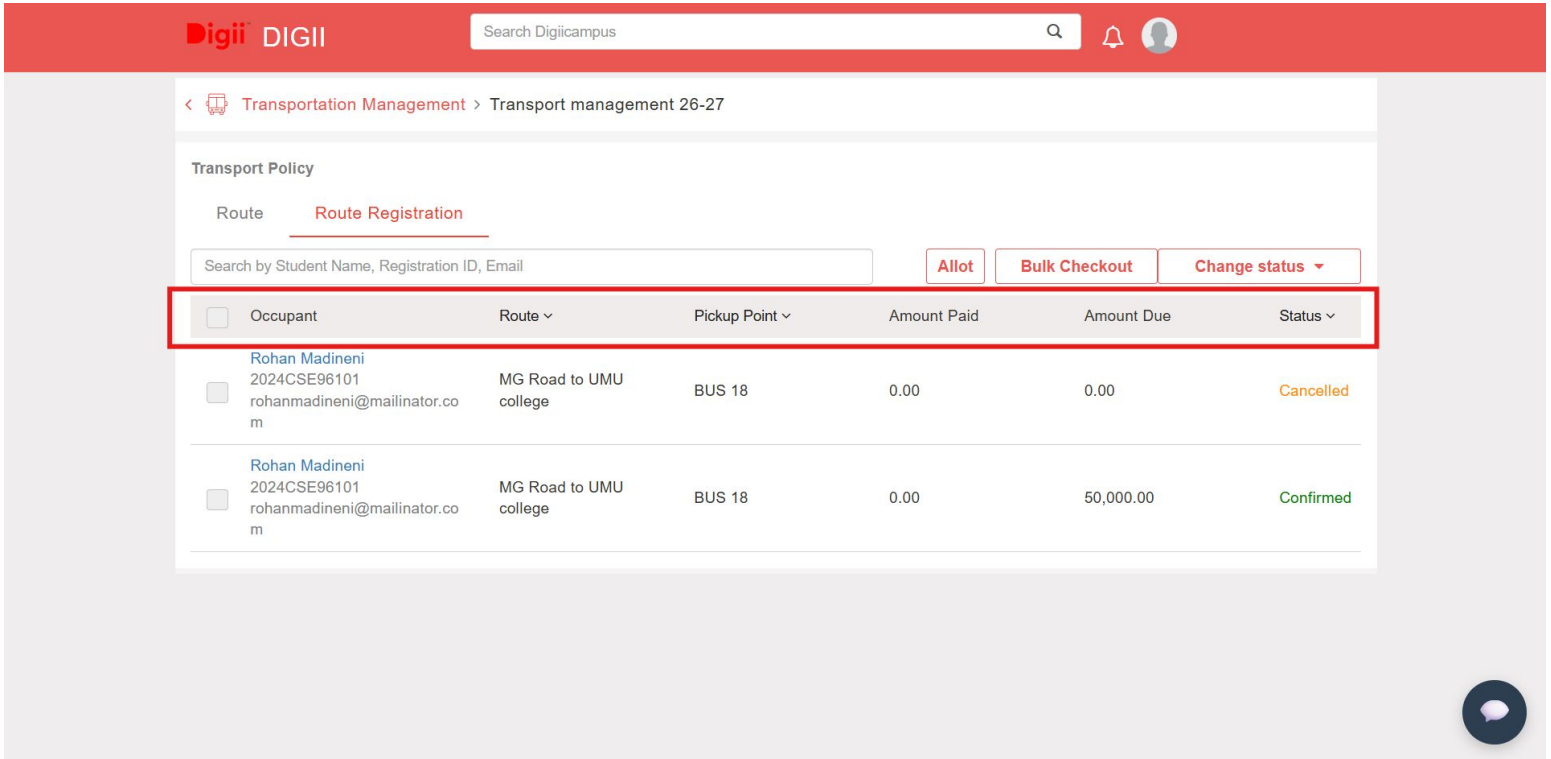

Sample Bulk Checkout Template - Preview

Admins can filter the allotment logs based on routes, pickup points and status

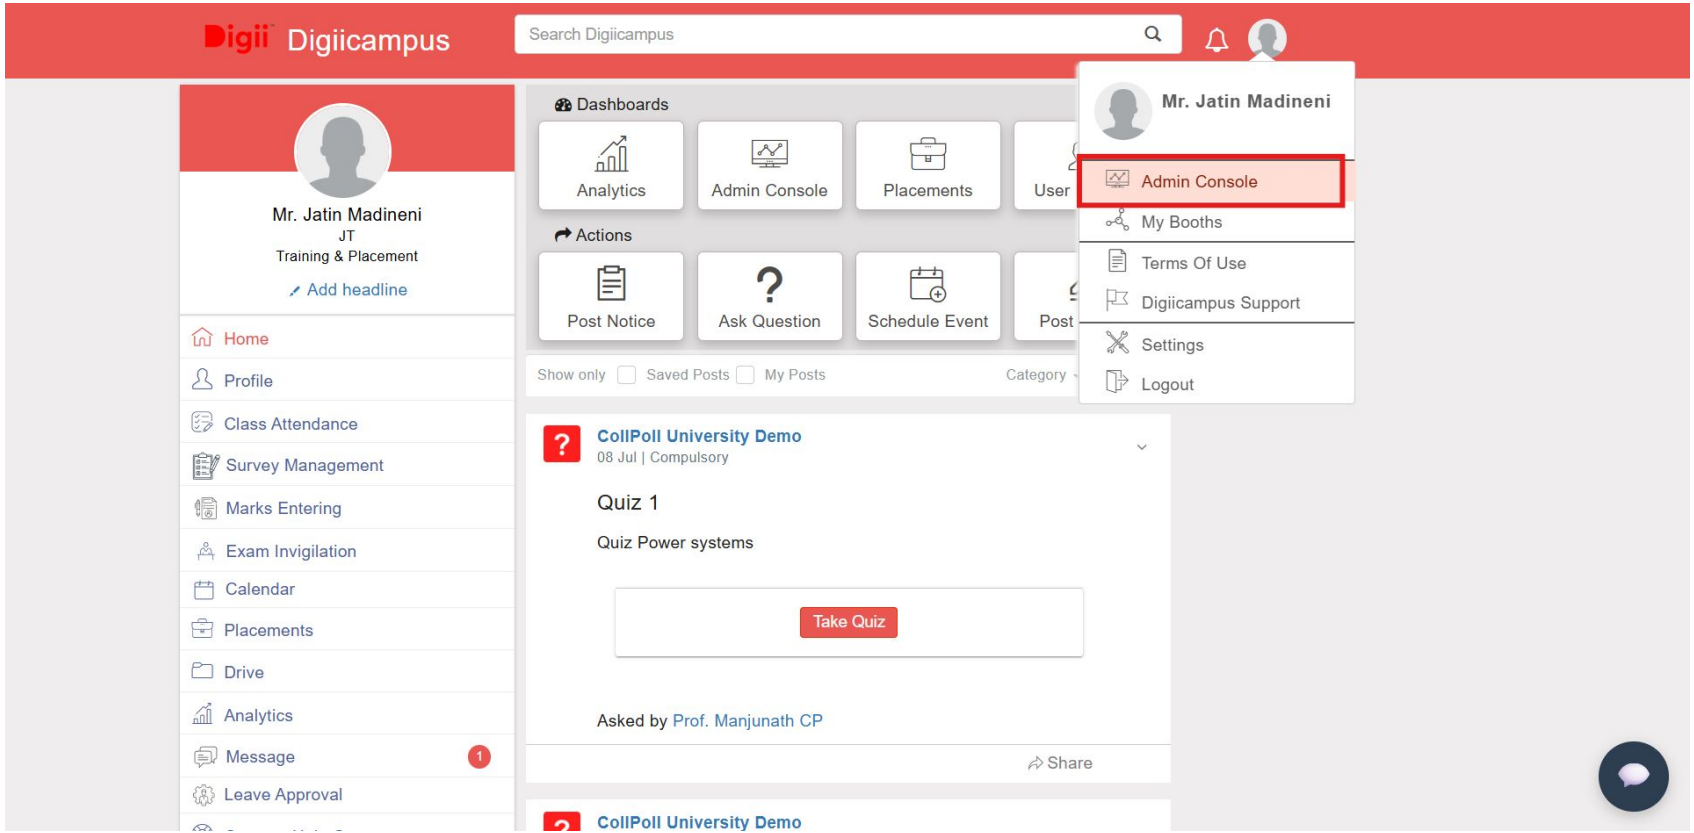

Admins can view all the allotments logs on the home page of the “Route Registration” tab.

Admins can also search for a student's allotment logs using the search bar provided

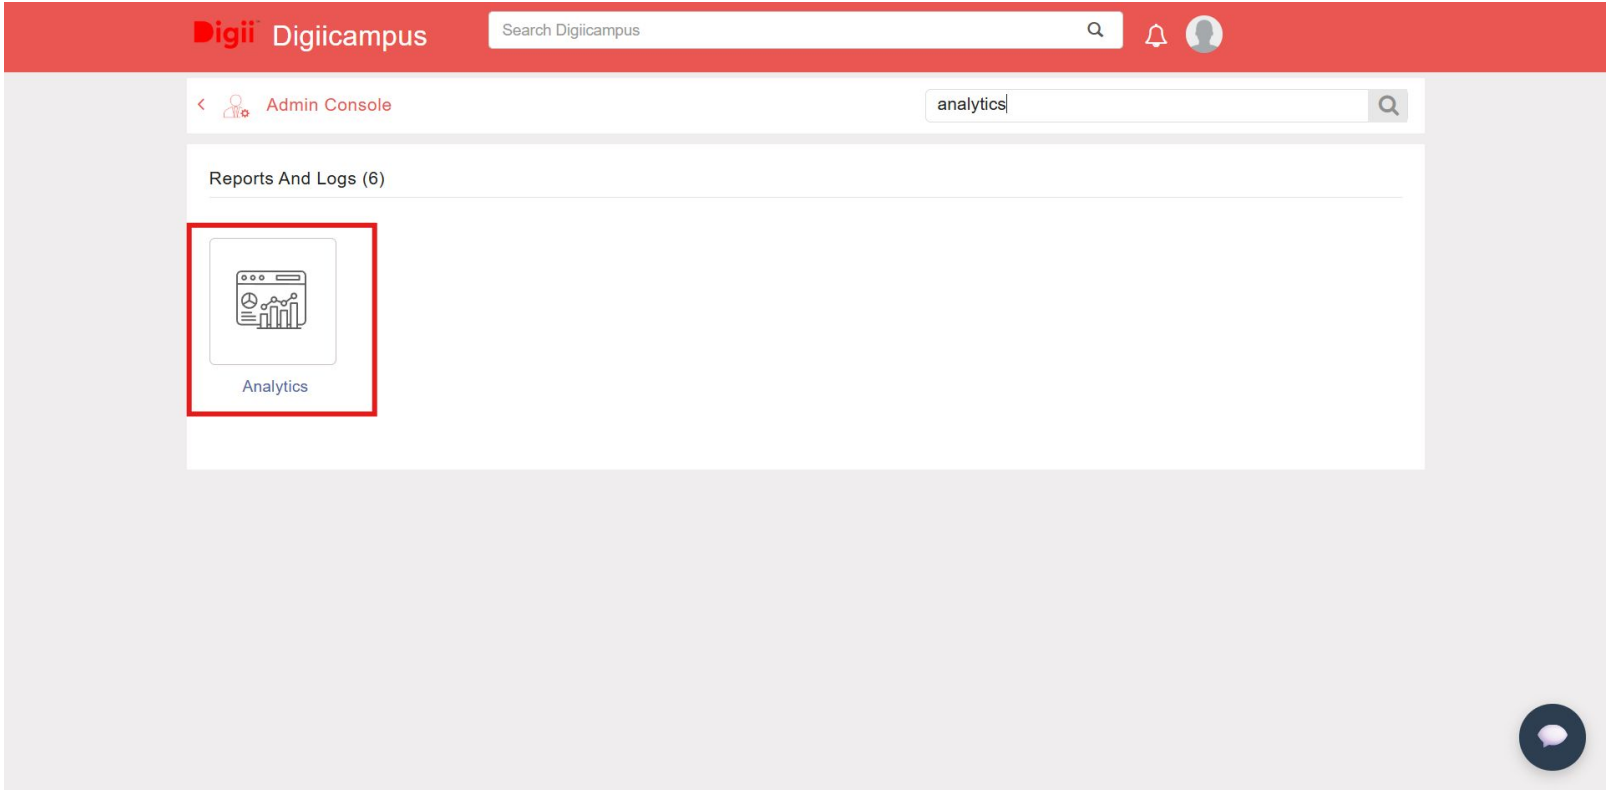

For an in-depth analysis of the module, admins can navigate to “Analytics” dashboard

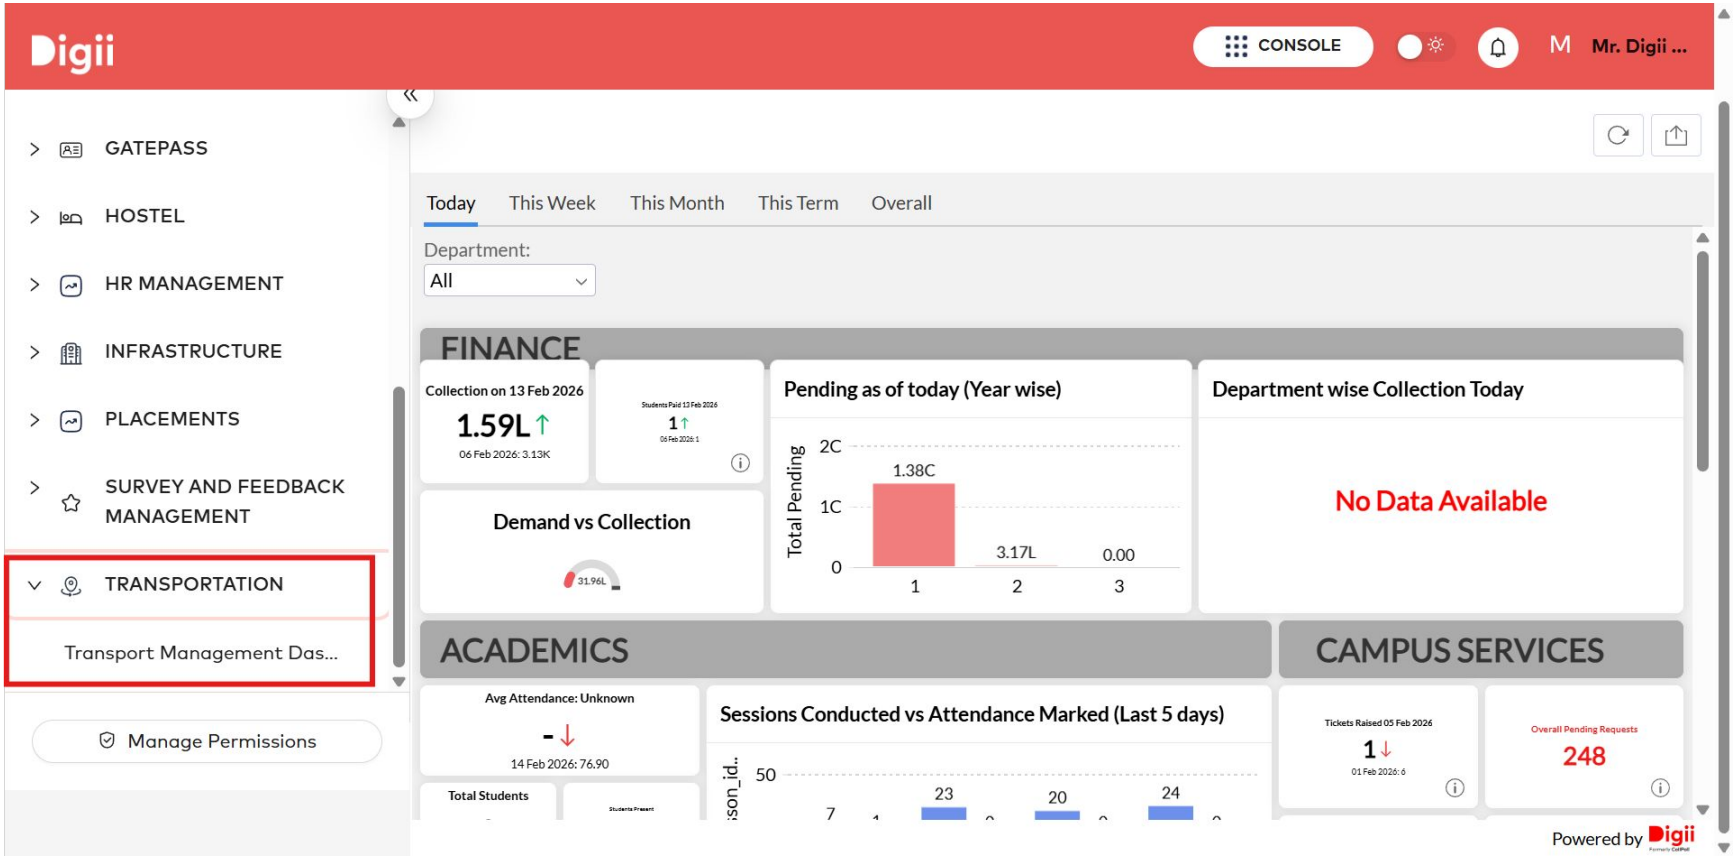

Navigate to “Admin Console” to access the analytics dashboard

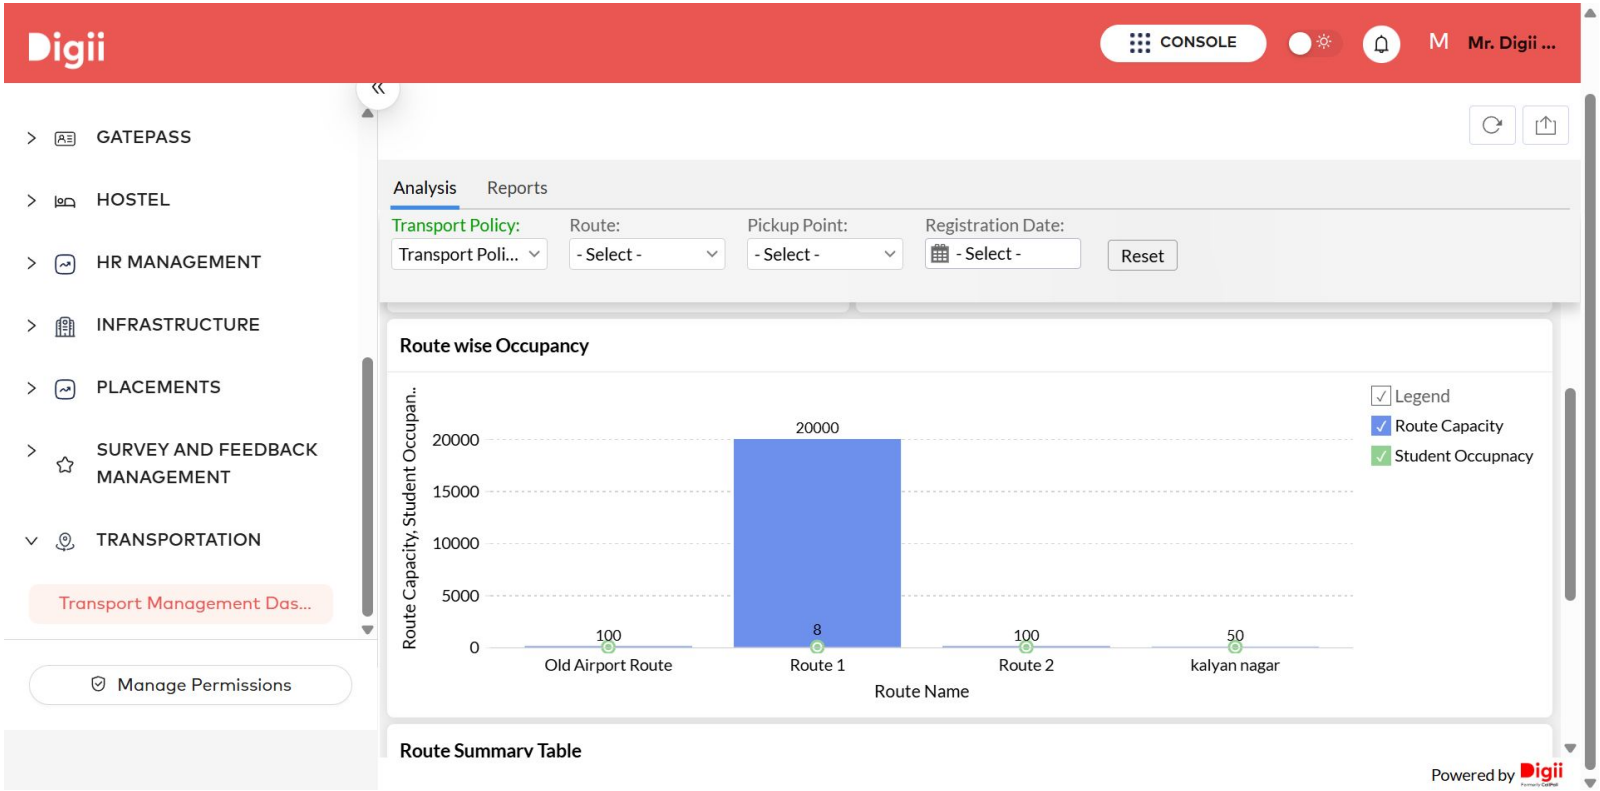

Search for the “Analytics” dashboard under admin console

Click on the “Transportation” tab available on the left hand side panel

Transport Management Dashboard

The “Transport Management Dashboard” focuses on providing route wise occupancy details along with the dues amount generated for the students followed by their registrations count.
